Students wishing a minor in Classics must choose a program with an emphasis in either Greek or Latin.

CLASSICS MINOR PREREQUISITES *

Course	Title
GRE 14201	Elementary Classical Greek I
14202	Elementary Classical Greek II
or	
LAT 16201	Elementary Latin I
16202	Elementary Latin II

CLASSICS MINOR REQUIREMENTS (18 credits)

Course	Title	Credits
Classical Language and Literature Courses: choose from the following series		6
GRE 24201	Intermediate Classical Greek I (3)	
24202	Intermediate Classical Greek II (3)	
or		
LAT 26201	Intermediate Latin I (3)	
26202	Intermediate Latin II (3)	
Classical Culture Courses: choose from the following		12
CLAS 21404	The Greek Achievement (3)	
21405	The Roman Achievement (3)	
41097	Colloquium in Classics (3)	
41301	Classical Mythology (3)	
41401	Greek Archaeology and Art (3)	
41402	Roman Archaeology and Art (3)	
41503	Greek Literature in Translation (3)	
41006	Roman History (or HIST 41006) (3)	
HIST 41003	History of Ancient Greece (3)	
41006	Roman History (or CLAS 41006) (3)	
PHIL 31001	Classical Greek Philosophy (3)	
Greek course at the 30000-40000 level (3)		
Latin course at the 30000-40000 level (3)		
TOTAL		18

*Prerequisites can be waived by demonstrated proficiency.

Minimum cumulative 2.00 GPA required for graduation.

Scott Sheridan, Coordinator, 410 McGilvrey Hall

The climatology program aims to provide an overview of the atmospheric sciences and how the climate system works. It also focuses on understanding the role of climate in an increasingly diverse world. Students learn about potential climate change and how to understand and forecast its potential impacts. Students also learn how to apply their knowledge of climate and weather to a variety of interdisciplinary fields, including agriculture, conservation, health, forestry and environmental planning.

CLIMATOLOGY MINOR REQUIREMENTS (25 credits)

Course	Title	Credits
GEOG 21062	Physical Geography	3
	31062 Fundamentals of Meteorology	3
	31064 Principles of Climatology	3
MATH 12002	Analytic Geometry and Calculus I	5
PHY 13001	General College physics I	4
	13021 General College Physics Laboratory I	1
Choose from the following:		6
GEOG 41062	Advanced Physical Geography (3)	
	41050 Polar and Alpine Environments (3)	
	41066 Climate Change and Its Impact (3)	
or any other GEOG 40000-level courses, as approved by the coordinator.		
TOTAL		25

 Web: <http://business.kent.edu/academic/econ/default.asp>

The minor in economics provides a basis for the application of economic analysis, which is the foundation for most business decisions. The minor allows the choice among a wide range of electives and therefore provides a well-rounded preparation for careers in business and public service. The emphasis on critical thinking in the economics minor is also excellent preparation for law and other graduate study.

ECONOMICS MINOR REQUIREMENTS (18 credits)		
Course	Title	Credits
ECON 22060	Principles of Microeconomics	3
22061	Principles of Macroeconomics	3
	Economics upper-division electives*	9
	Choose from the following:	3
ECON 32040	Intermediate Microeconomic Theory and Applications (3)	
32041	Intermediate Macroeconomic Theory and Policy (3)	
TOTAL		18

*Economics upper-division electives (9) may include ECON 32040 or 32041 if not selected above, chosen with advisor approval

Requirements to declare the economics minor:

- Officially declared major (not pre-major, general, undeclared or exploratory); however, advising is available and recommended anytime prior to declaration
- Minimum 30 semester hours completed
- Minimum 2.00 cumulative GPA

Requirement to graduate with the economics minor:

- Minimum 2.00 GPA (including all attempts) is required in the minor courses.

Notes:

1. It is highly recommended that students electing the economics minor complete at least one mathematics course at the MATH 11010 level or higher before registering for upper-division economics courses.
2. To earn a College of Business Administration minor, students must complete at least two courses in the minor at Kent State University on a graded basis. At least one of these courses must be at the upper-division (30000 or 40000) level.

Health Care Ethics Minor

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Arts and Sciences > Minors > Health Care Ethics

Department of Philosophy
 College of Arts and Sciences
 320 Bowman Hall
 Tel: 330-672-2315
 Fax: 330-672-4867
 Web: <http://www.kent.edu/cas/philosophy>
 Deborah Barnbaum, Coordinator, 320 Bowman Hall

The health-care ethics program is a concentration of courses offered by disciplines within the university concerned with health-care practices and the education of health-care practitioners. The minor is designed to heighten students' awareness of what constitutes ethical concerns, problems and activity from the perspectives of various kinds of health-care practitioners, clients and institutions. Various views of what constitutes the ethical are treated in the ethics courses so that the student is alerted both to the conceptual dimension of ethical activity and the existence of differing and conflicting modes of ethical reasoning, with PHIL 40005 Health Care Ethics attempting to sketch appropriate action in the light of these realities.

Students wishing to enter this program need to be certain that required prerequisites of many of the courses within the program are met.

HEALTH CARE ETHICS MINOR REQUIREMENTS (24 credits)			
Course	Title		Credits
BSCI 30050	Human Genetics		3
HED 21050	Health Education Theories		3

I. MATHEMATICS MINOR PREREQUISITES

Course	Title
CS	10051 Introduction to Computer Science (4)* or
	10061 Introduction to Computer Programming (3)*
MATH	11010 Algebra for Calculus (3)
	11022 Trigonometry (2)

II. MATHEMATICS MINOR REQUIREMENTS (25 credits)

Course	Title	Credits
MATH	12002 Analytic Geometry and Calculus I	5
	12003 Analytic Geometry and Calculus II	5
	21001 Linear Algebra with Applications	3
	22005 Analytic Geometry and Calculus III	3
Choose from one of the three categories:		
<i>Algebra</i>		
MATH	41001 Introduction to Modern Algebra I (3)	
	41002 Introduction to Modern Algebra II (3)	
	41021 Theory of Matrices (3)	
	47011 Theory of Numbers (3)	
<i>Analysis</i>		
MATH	42001 Introduction to Analysis I (3)	
	42002 Introduction to Analysis II (3)	
	42041 Advanced Calculus (3)	
	42045 Introduction to Partial Differential Equations (3)	
	42048 Introduction to Complex Variables (3)	
<i>Geometry/Topology</i>		
MATH	42021 Graph Theory and Combinatorics (3)	
	45011 Differential Geometry (3)	
	45021 Euclidean Geometry (3)	
	45022 Linear Geometry (3)	
	46001 Elementary Topology (3)	
Elective: choose from the following in consultation with students' minor advisor		3
MATH	31011 Discrete Mathematics (3)	
	32044 Introduction to Ordinary Differential Equations (3)	
	Mathematics 40000-level course (3)	
TOTAL		25

* Students planning to take CS courses at the 20000-level or above must take CS 10051

Minimum cumulative 2.00 GPA required for graduation.

Thomas Hensley, Coordinator, 302 Bowman Hall

No specific course of study is required for admission to law school. Most law schools, including all in Ohio, require a bachelor's degree for admission. The bachelor's degree may be from any discipline or college at Kent State University.

Law schools emphasize the value of reading comprehension, analytical skills and a good command of written English. While these skills can be obtained in various ways, a general liberal arts background is recommended; other fields such as business are also useful. Courses in literature, American history and government are considered essential. Many pre-law students choose a major in political science, history, sociology, psychology, economics or English. A Bachelor of General Studies is suitable if carefully planned.

The pre-law minor is designed to provide a background for the study of law through challenging coursework that reinforces and extends the liberal arts foundation gained through the LER, that provides advanced analytical and writing skills, and that introduces the student to the social and governmental structures that underlie the law. This minor may be combined with any major or field of concentration.

Law schools vary considerably in their admission requirements. Most place major emphasis on the overall GPA and the Law School Admission Test (LSAT) score. Students usually take this test about one year before beginning law school, but it is highly recommended that students take the exam in June before their last year as an undergraduate.

Students considering law as a career should seek individual advising from the pre-law advisors in the Department of Political Science or in the students' major department. A list of pre-law advisors is available in the college office. Consultation with a pre-law advisor is urged, regardless of the students' major, minor or college. The Department of Political Science also has available LSAT registration packets, pre-law planning guides, information on law school admissions of Kent State University students and financial aid information. The department maintains a file of law school catalogs and also sponsors a pre-law club. Opportunities also exist for students to participate in mock trial and moot court activities as well as legal internships. The Department of Philosophy and the Office of Continuing and Distance Education offer an LSAT Preparation Course before the June and October offerings of the LSAT. A bulletin board with law school and pre-law information is located on the third floor of Bowman Hall near the Department of Political Science.

Course Requirements for Pre-Law Minor (24 credits):

Course	Title	Credits
Minor Requirements		
ENG 30064	Argumentative Prose Writing	3
PHIL 11009	Principles of Thinking	3
	21001 Introduction to Ethics	3

	40182	Constitutional Law: Government Powers (3)	
	40183	Constitutional Law: Civil Rights and Liberties (3)	
Total:			24

Maximum three courses counted toward the students' major may be counted toward the pre-law minor.

It is recommended that students pursuing the pre-law minor give strong consideration to the following courses in fulfillment of the Kent Core Requirements or college general requirements: in the humanities and fine arts category: HIST 12070 and 12071, COMM 15000 and 26000 and PAS 23001 and 23002; in the social sciences category: JUS 12000, ECON 22061 and POL 10100. Students are strongly encouraged to consider prerequisites of advanced courses in the pre-law minor as they select their Kent Core courses or college general requirements.

Minimum cumulative 2.00 GPA required for graduation.

No coursework in this program may be taken pass/fail. The writing minor is intended to provide academic recognition to students who have demonstrated their ability in writing. The minor will help students establish eligibility for graduate programs in writing. It is also evidence of training that may be offered to prospective employers.

Students must have a 3.00 GPA in writing courses, junior standing and permission from the Department of English before enrolling in the required portfolio course.

WRITING MINOR REQUIREMENTS (23-25 credits)			
Course	Title		Credits
Writing Courses			
ENG 40010	Writing Portfolio *		2
Choose from the following: (maximum two courses at the 20000-level)			12
ENG 20002	Introduction to Technical Writing (3) *		
	20021 Introduction to Creative Writing (3) *		
	30062 Principles of Technical Writing (3) *		
	30063 Business and Professional Writing (3) *		
	30064 Argumentative Prose Writing (3) *		
	30065 Expository Prose Writing (3) *

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Arts and Sciences > Certificates > [Applied Conflict Management \(Post Secondary\)](#)

The Applied Conflict Management certificate is an undergraduate program where students learn skills to use in conflict situations in the workplace, in community settings and in their daily lives at home. Experiential learning, skills exercises, simulations and role plays are utilized to meet a growing need for constructive approaches to conflict management. Topics covered include active listening, constructive assertions, principled negotiation, mediation, group facilitation, strategic planning and much more.

Kent State University admission requirements apply, including assessment testing. Students may enroll in the program even if they have prior degrees. Students must declare themselves as a certificate candidate prior to completing half of the courses and must complete a minimum of 15 credits at Kent State University.

APPLIED CONFLICT MANAGEMENT CERTIFICATE REQUIREMENTS (16 credits)

Course	Title	Credits
CACM 11001	Introduction to Conflict Management	3

	31010 Conflict Theory (3)	
	32020 Strategic Planning (3)	
	35050 Environmental Conflict Resolution (3)	
	35092 Internship in Conflict Management (3)	
	35095 Special Topics in Conflict Management (3)	
	38080 Mediation: Theory and Training (3)	
TOTAL		16

Students choose a focus area of "Administration" (Environmental Conflict Resolution and Strategic Planning), "Human Resources" (Strategic Planning and Mediation), "Diversity" (Gender, Power and Conflict and Cross-Cultural Conflict Management) or students can choose any two courses from the above list. Students must declare their intent to earn the certificate before they have completed half of the required hours. They must satisfy the prerequisites of each course in the program and must pass each course with a minimum grade of C (2.0) to receive the certificate. Courses may not be completed on a pass/fail basis or via credit-by-exam. Transfer credits may, in certain circumstances, be used to fulfill certificate requirements. Maximum of 9 credit hours of variable topic (special topics, seminar, etc.) courses.

Minimum cumulative 2.25 GPA required in the program for award of certificate.

As one of Ohio's top universities, Kent State offers the resources and facilities of a large university with the friendly, casual atmosphere of a liberal arts college. Introduction

The College of Business Administration and the Graduate School of Management hold membership in the AACSB, International—The Association to Advance Collegiate Schools of Business. This association is recognized by the National Commission on Accrediting and the U.S. Office of Education as the official accrediting agency for business at the collegial level. AACSB standards include an evaluation of faculty adequacy and competence; admissions standards and caliber of the student body; library facilities; physical plant and equipment; financial support of the institution; and the content and breadth of both the professional and nonprofessional curricular requirements.

The College of Business Administration was organized in 1936 under enabling legislation passed by the General Assembly of the state of Ohio. After starting with 300 students and four faculty members, the college now numbers approximately 4,000 undergraduate students, 500 master's students, 50 doctoral students and 56 faculty members.

Mission Statement

The Kent State University College of Business Administration and Graduate School of Management fulfill their charge from the university and the state of Ohio by providing high-quality undergraduate, graduate and executive programs by engaging in a combination of instructional, research and scholarship, and service activities. While selected graduate programs encompass national and international clientele, our programs primarily serve the citizens of Northeast Ohio. For selected graduate programs, the geographical sphere encompasses national and international clientele.

The undergraduate programs of the College of Business Administration provide high-quality education in business and a foundation for lifelong learning. These programs serve as an important resource for Northeast Ohio by offering undergraduate-level business education throughout the region.

Degrees Offered

The College of Business Administration and the Graduate School of Management offer six degree programs at the graduate and undergraduate levels:

- Doctor of Philosophy
- Master of Arts in Economics
- Master of Business Administration
- Master of Science in Accounting
- Master of Science in Financial Engineering
- Bachelor of Business Administration

Accounting Advisory Council

Purpose:

The Accounting Advisory Council is a group of individuals made up of faculty members, members of the business and professional

Business Administration Building

- DEGREES OFFERED
- UNDERGRADUATE INFORMATION
- GRADUATE INFORMATION
- ACCOUNTING ADVISORY COUNCIL
- BUSINESS ADVISORY COUNCIL
- COLLEGE FACULTY

accounting community, and Kent State University administrators, who meet on a regular basis (usually quarterly) to discuss matters that impact the ability of accounting majors at KSU to become professionals with an expertise in accounting. The Accounting Department relies on this Council to:

1. provide information on the professional attributes and knowledge that our Accounting majors need to pursue a successful career;
2. review the accounting courses and curriculum periodically and make recommendations for curriculum changes which will improve the quality of the accounting program;
3. assist in improving public relations and communications between the Department and the community;
4. and review of legislative and administrative issues impacting the accounting degree program or accounting in general.

Practice Representatives:

- Gary Alger, Auditor of State's Office-Youngstown Region, 242 Federal Plaza West, Suite 302, Youngstown, OH
- Ryan Braun, Progressive, 300 North Commons Blvd., Box OHT6G, Mayfield Village, OH
- Marjorie L. Connor, The Davey Tree Expert Company, 1500 North Mantua St., Kent, OH
- Robert Goll, Card, Palmer, Sibbison & Company, 4545 Hinckley Ave., Cleveland OH
- Kenneth M. Haffey, Skoda, Minotti & Company, 6685 Beta Dr., Mayfield Village, OH
- Larry Holland, Meaden & Moore, Inc., 1100 Superior Ave., Suite 1100, Cleveland, OH
- Martin Hrabik, Walthall, Drake & Wallace, 6300 Rockside Rd., Suite 100, Cleveland, OH
- Pamela Huggins, Parker Hannifin Corporation, 6035 Parkland Blvd., Cleveland, OH
- Brian Jones, RSM McGladrey, Inc., 1001 Lakeside Avenue East, Suite 1400, Cleveland, OH
- Rick Kavenagh, Brockman, Coats, Gedelian & Company, 1735 Merriman Rd., Akron, OH
- Dina Leader, Deloitte & Touche, 127 Public Square, Suite 2500, Cleveland, OH
- Gregory Long, Long, Cook & Samsa, Inc., 505 North Market St., P.O. Box 58, Wooster, OH
- Debra Marthey, The J.M. Smucker Company, Strawberry Lane, Orrville, OH
- Timothy Michael, Rea & Associates, 419 W. High Ave., P.O. Box 1020, New Philadelphia, OH
- Julie Osredkar, KPMG LLP, 1375 East 9th, St., Suite 2600, Cleveland, OH
- Charles Paulson, Maloney & Novotny LLC, 1111 Superior Ave., Suite 700, Cleveland, OH

- Hobson Hamilton, Assistant Director, Career Services Center, Corporate and Community Relations
- Don McFall, Advisor, Accounting Association and Beta Alpha Psi, External Relations Committee
- Norman Meonske, Coordinator, IMA Conference, External Relations Committee
- David Young, Associate Treasurer and Tax Manager
- Linda Zucca, Interim Department Chair, Internship Courses, External Relations Committee

Business Advisory Council

The Business Advisory Council is made up of business leaders and industrialists with interests in Northeast Ohio. Included in the membership of the council are several outstanding alumni of the college. The group meets regularly with the dean of the College of Business Administration to provide a close liaison between the business world and education, and to advise on the curricula and other programs of the college.

Current members include:

- William A. Bartkus, Vice President, Information Systems, Travel Centers of America, Westlake, Ohio
- John S. Brinzo, CEO, Cleveland Cliffs Inc., Cleveland, Ohio
- Jack J. Burke, Senior Vice President, Investments, Ferris Baker Watts, Inc., Cleveland, Ohio
- Jack Crews, President, BTE Enterprises Company, LLC, Kent, Ohio
- Joseph P. Ditchman Jr., Senior Vice President/Partner, Colliers International, Cleveland, Ohio
- Patricia Enright, Manager, Global Management Reporting Systems, Eaton Corporation, Cleveland, Ohio
- Raymond W. Evans, Consultant, Titan International, Stow, Ohio
- Mary Christine Jackman, Director of Investments, Maryland State Treasury Office, Annapolis, Maryland
- Steven C. Karzmer, Attorney at Law, Calfee, Halter and Griswold LLP, Columbus, Ohio

- Michael R. Kennedy, Chairman and CEO, MRK Technologies Ltd., Cleveland, Ohio
- Daniel E. Klimas, President and CEO, Lorain National Bank, Lorain, Ohio
- Daniel L. Knotts, Senior Vice President, R. R. Donnelley Inc., Downers Grove, Illinois
- Joseph T. Kubic, President, AdCom Communications Inc., Cleveland, Ohio
- Nobby Lewandowski, CPA, Lewandowski & Co., Medina, Ohio
- James A. Lisy, Sr., Managing Director, Corporate Finance Group, Cohen & Company, LTD, Cleveland, Ohio
- John Loulan, Principal, NXT Consulting, LLC, Richfield, Ohio
- David W. McCauley, President, LSI Graphic Solutions Plus, North Canton, Ohio
- Lee A. McMannis, President, Aftermarket Performance by Design, LLC, Hudson, Ohio
- Stanley R. Miller, President, NAACP—Cleveland Chapter, Cleveland, Ohio

BACHELOR OF BUSINESS ADMINISTRATION

All undergraduate programs in the college lead to the Bachelor of Business Administration (B.B.A.) degree. To receive a baccalaureate degree from the College of Business Administration, students must, in addition to other requirements, satisfy the 36-37 hour minimum requirement stipulated in the [Kent Core](#) and complete 6 credit hours of diversity coursework.

Each candidate for the Bachelor of Business Administration must meet requirements in two areas: the pre-major program (freshman and sophomore) requirements; and the advanced business program (junior and senior) requirements.

The college also is an active participant in the university's Honors College. A business option in the general honors program is offered during the freshman and sophomore years, and various other opportunities are provided during the junior and senior years.

PROGRAMS OFFERED

- » Accounting (B.B.A.)
- » Business Management (B.B.A.)
- » Computer Information Systems (B.B.A.)
- » Economics (B.B.A.)
- » Entrepreneurship (B.B.A.)
- » Finance (B.B.A.)
- » Managerial Marketing (B.B.A.)
- » Marketing (B.B.A.)
- » Operations Management (B.B.A.)

ACADEMIC ADVISING

Academic Advising benefits students by partnering them with professional and faculty advisors who can be intellectual mentors, advisors and advocates. The professional advisors in the Undergraduate Programs Office (Room 107 BSA, 330-672-2872) are the primary advisors for the College of Business Administration students. Advisors not only guide students through their academic program(s), but they also guide them in meaningful investigation and choices for learning opportunities outside the classroom. These opportunities include relevant career/major exploration via student group/club activity, campus and community service and activities, leadership development, national and study abroad opportunities, relevant internship experiences and more. All students are encouraged to connect with their advisor(s) each semester to maximize their learning experiences and to optimally achieve their program goals and requirements.

All new freshmen and transfer students (with less than 24 semester hours) are assigned to their first-year advisor and must register in the Destination Kent State: First Year Experience course, which orients them to the College of Business Administration expectations, requirements and resources. Students who select one of the college's Learning Communities or Freshman Interest Groups additionally are connected to a fellowship of similarly interested students to share learning opportunities and experiences.

GENERAL DEGREE REQUIREMENTS FOR A BACHELOR OF BUSINESS ADMINISTRATION

All students in the College of Business Administration should also carefully read General Requirements and Regulations.

1. A minimum of 121 semester hours of approved coursework must be completed as prescribed in the various curricula. Included in these 121 semester hours is US 10097 Destination Kent State: First Year Experience, which may be used as a pre-major general elective.
2. All business administration students must satisfy the 36-credit-hour minimum requirement of the Kent Core as outlined and complete 6 credit hours of diversity coursework. Also, the Pre-major requirements (lower-division) show how the Kent Core courses apply to the baccalaureate degree program in business administration.
3. [Writing-intensive course requirement](#)
4. Students must complete at least 50 percent of business credit hours (required for the business degree) in-residence on a Kent State University campus.
5. Students must complete at least 50 percent of their major credit hours in residence on a Kent State University campus.
6. To earn a College of Business Administration minor, students must complete at least two courses in the minor at Kent State University. At least one of these must be at the upper-division (30000-40000) level.
7. A minimum 2.50 GPA must be earned for all work carried at Kent State University for the accounting, business management, computer information systems, finance, marketing and operations management majors. The economics major requires a minimum cumulative 2.25 GPA. A minimum 2.50 GPA must be earned in the major field (which includes all major requirements and major electives for the accounting, business management, computer information systems, finance, marketing and operations management majors). The economics major requires a 2.25 major GPA.
8. Students must complete two measures of outcomes assessment as specified by the College of Business Administration for complete satisfaction of the B.B.A.
9. The university normally requires a minimum of 39 semester hours at the upper-division (30000-40000) level for graduation with the B.B.A.

COURSE REQUIREMENTS FOR THE PRE-MAJOR PROGRAM

The following coursework is required by the College of Business Administration and will satisfy the Kent Core. The uniform requirements are the same for all pre-majors unless otherwise specifically indicated. Pre-major students are expected to follow the prescribed course of study in the freshman and sophomore years, consistent with Kent Core, the diversity requirement and the requirements of the College of Business Administration. Pre-major programs consist of 61 semester hours of required and elective coursework, which is designed to provide the students with a broad preparation in written and oral communication, social and basic sciences, the humanities and fine arts, mathematics, and introductory work in accounting, economics, computers, statistics, marketing, management and legal environment of business.

This program applies to pre-accounting, pre-business management, pre-computer information systems, pre-economics, pre-entrepreneurship, pre-finance, pre-managerial marketing, pre-marketing, pre-operations management and pre-business.

General College or University Requirements (1)
US 10097 Destination Kent State: First Year Experience (1)

Kent Core Requirements (36-37)
A complete listing of Kent Core courses are found [here](#).

Composition (6)

ENG 11011 College Writing I (3)

ENG 21011 College Writing II (3)

Note: For admission to all business majors, except economics, a minimum C (2.00) must be earned in ENG 11011 and 21011.

Mathematics and Critical Reasoning (3)

MATH 11010 Algebra for Calculus (3)

Note: For admission to all business majors, except economics, a minimum C (2.00) must be earned in MATH 11010.

Humanities and Fine Arts (9)

Minimum one course in humanities category and minimum one course in fine arts category.

Social Sciences (6)

Must be selected from two curricular areas.

ECON 22060 Principles of Microeconomics (3)

Second course must be chosen from anthropology, geography, political science, psychology or sociology. Business management majors must take PSYC 11762 General Psychology.

Basic Sciences (6-7)

Must include one laboratory course.

Additional Kent Core courses (6)

COMM 15000 Introduction to Human Communication (3)

ECON 22061 Principles of Macroeconomics (3)

Note: For admission to all business majors, except economics, minimum C (2.00) grade must be earned in COMM 15000.

Diversity Requirement

Students must complete a two-course diversity requirement, consisting of one with a domestic focus and one with a global focus. One course must come from the Kent Core; the second may be taken as a second Kent Core, within the major or minor, or as a general elective. In some cases, and with the approval of the assistant dean, students may satisfy the second diversity course requirement by completing one semester of study in another country. A complete list of diversity requirement courses can be found [here](#).

Additional Mathematics Requirement (3-5)

MATH 11012 Intuitive Calculus (3)

or

MATH 12002 Analytic Geometry and Calculus I (5)

Note 1: For admission to all business majors, except economics, minimum C (2.00) grade must be earned in MATH 11010.

Note 2: MATH 11012 Intuitive Calculus (or MATH 12002 Analytical Geometry and Calculus I) is required for all majors. Economics majors are strongly encouraged to take MATH 11022 and 11012 or 12002. Students should consult their academic advisor.

Business (24)

BUS 10123 Exploring Business (3)

MIS 24053 Introduction to Computer Applications (3)

MIS 24056 Fundamentals of Business Statistics (3)

MIS 24163 Principles of Management (3)

ACCT 23020 Introduction to Financial Accounting (3)

ACCT 23021 Introduction to Managerial Accounting (3)

FIN 26074 Legal and Regulatory Environment of Business (3)

MKTG 25010 Marketing (3)

Note 1: A minimum grade or average is required in the introductory course(s) for the major. See Advanced Business Program requirements.

Note 2: Students must have earned 28 or more credit hours to take ACCT 23020.

TOTAL CREDITS 64-67

Notes:

1. Any course offered as a choice in the Kent Core may not be taken pass/fail even if the course is being used as a nonbusiness elective.
2. Any course required for the Bachelor of Business Administration program may not be taken pass/fail.
3. Workshop credit will apply toward the B.B.A. only in circumstances where the workshop is programmatically appropriate and only after prior approval by the assistant dean and, when appropriate, by the department chair of the student's major. A maximum of 6 credit hours toward the B.B.A. are allowed, of which a maximum of 3 semester hours may apply toward the student's major.

ADMISSION REQUIREMENTS FOR THE ADVANCED BUSINESS PROGRAM

After completion of at least 46 semester hours of coursework in the pre-major program, all pre-major students who wish to be considered for admission to the Advanced Business Program should apply for such consideration in the Undergraduate Programs Office, 107 Business Administration Building. Admission to the Advanced Business Program and the ability to enroll in 30000- and 40000-level business coursework will be granted to students who have: accomplished the following:

- Satisfactorily completed 46 semester hours applicable to the pre-major program.
- Earned and maintained a minimum 2.50 overall GPA for all majors except economics (see Note 2 below) and marketing (see Notes 3 and 4 below).
- Earned minimum C (2.00) grade in COMM 15000, ENG 11011, ENG 21011, MATH 11010 and the introductory course in the major. (See complete list under Note 1 below.) The economics major does not require the C (2.00) minimum in the preceding courses. The accounting major requires a minimum C (2.00) and a 2.70 average in ACCT 23020 and ACCT 23021. The computer information systems major requires a minimum 2.50 average in MIS 24053, MIS 24060 and MIS 34070. The entrepreneurship major requires a minimum C (2.00) in each of the following: ENTR 27056, ENTR 27075 and ENTR 27456.
- Earned a minimum passing grade (D [1.00] or higher unless otherwise specified, an S for US 10097) in each of the required courses (or approved equivalents) in the pre-major program and have no more than 15 credits of required coursework in progress.

Advanced Business Program

Minimum 39 semester hours at the upper-division level (30000-40000) normally are required for graduation with the Bachelor of Business Administration degree.

Course Requirements:

General Business Requirements	12
ENG 30063 Business and Professional Writing	3
FIN 36053 Business Finance	3
MIS 34060 Operations Management	3
44285 Integrated Business Policy and Strategy	3

Notes:

1. Minimum C (2.00) is required in the introductory course for the major as follows: Business Management: MIS 24163
 - i. Finance: FIN 36053
 - ii. Managerial Marketing: MKTG 25010

- iii. Marketing: MKTG 25010
 - iv. Operations Management: MIS 34060
 - v. The accounting major requires a minimum C (2.00) and a 2.70 average in all attempts ACCT 23020 and 23021, or the equivalents.
 - vi. The computer information systems major requires a minimum 2.50 average in MIS 24053, 24060 and 34070.
2. The economics major requires a minimum overall GPA of 2.25 for admission to the major and satisfactory completion of MATH 11012 or MATH 12002 in the pre-major program.
 3. The marketing major will admit up to 90 students into the marketing major each year requiring a minimum GPA of 2.50 and all other requirements.
 4. The managerial marketing major will allow admission of up to 60 students only in the fall semester using a target GPA of at least 2.50 and all other requirements. Admission is competitive.
 5. The entrepreneurship major will admit up to 30 students each year requiring a minimum GPA of 2.50 and all other requirements.
 6. Students who receive credit for ENG 11011 and/or MATH 11010 via CLEP or Advanced Placement automatically satisfy the minimum C (2.00) grade requirement for ENG 11011 and/or MATH 11010.
 7. Students whose COMPASS and ACT/SAT scores waive them from ENG 11011 and/or MATH 11010 automatically satisfy the minimum C (2.00) grade requirement for ENG 11011 and/or MATH 11010.
 8. Students who receive credit via CLEP or Credit-by-Exam for any introductory major course(s) automatically satisfy the minimum C (2.00) grade requirement for the introductory major course(s).
 9. Transferred course grades that are used to satisfy the core requirements (ENG, MATH, COMM and introductory major course) are taken into consideration for admission to the advanced program.
 10. Transfer students are required to have minimum 2.50 GPA for admission to the College of Business Administration. Their transfer GPA is used only for admission purposes, not for calculation of graduation GPAs. Students who want to transfer from another KSU college or school are required to have minimum 2.50 cumulative GPA.

Writing-Intensive Requirement

Students must complete a one-course writing-intensive requirement and earn minimum C (2.00) grade. A complete list of writing-intensive courses can be found [here](#).

IMPORTANT

Pre-major students who fail to meet the minimum 2.50 cumulative GPA requirement (for all business majors except economics) by completion of 60 semester hours are prohibited from registering for any 30000- or 40000-level business courses. Students should consult an academic advisor.

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Bachelor of Business Administration in Accounting is designed to provide students with a solid foundation in accounting theory and practice necessary for entry-level accounting positions and career advancement. It encompasses a common body of concepts, conventions, principles and theories essential to the professional competency of the certified public accountant, controller, industrial accountant, institutional accountant and governmental accountant.

In addition to the above program that leads to the bachelor's degree, the department offers a five-year program that leads to both the Bachelor of Science and the Master of Science in Accounting degrees. The two-degree, five-year program meets the requirements for admission of graduates to the Certified Public Accountant's Examination (Section 4701 of the Ohio General Code after Jan. 1, 2000). Requirements differ in different states, and students should check with the state board of accountancy for requirements. For more details on the Master of Science in Accounting program, which is the fifth year of the five-year program, students should examine the Graduate Schools Bulletin, or contact the Graduate School of Management (room A310, Business Administration Building).

CAREER OPPORTUNITIES: Accountants and auditors held about 1.3 million jobs in 2008. They worked throughout private industry and government, but 24 percent of accountants and auditors worked for accounting, tax preparation, bookkeeping, and payroll services firms. Approximately 8 percent of accountants and auditors were self-employed.

Most accountants and auditors work in urban areas, where public accounting firms and central or regional offices of businesses are concentrated.

Some individuals with backgrounds in accounting and auditing are full-time college and university faculty; others teach part time while working as self-employed accountants or as accountants for private industry or in government.

Bookkeeping, accounting, and auditing clerks held about 2.1 million jobs in 2008. They work in nearly all industries and at all levels of government. State and local government, educational services, healthcare, and the accounting, tax preparation, bookkeeping, and payroll services industries are among the individual industries employing the largest numbers of these clerks.

Type	Course	Title	Credits
	ENG 30063	Business and Professional Writing	3
	FIN 36053	Business Finance	3
	36072	Law of Commercial Transactions	3
	MIS 34060	Operations Management	3
	44285	Integrated Business Policy and Strategy	3
	General Electives (lower or upper division)		18
MINIMUM TOTAL			121

*A minimum C (2.0) grade must be earned. A minimum C (2.0) grade must be earned in ACCT 43010 to fulfill the writing-intensive requirement.

Students may take or use any course at any level as long as the minimum 39-hour requirement for upper-division courses is satisfied for graduation with a B.B.A. Exceptions: Maximum 3 credit hours of physical education activity (PEB) courses and maximum 3 credit hours for courses in applied music and music ensembles (MUS courses with a second digit of 5, 6 or 7) combined may be counted toward the 121-total hour or 39-upper-division-hour graduation requirement. Non-business courses may be selected, provided there is minimum 6 credit hours in each of two different disciplines/departments. A minor (business or non-business) is encouraged. There is no limit on other music coursework. Any other exceptions must be approved by the assistant dean. Credit for ENG 11001 or 11002 or MATH 10023 or 10024 may apply only toward lower-division non-business electives.

Special notes for major:

Normally, an ACCT major course may be repeated only once. Students may repeat only a course in which a C+ grade or lower was earned. Only three accounting major courses (3/43000) may be repeated and counted toward the accounting major. All attempts count in the computation of the major, upper-division business and cumulative GPA.

A basic knowledge of and the ability to use personal computers for accounting applications, including an electronic spreadsheet such as Excel, is required to major in accounting. Students should possess such knowledge and skills, if not already possessed, before taking any upper-division accounting major course or during the first quarter of the term during which the course is taken. The department office can provide recommendations on self-study materials to acquire the knowledge and skills.

Fax: 330-672-5006
Web: <http://www.kent.edu/business/departments/index.cfm>

DESCRIPTION:

The Bachelor of Business Administration in Business Management gives students credentials important to getting their first job as an entry-level manager or manager-trainee. Every organization of any size and type depends on and needs managers, including, as examples, the small corner store, department stores, accounting firms, healthcare centers, a manufacturing firm such as Goodyear Tire & Rubber Company, or a business-to-business type of organization such as Proctor & Gamble.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management: Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration. In addition, they must meet the GPA requirement of 3.30 after 90 semester hours.

CAREER OPPORTUNITIES:

During a career in management, one's responsibility can grow from the job of entry-level manager, to department manager, and eventually to division manager or even to Chief Executive Officer. As in most fields of work, upon completion of the degree, the entry-level manager or trainee usually experiences an initial time period of on-the-job training. For example, a manager-trainee might spend time in every department of an organization learning the business inside and out. Then after the training period, the management trainee will be assigned to a specific department and have responsibility for the performance of an area or department of the organization. How far one advances in managerial positions depends on training (such as the Business Management major), talent for working with people, and effort. Working with people is a primary focus of management; therefore, good communications skills (both oral and written) are essential to the success of the manager.

Management analysts held about 746,900 jobs in 2008. About 26 percent of these workers, three times the average for all occupations, were self-employed. Management analysts are found throughout the country, but employment is concentrated in large metropolitan areas. Management analysts work in a range of industries, including management, scientific, and technical consulting firms; computer systems design and related services firms; and Federal, State, and local governments.

Administrative services managers held about 259,400 jobs in 2008. They are found in all industries, but several industries have a greater share of these managers than others. They are the education services industry with 15 percent, the healthcare industry with 12 percent, State and local government with 12 percent, and finance and insurance with 9 percent. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Requirements to be admitted as a business management major:

- Satisfactory completion of 46 semester hours applicable to the pre-business management major
- Minimum 2.50 cumulative GPA
- Minimum C (2.00) grade in COMM 15000, ENG 11011, ENG 21011 and MATH 11010 (or placement out of ENG 11011 and/or MATH 11010)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Bachelor of Business Administration in Computer Information Systems is designed to provide students with a focus on the creation and supervision of the Computerized Information Systems (CIS) that commonly are used in organizations of all types and sizes. There is a primary emphasis on problem solving within systems development, on the logic of programming and on state-of-the-art programming languages and methodologies. Examples of CIS include airline reservation systems, bank automated teller systems, trading systems for stock exchanges and accounting/auditing systems.

Once the required courses have been completed, students can select electives that will lead them in various professional career directions. One of these directions focuses on system development—preparing students for work as programmers, systems analysts and application system architects. Careers in this specialization area can involve intensive technical work writing program code, work in database design and support, projects in high-level system design and project management of these activities. A second direction focuses on the creation and maintenance of local and wide area networks and other computing infrastructure components, and prepares students for careers as network engineers and network managers. Some material taught in courses connected with both of these specialization areas correlates with the knowledge needed to pass professional certification exams.

Students also are strongly encouraged to engage in a CIS internship, which involves a summer or a semester of paid professional experience in industry. Internship experience helps show the relevance of on-campus courses to professional work, helps students focus their career plans and often enables students to secure better post-graduate jobs. Three hours of academic credit can be earned for an internship. Guidance in selecting electives is available from the CIS faculty or from the Undergraduate Programs Office. Permission is required prior to registration for MIS 24060 and 34070.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management

Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration. In addition, they must meet the GPA requirement of 3.30 after 90 semester hours

CAREER OPPORTUNITIES: Computer systems analysts held about 532,200 jobs in 2008. Although they are employed in many industries, 24 percent of these workers were in the computer systems design and related services industry. Computer systems analysts also were employed by governments; insurance companies; financial institutions; and business management firms. About 30,300 computer systems analysts were self-employed in 2008.

Computer software engineers and computer programmers held about 1.3 million jobs in 2008. Approximately 514,800 were computer applications software engineers, about 394,800 were computer systems software engineers, and about 426,700 were computer programmers. Although computer software engineers and computer programmers can be found in a wide range of industries about 32 percent were employed in computer systems design and related services. Many also worked for software

publishers, manufacturers of computers and related electronic equipment, financial institutions, and insurance providers. About 48,200 computer software engineers and computer programmers were self-employed in 2008.

(Source: Bureau of Labor Statistics)

**ADMISSION
REQUIREMENTS:**

Requirements to be admitted as a computer information systems major:

- Satisfactory completion of 46 semester hours applicable to the pre-computer information systems major
- Minimum 2.50 cumulative GPA
- Minimum C (2.00) grade in COMM 15000, ENG 11011, ENG 21011 and MATH 11010 (or placement out of ENG 11011 and/or MATH 11010)
- A 2.50 average in MIS 24053, 24060 and 34070

For more information on admissions, visit the [Admissions website for new freshmen](#).

Transfer Student: A cumulative GPA of at least 2.50 (2.25 for economics) is required for admission into the College of Business Administration. Students who have previously attended Kent State must also have a minimum 2.50 GPA (2.25 for economics) in their former Kent State coursework.

**GRADUATION
REQUIREMENTS:**

Minimum 121 total credit hours and 39 upper-division hours for graduation. Minimum 2.50 GPA overall and 2.50 GPA in major required for graduation.

**LANGUAGE
REQUIREMENT:**

None

**STUDY
ABROAD/AWAY
OPPORTUNITIES:**

There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE:

\$75/semester

ACCREDITATION:

Association to Advance Collegiate Schools of Business, The

**STUDENT
ORGANIZATIONS:**

Association for Computing Machinery; Collegiate Business Association; Delta Sigma Pi; Management and Information System Association (MISA); Net Impact Kent State University

**GRADUATE
PROGRAMS:**

Master of Business Administration: Information Systems
M.A. and M.S. in Computer Science

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Bachelor of Business Administration in Economics equips students with a variety of skills sought by employers, including conceptualizing and solving problems; locating, organizing and using relevant information; and analytical ability. In their junior year, students learn microeconomic and macroeconomic theory and take an econometrics class to learn basic analytical skills. Students then take a series of electives that deal with vital current topics relevant to many careers in which these theories and skills are applied, such as our financial and banking system; the economic relations between the United States and foreign countries; government spending and taxation policies; the U.S. health system and policy options. During their senior year, students take a capstone course that utilizes and applies the theory, skills and institutional knowledge learned in the program.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management: Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration. In addition, they must meet the GPA requirement of 3.30 after 90 semester hours

CAREER OPPORTUNITIES: Economists held about 14,600 jobs in 2008. Government employed 53 percent of economists, in a wide range of agencies, with 31 percent in Federal Government and 22 percent in State and local government. The remaining jobs were spread throughout private industry, particularly in scientific research and development services and management, scientific, and technical consulting services. A number of economists combine a full-time job in government, academia, or business with part-time or consulting work in another setting.

Employment of economists is concentrated in large cities. Some work abroad for companies with major international operations, for U.S. Government agencies, and for international organizations, such as the World Bank, International Monetary Fund, and United Nations.

In addition to the previously mentioned jobs, economists who hold faculty positions in colleges and universities are counted as postsecondary teachers.
(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Requirements to be admitted as an economics major:

- Satisfactory completion of 46 semester hours applicable to the pre-economics major
- Minimum 2.25 cumulative GPA

For more information on admissions, visit the [Admissions website for new freshmen](#).

Transfer Student: cumulative GPA of at least 2.50 (2.25 for economics) is required for admission into the College of Business Administration. Students who have previously attended Kent State must also have

a minimum 2.50 GPA (2.25 for economics) in their former Kent State coursework.

GRADUATION REQUIREMENTS: Minimum 121 total credit hours and 39 upper-division hours for graduation. Minimum 2.25 GPA overall and 2.25 GPA in major required for graduation.

DESCRIPTION: The Bachelor of Business Administration in Entrepreneurship provides students with the academic background and experiential opportunities needed to view business opportunities from an entrepreneurial perspective. The program helps students recognize market and business opportunities, learn when to seize them or take action, while operating within the context of limited resources and creating value for the customer. The program contains numerous opportunities to experience entrepreneurship firsthand. During their sophomore year, students earn course credit by launching and running a business of their own creation. A practicum course allows students to earn credit while developing their own business or assisting an entrepreneur with his or her business. Students have many opportunities to meet experienced entrepreneurs who discuss their successes and failures in business. Courses in the major are hands-on, with experiential learning central to the course format.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management: Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration. In addition, they must meet the GPA requirement of 3.30 after 90 semester hours

ADMISSION REQUIREMENTS: Requirements to be admitted as an entrepreneurship major:

- Admission of approximately 30 students each year with a minimum 2.50 GPA
- Minimum C (2.00) in ENTR 27456, ENTR 27056 and ENTR 27075
- A positive record of class participation and activity in the entrepreneurship courses, successful outcomes from the Entrepreneurial Experience courses, a personal essay and, potentially, a personal interview

For more information on admissions, visit the [Admissions website for new freshmen](#).

Transfer Student: A cumulative GPA of at least 2.50 (2.25 for economics) is required for admission into the College of Business Administration. Students who have previously attended Kent State must also have a minimum 2.50 GPA (2.25 for economics) in their former Kent State coursework.

GRADUATION REQUIREMENTS: Minimum 121 total credit hours and 39 upper-division hours for graduation. Minimum 2.50 GPA overall and 2.50 GPA in major required for graduation.

MINIMUM TOTAL				121

*A minimum C (2.0) grade must be earned. A minimum C (2.0) grade must be earned in ENTR 47065 to fulfill the writing-intensive requirement.

Students may take or use any course at any level as long as the minimum 39-hour requirement for upper-division courses is satisfied for graduation with a B.B.A. Expectations: Maximum 3 credit hours of physical education activity (PEB) courses and maximum 3 credit hours for courses in applied music and music ensembles (MUS courses with a second digit of 5, 6 or 7) combined may be counted toward the 121 total hour or 39-upper-division-hour graduation requirement. There is no limit on other music coursework. Any other exceptions must be approved by the assistant dean. Non-business courses may be selected, provided there is minimum 6 credit hours in each of two different disciplines/departments. A minor (business or non-business) is encouraged. Credit for ENG 11001 or 11002 or MATH 10023 or 10024 may apply only toward lower-division non-business electives.

Special notes for major:

- Students may apply for the entrepreneurship major during spring semester with an official start during the following fall.
- Admission of approximately 30 students in the major each year with a minimum 2.50 GPA and minimum C grade in ENTR 27065, 27075 and 27456.
- Criteria for acceptance in the major includes a positive record of class participation and activity in the ENTR courses, successful outcomes from the Entrepreneurial Experience courses, a personal essay and potential a personal interview.

Program Requirements
College Requirements
University Requirements

DESCRIPTION: The Bachelor of Business Administration in Finance is designed to provide students with an academic background appropriate for entry into a financial career, including financial management, investments, banking/financial institutions, risk/insurance, real estate and related areas.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management: Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration.

CAREER OPPORTUNITIES: Financial analysts held 250,600 jobs in 2008. Many financial analysts work at large financial institutions based in New York City or other major financial centers.

Because of their close relationship to stock exchanges and large banking operations, most of the major investment banks in the United States are based in New York metropolitan area.

Financial managers held about 539,300 jobs in 2008. Although they can be found in every industry, approximately 31 percent were employed by finance and insurance establishments.

Personal financial advisors held 208,400 jobs in May 2008. Jobs were spread throughout the country, although a significant number are located in New York, California, and Florida.

Most real estate firms are relatively small; indeed, some are one-person businesses. By contrast, some large real estate firms have several hundred agents operating out of numerous branch offices.

ADMISSION Requirements to be admitted as a finance major:

REQUIREMENTS:

- Satisfactory completion of 46 semester hours applicable to the pre-finance major
- Minimum 2.50 cumulative GPA
- Minimum C (2.00) grade in COMM 15000, ENG 11011, ENG 21011 and MATH 11010 (or placement out of ENG 11011 and/or MATH 11010)
- Minimum C (2.00) grade in FIN 36053

For more information on admissions, visit the [Admissions website for new freshmen](#).

Transfer Student: A cumulative GPA of at least 2.50 (2.25 for economics) is required for admission into the College of Business Administration. Students who have previously attended Kent State must also have a minimum 2.50 GPA (2.25 for economics) in their former Kent State coursework.

GRADUATION REQUIREMENTS:

Minimum 121 total credit hours and 39 upper-division hours for graduation. Minimum 2.50 GPA overall and 2.50 GPA in major required for graduation.

COLLEGE: College of Business Administration

DEPARTMENT: Department of Marketing
Room 534, Business Administration Building
E-mail: marketing@bsa3.kent.edu
Tel: 330-672-2170
Fax: 330-672-5006
Web: <http://business.kent.edu/dept/marketing>

DESCRIPTION:

The Bachelor of Business Administration in Managerial Marketing prepares students to be marketing practitioners by helping them to fully develop the analytical, decision-making and communications (written and oral) skills used and valued by individuals working in this field. Faculty engage each student in active learning through hands-on assignments, case studies, projects with real businesses, and dynamic interactions with the faculty member and other students in the classroom. Each course aims to strengthen writing skills by emphasizing logical flow, persuasiveness and succinctness. Because coursework is sequential and integrated, each course builds upon prior classes to give students a comprehensive body of knowledge, skills and abilities. The objective of this program is to educate students to function effectively in business environments (e.g., small firms) where they will have to make autonomous decisions and be required to take action on their own initiative.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management: Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration. In addition, they must meet the GPA requirement of 3.30 after 90 semester hours

CAREER OPPORTUNITIES:

Market and survey researchers held about 273,200 jobs in 2008, most of which—249,800—were held by market research analysts. Because of the applicability of market research to many industries, market research analysts are employed throughout the economy. The industries that employed the largest number of market research analysts in 2008 were management, scientific, and technical consulting services; management of companies and enterprises; computer systems design and related services; insurance carriers; and other professional, scientific, and technical services—which includes marketing research and public opinion polling.

Survey researchers held about 23,400 jobs in 2008. Most were employed primarily by firms in other professional, scientific, and technical services—which include market research and public opinion polling; scientific research and development services; and management, scientific, and technical consulting services. About 9 percent of survey researchers worked in educational services—which includes colleges, universities, and professional schools.

A number of market and survey researchers combine a full-time job in government, academia, or business with part-time consulting work in another setting. About 7 percent of market and survey researchers are self-employed.

Besides holding the previously mentioned jobs, many people who perform market and survey research held faculty positions in colleges and universities. These workers are counted as postsecondary teachers rather than market and survey researchers. Advertising, marketing, promotions, public relations, and sales managers held about 623,800 jobs in 2008. The following tabulation shows the distribution of jobs by occupational specialty:

Resources:

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

Sales managers 346,900
 Marketing managers 175,600
 Public relations managers 56,700
 Advertising and promotions managers 44,600

These managers were found in virtually every industry. Sales managers held about 56 percent of the jobs; about 62 percent of sales managers were employed in wholesale trade, retail trade, manufacturing, and the finance and insurance industries. Marketing managers held approximately 28 percent of the jobs; the professional, scientific, and technical services, and the finance and insurance industries employed around 32 percent of marketing managers. About 27 percent of advertising and promotions managers worked in the professional, scientific, and technical services industries and wholesale trade. Around 48 percent of public relations managers were employed in service-providing industries, such as professional, scientific, and technical services; public and private educational services; finance and insurance; and healthcare and social assistance.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Requirements to be admitted as a managerial marketing major:

- Students are admitted into marketing major in fall semester only.
- Admission of maximum 60 students into the marketing major each fall semester, using a target GPA of 2.50
- Minimum C (2.00) is required in ENG 11011, ENG 21011, MATH 11010, COMM 15000 and MKTG 25010

For more information on admissions, visit the [Admissions website for new freshmen](#).

Transfer Student: A cumulative GPA of at least 2.50 (2.25 for economics) is required for admission into the College of Business Administration. Students who have previously attended Kent State must also have a minimum 2.50 GPA (2.25 for economics) in their former Kent State coursework.

GRADUATION REQUIREMENTS:

Minimum 121 total credit hours and 39 upper-division hours for graduation. Minimum 2.50 GPA overall and 2.50 GPA in major required for graduation.

MINIMUM TOTAL	121

*A minimum C (2.0) grade must be earned. A minimum C (2.0) grade must be earned in MMTG 35011 to fulfill the writing-intensive requirement. Should students earn below a minimum C grade in MMTG 35011, they are required to repeat the course during the following fall semester to alleviate skill deficits, and they will not be eligible to progress in the major.

Students may take or use any course at any level as long as the minimum 39-hour requirement for upper-division courses is satisfied for graduation with a B.B.A. Exceptions: Maximum 3 credit hours of physical education activity (PEB) courses and maximum 3 credit hours for courses in applied music and music ensembles (MUS courses with a second digit of 5, 6 or 7) combined may be counted toward the 121-total hour or 39-upper-division-hour graduation requirement. Non-business courses may be selected, provided there is minimum 6 credit hours in each of two different disciplines/departments. A minor (business or non-business) is encouraged. There is no limit on other music coursework. Any other exceptions must be approved by the assistant dean. Credit for ENG 11001 or 11002 or MATH 10023 or 10024 may apply only toward lower-division non-business electives.

Special notes for major:

- Students are admitted into marketing major in fall semester only.
- Admission of maximum 60 students into the marketing major each fall semester, using a target 2.50 GPA.
- The curriculum is to be taken in sequence. Not all courses are offered each semester. Students should obtain from the department a copy of the schedule of course sequencing.
- Normally, MMTG courses may be repeated only once. Exceptions require the approval of the department chair and the assistant dean of the college.
- Only three managerial marketing major (3/45000) courses may be repeated and counted toward the major. Exceptions require the approval of the department chair. All attempts count in the computation of the major, upper-division business and cumulative GPA.

University Requirements

DESCRIPTION: The Bachelor of Business Administration in Marketing addresses the fact that marketing, a field entailing a variety of subtopics, can be applied in a wide range of areas (e.g., for profit, nonprofit, service and manufacturing businesses). This program addresses the breadth within the marketing field through courses (e.g., consumer behavior, marketing research, international marketing, personal selling and advertising) that provide the student with an appreciation of all central topic areas in the field. Accordingly, the program gives students a generalist's perspective and working knowledge of the theory and practice of marketing. Students learn the tasks involved in the analysis, planning, implementation and control of marketing programs that result in strategies and tactics used by businesses to sell goods and services to consumers and other businesses. Typically, the more traditional lecture format is used by instructors in this program.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management: Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration. In addition, they must meet the GPA requirement of 3.30 after 90 semester hours

CAREER OPPORTUNITIES: Advertising, marketing, promotions, public relations, and sales managers held about 623,800 jobs in 2008. These managers were found in virtually every industry. 	ENG 30063	Business and Professional Writing	3
	FIN 36053	Business Finance	3
	MIS 34060	Operations Management	3
	44285	Integrated Business Policy and Strategy	3
	General Electives (minimum 3 upper-division credit hours)		21
MINIMUM TOTAL			121

* A minimum C (2.0) grade must be earned. *A minimum C (2.0) grade must be earned in MKTG 45084 to fulfill the writing-intensive requirement.

** Students must take MKTG 35030 as the first course in the major and earn minimum C grade to continue in the major. MKTG 35030 may be taken concurrently with MKTG 35035 or 35050. Should students earn below a minimum C grade in MMTG 35030, they are required to repeat the course, with a maximum of three repeats.

Students may take or use any course at any level as long as the minimum 39-hour requirement for upper-division courses is satisfied for graduation with a B.B.A. Exceptions: Maximum 3 credit hours of physical education activity (PEB) courses and maximum 3 credit hours for courses in applied music and music ensembles (MUS courses with a second digit of 5, 6 or 7) combined may be counted toward the 121-total hour or 39-upper-division-hour graduation requirement. Non-business courses may be selected, provided there is minimum 6 credit hours in each of two different disciplines/departments. A minor (business or non-business) is encouraged. There is no limit on other music coursework. Any other exceptions must be approved by the assistant dean. Credit for ENG 11001 or 11002 or MATH 10023 or 10024 may apply only toward lower-division non-business electives.

Special notes for the major:

- Admission of maximum 90 students into the marketing major each academic year, with a target minimum cumulative 2.50 GPA. Class performance in MKTG 25010 is taken into consideration in the admission process.
- Normally, a marketing major course may be repeated only once. Exceptions require the approval of the department chair and the assistant dean of the college.
- Only three of marketing major (3/45000) courses may be repeated and counted toward the marketing major. All attempts count in the computation of the major and cumulative GPA.

Program Requirements

College Requirements

University Requirements

DESCRIPTION: The Bachelor of Business Administration in Operations Management focuses on the management of processes that create and deliver goods and/or services. Operations management is a core functional area of all organizations. The operations function is responsible for insuring that the organization produces goods and services that meet the quality expectations of the customer. In operations a systems approach is adopted in which the production of goods and services to satisfy customer demand is integrated with the financial and marketing plans of the organization. Service organizations such as hospitals, banks and retailer stores as well as manufacturing firms such as automobile and computer manufacturers draw heavily on operations management to insure continuous improvement of overall company performance and capability. As an operations management major your courses will provide you with a balanced mix of computer-based analytical tools, management training and problem solving skills so that you can make an immediate impact on improving how a manufacturing or service organization operates.

Combined Baccalaureate/Master's Program in the College of Business Administration and Graduate School of Management: Students must have earned 90 semester hours to apply for the Combine Baccalaureate/Master's Program in the College of Business Administration. In addition, they must meet the GPA requirement of 3.30 after 90 semester hours

CAREER OPPORTUNITIES: Graduates with an operations management degree enjoy a wide range of career opportunities. These opportunities include supply chain analyst, materials manager, forecasting analyst, production planner, purchasing and logistics analyst, operations manager and quality assurance analyst. Given the emphasis on global business practices, all organizations can benefit by the skill base that an operations management graduate has to offer hence there is a high demand in industry for operations management graduates. Positions offered to recent graduates include materials analyst at Diebold Incorporated, inventory control analyst at the Cleveland Clinic, and operations analyst at Precision Supply. Check the Internet and you will see that the average starting salary for an operations management graduate is in the \$45,000 - \$55,000 range.

ADMISSION REQUIREMENTS: Requirements to be admitted as an operations management major:

- Satisfactory completion of 46 semester hours applicable to the pre-operations management major
- Minimum 2.50 cumulative GPA
- Minimum C (2.00) grade in COMM 15000, ENG 11011, 21011 and MATH 11010 (or placement out of ENG 11011 and/or MATH 11010)
- Minimum C (2.00) grade in MIS 34060

For more information on admissions, visit the [Admissions website for new freshmen](#).

Transfer Student: A cumulative GPA of at least 2.50 (2.25 for economics) is required for admission into the College of Business Administration. Students who have previously attended Kent State must also

have a minimum 2.50 GPA (2.25 for economics) in their former Kent State coursework.

GRADUATION REQUIREMENTS:	Minimum 121 total credit hours and 39 upper-division hours for graduation. Minimum 2.50 GPA overall and 2.50 GPA in major required for graduation.
LANGUAGE REQUIREMENT:	None
STUDY ABROAD/AWAY OPPORTUNITIES:	There are many study abroad/away opportunities, for more information contact the Office of International Affairs .
PROGRAM FEE:	\$75/semester
ACCREDITATION:	Association to Advance Collegiate Schools of Business, The
STUDENT ORGANIZATIONS:	Collegiate Business Association; Construction Management Student Chapter; Delta Sigma Pi; Management and Information System Association (MISA); Net Impact Kent State University
GRADUATE PROGRAMS:	Master of Business Administration: Accounting, Finance, Human Resource Management, Information Systems, International Business, Marketing

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > [Graduate Programs](#)

The programs in the Graduate School of Management at Kent State University prepare students for management and staff positions in regional, national and international organizations. Curricular and cocurricular emphases are on ethical leadership, teamwork, creative problem-solving, global perspectives and skillful applications of information technology. The following programs are offered in the Graduate School of Management:

Master's degree programs

- Master of Business Administration (M.B.A.)
- Executive M.B.A.
- Master of Science in Financial Engineering
- Master of Science in Accounting
- Master of Arts in Economics

Doctoral degree program

- Doctor of Philosophy (Ph.D.) in Business Administration

Dual-degree programs are available in the following areas:

- Master of Business Administration/Master of Science in Nursing
- Master of Business Administration/Master of Library and Information Science
- Master of Business Administration/Master of Architecture
- Master of Business Administration/Master of Arts in Translation

All graduate programs of the school are accredited by AACSB International—The Association to Advance Collegiate Schools of Business. With the exception of the Ph.D. and M.S.F.E. programs, most of the degree programs may be completed on a part-time or full-time basis. All doctoral and master's students in management should obtain a current copy of the relevant *Graduate Student Handbook*. This guide contains the most up-to-date information concerning degree requirements and is available in the Graduate Office, Room A310, Business Administration Building.

For information on graduate non-degree status consult the Graduate School of Management, Room 310A, Business Administration Building, 330-672-2282, or visit <http://business.kent.edu/grad>.

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Master of Science in Accounting is for students interested in specializing in accounting. Students take accounting courses with courses in the various business disciplines, allowing them to become well-rounded professionals. The combination of coursework with the option of an internship provides students with a strong theoretical foundation in accounting as well as an understanding of the practical applications of the discipline. The program also emphasizes the development of communication, interpersonal and analytical problem-solving skills through the use of case studies, team and individual projects, and computers for accounting and auditing applications. Upon completion and 150 semester credit hours, students will be considered as having met the educational requirement for sitting for the CPA exam in Ohio.

Students in the Master of Science in Accounting have the option to select a concentration from the following: Assurance Services or Taxation.

The Assurance Services concentration allows students to specialize their degree with courses in advanced auditing and IT auditing. Graduates are prepared for responsible leadership positions in public, corporate, nonprofit and government accounting. Upon completion and 150 semester credit hours, students will be considered as having met the educational requirement for sitting for the CPA exam in Ohio.

The Taxation concentration allows students to specialize their degree with courses in corporate and partnership taxation. Graduates are prepared for responsible leadership positions in public, corporate, nonprofit and government accounting. Upon completion and 150 semester credit hours, students will be considered as having met the educational requirement for sitting for the CPA exam in Ohio.

ADMISSION REQUIREMENTS: Official transcript(s), GMAT, goal statement, three letters of recommendation, résumé and TOEFL, IELTS, MELAB or PTE, if applicable.

GRADUATION REQUIREMENTS: There are two tracks of study leading to the M.S. in Accounting, depending on the student's prior preparation. The first track, described below, is for those students who hold undergraduate degrees in accounting. A program of study of 33 hours is required. Students may elect an internship option during one term. All accounting courses are 3 credit hours.

PROGRAM FEE: None

ACCOUNTING PROGRAM REQUIREMENTS (27 credits)

Course	Title	Credits
ACCT 53014	Advanced Accounting Systems	3
	53020 Corporate Accounting III	3
	53033 Income Taxation II	3
	53034 Nonprofit Accounting Auditing	3
BAD 63022	Professional Issues and Ethics in Accounting	3
Graduate Business Courses *		9
BAD 64005	Statistics for Management (3)	
	66061 Financial Management I (3)	
ECON 62021	Business Conditions Analysis and Public Policy (3)	
Graduate Elective Courses: <i>Students are encouraged, but not required, to select a course from the following. Graduate courses outside of the College of Business must be approved by the M.S.A. coordinator.</i>		3

Graduate Accounting elective courses

ACCT 53013	Advanced Management Accounting (3)	
BAD 63024	IT Audit and Control (3)	
	63025 Business Valuation (3)	
	63030 International Accounting (3)	
	63031 Advanced Auditing Theory and Practice (3)	
	63032 Accounting Theory (3)	
	63042 Taxation of Corporations and Shareholders (3)	
	63043 Taxation of Partnerships and Partners (3)	
	63045 Tax Research and Planning (3)	
	63092 Internship (3)	
	63098 Research in Accounting (3)	

Graduate Business (Non-Accounting) elective courses

BAD 66062	Financial Management II (3)	
	66063 Financial Markets and Institutions (3)	
	66064 International Financial Management (3)	
ECON 62022	Managerial Economics (3)	
	62061 Monetary Theory and Policy (3)	
	62076 International Finance(3)	

CONCENTRATION REQUIREMENTS (6 credits)

Choose one of the following concentrations:

Course	Title	Credits
Accounting (6)		
<i>With the approval of the M.S.A. coordinator, the student may also structure a concentration tailored to the needs of the student by blending the two concentrations and the free elective.</i>		
Assurance Services (6)		
BAD 63031	Advanced Auditing Theory and Practice	3
	63024 IT Audit and Control	3
Taxation (6)		
	63042 Taxation of Corporations and Shareholders	3
	63043 Taxation of Partnerships and Partners	3

TOTAL 33

NOTE: If an M.S.A. student took ACCT 43014, 43020, 43033, or 43034 as a Kent State accounting undergraduate (or took comparable classes in another accounting undergraduate program), the normally required comparable graduate course (ACCT 53014, 53020, 53033 and 53034) will not be required in the M.S. program. Rather, the student will substitute an additional accounting elective for each such course.

*During the admission evaluation, some or all of the above courses might be waived by the M.S.A. coordinator depending on the related undergraduate courses the student has previously taken. The student would then choose other non-accounting graduate business courses to make up the required 9 hours of non-accounting graduate business courses.

Richard H. Kolbe, Associate Dean
rkolbe@kent.edu

DESCRIPTION: The Master of Business Administration–Executive MBA–Kent prepares students for management and staff positions in regional, national and international organizations. Curricular and co-curricular emphases are on ethical leadership, teamwork, creative problem solving, global perspectives and skillful applications of information technology. The Executive M.B.A. provides a unique and exciting approach to the study of business management for executives. The program is structured so that students take all their classes together, study in teams and interact with senior business faculty. The result is an educational experience unlike the more traditional M.B.A. programs. Upgrades in technology allow students access to the Internet, state-of-the-art computer facilities and the Vaughn Hoover Electronic Classroom as well as other executive classrooms equipped to facilitate multimedia presentations.

ADMISSION REQUIREMENTS: Official transcript(s); GMAT (GMAT or GRE for the dual-degree concentrations); goal statement; two-to-three letters of recommendation (three letters for the Executive M.B.A. and the Ph.D.); résumé; and TOEFL, IELTS, MELAB or PTE, if applicable. The Executive M.B.A. concentration also requires five years experience in a responsible position and interview with EMBA director.

GRADUATION REQUIREMENTS: The EMBA program is offered on the weekends in a concentrated 19-month format. Classes are held all day on Saturdays. One class of each eight-week term is conducted online allowing the class members to participate from home, their office or wherever they are traveling throughout the world. The program begins each year in mid-August.

The curriculum emphasizes leadership and management in a global environment using state-of-the-art technology. A ten-day International Business Experience is included midway through the program, providing participants with an applied learning experience abroad.

The Kent State University EMBA program is a highly personalized, adult-oriented and interactive educational experience. The program is academically enriching, comprehensive and challenging. Since its introduction in 1978, the EMBA program has proudly graduated more than 1000 students.

PROGRAM FEE: One competitively priced program fee includes all course materials, tuition, textbooks, international business trip, residencies, food service and parking for the entire duration of the program. To accommodate the schedules of busy professionals, all administrative functions such as disseminating textbooks and instructional material, scheduling and registering for classes and securing parking permits are arranged for the students.

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Master of Business Administration seeks to prepare students for responsible leadership positions in public, private and nonprofit organizations. Regardless of undergraduate education, the candidates will find a challenging program designed to meet their specific backgrounds and needs. The Graduate School of Management offers three M.B.A. options:

- Full-time day program
- Professional (part-time) evening program (PMBA)
- Executive program (EMBA)

Students that hold undergraduate business degrees are eligible for the accelerated M.B.A. program on either a full-time or a part-time basis.

The student has the option of taking a general M.B.A. with electives from a number of areas or selecting any of the following seven concentration, which must be a minimum of 12 hours: Accounting; Fashion Design and Merchandising; Finance; Human Resource Management; Information Systems; and International Business and Marketing. The Master of Business Administration also offers a dual degree program with the Master of Arts in Translation, Master of Architecture, Master of Science in Nursing and the Master of Library and Information Science.

The Business Administration major introduces students to the various areas of business such as accounting, marketing, human resources and operations management, and provides training in the theory and practice of business management.

Accounting concentration allows students to specialize their degree with courses in managerial and financial accounting, business valuation using financial statements and international accounting. Completion of this concentration is not sufficient to sit for the CPA exam in Ohio unless the student has an undergraduate accounting major.

Fashion Design and Merchandising concentration is available to current fashion merchandising majors at Kent State who have 90 credit hours and a minimum 3.3 GPA. Once the B.S. degree is achieved, the M.B.A. can be earned in 12 additional months.

Finance concentration allows students to specialize their degree with advanced courses in investments, financial markets and institutions, real estate and other related areas.

Human Resources concentration allows students to specialize their degree with advanced topics in employee selection and appraisal, organizational analysis and the opportunity for real-world applications.

Information Systems concentration allows students to specialize their degree with advanced topics in database management systems, emerging hardware and software technology and other related areas.

International Business concentration allows students to specialize their degree with courses in accounting, marketing, finance and strategy with an international focus. Study abroad options are possible,

with no language skills required.

Marketing allows students to specialize their degree with courses in buyer behavior, promotion management, service marketing and management and other related areas.

Dual Degree with the M.A. in Translation is designed for linguists. By combining the practices and language of business, students can pursue language-based careers in the private, public and governmental sectors.

Dual Degree with the Master of Architecture is designed for architects or undergraduate architectural students whose career goals include assuming middle or executive management positions in architectural practices, or who are interested in starting their own businesses.

Dual Degree with the Master of Science in Nursing is designed for experienced nurses whose career goals include assuming middle or executive management positions in health services agencies or in health-related companies, or who are interested in starting their own business. It combines the strengths of advanced nursing preparation with the practical management knowledge needed to develop significant leadership capabilities.

Dual Degree with the Master of Library and Information Science is designed for managers of large libraries and information centers. Individuals in these positions need knowledge pertaining to planning, organizing, staffing, directing and controlling. Advanced education to obtain knowledge and learn skills related to these management functions enables students to take advantage of career opportunities both in library settings and other information settings, both in the profit and nonprofit sectors.

The Ph.D. in Business Administration consists of nine concentrations: Accounting, Finance, Human Resource Management, Information Systems, International Economics, Marketing, Operations Management, Public Sector Economics and Strategic Management.

Accounting: Admissions into this program is suspended until fall 2011. Accounting prepares highly qualified candidates for faculty positions in colleges and universities. In addition to completing doctoral-level coursework and a dissertation, students conduct scholarly research and become effective teachers.

Finance prepares students for finance faculty positions in colleges and universities. Students complete courses in business and finance, learn how to conduct high-quality, scholarly research and be effective teachers. Completing a dissertation is the final step.

Human Resource Management provides students with comprehensive knowledge regarding the impact of employment relationships on organizations, workers and society. Students are trained to become renowned scholars and exceptional teachers. Completing a dissertation is the final step.

Information Systems creates a strong grounding in areas of behavioral, strategic and economic aspects of global IS decision-making. Students are trained to become renowned scholars and exceptional teachers. Completing a dissertation is the final step.

International Economics: Admissions into this program is suspended until fall 2013.

Marketing prepares highly qualified candidates for positions of professional responsibility in university teaching and research, or administrative and research careers in governmental and private organizations. The program offers a solid balance of teaching experience and preparation for conducting scientific research.

Operations Management trains world-class scholars to conduct research in supply-chain management, operations strategy and operations planning and control. The program emphasizes research that focuses on real problems in operations and supply-chain management and maintains a balance between theory and implementation. Completing a dissertation is the final step.

Public Sector Economics: Admissions into this program is suspended until fall 2013.

Strategic Management receive instruction in strategic management and macro-organizational theory and the methodological approaches underlying them. They also receive training on how to do appropriate doctoral-level research. Completing a dissertation is the final step.

FULL-TIME/
PART-TIME

Full-time Day M.B.A. Program: This program is for the individual who can concentrate all efforts toward earning the degree. Students in this program take three to five courses per semester and complete the degree in two years or less. Admission is only for Fall semester.

Professional Evening M.B.A. Program: The PMBA program is designed for the individual who maintains full-time employment during the day and can only attend courses at night. Students in this program take one to two courses in a semester and can take between three to five years to complete the degree. Courses are available weeknights, Monday through Thursday, and meet one night per week. The PMBA program offers flexibility and begins each semester (fall, spring, summer).

ADMISSION
REQUIREMENTS:

Official transcript(s); GMAT (GMAT or GRE for the dual-degree concentrations); goal statement; two-to-three letters of recommendation (three letters for the Executive M.B.A. and the Ph.D.); résumé; and TOEFL, IELTS, MELAB or PTE, if applicable. The Executive M.B.A. concentration also requires five years

experience in a responsible position and interview with EMBA director.

Admission is suspended until fall 2011 for the Ph.D. Accounting concentration, and suspended until fall 2013 for the Ph.D. International Economics and Public Sector Economics concentrations.

**GRADUATION
REQUIREMENTS:**

M.B.A.: Minimum of 54 total credit hours. Students who are graduates of undergraduate business programs accredited by the AACSB may be able to reduce the required coursework hours for their M.B.A. programs from 54 hours to as low as 39 hours. Students from undergraduate business programs that are not AACSB-accredited also may be eligible for reduced programs. In all instances, waiver of coursework is determined on a case-by-case basis. The student must have received a grade of "B (3.0)" or better in courses considered for waiver. Courses taken as "Pass-Fail" are not eligible for waiver.

The Ph.D. program consists of five phases: proficiency requirements, supportive coursework, concentration and minor coursework, comprehensive examinations and dissertation. The course requirements in the proficiency phase are roughly equivalent to an AACSB-accredited M.B.A. degree, and certain courses may be waived based upon completed graduate and undergraduate coursework.

**THESIS/
DISSERTATION:**

Successful completion of the comprehensive examinations and approval of a dissertation topic shall constitute admission to candidacy for the Ph.D. degree. The final phase of the Ph.D. program is the preparation of the Ph.D. dissertation. Upon completion, the dissertation is defended before a committee of the graduate faculty.

**LANGUAGE
REQUIREMENT:**

None

PROGRAM FEE:

» Business Administration - M.B.A. and Ph.D. Program Requirements

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > Graduate Programs > [Business Administration - M.B.A. and Ph.D. Program Requirements](#)

Full-Time Master of Business Administration

BUSINESS ADMINISTRATION CORE PROGRAM REQUIREMENTS (30 credits)			
Course	Title		Credits
BAD 63037	Financial Accounting-Managerial Action		3
63038	Accounting for Managerial Action and Evaluation		3
64005	Statistics for Management		3
64041	Operations Management		3
64042	Management Information Systems		3
64271	Human Resources Management		3
65051	Marketing Management		3
66061	Financial Management I		3
ECON 62021	Business Conditions Analysis and Public Policy		3
62022	Managerial Economics		3
ADDITIONAL PROGRAM REQUIREMENTS (24 credits)			
Executive Modules, Integrative Management Courses and Electives*			24
TOTAL			54

*With approval, some electives may be taken outside the Graduate School of Management.

Ph.D. Program Requirements

The Ph.D. program consists of five phases: proficiency requirements, supportive coursework, concentration and minor coursework, comprehensive examinations and dissertation. The course requirements in the proficiency phase are roughly equivalent to an AACSB-accredited M.B.A. degree, and certain courses may be waived based upon completed graduate and undergraduate coursework.

The Ph.D. program calls upon the student to complete a minimum of six courses in quantitative analysis, economic theory and other analytical courses supportive of the student's area of concentration; five courses in his or her major area; and a four-course minor.

After completion of the coursework, each student must pass comprehensive examinations in his or her major area. No universal language requirement for the Ph.D. degree in business administration is necessary.

Successful completion of the comprehensive examinations and approval of a dissertation topic shall constitute admission to candidacy for the Ph.D. degree. The final phase of the Ph.D. program is the preparation of the Ph.D. dissertation. Upon completion, the dissertation is defended before a committee of the graduate faculty.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > Graduate Programs > Economics

COLLEGE: College of Business Administration

Program Requirements

College Requirements

University Requirements

DESCRIPTION: The Master of Arts in Economics and Financial Economics provides excellent preparation for a career as an analyst in government or the private sector, and for doctoral study. One distinct advantage of the M.A.E. is its focus on the development of strong analytical and quantitative skills. Students are well-trained in the application of economic theory and methods of statistical analysis.

The Financial Economics concentration is primarily designed for students who wish to pursue careers in the financial services industry, including commercial banking, investment banking, insurance, real estate and financial advising.

ADMISSION REQUIREMENTS: Official transcript(s), GMAT or GRE, goal statement, three letters of recommendation, résumé and TOEFL, IELTS, MELAB or PTE, if applicable.

GRADUATION REQUIREMENTS: Minimum of 30 semester hours of coursework, or a minimum of 24 hours of coursework and a thesis.

Students entering the program will be expected to have completed undergraduate courses in intermediate microeconomic and macroeconomic theory, differential calculus and statistics. Any deficiencies must be made up before the start of the program. These background courses do not count toward the 30 hours required for the degree.

Both the Financial Economics and Economic Analysis tracks are built upon a set of core courses in economic theory and econometrics. The student then takes elective courses in areas such as international economics, economic development, monetary economics, labor economics, public sector economics or several courses in the Department of Finance, depending on the track chosen.

ECONOMICS PROGRAM REQUIREMENTS (30 credits)

Course	Title	Credits
ECON 62050	Microeconomics Theory I	3
62051	Macroeconomics Theory I	3
62054	Econometrics I	3
64004	Quantitative Methods in Business Administration I	3
Electives		18
TOTAL		30

For elective courses, students may select any M.A.- or Ph.D.-level economics courses subject to these restrictions:

- All choices must have the approval of the graduate coordinator.
- No more than 6 hours may be at the 50000 level
- The student must complete at least 15 hours of economics courses other than those in independent study and research (62096, 62098, etc.)

A student may also select, with departmental approval, a limited number of courses outside the Department of Economics.

Financial Economics Concentration

FINANCIAL ECONOMICS PROGRAM REQUIREMENTS (30 credits)

Course	Title	Credits

COLLEGE: [College of Business Administration](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The interdisciplinary Master of Science in Financial Engineering is for those with strong quantitative backgrounds who have career goals of becoming risk management officers, derivatives analysts or traders. The program is rigorous and requires the completion of 36 credit hours of coursework, including an industry-based project. The curriculum meets the guidelines established by the International Association of Financial Engineers.

The Financial Engineering program also partners with the WISE institute at Xiamen University in China to offer a concentration in Financial Engineering Quantitative to students who first enroll at Xiamen for one year. These students take extensive coursework in Finance, Math and Economics topics to prepare for the program. Since their preparation covers some coursework in the program, they are on a second track or concentration in this degree. Other than these coursework differences, the program is the same

ADMISSION REQUIREMENTS: Official transcript(s), GMAT or GRE, résumé and TOEFL, IELTS, MELAB or PTE, if applicable. Also required for the major but not for the Financial Engineering concentration are a goal statement and three letters of recommendation.

GRADUATION REQUIREMENTS: Financial Engineering: Minimum of 36 total credit hours. Financial Engineering Quantitative concentration requires a minimum of 32 total credit hours.

The program is a demanding one, and requires the completion of 36 credit hours of coursework, including an industry based internship. It combines strong quantitative skills from mathematics, including probability theory and numerical computing, with risk management and dynamic valuation skills from finance. The program emphasizes applied skills in the area of financial engineering, while still providing the necessary theoretical background. The coursework was designed by an industry advisory board of leading investment banks and financial firms. The board works closely with faculty to revise the content regularly. For a list of current MSFE Advisory Board Members please see www.business.kent.edu/msfe.

The on-campus electronic Olga A. Mural Financial Engineering Trading Floor allows students to receive hands-on experience in derivatives trading and risk management. Kent State has the only derivatives-oriented trading floor in an academic institution with direct connections to the futures exchanges. The trading floor is equipped with the same software used by major investment banking firms. Live exchange data feeds and real-time market information allow students to simulate real trading. The software includes Trading Technologies X Trader, Patsystems, and SunGard's MicroHedge options analytical product. Data feeds from CQG and Reuters provide continuous news and pricing information. At the front of the trading floor is a data board that provides real-time pricing information on derivatives. Students use this information to assess market conditions for trading tendencies. Live satellite feeds are shown on plasma displays.

This unique trading floor is an integral part of the MSFE program at Kent State University. Since students use the same data feeds and trading software that are used by major investment banking firms, the trading floor allows them to replicate dynamic trading strategies and derivative security analyses.

An industry-based internship is assigned. The project will involve direct interaction with a contributing firm. The student will undertake a ten-week internship to complete the required project with a firm from the financial community. The project will be presented to the program faculty for final evaluation. Prior participating firms include the Chicago Board of Trade, Eurex, Prebon Yamane, State Street Research, KeyBank, SunGard, FirstEnergy, Goldman Sachs, and ICAP. Students are given opportunities to network

with top industry officials. The class visits both the Chicago and New York financial districts to interact with professionals in the derivatives field.

PROGRAM FEE: \$2,700/semester

Financial Engineering - M.S. Program Requirements

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > Graduate Programs > [Financial Engineering - M.S. Program Requirements](#)

The MSFE program requires the completion of 36 semester hours of coursework. The quantitative prerequisites for students applying to the program are:

- Calculus: differentials, infinite series, Taylor's formula, partial derivatives, multiple integrals. Linear Algebra: matrices, vectors, determinants, linear systems of equations, linear independence, bases, eigenvalues, eigenvectors.
- Ordinary Differential Equations: 1st-order ODEs, solution techniques, initial value problems, exponential growth/decay, logistic model equilibrium, steady state 2nd-order linear constant-coefficient ODEs.
- Probability: continuous and discrete distributions, multivariate distributions and independence, ordinary and conditional expectations, Central Limit Theorem.
- Statistics: regression analysis including detection of and solutions to various violations of classic regression assumptions (heteroskedasticity, autocorrelation, multicollinearity and simultaneity).
- Computer Programming: programming ability in a highlevel language such as C, C++, Fortran (77 or 90/95), Basic, Visual Basic or Matlab.
- Economics: basic micro- and macroeconomic topics including supply and demand functions, market structure and the role of money.

Qualified students can be conditionally admitted on the basis of completing these summer workshops.

Accounting Minor

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > Minors > [Accounting](#)

Department of Accounting
College of Business Administration
Room 550, Business Administration Building
E-mail: accounting@kent.edu
Tel: 330-672-2545
Fax: 330-672-5006
Web: <http://business.kent.edu/dept/accounting>

The accounting minor is for students desiring accounting education in financial statement preparation, budgeting, costing and accounting systems at a level beyond the user of financial information but less than the preparation for being a professional accountant. The minor will be especially useful to students whose career paths are in business, not-for-profit and governmental organizations where dealing with financial issues will be an important part of their duties. The accounting minor is open to all students in all majors based on the admission requirements outlined below.

ACCOUNTING MINOR REQUIREMENTS (21 credit):

Course	Title	Credits
ACCT 23020	Introduction to Financial Accounting	3
23021	Introduction to Managerial Accounting	3
33001	Corporate Accounting I	3
33004	Introduction to Accounting Systems	3
33010	Cost Accounting	3
33012	Corporate Accounting II	3
MIS 24053	Introduction to Computer Applications	3
TOTAL		21

Requirements to declare the accounting minor:

- Officially declared major (not pre-major, general, undeclared/exploratory); however, advising is available and recommended anytime prior to declaration
- Minimum 60 semester hours completed
- Minimum 2.50 cumulative GPA
- Minimum C (2.00) grade and 2.50 average GPA for all attempts in ACCT 23020 and 23021(or equivalents)

Requirement to graduate with an accounting minor:

- Minimum 2.50 GPA (including all attempts) in the minor courses

Note: To earn a minor within the College of Business Administration, students must complete at least two courses in the minor at Kent State University on a graded basis. At least one of these courses must be at the upper-division (30000 or 40000) level.

» Business Minor

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > Minors > [Business](#)

College of Business Administration
 Academic Advising Office
 Room 107, Business Administration Building
 Tel: 330-672-2872
 Web: <http://business.kent.edu>

The business minor provides students with exposure to a basic core of business courses. Students take at least one course in each department of the College of Business Administration and, thereby, gain an overview of the world of business while pursuing a degree in another college within Kent State University (e.g., liberal arts or fine arts).

The business minor is self-contained and assumes no prior experience with business concepts. It is designed to complement students' primary career field, whatever that might be, by providing knowledge of a broad range of business functions: accounting, computers, economics, finance, management and marketing. Completion of the business minor will prepare students to understand and, to a limited extent, manage the business functions of an organization.

BUSINESS MINOR REQUIREMENTS (24 credits)			
Course	Title		Credits
ACCT	23020	Introduction to Financial Accounting	3
	23021	Introduction to Managerial Accounting	3
ECON	22060	Principles of Microeconomics	3
	22061	Principles of Macroeconomics	3
FIN	36053	Business Finance *	3
MKTG	25010	Marketing *	3
MIS	24163	Principles of Management *	3
Choose from the following:			3
CS	10061	Introduction to Computer Programming (3)	
MIS	24053	Introduction to Computer Applications (3)	
TOTAL			24

* See registration requirements in the course listing for completed hours and cumulative GPA.

Requirements to declare the business minor:

- Officially declared major (not pre-major, general, undeclared or exploratory); however, advising is available and recommended anytime prior to declaration
- Minimum 60 semester hours completed
- Minimum 2.50 cumulative GPA

Requirement to graduate with the business minor:

- Minimum 2.50 GPA (including all attempts) is required in the minor courses.

Notes:

1. To earn a College of Business Administration minor, students must complete at least two courses in the minor at Kent State University on a graded basis. At least one of these courses must be at the upper-division (30000 or 40000) level.
2. It is recommended that students pursuing a business minor take a statistics course and an operations course.
 Recommended statistics course: MATH 10041 Elementary Probability and Statistics or PSYC 21621 Quantitative Methods in Psychology I or SOC 32220 Data Analysis or MIS 24056 Fundamentals of Business Statistics
 Recommended operations course: MIS 34060 Operations Management (*prerequisites are MIS 24053 and MIS 24056*).
3. The AACSB accreditation standards prohibit non-business majors from taking more than 25 percent of their degree requirements in business courses. Therefore, maximum 32 semester credit hours may be counted toward stated degree requirements.

Personal computers and local area networks are resulting in the penetration of computer information technology into even the smallest organizations. Today, most careers involve some activities related to the creation and use of computer-based information systems. To be competitive in the current job market, it is essential to achieve proficiency in the use of computer information systems (CIS). The CIS minor is self-contained and assumes essentially no prior experience with computers or information systems. It is designed to complement the students' primary career field, whatever that might be, by providing knowledge of CIS and their applications and hands-on experience with computer technology. Completion of the minor will prepare students to design and build CIS of modest size and to participate with professional analysts, on an effective partnership basis, in the construction of large complex systems. Students also will have the ability to aid their coworkers by performing computer system support in consultative and advisory roles.

COMPUTER INFORMATION SYSTEMS MINOR REQUIREMENTS (18 credits)

Course	Title	Credits
MIS 24053	Introduction to Computer Applications*	3
24060	System Analysis I **	3
34053	Data Integration	3
34070	Principles of Systems Development **	3
Electives: choose from the following		6
MIS 34032	Data and File Technology (3)	
34033	Computer Programming for Business II (3)	
34036	Large Systems Technology (3)	
34045	Small Systems Technology (3)	
34080	Computer Programming for Business I (3)	
44042	Network Theory and Applications (3)	
44043	Data Base Management Systems (3)	
44044	Systems Analysis II (3)	
44045	Information Systems Management (3)	
44049	Network Management (3)	
44095	Special Topics (3)	
44292	Internship in Information Systems (3)	
TOTAL		18

* Course is substituted by TECH 10001 in Aviation Management concentration within the Aeronautics major.

** Students need permission prior to registering for MIS 24060 and 34070.

Requirements to declare the computer information systems minor:

- Officially declared major (not pre-major, general, undeclared or exploratory); however, advising is available and recommended anytime prior to declaration
- Minimum 60 semester hours completed
- Minimum 2.50 cumulative GPA

Requirement to graduate with the computer information systems minor:

- Minimum 2.50 GPA (including all attempts) is required in the minor courses

Notes:

1. To earn a College of Business Administration minor, students must complete at least two courses in the minor at Kent State University on a graded basis. At least one of these courses must be at the upper-division (30000 or 40000) level.
2. CIS minors may use non-CIS courses as minor electives with permission. Please meet with a faculty CIS advisor to pursue this option.
3. Double-counting of minor electives as major electives or requirements is not permitted. In other words, students should choose two CIS elective courses that are not part of the students' major.
4. COMT 21005, offered on the Regional Campuses, will be counted for MIS 34032 if the student earns a minimum B (3.0) grade in MIS 44043. Students should see an advisor either in the Undergraduate Programs Office or at the Regional Campus.

 Fax: 330-672-5006
 Web: <http://www.kent.edu/business/marketing/index.cfm>

The entrepreneurship minor is available to all majors of the university. Entrepreneurship is more than a set of tools and techniques for starting and growing a business. It's a mindset, a creative way of looking at opportunities. It's passion, doing what one loves. Entrepreneurship is about challenge, persistence and creating wealth. It is about operating a business, whether one owns it or not. The entrepreneurship minor offers students the opportunity to explore entrepreneurship regardless of their academic major. This minor is designed to bring an entrepreneurial perspective to their major field of study. Students are immersed in the entrepreneurial process through coursework, entrepreneurial projects and exposure to many entrepreneurs in the community. Students are prepared for the various aspects of starting a business, acquiring a business, corporate entrepreneurship or working for a small business.

The minor is open to 100 students at any given time, with maximum 30 of the top applicants being accepted into the program each year. Students apply for the minor and complete a personal interview for consideration. The core competencies of an entrepreneur generally vary among high-GPA students. Administrators target emerging entrepreneurs who have the drive, ambition and passion to succeed. This does not necessarily correlate with GPA, but recognizes that education is critical to future success.

ENTREPRENEURSHIP MINOR REQUIREMENTS (25 credits)

Course	Title	Credits
ACCT 23020	Introduction to Financial Accounting	3
ECON 22060	Principles of Microeconomics	3
	22061 Principles of Macroeconomics	3
ENTR 27456	Introduction to Entrepreneurship	3
	27466 Speaker Series in Entrepreneurship	1
	47091 Seminar in Entrepreneurship	3
FIN 36053	Business Finance	3
MKTG 25010	Marketing	3
	Choose from the following: General Elective	3
ENTR 37195	Special Topics in Entrepreneurship (3)	
	47195 Special Topics in Entrepreneurship (3)	
	47292 Entrepreneurship Internship (1-3)	
FDM 35280	Fashion Entrepreneurship (3)	
FIN 46295	Special Topics: Entrepreneurial Finance (3)	
TECH 43060	Management of Technology Innovation (3)	
TOTAL		25

Requirements to declare the entrepreneurship minor:

- Officially declared major (not pre-major, general, undeclared/exploratory)
- Minimum 60 semester hours completed
- Completion of a 300-350-word paper on "How I will benefit from a minor in entrepreneurship." The top candidates then complete a personal interview for final selection into the minor.

Requirement to graduate with the entrepreneurship minor:

- Minimum 2.50 GPA (including all attempts) is required in the minor courses.

Some knowledge of finance is necessary to understand and carry out work in most companies and other organizations. Profits and value creation are the "bottom lines" to which firms direct their efforts. The finance minor is designed for individuals desiring to gain some familiarity with financial management as well as the financial system of institutions and markets in which firms must operate. Some acquaintance with investment techniques may help students in managing their personal finances. The finance minor is particularly useful for business students in other majors who take the requisite courses, and other students who desire to acquire some understanding of finance without having to take all the core business school requisites. Both groups will be exposed to important fundamentals yet they also will have the flexibility to consider several areas of finance.

FINANCE MINOR REQUIREMENTS (24 credits)

Course	Title	Credits
ACCT 23020	Introduction to Financial Accounting	3
ECON 22060	Principles of Microeconomics	3
	22061 Principles of Macroeconomics	3

The competitive advantage derived from the more effective use of human resource management (HRM) policies, practices and procedures is the focus of the HRM minor. The HRM minor is relevant to a variety of students university wide who want to learn to better manage a firm's human resources. This includes, but is not limited to, students who become line managers and need to implement HR policies as they hire and manage the performance of their employees, students who become entrepreneurs and need a fundamental knowledge of HRM to run their companies more effectively, and students who become members of not-for-profit organizations and need to understand the basics of HRM because they rarely are able to hire HR staff. The curriculum of the HRM minor covers a range of topic areas taught from both theoretical and applied perspectives. Students are exposed to a wide array of HR functional areas including staffing, performance management, training, compensation, employer-employee rights and responsibilities and human resource information systems.

HUMAN RESOURCE MANAGEMENT MINOR (24 credits)

Course	Title	Credits
ACCT 23020	Introduction to Financial Accounting	3
COMM 25863	Business and Professional Communication	3

Global business is fast becoming an important part of the U.S. economy. The world that college graduates are facing will essentially be a triad of powers (the United States and, perhaps, Canada and Latin America; Europe; and Japan and its Asian neighbors) and a borderless world. This suggests a need to be trained for employment that will have international implications. Whether students take a major in business, fashion design and merchandising, the hard sciences, English or education, some training in global outreach, cultural diversity and "business cultures" will be necessary. The international business minor will introduce students to cultural issues of a broad, global nature. Students in the international business minor are encouraged to participate in Kent State or other university study-abroad programs.

BUSINESS MINOR REQUIREMENTS (24-35 credits)

Course	Title	Credits

Management Minor

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > Minors > [Management](#)

College of Business Administration
Academic Advising Office
Room 107, Business Administration Building
Tel: 330-672-2872
Web: <http://business.kent.edu>

The minor in management is intended to provide a basic core of management courses, with emphasis on strategic management, leadership and the management of employees. These courses allow students to gain an overview of managerial functions and expertise that will add value to the career preparations provided by their major programs. The minor is valuable to students outside, as well as inside, the College of Business Administration. Students are expected to satisfy all prerequisite requirements.

MANAGEMENT MINOR REQUIREMENTS (24 credits)			
Course		Title	Credits

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Business Administration > Minors > [Marketing](#)

Department of Marketing
College of Business Administration
Room 534, Business Administration Building
E-mail: marketing@bsa3.kent.edu
Tel: 330-672-2170
Fax: 330-672-5006
Web: <http://business.kent.edu/academic/mktg/default.asp>

In today's highly competitive business environment, successful managers must have a strong focus on providing customer satisfaction. This requires the ability to research consumer needs, wants and desires; understand what these mean in terms of company offerings (e.g., the marketing mix); and communicate the benefits of their products or services effectively. The marketing minor is designed to help students develop the perspectives and skills necessary to understand consumers and to provide customer satisfaction. Students completing a minor should be equipped to bring a marketing orientation to both profit and not-for-profit organizations.

MARKETING MINOR REQUIREMENTS (21 credits)

Course	Title	Credits
ECON 22060	Principles of Microeconomics	3
22061	Principles of Macroeconomics	3
MKTG 25010	Marketing	3
35035	Consumer Behavior	3
45045	Advertising and Promotion Management	3
45046	Personal Selling and Sales Management	3
45060	International Marketing	3
TOTAL		21

Requirements to declare the marketing minor:

- Officially declared major (not pre-major, general, undeclared/exploratory); however, advising is available and recommended anytime prior to declaration
- Minimum 60 semester hours completed
- Minimum 2.50 cumulative GPA

Requirement to graduate with the marketing minor:

- Minimum 2.50 GPA (including all attempts) is required in the minor courses

Notes:

1. To earn a College of Business Administration minor, students must complete at least two courses in the minor at Kent State University on a graded basis. At least one of these courses must be at the upper-division (30000 or 40000) level.
2. Marketing courses required for the minor are not be offered each semester. Students should read the Marketing Major Course Requirements for course sequencing or contact the department's undergraduate advising office before applying for the minor to determine whether they can complete the minor coursework in a timely manner.

Leadership styles, organizational structure and behavior, and a global perspective form the common ground between the military and business. This minor is a 24-credit-hour integrated program designed to enhance junior leader development and success in an increasingly competitive world. Admission to this minor requires completion of the application process and consultation with the military science or aerospace studies faculty. Please note it is not limited only to those students enrolled in one of the military's pre-conditioning programs (Air Force or Army ROTC).

MILITARY STUDIES MINOR REQUIREMENTS (24 credits)		
Course	Title	Credits
Choose one option:		12
Aerospace Studies Option		
ASTU 30101	Leadership Studies I (3)	
	30102 Leadership Studies II (3)

Web: <http://business.kent.edu>

The leadership certificate is an undergraduate interdisciplinary program that integrates contemporary scholarship and experiential learning with a cross-cultural perspective, enhancing the leadership knowledge, skills and experience of students. The certificate program meets a growing need for leadership training as a critical component of the higher education experience. Students completing the program will have the knowledge and skills to become productive and effective purposeful leaders in various types of organizations.

The certificate program incorporates a variety of approaches to leadership. Under the mentorship of various faculty and staff, students benefit from academic as well as cocurricular opportunities. The certificate program is based on a foundation of scholarly dialogue and experiential learning. Emphasis is on ethical decision-making, self-motivation, motivating others, critical thinking, teamwork, interpersonal communication and service learning.

Kent State University admission requirements apply, including assessment testing. Students may enroll in the program even if they have prior degrees. Students must declare themselves as a certificate candidate prior to completing half of the courses and must complete a minimum of 15 credits at Kent State University.

Course requirements for the leadership certificate (15 credits):

- MIS 24163 Principles of Management (3)
- MIS 44093 Workshop: Learning to Lead (3) *week-long residential experience offered during semester break periods*
- Electives (9)
A list of possible electives is available from the Undergraduate Programs Office in the College of Business Administration.

Additional requirements for the leadership certificate:

- One semester supervised leadership practicum (50 hours, on or off campus, must be approved by a mentor) and reflection paper
- Participation in 80 hours of supervised community service, including a written summary and reflection of the experience(s)
- Attendance of 30 hours at leadership development workshops
- Development of a leadership portfolio to include documentation such as written reflections, leadership course-related papers, etc.
- Successful review of portfolio by faculty and staff
- 2.50 cumulative GPA

Introduction

The disciplines represented within the College of Communication and Information emphasize different aspects of communication and information theory, research, use and practice. Yet, they all focus on the elements and means of creating, managing, using and evaluating messages, and on information components and processes that are central to communication interaction.

The evolution of digital and electronic media has blurred the distinctions and narrowed the traditional differences between and among communication and information disciplines. The College of Communication and Information provides a coherent and unified structure for the cohesive, collaborative and convergent study of human interaction and information design, production, processing, management, exchange and evaluation, while retaining the unique perspectives and content foci of programs within each of the constituent schools.

The college includes four schools: Communication Studies, Journalism and Mass Communication, Library and Information Science and Visual Communication Design.

The college links programs with a pedagogical and research interest in new technology for information and communication uses, distribution and content. In addition, the School of Communication Studies houses the Communication Instructional Resource Lab and the Communication Research Center. The School of Journalism and Mass Communication houses two centers: the Center for Scholastic Journalism and the Media Law Center for Ethics and Access. The School of Library and Information Science houses the Center for the Study of Librarianship and the Center for the Study of Information and Religion, and the School of Visual Communication Design offers workshops created for graduate students tackling multidisciplinary design research and for industry professionals engaged in interactive design methods and technology.

ORGANIZATION OF COLLEGE

School of Communication Studies

The communication studies program involves the study and practice of human communication. Coursework examines intrapersonal, interpersonal, group and public communication in various organizations and professions. We study human communication processes through language, nonverbal, argumentation and persuasive interactions. The traditions of humanistic and social scientific communication theory are infused into the program.

Undergraduate communication studies majors will complete a 15-hour core and select one of four concentrations of 15 hours in the

Taylor Hall

- » UNDERGRADUATE INFORMATION
- » GRADUATE INFORMATION
- » ORGANIZATION OF COLLEGE
- » COLLEGE FACULTY

45-credit major. The concentrations are applied communication, interpersonal communication, organizational communication and public communication.

The COMM Program

The program in communication studies is intended to enable students to lead meaningful and productive lives in interpersonal, organizational and public settings, and to prepare for a variety of careers in the professions of government, public or social service, business, industry and counseling. For those intending to continue with graduate study, the program leads to careers in college or university teaching and advanced positions in the public and private sectors.

Graduate Program

The School of Communication Studies offers programs of graduate study leading to the Master of Arts degree. The M.A. degree program is intended to provide a broad spectrum of knowledge about human communication. It is intended for those who wish to continue graduate study in communication beyond the master's level, to teach at the secondary, community college or small-college level, to continue preparation for professional careers, or to prepare for nonacademic careers in which a broad understanding of communication theory and research is desirable.

The M.A. program focuses on the social and behavioral study of communication theory and research. Students may pursue work in health, instructional, interpersonal, mediated, organizational, mass and public communication, and new technologies/social informatics. For more information, visit the school's Web site at <http://www.kent.edu/comm>.

For additional studies beyond the M.A. degree, refer to the CCI PhD program description.

School of Journalism and Mass Communication

The School of Journalism and Mass Communication offers professionally oriented programs at both the undergraduate and graduate levels to prepare students for positions in mass communication.

The school's responsibilities include training students for careers, providing leadership for persons currently working in the mass media and helping to increase public awareness of the role of the media. The curriculum is designed to provide students with the benefits of both a strong liberal arts education and professional training. Journalism and mass communication requirements make up approximately 25 percent of the students' program, with requirements in other areas and elective courses constituting the other 75 percent.

Faculty members have substantial professional experience in the mass media in addition to teaching and academic qualifications. Also, a number of area professionals teach as adjunct faculty.

The School of Journalism and Mass Communication provides professional service and leadership through seminars and professional workshops for journalists. Faculty members are active in a number of professional organizations and serve as consultants to groups in mass communication.

Journalism and mass communication majors supplement their coursework with an internship in their field of specialization. Other opportunities for practical experience include news, production, management, sales, performance and advertising positions on the campus newspaper, the [Daily Kent Stater](#), and its online edition; the campus television station, TV-2; the campus radio station, [Black Squirrel Radio](#); and the campus magazine, [the Burr](#), and its online edition.

Students also may participate in student chapters of six national professional organizations: American Advertising Federation, Journalism and Mass Communication Honorary Kappa Tau Alpha, Public Relations Student Society of America, National Association of Black Journalists, Society of Professional Journalists and the Association of Women in Communications.

Programs leading to the Bachelor of Science degree are available for students interested in a variety of electronic media. The students may look to possible careers as radio-television performers, program production personnel, producers, broadcast sales promoters and advertisers, and broadcast copy and script writers. Other options include careers in nonbroadcast and new media utilization of audio and video communication in industrial training and in public communication. Careers are applicable to both commercial and public broadcasting operations.

B.S. degree programs also are available for majors in advertising, electronic media, news, public relations and visual journalism.

Students who major in the news sequence select one of three areas of study: newspaper journalism, magazine journalism or broadcast journalism.

Students in any journalism and mass communication major may elect a minor outside or within the School of Journalism and Mass Communication.

Degree Requirements

In each of the baccalaureate degree programs, students must satisfy the 36-hour minimum stipulated in the Kent Core.

A 2.75 overall GPA at Kent State and a 2.75 GPA in JMC courses are required for graduation for both JMC majors and minors. A 2.75 overall GPA is also required to enroll in JMC courses. Students who fall below a 2.75 overall will be allowed to remain in JMC courses for which they are already registered for one more semester. They will be given one semester to bring their overall GPA up to the school minimum. Failure to do so will result in not being permitted to enroll in JMC courses until their overall GPA reaches the school minimum. In addition, no grade lower than a C- (1.70) in a JMC course will be counted toward graduation or as a prerequisite for a subsequent class.

Students must earn a B- (2.70) or better in JMC 20004 Media Writing to move on in their major. If they fail to earn a B- (2.70) or better in JMC 20004 after two attempts, they are not permitted to continue in the journalism and mass communication program.

Accreditation

The School of Journalism and Mass Communication is accredited nationally by the Accrediting Council on Education in Journalism and Mass Communication. In addition, the school holds memberships in the Ohio Newspaper Association, the Association for Education in Journalism and Mass Communication, Broadcast Education Association and the Association of Schools of Journalism and Mass Communication.

For more than 50 years, the school has sponsored the Northeastern Ohio Scholastic Press Association to encourage and guide the practice of journalism at the secondary school level.

Graduate Program

Graduate programs leading to the Master of Arts degree also are available. The School of Journalism and Mass Communication offers professionally oriented graduate study in Journalism and Mass Communication and public relations leading to the Master of Arts degree. This program prepares students for careers in a multi-platform media marketplace characterized by free enterprise and freedom of expression.

The Reporting/Editing concentration allows students to select from these options:

- Convergence
- Journalism Education
- Broadcast
- Magazine
- Newspaper

The public relations and media management concentrations are designed primarily for students with professional media experience who desire to move into PR or management positions. For those with strong professional backgrounds, an individualized program of study is also available. The degree program is designed to provide professional preparation and enhancement both for students who have undergraduate degrees and/or professional experience in journalism and mass communication and those without such background and experience. While the emphasis of the program is professional, students who wish to structure their M.A. program to provide a foundation for future study of journalism and mass communication at the doctoral level may do so by completing a thesis as the capstone requirement.

Information on the program and on application procedures is available from the Coordinator of Graduate Studies, School of Journalism and Mass Communication or by visiting the School's Web site at <http://www.jmc.kent.edu>.

Library and Information Science

Graduate Program

The school offers a graduate program, accredited by the American Library Association, which leads to a Master of Library and Information Science (M.L.I.S.) degree. An American Library Association-accredited master's degree is the basic requirement for professional employment in most libraries and information centers.

The School of Library and Information Science (S.L.I.S) prepares students for positions of leadership in librarianship and the information professions. The master's and advanced certificate programs emphasize the preparation of students for professional service in academic, public, special and school libraries and other types of information agencies.

For more information about the School of Library and Information Science, prospective students may request an information packet by contacting the School of Library and Information Science or by visiting the school's web site at <http://www.slis.kent.edu>.

School of Visual Communication Design

The mission of the School of Visual Communication Design (VCD) is to provide a comprehensive and superior professionally oriented education in the study and practice of visual communication design that will complement university studies in the liberal arts, humanities and sciences. The intention and emphasis of the visual communication design degree programs is the preparation of students for the graphic design and illustration professions; specifically, to develop technical proficiency, aesthetic sensibility and design expertise in the organization of imagery and typography to communicate information in two-dimensional form by graphics for print, video and interactive electronic multiple media, and in three-dimensional form through packaging, exhibition and environmental graphics. In support of this mission, a liberal education is a necessary foundation or catalyst to the development of perception, intellect, imagination, skill and knowledge of the history of the visual communication design field.

The School of Visual Communication Design offers three undergraduate degree programs: the Bachelor of Arts, the Bachelor of Fine Arts, Bachelor of Science and a combined Bachelor of Science/Master of Arts (or Master of Fine Arts). Stand-alone degrees of the Master of Arts and the Master of Fine Arts programs are also offered.

The [Admissions Office](#) will process all applications with respect to the general qualifications for admission to the university for new freshmen and transfer students.

The School of Visual Communication Design recognizes that competence in visual design as well as intellectual capacity are necessary qualities in students who plan to prepare for a career in visual communication design. Therefore, the right is reserved to require evidence of achievement in design and related areas from all students endeavoring to enroll for the first time as majors in the school. Early admission is recommended.

Transfer Students

Students meeting the general requirements of the university for transfer admission will be admitted to the program. Transfer credits will be evaluated on a case-by-case basis. In most situations, completion of the VCD basic coursework is a necessary prerequisite to further study. The director of the School of Visual Communication Design may impose additional requirements considered reasonable and necessary. Transfer credits are evaluated consistent with the university policy, although each student will be evaluated individually in terms of his or her ability to perform within the program. A transfer applicant's strengths and deficiencies will be considered and his or her transfer credits will reflect that consideration.

The Kent State University School of Visual Communication Design is an accredited institutional member of the National Association of Schools of Art and Design.

Information Architecture and Knowledge Management

Graduate Program

The Master of Science degree in Information Architecture and Knowledge Management (IAKM) is an interdisciplinary degree that provides opportunities for students interested in graduate studies and research in the broad range of information-related disciplines and professions. The program rests on a set of core courses that provide a broad and solid foundation for specialized work in these three concentrations:

- Health Information Management
- Knowledge Management
- User Experience Design

Through these concentrations the program offers focus and flexibility for students to fashion a course of study that suits their interests and career objectives. This flexibility is essential to the nature of the program because of the transdisciplinary character of information, the emerging and evolving roles for information professionals, and the rapid and dynamic growth of information technologies, products, systems, services and networks. The major faculties contributing to the degree are the:

- School of Communication Studies
- Department of Computer Science
- School of Journalism and Mass Communication
- School of Library and Information Science
- Graduate School of Management
- School of Visual Communication Design

While information architecture and knowledge management have emerged as fields of study and career concentrations, their use in the degree title is intended to designate significant points on a spectrum of current and emerging information and knowledge professions and to draw upon and balance the strengths of the participating disciplines.

As a new career path surfaces, IAKM works to develop curriculum to meet its demands. The current options for study in IAKM reflect the current needs in the professional landscape with concentrations in Health Information Management (HIM), Knowledge Management (KM), and User Experience Design (UXD). Health information management sets standards for electronic health records, facilitates the rapid evolution from paper-based to electronic records and the integration of hospital, patient, and physician systems. Knowledge management is a discipline that turns an organization's intellectual assets, including its recorded information, its memory, and the expertise of its employees into greater productivity and increased competitiveness. User Experience Design involves the use of information architecture and interaction design to create a user experience that helps information seekers solve their information needs efficiently and effectively, primarily in web-based environments, but also through emerging technologies. For more detailed information on health information management, knowledge management, and user experience design in IAKM, visit the Web site at <http://iakm.kent.edu>.

- General Academic Requirements

DEGREES

The college awards four undergraduate degrees: Bachelor of Arts in Communication Studies, Bachelor of Arts in Visual Communication Design, Bachelor of Fine Arts in Visual Communication Design and Bachelor of Science in Journalism and Mass Communication and in Photo-Illustration. Programs leading to the combined Bachelor of Science/Master of Fine Arts in Visual Communication Design, Master of Arts, Master of Fine Arts, Master of Library and Information Science, Master of Science in Information Architecture and Knowledge Management and Doctor of Philosophy degrees also are offered in the college.

PROGRAMS OFFERED

- Advertising
- Communication Studies
- Electronic Media
- News
- Photo-Illustration
- Public Relations
- Visual Communication Design
- Visual Journalism

ACCREDITATION

Individual undergraduate programs are accredited or approved by:

- Accrediting Council on Education in Journalism and Mass Communication
- National Association of Schools of Art and Design

ADMISSION

Selective admission criteria are used in some programs in the college. It is imperative that the student contact the individual school for detailed information.

Students with an interest in a program for which they are not qualified are admitted into the communication and information general category until requirements are met.

ACADEMIC ADVISING

Regular consultation with an academic advisor is an essential aspect of all students' personal academic management and planning. Consultation at least once each semester for scheduling advice and assistance with registration procedures is the minimum expectation.

Academic advising for students in the College of Communication and Information is provided in each of the school offices (Communication Studies majors, 135 Taylor Hall; Journalism and Mass Communication majors, 328 Franklin Hall; Visual Communication Design and Photo Illustration majors, 231 Art Building). Students who are CCI General [CCIG] majors or those not sure which field in Communication to choose are advised in Communication Studies. The school offices provide advising for transfer students and intervention and referral programs for students on academic probation that include small group and individual counseling. Students may schedule an appointment with an academic advisor online through the website, <http://cci.kent.edu/advising> and/or individual school websites.

It is the student's responsibility to seek out and use the advising resources available.

Requirement Audit

Upon completion of 60 semester hours, students are strongly advised to contact an academic advisor in their respective school to obtain a current evaluation of all progress toward completion of the chosen degree program. Requirement evaluations are not a substitute for meeting with an advisor. Questions about KAPS reports can be answered in the school advising offices.

RESPONSIBILITY FOR MEETING ALL GRADUATION REQUIREMENTS rests with students. The various advising services provided by the schools and the college are an effort to support and assist students in meeting this responsibility. Students' failure to comply with all duly publicized academic requirements, however, is not the responsibility of the university.

Transfer Advising

Students transferring into the college from another university should make an appointment in their respective school advising office to determine applicability of transfer credits to their program before registering for classes. Those seeking admission to schools or programs with specialized admissions requirements should check the school's section of this Catalog for special requirements.

GENERAL ACADEMIC REQUIREMENTS

Scholastic Requirements

All candidates for a degree in the College of Communication and Information must meet all requirements listed under the program of their major in this Catalog. In addition, students must meet the following scholastic qualifications:

- A cumulative overall GPA of at least 2.00 (C) for all courses taken at Kent State University. (Some programs require a higher overall GPA.)
- A cumulative GPA of at least 2.25 in the major and, where applicable, the minor. Certain programs require higher GPAs. Consult the degree requirements for the major as listed in this Catalog.
- Successful completion of at least 39 upper-division hours of coursework. Upper-division courses are numbered 30000-49999.

Course Substitutions

Students who desire to substitute a course for one required in their program must secure written approval from their school academic or faculty advisor prior to enrolling in the substitute course.

PEB—ROTC

No more than 4 credit hours of PEB activities courses or the first 16 credit hours of ROTC courses may apply to the 121 semester hours required for graduation.

Veterans who have completed a minimum of one year of active duty may receive PEB credit for military basic training according to branch of service, as follows: Army and Marine Corps, 3 credit hours; Navy and Coast Guard, 2 hours; Air Force, 1 hour.

Natural Sciences

Credit toward fulfilling the natural science requirement is not given for the following combinations:

- PHY 11660 and the CHEM 10050 series, the CHEM 10060 series and/or the PHY 13001 series;
- both the CHEM 10050 series and the CHEM 10060 series;
- both the PHY 13001 series and the PHY 23101 series.

Minors

Students who seek the Bachelor of Arts or Bachelor of Fine Arts degrees in some programs may be required to complete a minor. In certain circumstances, an individually planned minor may be approved upon recommendation of the director of the school in which the students are enrolled and the chairperson of the department in which the minors are proposed. However, an individualized minor is not officially recognized. Consult the program descriptions listed by the schools to determine if a minor is required.

Students may elect a minor outside or within the College of Communication and Information. Where major and minor requirements overlap, students may apply courses in both areas.

DESCRIPTION: Advertising majors study the entire spectrum of the advertising business and the social responsibilities of a persuasive media. The major prepares students for careers in creative, media planning, account management, media sales, sales promotion and direct marketing. Typical positions for new graduates include junior copywriter, assistant account executive, assistant media planner or buyer, or assistant advertising manager.

CAREER OPPORTUNITIES: Advertising careers include the creative elements of all kinds of advertising and promotional elements, including the strategic planning and execution of creative materials including print, broadcast and online; the planning and buying of all types of media including the ever expanding electronic media; account supervision, which is working with clients to help plan and execute advertising; and strategic planning and execution of direct elements, sales promotion and e-marketing.

ADMISSION REQUIREMENTS: Students first entering the university, whether from high school or transferring from another institution, are admitted directly into one of the nine JMC majors/concentrations. A Kent State GPA of 2.75 must be maintained to continue taking JMC courses.

Current Kent State students wishing to pursue a major in the School of Journalism and Mass Communication must have a GPA of 2.75 or higher to be admitted directly into one of the nine majors/concentrations.

Current Kent States students with a GPA lower than 2.75 (but 2.0 or higher) may be admitted as journalism and mass communication pre-majors.

GRADUATION REQUIREMENTS: Minimum 2.75 GPA cumulative and in major. Minimum 80 credit hours taken outside the School of Journalism and Mass Communication. Only general elective courses may be taken as pass/fail, of which maximum 12 credit hours may be taken as pass/fail. Students must meet the requirements stated in this catalog to declare a journalism and mass communication major. American Assembly of Collegiate Schools of Business accreditation standards prohibit non-business majors from taking more than 25 percent of their degree requirements in business courses. Therefore, no more than 30 semester credit hours in business may be counted toward stated degree requirements.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: \$50/semester

ACCREDITATION: Accrediting Council on Education in Journalism and Mass Communication

COLLEGE: College of Communication and Information

DEPARTMENT: School of Communication Studies
135 Taylor Hall
Tel: 330-672-2659 | Fax: 330-672-3510
E-mail: rduncan@kent.edu
Web: <http://www.kent.edu/comm>

DESCRIPTION: The Bachelor of Arts in Communication Studies comprises four concentrations: Applied Communication, Interpersonal Communication, Organizational Communication and Public Communication.

Applied Communication is a unique concentration in which students take courses not only in Communication Studies but in Journalism and Mass Communication and in Visual Communication Design. Students in this concentration gain expertise in organizational communication, advanced public speaking, professional writing, and visual design. Courses in the concentration teach students not only how to do the work of a professional communication specialist but also the theories that explain why certain messages are most effective for different types of audiences. Students also have the opportunity to learn how newer communication media such as the Internet, social networking sites, and text messaging, are changing the workplace. Applied Communication graduates leave Kent State University prepared for professional communication careers in non-profit organizations, health care organizations, small businesses and governmental agencies.

Interpersonal Communication - What are the most effective strategies for face-to-face and small-group communication? How do you interpret the nonverbal behaviors you see and hear during the act of communication? Whether you are concerned about personal communication with friends and loved ones or interpersonal communication in a business setting, interpersonal communication is an excellent concentration for students interested in understanding and improving their interpersonal communication skills and knowledge. Not all interpersonal communication is done in a traditional face-to-face setting. Students have the opportunity in this concentration to learn about the role of the Internet, social networking sites, text messaging and other new media forms in the interpersonal communication process. This is an excellent major for students interested in sales, human resources, counseling, or teaching.

Organizational Communication - Almost every college graduate will eventually go to work for an organization. The organizational communication concentration gives students the opportunity to study organizational culture and the ways in which communication occurs in organizations. Students in this concentration also take course work in business and professional communication, communication in teams, and organizational training and development. The concentration teaches students how to function effectively in an organizational setting – how to work with others and make sure they are communicating their own messages clearly and receiving clear information from others. Many students in this concentration go on to careers in training and development, human resources, or sales. This concentration also explores the latest technological developments in organizational communication, including teleconferencing, telecommuting, and social networking.

Public Communication - We all watch television, go to movies, use a wide variety of Internet sites, send text messages and twitters, listen to the radio, read magazines and newspapers. We're bombarded daily by advertising messages. Why do we choose to use certain types of media and not others, or pay more attention to some media messages than others? Public Communication is a great concentration for students interested in these kinds of questions. Students in Public Communication study media uses and effects, freedom of speech, persuasion and social influence, and the role of media in our personal,

political, and professional lives. This is an excellent concentration for anyone interested in working on political, health, or other media campaigns, attending law school or working as a lobbyist.

ADMISSION REQUIREMENTS:	To be admitted to the COMM major, students must have a minimum 2.0 cumulative GPA. Transfer students with a minimum 2.0 cumulative GPA from their previous colleges and students who meet Kent State's admission standards as entering freshmen also will be admitted to the COMM major.
GRADUATION REQUIREMENTS:	2.25 minimum major GPA. 2.00 cumulative GPA.
LANGUAGE REQUIREMENT:	None

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Communication and Information > Undergraduate Programs > [Electronic Media](#)

COLLEGE: College of Communication and Information

DEPARTMENT: School of Journalism and Mass Communication
201 Franklin Hall
Tel: 330-672-2572 | Fax: 330-672-4064
E-mail: jmc@kent.edu
Web: www.jmc.kent.edu

DESCRIPTION:

The Bachelor of Science in Electronic Media comprises three concentrations:

Electronic media production majors learn how to create audio and video programs. Students may assist in the production aspects of both Black Squirrel Radio and TV2. Graduates generally secure entry-level positions in production departments for broadcast operations or production work in studios.

Electronic media sports production majors learn how to shoot, edit, produce and create graphics for a variety of sporting events, including basketball and football. Students work both remotely in the field with a satellite truck and in the TV 2 studio to produce the games. They also learn about sports marketing and sports and the media.

Electronic media management majors study all aspects of program planning for electronic media, including understanding audiences' attitudes/motives and what types of programs attract different audiences. Graduates generally find employment in program scheduling, broadcast station management and sales fields.

CAREER OPPORTUNITIES:

Broadcast and sound engineering technicians and radio operators held about 105,000 jobs in 2006. Their employment was distributed among the following detailed occupations:

•Audio and video equipment technicians	50,000
•Broadcast technicians	38,000
•Sound engineering technicians	16,000
•Radio operators	1,500

About 30 percent worked in broadcasting (except Internet) and 17 percent worked in the motion picture, video, and sound recording industries. About 13 percent were self-employed. Television stations employ, on average, many more technicians than radio stations. Some technicians are employed in other industries, producing employee communications, sales, and training programs. Technician jobs in television and radio are located in virtually all cities; jobs in radio also are found in many small towns. The highest paying and most specialized jobs are concentrated in New York City, Los Angeles, Chicago, and Washington, DC—the originating centers for most network or news programs. Motion picture production jobs are concentrated in Los Angeles and New York City.

- University Requirements

DESCRIPTION: The Bachelor of Science in News encompasses three journalism concentrations:

In the Broadcast News concentration, students learn to report, write and produce news for television and radio stations. Students may work at TV2, which broadcasts news daily on a local cable network, Black Squirrel Radio and Kentwired.com. Graduates can find employment in radio or television news and online news sites.

In the Magazine concentration, students learn all aspects of the reporting, writing, editing and production of digital and print magazines. Students also work at The Burr, theburr.com, the Daily Kent Stater and Kentwired.com. Graduates can find writing or editing positions at magazines, newspapers or news web sites.

In the News concentration, students learn all aspects of the reporting, editing and design of print and online news. They work for the Daily Kent Stater and Kentwired.com for at least one semester as part of a reporting class and many continue their involvement beyond that course. Most graduates find employment at daily newspapers or news web sites.

CAREER OPPORTUNITIES: As technological innovation changes how news is delivered, journalists increasingly will be working for online or mobile outlets. Students learn all facets of multimedia. As the ownership of media shifts, they also are encouraged to seek out opportunities to learn about entrepreneurship in courses or projects.

ADMISSION REQUIREMENTS: Students first entering the university, whether from high school or transferring from another institution, are admitted directly into one of the nine JMC majors/concentrations. A Kent State GPA of 2.75 must be maintained to continue taking JMC courses.

Current Kent State students wishing to pursue a major in the School of Journalism and Mass Communication must have a GPA of 2.75 or higher to be admitted directly into one of the nine majors/concentrations.

Current Kent State students with a GPA lower than 2.75 (but 2.0 or higher) may be admitted as journalism and mass communication per-majors.

GRADUATION REQUIREMENTS: Minimum 2.75 GPA cumulative and in major. Minimum 80 credit hours taken outside the School of Journalism and Mass Communication. Only general elective courses may be taken as pass/fail, of which maximum 12 credit hours may be taken as pass/fail. Students must meet the requirements stated in this catalog to declare a journalism and mass communication major. American Assembly of Collegiate Schools of Business accreditation standards prohibit non-business majors from taking more than 25 percent of their degree requirements in business courses. Therefore, no more than 30 semester credit hours may be counted toward stated degree requirements.

LANGUAGE REQUIREMENT:	None
STUDY ABROAD/AWAY OPPORTUNITIES:	There are many study abroad/away opportunities, for more information contact the Office of International Affairs .
PROGRAM FEE:	\$50/semester
ACCREDITATION:	Accrediting Council on Education in Journalism and Mass Communication
STUDENT ORGANIZATIONS:	National Association of Black Journalists, Public Relations Student Society of America, National Press Photographers Association, American Advertising Federation Student Chapter, Kappa Tau Alpha. Student Media: Artemis, The Daily Kent Stater, The Burr and Cyburr, UHURU, Luna Negra, Fusion, TV2, Black Squirrel Radio, KentNewsNet.com
GRADUATE PROGRAMS:	Media Management, Public Relations, Reporting and Editing

COLLEGE: College of Communication and Information

DEPARTMENT: School of Visual Communication Design
231 Art Building
Tel: 330-672-7856 | Fax: 330-672-9714
Email: vcd@kent.edu
Web: <http://vcd.kent.edu>

DESCRIPTION: The Bachelor of Science degree in Photo Illustration is designed for students interested in careers in studio and illustrative commercial photography. Photo illustrators are intermediaries between clients and their audiences, acting as interpreters and messengers in photographic form for commerce, industry and the culture at large. Students in the program work in digital media.

CAREER OPPORTUNITIES: Photographers held about 122,000 jobs in 2006. More than half were self-employed, a much higher proportion than for most occupations. Some self-employed photographers have contracts with advertising agencies, magazine publishers, or other businesses to do individual projects for a set fee, while others operate portrait studios or provide photographs to stock-photo agencies. Most salaried photographers work in portrait or commercial photography studios; most of the others work for newspapers, magazines, and advertising agencies. Photographers work in all areas of the country, but most are employed in metropolitan areas.
(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: General Admissions for Freshman Students: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the [Admissions website for new freshmen](#).

General Admissions for Transfer Student: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the [Admissions website for transfer students](#).

GRADUATION REQUIREMENTS: Minimum 127 credit hours. Minimum 39 upper-division credit hours. Minimum 2.75 GPA in the major and 2.50 GPA overall. Students must receive a minimum B (3.0) in VCD 13000 and 13001 before enrolling in VCD 23001. VCD 13001 may be taken a maximum three times until a minimum B (3.0) grade is achieved.

LANGUAGE REQUIREMENT: No

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: \$50/semester

University Requirements

DESCRIPTION: Public Relations major study the strategic management of communication and the relationships between organizations and their key publics. Students develop skills in written, online, verbal and visual communications, as well as research and strategic thinking. The public relations program offers numerous hand-on learning opportunities. The upper division PR skills courses require students to develop plans, strategies and tactics that would be produced in the public relations field. Often, projects relate to actual client communication challenges. In PR Campaigns, students complete research and create a public relations plan for a real client. Public relations major are also required to complete 300 hours of an internship. Students also have the opportunity to apply for positions at two student-run agencies and get involved in the Kent State Chapter of the Public Relations society of America.

CAREER OPPORTUNITIES: Graduates typically secure positions in public relations firms or public relations departments at corporations, nonprofit organizations and government agencies.

From 2008-2018, public relations is expected to "grow 24 percent, much faster than the average of all occupations," according to the Bureau of Labor Statistics. A highly competitive and global business environment and shifts in economic conditions have created a greater demand for communications professionals. The growth of social media has created new opportunities for public relations professional.

Public relations professional are involved in different areas of practice including research counseling, crisis communications, internal communications, event planning, media relations, public affairs and social media.

ADMISSION REQUIREMENTS: Students first entering the university, whether from high school or transferring from another institution, are admitted directly into one of the nine JMC majors/concentrations. A Kent State GPA of 2.75 must be maintained to continue taking JMC courses.

Current Kent State students wishing to pursue a major in the School of Journalism and Mass Communication must have a GPA of 2.75 or higher to be admitted directly into one of the nine majors/concentrations.

Current Kent States students with a GPA lower than 2.75 (but 2.0 or higher) may be admitted as pre-journalism and mass communication majors.

GRADUATION REQUIREMENTS: Minimum 2.75 GPA cumulative and in major. Minimum 80 credit hours taken outside the School of Journalism and Mass Communication. Only general elective courses may be taken as pass/fail, of which maximum 12 credit hours may be taken as pass/fail. Students must meet the requirements stated in this catalog to declare a journalism and mass communication major. American Assembly of Collegiate Schools of Business accreditation standards prohibit non-business majors from taking more than 25 percent of their degree requirements in business courses. Therefore, no more than 30 semester credit hours may be counted toward stated degree requirements.

LANGUAGE REQUIREMENT:	No
STUDY ABROAD/AWAY OPPORTUNITIES:	There are many study abroad/away opportunities, for more information contact the Office of International Affairs .
PROGRAM FEE:	\$50/semester
ACCREDITATION:	Accrediting Council on Education in Journalism and Mass Communication
STUDENT ORGANIZATIONS:	National Association of Black Journalists, Public Relations Student Society of America, National Press Photographers Association, American Advertising Federation Student Chapter, Kappa Tau Alpha. Student Media: Artemis, The Daily Kent Stater, The Burr and Cyburr, UHURU, Luna Negra, Fusion, TV2, Black Squirrel Radio, Kentwired.com
GRADUATE PROGRAMS:	M.A. in Media Management, Public Relations, Reporting and Editing

- University Requirements

DESCRIPTION: The Bachelor of Arts in Visual Communication Design: the intention and emphasis of the visual communication design degree programs is the preparation of students for the graphic design and illustration professions; specifically, to develop technical proficiency, aesthetic sensibility and design expertise in the organization of imagery and typography to communicate information in two-dimensional form by graphics for print, video and interactive electronic multimedia, and in three-dimensional form through packaging, exhibition and environmental graphics.

The Bachelor of Fine Arts in Visual Communication Design is a four-and-one-half-year degree program with the option of either a minor or a senior project. It comprises three concentrations: 2-D Graphic Design, 3-D Graphic Design and Illustration.

A concentration in 2D Graphic Design is a professional career preparation for future graphic designers. Graphic designers are intermediaries between clients and their audiences, acting as interpreters, messengers and designers of information and communication in visual form for commerce, industry, and the culture at large. Those concentrating in two-dimensional graphic design work in print and online media.

A concentration in 3D Graphic Design is a professional career preparation for future graphic designers. Graphic designers are intermediaries between clients and their audiences, acting as interpreters, messengers and designers of information and communication in visual form for commerce, industry, and the culture at large. Those concentrating in three-dimensional graphic design work in packaging, environmental graphic design and wayfinding.

The illustration concentration prepares students for careers as future illustrators. Illustrators are intermediaries between clients and their audiences, acting as interpreters and messengers in visual form for commerce, industry and the culture at large. Those concentrating in illustration work in traditional and digital media.

CAREER OPPORTUNITIES: Graphic designers held about 261,000 jobs in 2006. Most graphic designers worked in specialized design services; advertising and related services; printing and related support activities; or newspaper, periodical, book, and directory publishers. Other designers produced computer graphics for computer systems design firms or motion picture production firms. A small number of designers also worked in engineering services or for management, scientific, and technical consulting firms.

About 25 percent of designers were self-employed. Many did freelance work—full time or part time—in addition to holding a salaried job in design or in another occupation.

(Source: Bureau of Labor Statistics)

ADMISSION The Bachelor of Arts

REQUIREMENTS:	<p>General Admissions for Freshman Students: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the Admissions website for new freshmen.</p> <p>General Admissions for Transfer Students: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the Admissions website for transfer students.</p> <p>The Bachelor of Fine Arts Admission to this program requires a minimum 2.75 GPA in major, 2.50 GPA overall and a B (3.0) grade in VCD 30009 Junior Portfolio Review.</p>
GRADUATION REQUIREMENTS:	<p>The Bachelor of Arts Minimum 130 credit hours. Minimum 39 upper-division credit hours. Minimum 2.75 GPA in the major and 2.50 GPA overall. Students must receive a minimum average B (3.0) calculated between VCD 13000 and 13001 before enrolling VCD 23001. VCD 13000 and 13001 may be taken a maximum three times until a minimum average B grade is achieved.</p> <p>The Bachelor of Fine Arts Minimum 136 credit hours. Minimum 39 upper-division credit hours. Minimum 2.75 GPA in the major and 2.50 GPA overall. Students must receive a minimum average B (3.0) calculated between VCD 13000 and 13001 before enrolling VCD 23001. VCD 13000 and 13001 may be taken a maximum three times until a minimum average B grade is achieved. Students must earn a B (3.00) grade in VCD 30009 Junior Portfolio to remain in the major.</p>

Information Design (18-20)	
Photojournalism (21-22)	
MINIMUM TOTAL	124

* Visual journalism majors can place out of JMC 20004 and be placed directly into JMC 26001 under the following condition: Students not yet enrolled in JMC 20004 but who score at least a 75 on the GUP test on their first attempt may take a writing exam. If they pass the exam and have all other prerequisites for newswriting completed, they are eligible to enroll in JMC 26001. Students who take this option must choose an additional upper-division writing course from the following: JMC 40004, 40005, 40012, 46006, 46007, 46009, 46021, 46052 or 46054. If JMC 20004 is taken a minimum B- (2.70) grade must be earned within two attempts in order to move forward in the major.

**A minimum C (2.0) grade must be earned. A minimum C (2.0) grade must be earned in JMC 40010 to fulfill the writing-intensive requirement.

Information Design Concentration

- [Roadmaps](#)
- [Program Requirements](#)
- [College Requirements](#)
- [University Requirements](#)

DESCRIPTION: The Bachelor of Science in Visual Journalism comprises two concentrations: Information Design and Photojournalism.

Information design majors study the visual presentation of news. Students also may work on visual presentation of news for The Daily Kent Stater, The Burr and Kentwired.com. Graduates can find employment as page designers or copy editors at traditional newspapers and magazines or at online publications.

Photojournalism majors study the visual reporting of news. This major is for students who have good visual perception and want to demonstrate this skill through photography. A dynamic portfolio is needed to break into this career, and the courses are geared toward producing one. Graduates find employment at newspapers, magazines or other print publications as well as online publications where visual presentation of news is required.

CAREER OPPORTUNITIES: Photographers held about 122,000 jobs in 2006. More than half were self-employed, a much higher proportion than for most occupations. Some self-employed photographers have contracts with advertising agencies, magazine publishers, or other businesses to do individual projects for a set fee, while others operate portrait studios or provide photographs to stock-photo agencies.

Most salaried photographers work in portrait or commercial photography studios; most of the others work for newspapers, magazines, and advertising agencies. Photographers work in all areas of the country, but most are employed in metropolitan areas.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students first entering the university, whether from high school or transferring from another institution, are admitted directly into one of the nine JMC majors/concentrations. A Kent State GPA of 2.75 must be maintained to continue taking JMC courses.

Current Kent State students wishing to pursue a major in the School of Journalism and Mass Communication must have a GPA of 2.75 or higher to be admitted directly into one of the nine majors/concentrations.

Current Kent State students with a GPA lower than 2.75 (but 2.0 or higher) may be admitted as journalism and mass communication per-majors.

GRADUATION REQUIREMENTS: Minimum 2.75 GPA cumulative and in major. Minimum 80 credit hours taken outside the School of Journalism and Mass Communication. Only general elective courses may be taken as pass/fail, of which maximum 12 credit hours may be taken as pass/fail. Students must meet the requirements stated in this catalog to declare a journalism and mass communication major. American Assembly of Collegiate Schools of Business accreditation standards prohibit non-business majors from taking more than 25 percent of

their degree requirements in business courses. Therefore, no more than 30 semester credit hours may be counted toward stated degree requirements.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: \$50/semester

ACCREDITATION: Accrediting Council on Education in Journalism and Mass Communication

STUDENT ORGANIZATIONS: National Association of Black Journalists, Public Relations Student Society of America, National Press Photographers Association, American Advertising Federation Student Chapter, Kappa Tau Alpha. Student Media: Artemis, The Daily Kent Stater, The Burr and Cyburr, UHURU, Luna Negra, Fusion, TV2, Black Squirrel Radio, Kentwired.com

GRADUATE PROGRAMS: M.A. in Media Management, Public Relations, Reporting and Editing

Kent State University Catalog 2011 > Colleges and Programs > College of Communication and Information > [Graduate Programs](#)

The College of Communication and Information consists of four schools whose missions share complementary concerns and emphasize different aspects of communication and information theory, research and practice. They all focus on scholarly investigations regarding the elements and means of creating, managing, using and evaluating messages, and on information components and processes that underpin communication.

The college includes graduate programs in each of the four schools as well as housing the interdisciplinary M.S. program in Information Architecture and Knowledge Management and the interdisciplinary Ph.D. program in Communication and Information.

Master's Degree Programs

Master's degree programs are available in each of the following disciplines:

- Communication Studies (M.A.)
- Information Architecture and Knowledge Management (M.S.)
- Journalism and Mass Communication (M.A.)
- Library and Information Science (M.L.I.S.)
- Visual Communication Design (M.A., M.F.A.)

Information regarding individual graduate programs is provided on subsequent pages. Prospective students may obtain more information by visiting <http://www.kent.edu/ccj> or by contacting the individual schools.

Doctor of Philosophy

This degree program is designed to prepare individuals for traditional and emerging careers in teaching, research, and administration in the rapidly converging fields of communication and information through a prescribed core of interdisciplinary courses and supervised selection of elective coursework within and across disciplines.

Admission

The doctoral program in communication and information is strongly research oriented. Applicants for the Ph.D. program normally are expected to have completed a thesis in their Master's program. Admission is restricted to the most promising applicants. Applications are viewed holistically to evaluate the student's likelihood of success in the CCI Ph.D. program. Applicants normally are accepted for admission only for the fall semester, and the deadline for all application materials is February 1.

In addition to regular application requirements of the university, admission to the CCI Doctor of Philosophy program normally requires the following:

- Completion of the academic requirements of a Master's degree in one of the disciplines represented in the College of Communication and Information or a discipline related to the applicant's proposed course of study. Applicants with academic preparation in other fields may be required to enroll in preparatory coursework at the Master's level that will not count toward the Ph.D. degree.
- A minimum 3.3 (where A=4.0) graduate GPA (GPA above 3.5 recommended).
- A verbal score of 600 and quantitative score of 600 on the Graduate Record Examination.
- Superior letters of recommendation from those in a position to evaluate graduate academic performance and potential.
- A statement of academic goals and intended topics of study that are compatible with the focus of the college's doctoral program.
- A sample of superior scholarly writing (published paper, major term paper, thesis chapter, etc.).

International applicants normally are expected to achieve a minimum score of 590 on the paper-based TOEFL examination or the

equivalent in another testing format.

Applicants who do not meet all of the requirements listed above but who have otherwise exceptional credentials may apply and may be admitted conditionally.

Communication Studies

The School of Communication Studies offers programs of graduate study leading to the Master of Arts degree. The M.A. degree program is intended to provide a broad spectrum of knowledge about human communication in various social contexts and ways in which information is produced and processed.

With this solid training in theory, research and teaching, many graduates go on to pursue a doctorate degree at prestigious universities, teach at the secondary, community college or small-college level, work in areas such as marketing, fundraising, event planning, non-profit organizations, sales, media stations, campaign teams and community relations. The Master of Arts in communication studies program also prepares individuals for non-academic careers in which a broad understanding of communication theory and research is desirable.

The M.A. program focuses on the social and behavioral study of communication theory and research. Students may specialize in one or a combination of two of these areas of study:

- Health Communication
- Interpersonal Communication
- Mediated/Mass Communication

Students are able to choose one of four degree completion options that best fits their career needs:

- Thesis
- Coursework only
- Project
- Internship

Review of assistantship applications begins January 15th for fall semester and November 15th for spring semester. For more information, visit the school's Web site at www.kent.edu/comm.

For additional studies beyond the M.A. degree, refer to the CCI Ph.D. program description.

Information Architecture and Knowledge Management

The Master of Science degree in Information Architecture and Knowledge Management (IAKM) is an interdisciplinary degree that provides opportunities for students interested in graduate studies and research in the broad range of information-related disciplines and professions. The program rests on a set of core courses that provide a broad and solid foundation for specialized work in these three concentrations:

- Health Informatics
- Knowledge Management
- User Experience Design

Through these concentrations the program offers focus and flexibility for students to fashion a course of study that suits their interests and career objectives. This flexibility is essential to the nature of the program because of the transdisciplinary character of information, the emerging and evolving roles for information professionals, and the rapid and dynamic growth of information technologies, products, systems, services and networks. The major faculties contributing to the degree are the:

- School of Communication Studies
- Department of Computer Science
- School of Journalism and Mass Communication
- School of Library and Information Science
- Graduate School of Management
- School of Visual Communication Design

While information architecture and knowledge management have emerged as fields of study and career concentrations, their use in the degree title is intended to designate significant points on a spectrum of current and emerging information and knowledge professions and to draw upon and balance the strengths of the participating disciplines.

As a new career path surfaces, IAKM works to develop curriculum to meet its demands. The current options for study in IAKM reflect the current needs in the professional landscape with concentrations in Health Informatics (HI), Knowledge Management (KM), and User Experience Design (UXD). Health informatics sets standards for electronic health records, facilitates the rapid evolution from paper-based to electronic records and the integration of hospital, patient, and physician systems. Knowledge management is a discipline that turns an organization's intellectual assets, including its recorded information, its memory, and the expertise of its employees into greater productivity and increased competitiveness. User experience design involves the use of information architecture and interaction design to create a user experience that helps information seekers solve their information needs efficiently and effectively, primarily in web-based environments, but also through emerging technologies. For more detailed information on health informatics, knowledge management, and user experience design in IAKM, visit the Web site at <http://iakm.kent.edu>.

Journalism and Mass Communication

The School of Journalism and Mass Communication offers professionally oriented graduate study in Journalism and Mass Communication and public relations leading to the Master of Arts degree. This program prepares students for careers in a multi-platform media marketplace characterized by free enterprise and freedom of expression.

The Reporting/Editing concentration allows students to select from these options:

- Convergence
- Journalism Educators
- Broadcast
- Magazine
- Newspaper

The public relations and media management concentrations are designed primarily for students with professional media experience who desire to move into PR or management positions. For those with strong professional backgrounds, an individualized program of study also is available. The degree program is designed to provide professional preparation and enhancement both for students who have undergraduate degrees and/or professional experience in journalism and mass communication and those without such background and experience. While the emphasis of the program is professional, students who wish to structure their M.A. program to provide a foundation for future study of journalism and mass communication at the doctoral level may do so by completing a thesis as the capstone requirement.

Information on the program and on application procedures is available from the Coordinator of Graduate Studies, School of Journalism and Mass Communication or by visiting the School's Web site at <http://jmc.kent.edu>.

Library and Information Science

The school offers a graduate program, accredited by the American Library Association, which leads to a Master of Library and Information Science (M.L.I.S.) degree. An American Library Association-accredited master's degree is the basic requirement for professional employment in most libraries and information centers.

The School of Library and Information Science (S.L.I.S) prepares students for positions of leadership in librarianship and the information professions. The master's and advanced certificate programs emphasize the preparation of students for professional service in academic, public, special and school libraries and other types of information agencies.

For more information about the School of Library and Information Science, prospective students may request an information packet by contacting the School of Library and Information Science or by visiting the school's web site at <http://www.slis.kent.edu>.

Admission

Prospective students should complete the application process no later than September 15 for spring admission, January 15 for summer admission and March 15 for the fall semester. For further details on admission procedures and deadlines, prospective students should consult the school's web site at <http://www.slis.kent.edu>.

Visual Communication Design

The School of Visual Communication Design offers graduate study leading to the Master of Arts and Master of Fine Arts degrees. The programs are 32 semester hours and 60 semester hours respectively. The School of Visual Communication Design is accredited by the National Association of Schools of Art and Design.

Admission

In addition to regular application requirements of the university, admission to Master of Arts or Master of Fine Arts programs require the following:

- An undergraduate degree in graphic design or illustration (3.0 major GPA on a 4.0 scale).
- Three letters of recommendation from persons who are themselves in the applicant's proposed field of study or a closely related area.
- A portfolio that shows an emphasis in the proposed area of studio interest. The portfolio is typically 15-20 samples of personal professional work, clearly identified with appropriate background information, presented in a Macintosh compatible digital format.
- A 250-word autobiographical statement.

Visits to the School of Visual Communication Design preceding the application are recommended.

Review of applications will begin February 15. special consideration will be given to applicants who successfully submit all application materials by March 1.

Advising

After a person is admitted to the program and notifies the graduate coordinator of his or her intention to enroll, a graduate advisor is assigned to help plan a course of study and to familiarize the student with the procedures of the school. To help in the planning of the student's program of study, the newly admitted student should share examples of his or her work with the graduate advisor.

Multiple Degrees Option

Students can concurrently pursue the Master of Arts in Journalism and Mass Communication and Master of Science in Information Architecture and Knowledge Management or a Master of Library and Information Science and a Master of Science in Information

Architecture and Knowledge Management. Students apply to both the master's program in Information Architecture and Knowledge Management and to the School of Journalism and Mass Communication or to the School of Library and Information Science. Each program or school makes an independent admission decision. If approved for admission by both the program and the school, students may doubly count up to 28 credits for each degree, although, based on the combination of the concentrations taken in each degree, the actual number will range from 12 to 28.

Many job opportunities in Library and Information Science require a Master of Library and Information Science degree from an accredited school of library and information science. The Master of Library and Information Science enjoys such accreditation from the American Library Association (ALA). However, students may find that their IAKM skills could be applied in a library or information center. For them to secure jobs more easily in such settings, an ALA-accredited degree is almost always demanded. In addition, courses in the IAKM program will provide enhanced employment options and a more diverse education that will allow them to pursue jobs beyond the traditional settings for students in Library and Information Science.

Similarly, students working on a master's degree in Journalism and Mass Communication may also wish to seek traditional careers for majors in Journalism and Mass Communication, such as newspaper reporters, editors or media managers. Having a master's degree in this area would provide clear credentials for these jobs. Having the multiple degrees will provide additional and enhanced skills and additional employment opportunities.

DESCRIPTION: This degree program is designed to prepare individuals for traditional and emerging careers in teaching, research, and administration in the rapidly converging fields of communication and information through a prescribed core of interdisciplinary courses and supervised selection of elective coursework within and across disciplines.

The doctoral program of study is flexibly structured. It is designed to provide both a broad interdisciplinary core of knowledge about communication and information theory and research, and an individualized selection of electives developed by students in consultation with their advisors and supervisory committees. Students should begin developing their programs of study during their first semester and have them approved by the time they have completed 15 semester hours. Those students seeking a more traditional doctoral preparation may wish to adopt model programs of study in such areas as interpersonal communication, health communication, mass communication, mediated communication, library and information science, information architecture or knowledge management. Students also are given freedom to create unique programs of study combining various facets of the disciplines within the college. All proposed programs of study are subject to stringent review by the College Doctoral Program Policy Committee. Students are expected to become engaged in a variety of research projects before they begin dissertation work.

ADMISSION REQUIREMENTS: The doctoral program in communication and information is strongly research oriented. Applicants for the Ph.D. program normally are expected to have completed a thesis in their Master's program. Admission is restricted to the most promising applicants. Applications are viewed holistically to evaluate the student's likelihood of success in the CCI Ph.D. program. Applicants normally are accepted for admission only for the fall semester, and the deadline for all application materials is February 1.

In addition to regular application requirements of the university, admission to the CCI Doctor of Philosophy program normally requires the following:

- Completion of the academic requirements of a Master's degree in one of the disciplines represented in the College of Communication and Information or a discipline related to the applicant's proposed course of study. Applicants with academic preparation in other fields may be required to enroll in preparatory coursework at the Master's level that will not count toward the Ph.D. degree.
- A minimum 3.3 (where A=4.0) graduate GPA (GPA above 3.5 recommended).
- A verbal score of 600 and quantitative score of 600 on the Graduate Record Examination.
- Superior letters of recommendation from those in a position to evaluate graduate academic performance and potential.
- A statement of academic goals and intended topics of study that are compatible with the focus of the college's doctoral program.
- A sample of superior scholarly writing (published paper, major term paper, thesis chapter, etc.).

International applicants normally are expected to achieve a minimum score of 590 on the paper-based TOEFL examination or the equivalent in another testing format.

Applicants who do not meet all of the requirements listed above but who have otherwise exceptional credentials may apply and may be admitted conditionally.

GRADUATION REQUIREMENTS: The Ph.D. program in Communication and Information requires a minimum of 45 semester hours of graduate credit beyond the Master's degree and 30 semester hours of dissertation work for a total of 75 semester hours.

CANDIDACY: To achieve candidacy, doctoral students must pass the doctoral comprehensive examination.

DISSERTATION: Yes

DESCRIPTION:

The School of Communication Studies offers programs of graduate study leading to the Master of Arts degree. The M.A. degree program is intended to provide a broad spectrum of knowledge about human communication in various social contexts and ways in which information is produced and processed.

With this solid training in theory, research and teaching, many graduates go on to pursue a doctorate degree at prestigious universities, teach at the secondary, community college or small-college level, work in areas such as marketing, fundraising, event planning, non-profit organizations, sales, media stations, campaign teams and community relations. The Master of Arts in communication studies program also prepares individuals for non-academic careers in which a broad understanding of communication theory and research is desirable.

The M.A. program focuses on the social and behavioral study of communication theory and research. Students may specialize in one or a combination of two of these areas of study:

- Health Communication
- Interpersonal Communication
- Mediated/Mass Communication

Students are able to choose one of four degree completion options that best fits their career needs:

- Thesis
- Coursework only
- Project
- Internship

Review of assistantship applications begins January 15th for fall semester and November 15th for spring semester. For more information, visit the school's Web site at www.kent.edu/comm.

For additional studies beyond the M.A. degree, refer to the CCI Ph.D. program description.

Program Requirements

College Requirements

Academic Policies

ADMISSION REQUIREMENTS:	Official transcript(s), three letters of recommendation, GRE, TOEFL for international students, goal statement and sample of scholarly writing.
GRADUATION REQUIREMENTS:	The M.A. degree in Communication Studies requires a minimum of 32 semester hours of graduate credit. Core courses include COMM 65000, 65020, 65652 and 65794 for those holding graduate assistantships. In consultation with their advisor and the Graduate Studies Committee, students develop an approved program of study once they have completed 8 credits in the master's program.
THESIS/ DISSERTATION:	Students are able to choose one of four degree completion options that best fits their career needs: <ul style="list-style-type: none">• Thesis• Coursework only• Project• Internship
PROGRAM FEE:	None

DESCRIPTION: The Master of Science in Information Architecture and Knowledge Management consists of three concentrations: Health Informatics, Knowledge Management and User Experience Design.

Health Informatics is the science of evaluating, implementing, and utilizing technology to manage all information related to the patient care delivery process: clinical, financial, technological and enterprise-wide. We describe the health informatics discipline by considering three major components. The Information Systems component focuses on such issues as information systems analysis, design, implementation, management and leadership. The Informatics component is concerned with the study of structure, function and transfer of information, socio-technical aspects of health computing, and human-computer interaction. Lastly, the Information Technology component focuses on computer networks, database and systems administration, security, and programming. The field draws contributions from computer science, health informatics, the clinical sciences, social and organizational influences and business practices. Health informatics professionals typically work in managerial, analytical, consultative and executive roles.

The skills and tools required to manage a knowledge organization build upon, but are different from, those required to manage an industrial-era organization. These new skills and tools are found in the emerging domain of Knowledge Management (KM). KM organizations of all types, in all sectors of the economy, face a growing need for knowledge management professionals. In fact, knowledge organizations are created and sustained by KM professionals working side by side with corporate executives, business and subject matter experts. A knowledge organization works smarter at the organizational, the community and the individual level because KM professionals envision and strategically manage the organization's knowledge, design knowledge architectures and build technologies that enable the organization to work smarter, and facilitate KM on a daily basis. Kent State is taking a leadership role in developing standards and competencies that define the field. It offers the only courses that are part of an accredited program, and thus provides a depth and breadth not available elsewhere. Students in KM at Kent State get a firm foundation from full-time faculty as well as KM experts currently implementing successful projects through online courses. They learn best practices from their fellow students, many of whom are also professionals working in KM. And through courses or internships, they get real-world, practical experience.

User Experience Design embraces a variety of components: information architecture, interaction design, visual design and usability studies. Information architecture provides insight on such issues as the organization of information, navigation and labeling systems and project management for websites. Interaction design focuses on the facilitation of the dialog and engagement of the user with an information or communication technology system or interface. Visual design provides expertise on the organization and deployment of graphics and other visual components for efficient and effective communication. Usability studies analyze users and their needs and assess the actual effectiveness of specific systems and interfaces. The program orchestrates these components for a cohesive, coherent user experience in an information environment that has become increasingly richer and more sophisticated, with new forms of technologies (e.g. mobile devices) and with new interaction capabilities (e.g. multi-touch interfaces).

ADMISSION REQUIREMENTS: Official transcript(s), three letters of recommendation, TOEFL for international students, goal statement and resume.

GRADUATION REQUIREMENTS:	A minimum of 42 credit hours in accordance with the program plan is required for the degree. A seven-course, 21-credit core is required of all students.
THESIS:	To complete the Master of Science, students must submit one of these: A Thesis (6 credits), Master's Project (3 credits) or Capstone Experience (3 credits)
PROGRAM FEE:	None
STUDENT ORGANIZATIONS:	Information Society

Information Architecture and Knowledge Management - M.S. Program Requirements

Kent State University Catalog 2011 > Colleges and Programs > College of Communication and Information > Graduate Programs > [Information Architecture and Knowledge Management - M.S. Program Requirements](#)

- Health Informatics
- Knowledge Management
- User Experience Design

I. CORE PROGRAM REQUIREMENTS (6 credits)

Course	Title	Credits
IAKM 60001	Information Architecture and Knowledge Management in Context	3
60002	Knowledge Organization Structures, Systems and Services	3

II. CONCENTRATION PROGRAM REQUIREMENTS (33 credits)

Choose one of the following concentrations

Health Informatics

IAKM 60301	Foundational Principles of Knowledge Management	3
60304	Research Methods for Knowledge Management	3
60401	Health Informatics Management	3
60402	Legal Issues in Health Informatics	3
60403	Health Information Systems	3

Electives: choose from the following: *six elective courses whether in their own area of concentration or from any of the other concentrations* 18

IAKM 60410	Health Records Management (3)	
60691	Seminar in Information Architecture and Knowledge Management (1-3)	
61095	Special Topics in Information Architecture and Knowledge Management (1-3)	

Courses from other concentration or approved courses from participating disciplines: BAD, COMM, CS, JMC, VCD.

Knowledge Management

ECON 62015	Economics of Information	3
IAKM 60301	Foundational Principles of Knowledge Management	3
60302	Document and Records Management	3
60303	Effective Knowledge Management in Organizations	3
60304	Research Methods for Knowledge Management	3

Electives: choose from the following: *six elective courses whether in their own area of concentration or from any of the other concentrations* 18

IAKM 60105	Information Technologies (3)	
60310	Intellectual Capital Management (3)	
60311	Business Process Management (3)	
60312	Business Intelligence-Competitive Intelligence (3)	
60313	Strategic Knowledge Management-Virtual Communities (3)	
60691	Seminar in Information Architecture and Knowledge Management (1-3)	
61095	Special Topics in Information Architecture and Knowledge Management (1-3)	

Courses from other concentration or approved courses from participating disciplines: BAD, COMM, CS, JMC, VCD.

User Experience Design

IAKM 60101	Information Architecture	3
60102	Information and Visual Design	3
60103	Researching the User Experience	3
60104	Usability I	3
60105	Information Technologies	3

Electives: choose from the following: <i>six elective courses whether in their own area of concentration or from any of the other concentrations</i>			18
IAKM	60110	Content Management Systems (3)	
	60111	Online Branding (3)	
	60112	Advanced Information Architecture (3)	
	60113	User and Task Analysis (3)	
	60114	Usability II (3)	
	60691	Seminar in Information Architecture and Knowledge Management (1-3)	
	61095	Special Topics in Information Architecture and Knowledge Management (1-3)	
Courses from other concentration or approved courses from participating disciplines: BAD, COMM, CS, JMC, VCD.			
III. THESIS, MASTER'S PROJECT OR CAPSTONE EXPERIENCE REQUIREMENTS (3-6 credits)			
IAKM	61081	Capstone Experience	3
	61098	Master's Project	3
	61199	Thesis I	6
MINIMUM TOTAL			42

Based on the student's education and/or experience, and with appropriate and adequate evidence, he/she may petition to substitute one or more of the core courses with electives. Courses equivalent to the core may be submitted with the approval of the Program Director and the student's advisor. Cognate and elective courses in related departments must be selected and approved by the Program Director and the student's advisor.

Multiple Degrees Option

Students can concurrently pursue the and the Master of Science in Information Architecture and Knowledge Management and Master of Arts in Journalism and Mass Communication or Master of Library and Information Science. Each program makes an independent admission decision. If approved for admission by both the program and the school, students may doubly count up to 28 credits for each degree.

Web: www.jmc.kent.edu

DESCRIPTION:

The Master of Arts in Journalism and Mass Communication consists of seven concentrations: Media Management; Public Relations; and Reporting/Editing: Journalism Educators, Broadcasting, Magazine, Newspaper, Convergence.

The Media Management concentration provides a stimulating and challenging environment in which students can learn the principles of effective management from professors who are accomplished both professionally and academically.

The Public Relations concentration, also available 100 percent online, accommodates the needs of students who wish to pursue a management-level career at a public relations firm or at an in-house public relations department.

The Reporting/Editing: Journalism Educators concentration caters to those who want to teach high school journalism. By offering hands-on, engaging courses—such as reporting public affairs, computer-assisted reporting, online journalism, legal problems for mass media and design for cybermedia—the program readies our students to better prepare their students upon graduation.

The Reporting/Editing: Broadcasting concentration focuses on educating students who want to become reporters or producers of broadcast content. Through such courses as documentary, advanced broadcast news and online journalism, the program readies students to be leaders in their chosen field upon graduation.

The Reporting/Editing: Magazine concentration is for students who want to become writers, editors or magazine publishers. Courses such as magazine publishing, feature writing, specialized reporting and design for cybermedia will enable students to be competitive in the burgeoning magazine field.

The Reporting/Editing: Newspaper concentration is for students who want to become writers or editors for traditional newspapers. This concentration features courses such as reporting public affairs, computer-assisted reporting and specialized reporting to prepare students for careers in print journalism.

The Reporting/Editing: Convergence concentration is for students who want to become content providers for traditional and online media companies, across all platforms. This concentration features a combination of elements including reporting public affairs, computer-assisted reporting and design for cybermedia, along with online journalism and collaborative online production.

ADMISSION REQUIREMENTS: Official transcript(s), three letters of recommendation, GRE, TOEFL for international students, goal statement and statement of desired concentration.

GRADUATION REQUIREMENTS: Students must successfully complete a minimum of 36 semester hours of graduate credit. All students complete a common core of conceptual courses in addition to required professional courses for each concentration. Approved electives include theoretical, conceptual and professional courses in journalism and mass communication. Electives from other academic units of the university may be approved through consultation with the student's academic adviser. Students choose among master's professional project,

[M.L.I.S. Program Requirements](#)

[Dual Degree Program Requirements](#)

[College Requirements](#)

[Academic Policies](#)

DESCRIPTION: The Master of Library and Information Science prepares students for positions of leadership in librarianship and the information professions. The program emphasizes the preparation of students for professional service in academic, public, special and school libraries and other types of information agencies. Kent State offers the only American Library Association-accredited M.L.I.S. degree program in Ohio. An M.L.I.S. degree is the basic requirement for professional employment in most libraries and information centers.

This degree program is available 100 percent online.

Students seeking School Library Media licensure have three pathway options in the School of Library and Information Science:

1. For students who have a teaching credential: M.L.I.S degree with K-12 School Library Media Licensure is a 39-credit-hour course of study that prepares students to work in all types of libraries, including school libraries. The program includes library science and instructional technology courses.
2. For students who do not have a teaching credential: Dual Degree M.Ed./M.L.I.S. degrees with K-12 School Library Media Licensure is a 57-credit-hour course of study, offered in cooperation with the College of Education, Health and Human Services. It prepares students to work in all types of libraries including school libraries and confers initial teaching license. The program includes professional educational requirements, library science and instructional technology courses.
3. K-12 School Library Media Licensure is a 29-credit-hour non-degree course of study that prepares students to work in school libraries only. The program includes library science and instructional technology courses.

Note: Conferral of a school library media license requires successful completion of the Praxis exam in library media (#0311) and a practicum.

Dual Degree with the Master of Business Administration is for managers of large libraries and information centers. Individuals in these positions need knowledge pertaining to planning, organizing, staffing, directing and controlling. Advanced education to obtain knowledge and learn skills related to these management functions enables students to take advantage of career opportunities both in library settings and other information settings, in the profit and non-profit sectors.

ADMISSION REQUIREMENTS: Official transcript(s), three letters of recommendation, GRE if GPA is below 3.0, TOEFL for international students, goal statement and biographical sketch.

GRADUATION REQUIREMENTS: The Master of Library and Information Science degree requires a minimum of 36 hours.

THESIS: Students must choose between a 3-hour culminating experience (LIS 60670) or a 6-hour master's thesis to meet degree requirements.

PROGRAM FEE: None

ACCREDITATION: American Library Association

			TOTAL 29

Special Note:

This program does not have any electives; all courses listed above are required. Students **must** have current standard teaching credentials in the State of Ohio to follow the school library media licensure program. Students are responsible for completing licensure paperwork requirements through the Kent State University College of Education near the end of or at the conclusion of their SLIS

program.

Praxis Exam in Library Media (Test Code #0311) required for licensure.

Multiple Degrees Option

Students can concurrently pursue the Master of Library and Information Sciences and the Master of Science in Information Architecture and Knowledge Management. Each program makes an independent admission decision. If approved for admission by both the program and the school, students may doubly count up to 28 credits for each degree. For further information about the master's program in Information Architecture and Knowledge Management, see the Information Architecture and Knowledge Management section of the catalog.

Visual Communication Design - M.A. and M.F.A.

Kent State University Catalog 2011 > Colleges and Programs > College of Communication and Information > Graduate Programs > Visual Communication Design

COLLEGE: College of Communication and Information

DEPARTMENT: School of Visual Communication Design
 231 Art Building
 Tel: 330-672-7856
 E-mail: vcd@kent.edu
 Web: <http://vcd.kent.edu>

- M.A. and M.F.A. Program Requirements
- College Requirements
- Academic Policies

DESCRIPTION: The Master of Arts in Visual Communication Design is recommended for students with undergraduate degrees in design or related fields wishing to advance their studio skills in print design, illustration, web design, 3-D design, motion graphics, interactive design, corporate identity, information architecture, interaction design or information graphics. The program offers individualized plans of study, experiential learning, design history and research. Interdisciplinary study is encouraged.

A terminal degree, the Master of Fine Arts in Visual Communication Design is recommended for students with undergraduate degrees in design or related fields wishing to enter a career in higher education instruction as well as advance their studio skills in one or more of the following: print design, illustration, web design, 3-D design, motion graphics, interactive design, corporate identity, information architecture, interaction design or information graphics. The program offers graduate teaching and research assistantships, individual plans of study, experiential learning, design history and research. Interdisciplinary study is encouraged.

ADMISSION REQUIREMENTS: Official transcript(s), three letters of recommendation, TOEFL for international students, goal statement, resume, autobiographical statement and portfolio. Applications must meet the following expectations:

- Portfolios must be presented online.
- A portfolio should consist of 15-20 samples of personal or professional work.
- Each sample must be clearly identified with appropriate background information.
- Portfolio URL must be included in a 250-work autobiographical statement.
- VCD reviews applicants only once a year for fall admission only. Applications must be received by March 1.

GRADUATION REQUIREMENTS: The Master of Arts degree program requires the successful completion of 32 semester hours of graduate credit including a thesis. Students may choose the option of 25 studio hours and an M.A. project instead of the thesis.

The Master of Fine Arts program requires the successful completion of 60 semester hours of graduate credit and requires a thesis.

The final examination is at the completion of the studio or research thesis. The final examination is the presentation and defense of the thesis and is also an examination of the graduate student's general comprehension of visual communication design. Graduate students are expected to follow the university schedule of deadlines for taking the final examination and presenting thesis materials.

CANDIDACY: Successful completion of the Candidacy Review Examination VCD 60009 is a requirement in every School of Visual Communication Design graduate program for both M.A. and M.F.A. students after the first semester or 12 hours of course completion.

Successful completion of the examination designates the student as a candidate for the degree.

THESIS/ DISSERTATION:	<p>The thesis is mandatory for M.F.A. candidates. M.A. candidates may choose to complete either a 6-credit-hour M.A. thesis or a 4-credit-hour M.A. project with an additional 2 credit hours of coursework in the major.</p> <p>The thesis is a significant project or body of work done independently of other coursework. Students are expected to demonstrate the ability to conduct research or produce an original project in a discriminating and disciplined manner. The thesis topic should be one that will further the student's knowledge and ability in the specialty by demonstrating skill as a researcher or professional designer/illustrator. The outcome should be an effort that serves as a foundation for the pursuit of independent work when the graduate program is completed. At this stage, students are expected to work in close consultation with their thesis advisor.</p>
FINAL EXAMINATION:	<p>The final examination is at the completion of the studio or research thesis. The final examination is the presentation and defense of the thesis and is also an examination of the graduate student's general comprehension of visual communication design. Graduate students are expected to follow the university schedule of deadlines for taking the final examination and presenting thesis materials.</p>
SPECIAL PROGRAMS:	<p>Each year, the School of Visual Communication Design conducts special summer programs that are available for graduate credit. The VCD Summer program is designed specifically for working professionals and/or students at the graduate level. The variable length, variable credit workshops provide studio experiences, lectures and seminars on the Kent State University campus during summers, and off campus at sites throughout the United States during other times of the year. Accredited and taught by Kent State University faculty, in concert with nationally and internationally noted experts as guest faculty, the credits may be applied toward the M.A. or the M.F.A. degree programs if accepted into the graduate program in the Kent State University School of Visual Communication Design. Previous guest faculty includes: Kenneth Hiebert, Rudolph de Harak, Michael Bierut, McRay Magleby, Bruno Monguzzi, Michael Patrick Cronan, Mervyn Kurlansky, Clement Mok, Alan Cober, Michael Manwaring, Michael Vanderbyl, Gary Kelley, Woody Pirtle, Christopher Pullman, April Greiman, Ken Carbone, Lance Hidy, Craig Frazier and Rudi Ruegg. Interested persons should write or call the School of Visual Communication Design or visit the web site.</p>
PROGRAM FEE:	None
ACCREDITATION:	Accredited by the National Association of Schools of Art and Design, NASAD
STUDENT ORGANIZATIONS:	AIGA

» Health Informatics Certificate (Post Bachelor's)

Kent State University Catalog 2011 > Colleges and Programs > College of Communication and Information > Certificates > [Health Informatics \(Post Bachelor's\)](#)

College of Communication and Information
Information Architecture and Knowledge Management
Tel: 330-672-5840
E-mail: iakm@kent.edu
Web: <http://iakm.kent.edu>

The Health Informatics certificate provides competencies and knowledge in health information systems, health records management, clinical decision support systems and other areas relevant to developing and refining competencies in health informatics.

HEALTH INFORMATICS CERTIFICATE REQUIREMENTS (18 credits):

Course	Title	Credits
IAKM 60401	Health Informatics Management	3
60403	Health Information Systems	3
60410	Health Records Management	3
61081	Capstone: Leadership Studies	3
61095	Selected Topics: Clinical Decision Support Systems	3
Choose from one of following:		3
60002	Knowledge Organization Structures, Systems and Services (3)	
60311	Business Process Management (3)	
60402	Legal Issues in Health Informatics (3)	
	Course specifically approved by advisor (3)	
Total:		18

Admission requirements are the same as for the full degree.

Students working on the certificate are permitted to enroll in the full program, and can use the courses taken to apply to the master's degree.

Mathematics and Computer Science Building

The School of Digital Sciences was established in 2010 as an interdisciplinary school at Kent State University. It combines elements of and fosters a broad understanding of the "digital sciences" across the following disciplines: computer science, computer information systems, computer technology, library information science, visual communication design, journalism, communication studies and instructional technology.

With the mission to foster a broad understanding of the digital sciences in an enterprise environment, from business processes to information repositories to software development to the underlying telecommunication infrastructure. The School of Digital Sciences also serves as an incubator for research synergies among faculty in related disciplines and as a focal point for multidisciplinary collaborations.

The School of Digital Sciences offers the [Bachelor of Arts](#), the [Bachelor of Science](#) and the [Master of Digital Sciences](#) degrees in the Digital Sciences (pending approval from the Ohio Board of Regents), as well as an [undergraduate minor](#). These degree programs are designed to complement existing programs in Kent State's College of Arts and Sciences (Department of Computer Science); the College of Business (Department of Management and Information Systems); the College of Communication and Information (schools of Library and Information Sciences, Visual Communication Design, and Journalism and Mass Communication, and the Information Architecture and Knowledge Management program); the College of Technology; and the College of Education, Health, and Human Services (School of Lifespan Development and Educational Sciences), among others.

The [Bachelor of Arts](#) and the [Bachelor of Science](#) degrees in Digital Sciences provide a broad overview across traditional "digital" programs, and prepare graduates to effectively understand and specify the information repositories, software applications and telecommunication infrastructure needed to support the goals of an organization and to work with a multidisciplinary team to meet those needs.

The [Master of Digital Sciences](#) degree also provides a broad overview of the Digital Sciences across traditional "digital" programs. It can serve as a terminal professional degree to augment Bachelors degrees in related units by giving their graduates a broader exposure to the digital sciences and some focused depth in one area outside their own discipline. It can also serve as an entry degree to augment Bachelors degrees in other units by giving their graduates a broad exposure to the digital sciences and a focused introduction to one area outside their own discipline.

RoadMaps

B.A. Program Requirements

B.S. Program Requirements

School Requirements

Academic Policies

DESCRIPTION: Pending approval from the Ohio Board of Regents, the Bachelor of Arts and Bachelor of Sciences degrees in Digital Sciences provide a broad overview across traditional "digital" programs and prepare graduates to effectively understand and specify the information repositories, software applications and telecommunication infrastructure needed to support the goals of an organization, and to work with a multidisciplinary team to meet those needs.

The curriculum prepares graduates to understand the role of digital sciences in society; have an appreciation of information ethics and social responsibility; understand the relationship between information processing, computational thinking and database systems and the telecommunications infrastructure; and be familiar with design principles, project management, team dynamics and digital systems security.

The B.A. degree program is designed for a broad liberal arts experience, providing ample opportunities for exploring elective options both within and outside digital sciences.

The B.S. degree program offers six focused concentrations to provide deeper knowledge in one or more specific domains:

- The Enterprise Architecture concentration provides students the skills to assist organizations in all sectors of the economy to review and improve their investments in technology; and to ensure that investments in digital information, application and technology are fully aligned with business goals and objectives.
- The Digital Systems Analysis concentration provides students the skills to consult with an organization's managers and users to understand the organization's computer system needs, and design a computer system to meet those needs.
- The Digital Science Cognition and Communication concentration provides students the skills to analyze the learning, teaching, communication and training needs of an organization, and design hardware and software systems to meet those needs.
- The Digital Systems Software Development concentration provides students the skills to analyze the software system needs of an organization's computer system, and coordinate the design, maintenance and expansion of a software system to meet those needs.
- The Digital Systems Telecommunication Networks concentration provides students the skills to analyze the communication needs for an organization, and design a telecommunication and network infrastructure to meet those needs.
- The Digital Systems Management and Consulting concentration provides students the skills to identify and shape solutions that address clients' key business priorities, including identifying and creatively solving complex problems, designing and re-engineering critical processes and fundamentally transforming business processes in a company.

The B.S. degree program also contains concentration-specific senior capstone courses, which can meet concurrently with senior-level courses in related disciplines and give students exposure in working on interdisciplinary projects as part of a multidisciplinary team.

CAREER OPPORTUNITIES:

In many cases, computing graduates can benefit from a broader view than that provided by traditional computer-related degree programs. For a growing number of computer-related occupations, the career path will increasingly require broad multidisciplinary training that provides exposure to business processes, information management, software development, telecommunications infrastructure, design, project management and a host of other skills. While these graduates will lack the deep domain knowledge provided by a traditional degree, they will gain familiarity across a broad spectrum of disciplines.

The B.A. and B.S. in Digital Sciences provide a broad overview across traditional "digital" programs, and prepare graduates to effectively understand and specify the information repositories, software applications, and telecommunication infrastructure needed to support the goals of an organization, and to work with a multi-disciplinary team to meet those needs.

These graduates will have the skills to analyze users' needs, plan an enterprise architecture, guide the development of a digital software/hardware system, and manage these complex systems. They will be comfortable working in multidisciplinary teams with computer scientists, computer engineers, business analysts, information architects, etc., and will have sufficiently broad training to bridge the communication gap between disciplines.

Students graduating from the Digital Sciences program will be prepared for entry-level careers as enterprise architects, computer system analysts, digital cognition analysts, application (software) architects, network system analysts and information technology officers.

ADMISSION REQUIREMENTS:

General Admissions for Freshman Students: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the [Admissions website for new freshmen](#).

General Admissions for Transfer Students: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the [Admissions website for transfer students](#).

GRADUATION REQUIREMENTS:

Minimum 121 total credit hours and minimum 39 upper-division hours, with minimum 2.0 GPA in major and overall.

CULMINATING REQUIREMENTS:

The B.S. degree program contains concentration-specific senior capstone courses that can meet concurrently with senior-level courses in related disciplines and give students exposure in working on interdisciplinary projects as part of a multidisciplinary team.

LANGUAGE REQUIREMENT:

None.

STUDY ABROAD/AWAY OPPORTUNITIES:

There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE:

None.

STUDENT ORGANIZATIONS:

Association for Computing Machinery; Collegiate Business Association; Delta Sigma Pi; Management and Information System Association (MISA); Net Impact Kent State University

GRADUATE PROGRAMS:

[Business Administration–Information Systems](#) (M.B.A), [Computer Science](#) (M.A. and M.S.), [Digital Sciences](#) (M.S.), [Evaluation and Measurement](#) (M.Ed.), [Information Architecture and Knowledge Management](#) (M.S.), [Instructional Technology](#) (M.Ed.)

DEPARTMENT: School of Digital Sciences
236 Mathematics and Computer Science Building
Tel: 330-672-9105
E-mail: digital-sciences@kent.edu
Web: www.kent.edu/dsci

DESCRIPTION: Pending approval from the Ohio Board of Regents, the Master of Digital Sciences provides a broad overview of the digital sciences across traditional "digital" programs. It can serve as a terminal professional degree to augment bachelor's degrees in related units by giving their graduates a broader exposure to the digital sciences and some focused depth in one area outside their own discipline. It can also serve as an entry degree to augment bachelor's degrees in other units by giving their graduates a broad exposure to the digital sciences and a focused introduction to one area outside their own discipline.

A graduate of the school's master's degree program will understand the relationship between information processing, software development and the telecommunications infrastructure, and will have an appreciation of the cognitive and managerial aspects of digital sciences.

The M.S. degree in Digital Sciences comprises five concentrations to provide deeper knowledge in one or more domains: Digital Science Cognition and Communication, Digital Systems Management and Consulting, Digital Systems Software Development, Digital Systems Telecommunication Networks, and Enterprise Architecture.

The Digital Science Cognition and Communication concentration provides students the skills to analyze the learning, teaching, communication and training needs of an organization, and design hardware and software systems to meet those needs. Students will know how to use the principles, theories and research-based outcomes of how people interact and communicate with and through technology to improve the usability of hardware, software and training within an organization. The concentration adds a deeper understanding of instructional design, managing technological change, simulation games in education and virtual reality.

The Digital Systems Management and Consulting concentration provides students the skills to identify and shape solutions that address clients' key business priorities, including identifying and creatively solving complex problems, designing and re-engineering critical processes and fundamentally transforming business processes in a company. Students will know how to oversee the technical operations of an organization, and will be able create, re-engineer and integrate technology-enabled solutions with an understanding of how users interact and communicate with technology. The concentration adds a deeper understanding of system development, database management and information security.

The Digital Systems Software Development concentration provides students the skills to analyze the software system needs of an organization's computer system, and coordinate the design, maintenance and expansion of a software system to meet those needs. Students will understand the role of software development in relationship to information management and the technology infrastructure in an enterprise environment. They will be able to work with chief enterprise architects, information architects and technology architects to design software systems in support of business goals, and work with software engineers as they build those software systems. The concentration covers application architecture, software engineering, programming and data structures. (Programming and data structures may be replaced with additional material on enterprise architecture and software development for students already familiar with programming.)

[Program Requirements](#)

[School Requirements](#)

[Academic Policies](#)

The Digital Systems Telecommunication Networks concentration provides students the skills to analyze the communication needs for an organization, and design a telecommunication and network infrastructure to meet those needs. Students will understand how to design hardware systems and the supporting communication infrastructure to transport and store the converged voice, video and data traffic required by a modern multimedia system. They will be able to work with chief enterprise architects, information architects and application (software) architects to design that communication infrastructure. The concentration adds a deeper understanding of ethics and technology, wireless networks and systems engineering.

The Enterprise Architecture concentration provides students the skills to assist organizations in all sectors of the economy to review and improve their investments in technology; and to ensure that investments in digital information, application, and technology are fully aligned with business goals and objectives. Students will know how to develop detailed blueprints of an organization's current state, to work with the stakeholders to prepare a vision of a future architecture, to prepare an implementation roadmap, and to execute technology and business change. The concentration adds a deeper understanding of business architecture, application/software architecture and information architecture.

CAREER OPPORTUNITIES:

In many cases, computing graduates can benefit from a broader view than that provided by traditional computer-related degree programs. For a growing number of computer-related occupations, the career path will increasingly require broad multidisciplinary training that provides exposure to business processes, information management, software development, telecommunications infrastructure, design, project management and a host of other skills. While these graduates will lack the deep domain knowledge provided by a traditional degree, they will gain familiarity across a broad spectrum of disciplines.

The M.S. in Digital Sciences provides a broad overview of the digital sciences across traditional "digital" programs. It can serve as a terminal professional degree to augment bachelor's degrees in related units by giving their graduates a broader exposure to the digital sciences and some focused depth in one area outside their own discipline. It can also serve as an entry degree to augment bachelor's degrees in other units by giving their graduates a broad exposure to the digital sciences and a focused introduction to one area outside their own discipline.

These graduates will have the skills to analyze users' needs, plan an enterprise architecture, guide the development of a digital software/hardware system and manage these complex systems. They will be comfortable working in multidisciplinary teams with computer scientists, computer engineers, business analysts, information architects, etc., and will have sufficiently broad training to bridge the communication gap between disciplines.

Students graduating from the M.S. degree program will be prepared for careers as enterprise architects, digital cognition analysts, application (software) architects, network system analysts, and information technology officers.

ADMISSION REQUIREMENTS:

Applicants are expected to submit evidence of scholarly accomplishment in previous undergraduate and graduate work if undertaken. This may be accomplished in part by having achieved an undergraduate grade point average (GPA) of 2.75 on a 4.0 point scale, although some departments may require a higher minimum GPA. At the graduate level, a minimum 3.0 GPA is expected. In all cases, the GPA is only one of several measures used to determine admission. Additional considerations are letters of recommendation, scores on standardized tests and other indices of ability to do graduate-level work.

Students with below a 2.75 GPA will be considered for conditional admission on an individual basis. Admission in such cases will depend heavily on other indices of the student's ability to handle graduate-level work. These might include strong performance on standardized tests, GPA in the major and/or experiences subsequent to matriculation that are clearly indicative of strong academic ability. Evidence of holding a bachelor's degree or equivalent from an accredited college or university must be included.

Students who hold degrees from non-accredited institutions may be admitted under conditions that are determined in each individual case and which ordinarily include the necessity of further undergraduate work.

GRADUATION REQUIREMENTS:

Minimum 32 credit hours of graduate-level coursework comprising of 9 credits of major requirements, 9 credits of concentration requirements and 14 credits of approved electives in the digital sciences or related programs.

CULMINATING REQUIREMENTS:

Candidates choosing the Thesis option will replace 6 of the required 14 elective hours with of a Thesis I course.

PROGRAM FEE:

None

Digital Sciences Minor

Kent State University Catalog 2011 > Colleges and Programs > School of Digital Sciences > Minors > Digital Sciences

School of Digital Sciences

236 Mathematics and Computer Science Building

Tel: 330-672-9105

E-mail: digital-sciences@kent.edu

Web: www.kent.edu/dsci

The Digital Sciences minor exposes students to the "big picture" of the digital sciences across traditional "digital" programs. Graduates with the minor understand the role of digital sciences in society, have an appreciation of information ethics and social responsibility, understand the telecommunications infrastructure and be familiar with design.

DIGITAL SCIENCES MINOR REQUIREMENTS (18 credits):

Course	Title	Credits

Mission Statement

The College of Education, Health, and Human Services creates and advances knowledge as it educates professionals who enhance health and well-being and enable learning across the lifespan.

The College of Education, Health, and Human Services (EHHS) consists of four schools—Foundations, Leadership and Administration, Health Sciences, Lifespan Development and Educational Sciences, and Teaching, Learning and Curriculum Studies. The college offers 27 distinctive programs that lead to the degrees of Bachelor of Science, Bachelor of Science in Education, combined Bachelor of Science/Master of Arts, Master of Arts, Master of Arts in Teaching, Master of Education, Educational Specialist and Doctor of Philosophy.

Agencies and Centers of the College of Education, Health, and Human Services

To help achieve its aims and to promote its functions, the college provides the following agencies: the Center for the Study of Lifespan, Health and Human Performance; the Center for Hospitality and Tourism Development; the Center for Sport, Recreation and Tourism Development; the Human Development Center; the Gerontology Center; the Gerald H. Read Center for International and Intercultural Education; the Center for Educational Leadership Services; the Center on Innovation in Transition and Employment for Youth with Disabilities; the Child Development Center; the Reading and Writing Development Center; the Bureau of Research Training and Services; the Counseling and Human Development Center; the Vacca Office of Student Services; the Office of Clinical Experiences; Academic Computing Support; the Ohio Literacy Resource Center; the Research Center for Educational Technology; Center for Health Promotion Through Education; and Office of Graduate Student Services

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Education, Health and Human Services > Undergraduate Programs > [Athletic Training](#)

COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Health Sciences
100 Nixon Hall
PH: 330-672-2197 | Fax: 330-672-2194
Web: <http://www.ehhs.kent.edu/hs/>

DESCRIPTION:

The two-phased athletic training education program focuses on physical evaluation, emergency management, rehabilitation and care, and prevention of injuries. During the preprofessional phase students complete 150 observation hours in the athletic training room, where they are exposed to the academic and clinical requirements of athletic training. Upon completion of the preprofessional phase, qualified students apply for formal acceptance into the major or professional phase, where they spend 2.5 to 3 years applying academic knowledge and clinical application of athletic training skills in a variety of clinical settings, such as intercollegiate athletics, sports medicine clinics, orthopedic offices and EMS services. Upon completing the program, students qualify to sit for the national Board of Certification examination. The CAATE -accredited program has a selective admission policy.

The Bachelor of Science in Athletic Training consists of preprofessional and professional components. In the preprofessional phase, the student completes a directed observation year. The professional phase begins after formal admission into the athletic training education program and includes clinical courses and clinical educational experiences under the direct supervision of a certified athletic trainer.

Advancement into the professional phase of the athletic training program is selective and is limited. Limited admission will ensure that an appropriate student to clinical instructor ratio (approximately 8:1) is maintained.

After completion of the preprofessional directed observation requirement (normally done within the first two or three semesters of full-time study), formal application to the professional phase of the program is made. Advancement to the professional program is controlled through the first practicum course (ATTR 15092). In order to be eligible for this course, students must: complete 30 credit hours; make formal application to the professional phase of the program; provide three professional letters of reference; complete 150 hours of directed observation experiences under the direct supervision of a certified athletic trainer; have a minimum 2.50 GPA; secure first aid and CPR certification; successfully complete ATTR 15011, which includes an oral and written exam; secure staff evaluations and complete a self-administered evaluation; and complete an interview with the professional athletic training staff. After these requirements have been fulfilled, students may be selected for advancement into the professional phase of the program based upon their competitive rank using their GPA (15 percent), evaluation scores (40 percent), interview scores (20 percent) and ATTR 15011 written (10 percent) and oral (15 percent) practical exam scores. Those selected may enroll in ATTR 15092 during the following semester.

Students who are not accepted into the professional phase may reapply the following year by completing another preprofessional year. Due to the extensive clinical component associated with this program, students may reapply only once. Students who are not selected for the professional phase of this program will work with the program coordinator to identify alternate academic programs to pursue.

Students who have transferred to Kent State University must complete a directed observation period at Kent State prior to advancement into the professional phase of the program. Prompt commencement of

Resources:

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

[Audiology](#)[Sport Administration](#)[Trade and Industrial Education](#)[Minors](#)[Certificates](#)[Graduate Programs](#)[» College of Nursing](#)[» College of Public Health](#)[» College of Technology](#)[» Regional College](#)[» Honors College](#)

the directed observation period is necessary as it will take a minimum of five semesters at Kent State to complete the clinical courses and experiences in the professional phase.

Clinical Experience

Once accepted into the professional athletic training education program, students will begin the formal clinical education courses. Directed clinical experiences and supervised field experiences also are required. Although most of these experiences will be at the university, off-campus high school and clinical sites also are required. These experiences will total 1,000 hours minimally and 1,200 hours maximally, partially accrued through clinical courses including practicum and internship, in no less than five semesters and no more than six semesters. Although the Ohio Occupational Therapy, Physical Therapy and Athletic Trainers Board requires minimally 800 hours for licensure, completion of 1,000 clinical hours minimally is required for graduation from Kent State.

Students interested in this area of study will be advised by the athletic training program coordinator and should contact the program coordinator promptly to discuss the specific entrance, selection, health, technical standards and retention criteria in greater detail.

CAREER OPPORTUNITIES:

Athletic trainers held about 17,000 jobs in 2006 and are found in every part of the country. Most athletic trainer jobs are related to sports, although an increasing number also work in nonsports settings. About 34 percent of athletic trainers worked in health care, including jobs in hospitals, offices of physicians, and offices of other health practitioners. Another 34 percent were found in public and private educational services, primarily in colleges, universities, and high schools. About 20 percent worked in fitness and recreational sports centers.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students are admitted to health and human services programs and educational studies using the university admission criteria (see the Entering the University section of this Catalog), with the exception of the sport administration program, which requires a 2.75 high school GPA for entering freshmen and a 21 ACT or 980 SAT score. Selective admission criteria are used in some programs in the college. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required GPA. Students desiring to major in human development and family studies or speech pathology and audiology are admitted as pre-majors and later are accepted into the appropriate program only after specific requirements have been met. It is imperative that the student contact the individual school for detailed information.

GRADUATION REQUIREMENTS:

Minimum 123 credit hours. Minimum 2.25 GPA in major and 2.0 cumulative GPA. Students must earn minimum C (2.00) grade in all ATTR courses.

LANGUAGE REQUIREMENT:

None

STUDY ABROAD/AWAY OPPORTUNITIES:

There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE:

\$35/semester

ACCREDITATION:

COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Health Sciences
100 Nixon Hall
PH: 330-672-2197 | Fax: 330-672-2194
Web: <http://www.ehhs.kent.edu/hs/>

DESCRIPTION: The Bachelor of Science in Community Health Education gives students the necessary tools to plan, implement and evaluate health education programs for individuals, communities and groups. Recognizing the importance of promoting good health and preventing disease, the major features a 12-credit capstone internship experience during which the student works with a health educator in a community setting. Courses qualify students to take the Certified Health Education Specialist Exam administered by the National Commission for Health Education Credentialing.

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students are admitted to health and human services programs and educational studies using the university admission criteria (see the Entering the University section of this Catalog), with the exception of the sport administration program, which requires a 2.75 high school GPA for entering freshmen and a 21 ACT or 980 SAT score. Selective admission criteria are used in some programs in the college. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required GPA. Students desiring to major in human development and family studies or speech pathology and audiology are admitted as pre-majors and later are accepted into the appropriate program only after specific requirements have been met. It is imperative that the student contact the individual school for detailed information.

GRADUATION REQUIREMENTS: Minimum 121 credit hours. Minimum 2.75 cumulative and major GPA.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: \$35/semester

Resources:

- [Roadmaps](#)
- [Program Requirements](#)
- [College Requirements](#)
- [University Requirements](#)

DESCRIPTION: The Bachelor of Science in Early Childhood Education (ECED) focuses on professional preparation and application of current theory, methods and practices for future teachers of pre-K-3 classrooms. Students form a cohort and complete the five-block sequence of courses while gaining teaching experiences linked to coursework. All student complete field and practicum experiences in diverse settings, including urban and inclusive programs, and accumulate approximately 1500 clock hours of field experience in preschool, kindergarten and primary classrooms. Upon successful completion of the program and passing Praxis II, student are eligible for Ohio licensure in Early Childhood, which is "valid for teaching children who are typically developing, at-risk, gifted, and who have mild/moderate educational needs.

The curriculum leads to the Ohio license valid for teaching in settings for children age three through grade three.

CAREER OPPORTUNITIES: Preschool, kindergarten, elementary school, middle school, and secondary school teachers, except special education, held about 4.0 million jobs in 2006. Of the teachers in those jobs, about 1.5 million are elementary school teachers, 1.1 million are secondary school teachers, 674,000 are middle school teachers, 437,000 are preschool teachers, and 170,000 are kindergarten teachers. The vast majority work in elementary and secondary schools. Preschool teachers, except special education, are most often employed in child daycare services (59 percent), public and private educational services (16 percent), and religious organizations (15 percent). Employment of teachers is geographically distributed much the same as the population. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: As part of an enrollment management plan, early childhood majors are admitted to the program on a selective basis. A maximum of 100 students will be admitted to this program each academic year. A minimum ACT composite score of 21 (980 SAT combined critical reading and math score) OR a 2.75 cumulative high school grade point average and all 16 of the recommended college preparatory units is required. Students seeking admission to this program must meet all professional requirements for admission to advanced study and have a minimum cumulative 2.75 GPA in all previous undergraduate coursework. Because of the instituted enrollment management plan, meeting the above requirements does not automatically provide students admittance to the early childhood education major. Faculty will select the most qualified applicants based upon the number of available student spaces, students' standardized test scores, essay, interview and cumulative GPA. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission to advanced study and selective admission to the early childhood education program. Students transferring from another university should meet with an academic advisor in 304 White Hall at least one semester prior to transferring.

GRADUATION REQUIREMENTS: Minimum 131 credit hours. Minimum 2.75 cumulative GPA. A minimum grade of C (2.0) grade is required in some courses; view the program requirements to see specific courses.

Required for Ohio Licensure: Must pass Praxis II "Principles of Learning and Teaching, Grades P-3" and Praxis II specialty test "Education of Young Children" (minimum score of 166 on each of the tests).

DESCRIPTION: The Adolescence/Young Adult Education (ADED) Earth Science program prepares candidates for licensure in earth science, grades 7-12. Students take a broad range of courses from the biology, chemistry, geography and physics departments and specialize in geology content. Most content coursework is completed during their first three years; methods coursework begins during the spring of their third year. In the final year of the program, candidates complete remaining content courses, science teaching methods courses, and a year-long placement in a local school district, which concludes with 12 weeks of student teaching in the spring.

CAREER OPPORTUNITIES: Of the 1.2 million secondary schools teachers in the U.S., about 109,500 are science teachers in public and private schools. Currently, many school districts have difficulty hiring qualified teachers in some subject areas; most often mathematics, science (especially chemistry and physics), bilingual education and foreign languages. Accordingly, job prospects for ADED science majors are promising, especially in urban or rural school districts.

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. To be admitted to the program, students must display evidence of adequate communication skills; sound content area knowledge (language arts, mathematics, science or social studies); a basic understanding of the teaching profession; a basic understanding of adolescents; and dispositions aligned with the conceptual framework of the College of Education, Health, and Human Services, including being open-minded, flexible, caring and responsible. Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA; Praxis I scores; and performance in English and communication studies coursework. Applicants to the ADED program must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health, and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with admission to the adolescence/young adult education program.

GRADUATION REQUIREMENTS: Minimum 133 credit hours. Minimum 2.60 major GPA. Minimum 2.75 cumulative GPA. A minimum grade of C (2.0) grade is required in some courses; view the program requirements to see specific courses.

Required for Ohio Licensure: Successful completion of Praxis II "Principles of Learning and Teaching" and Praxis II specialty test "Earth Science-Content Knowledge (passing score 151).

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The educational studies program is a non-licensure option designed for those who wish to function as educators in human services and resource settings such as business and industry, religious, community, or interest and advocacy groups. Programs reflect a consideration for the nature of the setting in which educators will work (e.g., youth center, social agency, museum, park, business), the particular skills and competencies required in such an educational career (e.g., program planning, technology utilization, interpersonal and multicultural facilitation) and the nature of the particular educational function which characterizes the option (e.g., program design, instruction, service delivery).

ADMISSION REQUIREMENTS: Additional information can be obtained from 316 White Hall, 330-672-7977.

GRADUATION REQUIREMENTS: Students are required to meet all university requirements, including a 2.50 cumulative GPA, for graduation. The students choose an elective concentration that is supportive of their particular career emphasis and goal, selected from offerings in the College of Education, Health, and Human Services and other professional schools.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Health Sciences
100 Nixon Hall
PH: 330-672-2197 | Fax: 330-672-2194
Web: <http://www.ehhs.kent.edu/hs/>

DESCRIPTION: The Bachelor of Science in Exercise Science comprises two concentrations: Exercise Physiology and Exercise Specialist.

CAREER OPPORTUNITIES: Physical therapists held about 173,000 jobs in 2006. The number of jobs is greater than the number of practicing physical therapists because some physical therapists hold two or more jobs. For example, some may work in a private practice, but also work part time in another health care facility.

About 6 out of 10 physical therapists worked in hospitals or in offices of physical therapists. Other jobs were in the home health care services industry, nursing care facilities, outpatient care centers, and offices of physicians. Some physical therapists were self-employed in private practices, seeing individual patients and contracting to provide services in hospitals, rehabilitation centers, nursing care facilities, home health care agencies, adult day care programs, and schools. Physical therapists also teach in academic institutions and conduct research.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students are admitted to health and human services programs and educational studies using the university admission criteria (see the Entering the University section of this Catalog), with the exception of the sport administration program, which requires a 2.75 high school GPA for entering freshmen and a 21 ACT or 980 SAT score. Selective admission criteria are used in some programs in the college. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required GPA. Students desiring to major in human development and family studies or speech pathology and audiology are admitted as pre-majors and later are accepted into the appropriate program only after specific requirements have been met. It is imperative that the student contact the individual school for detailed information.

GRADUATION Minimum 121 credit hours. Minimum 2.25 GPA in major and 2.0 cumulative GPA.

DEPARTMENT: School of Teaching, Learning and Curriculum Studies

404 White Hall

Tel: 330-672-2580 | Fax: 330-672-3246

<http://www.ehhs.kent.edu/tlc/>

DESCRIPTION:

The Bachelor of Science in Education in Family and Consumer Sciences Education comprises three concentrations: Early Childhood Education and Care, Food Management Production and Services, and Work and Family.

The early childhood education degree leads to licensing by the Ohio Department of Education, a license specific to career-technical education. Candidates complete specific content coursework in family and consumer sciences as well as early childhood education. Candidates must also complete specific occupational competencies either through work experience and/or an internship in early childhood. Candidates must also pass the Praxis Examination series and complete student teaching.

The food management production and services degree leads to licensing by the Ohio Department of Education. This license is specific to career-technical education programs in food management production and services. Candidates are required to complete content-specific coursework in family and consumer sciences as well as food production management and services; complete specific occupational competencies either through work experience and/or an internship in food production management and services; and pass the Praxis Examination series and complete student teaching.

The family and consumer sciences program leads to licensure by the Ohio Department of Education. Licenses are available in Work and Family, Early Childhood Education and Food Management/Production. Each license requires content coursework in family and consumer sciences, professional education and career-technical teacher education including student teaching. Students must pass the Praxis series of examinations to become fully licensed. Licenses in early childhood education and food management/production also require specific work experience in the respective area.

CAREER OPPORTUNITIES:

Teachers of self-enrichment education held about 261,000 jobs in 2006. The largest numbers of teachers were employed by public and private educational institutions, religious organizations, and providers of social assistance and amusement and recreation services. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

GRADUATION REQUIREMENTS:

Minimum 121 credit hours. Minimum 2.75 cumulative GPA.

Required for Ohio Licensure: Successful completion of Praxis II "Principles of Learning and Teaching Grades 7-12" with a passing score of 165. Successful completion of Praxis II specialty test "Family and Consumer Sciences" with a passing score 148.

COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Lifespan Development and Educational Services

405 White Hall

Tel: 330-672-2294

Web: <http://www.ehhs.kent.edu/ldes>

DESCRIPTION:

Students must declare a pre-major in human development and family studies until they have earned minimum 2.50 GPA in the requirements outlined below, with minimum 3.00 GPA in the three HDFS courses. The purpose of the pre-major in human development and family studies requirement is to ensure that majors have adequate preparation necessary to successfully complete upper-division human development and family studies courses, including a senior-level practicum (HDFS 44092), which provides students with professional training in the field of human/social services.

The Bachelor of Science in Human Development and Family Studies comprises six concentrations: Case Management for Individuals and Families, Child and Youth Development, Family Life Education, Gerontology, Gerontology and Nursing Home Administration and Human Services Technology.

The Case Management for Individuals and Families concentration provides training in needs assessment and the utilization of available public and private resources. Graduates are eligible for securing positions in a wide array of social service agencies.

The Child and Youth Development concentration prepares students for working with children and adolescents in non-school settings such as residential treatment, group care community youth services, foster care and after-school programs. Graduates are able to design and deliver developmentally appropriate programs, preparing children and youth for productive adulthood by emphasizing skills and competency development. The curriculum prepares students for provisional national certification as child and youth care professionals.

The Family Life Education concentration prepares graduates to develop and implement family life programs in a variety of education and human service settings. Graduates are eligible to apply to be Certified Family Life Educators (CFLE), a credential granted by the National Council on Family Relations.

The Gerontology concentration prepares graduates for professional positions in the diverse field of aging, including health and wellness, community-based social services, retirement communities, adult-care centers and nursing homes. The curriculum provides students with a solid understanding of typical age-related changes and how these changes affect a person physiologically, psychologically and socially.

A minor in gerontology is also offered. Through coursework, research experiences and practicum students develop expertise in gerontology while completing requirements in their selected major.

The Gerontology and Nursing Home Administration concentration qualifies students for employment as administrators in long-term care settings, including nursing homes, assisted living facilities and congregate living settings. Graduates are eligible to sit for the Nursing Homes Administrator's Licensure Examination offered by the Board of Examiners of Nursing Home Administrators (BENHA). The curriculum in this program is BENHA-approved. According to the U.S. Census, 20 percent of the total population will be 65 or older by 2030. Because of the increasing number of older persons and the fact that people are generally living longer, there is a growing need for people to work in the field of aging.

[University Requirements](#)

[Audiology](#)[Sport Administration](#)[Trade and Industrial Education](#)[Minors](#)[Certificates](#)[Graduate Programs](#)[» College of Nursing](#)[» College of Public Health](#)[» College of Technology](#)[» Regional College](#)[» Honors College](#)

Both the four-year concentration and minor provide strong interdisciplinary knowledge base, research skills and preparation for graduate study in a wide variety of disciplines, such as human development and family studies, sociology, public administration, nursing and exercise science. Students are eligible to join Kappa Omicron Nu, a national honorary in gerontology.

The Human Services Technology concentration is for associate degree holders and is offered at the Ashtabula and Salem campuses. This program prepares graduates for entry-level positions in a variety of human service agencies, including child and family welfare agencies, mental health centers, mental retardation and developmental disability facilities, and substance abuse treatment centers.

CAREER OPPORTUNITIES:

The U.S. Bureau of Labor Statistics employment projections for 2006-2016 include a 73 percent increase in the number of jobs in individual and family services. Students graduating with a degree in HDFS are not eligible for social work licensure, but may find employment in social work type jobs.

Social workers held about 595,000 jobs in 2006. About five out of 10 jobs were in health care and social assistance industries and three out of 10 are employed by state and local government agencies, primarily in departments of health and human services. Although most social workers are employed in cities or suburbs, some work in rural areas. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

GRADUATION REQUIREMENTS:

Minimum 121 credit hours. Minimum 2.25 major GPA and 2.0 cumulative GPA.

LANGUAGE REQUIREMENT:

None

STUDY ABROAD/AWAY OPPORTUNITIES:

There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: \$35/semester

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Integrated Business Education program prepares teachers for middle and high school instruction in a variety of business-related courses. In addition to professional education core classes, prospective teachers complete major area content courses in business as well as information technology applications. Students must complete the Praxis series of examinations to obtain the initial Ohio five year license.

CAREER OPPORTUNITIES: Teachers of self-enrichment education held about 261,000 jobs in 2006. The largest numbers of teachers were employed by public and private educational institutions, religious organizations, and providers of social assistance and amusement and recreation services.
(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. A maximum of 100 students will be admitted to this program each academic year. A minimum ACT composite score of 21 (980 SAT combined critical reading and math score) OR a 2.75 cumulative high school grade point average and all 16 of the recommended college preparatory units is required. Students seeking admission to this program must meet all professional requirements for admission to advanced study and have a minimum cumulative 2.75 GPA in all previous undergraduate coursework. Because of the instituted enrollment management plan, meeting the above requirements does not automatically provide students admittance to the early childhood education major. Faculty will select the most qualified applicants based upon the number of available student spaces, students' standardized test scores, essay, interview and cumulative GPA. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission to advanced study and selective admission to the early childhood education program. Students transferring from another university should meet with an academic advisor in 304 White Hall at least one semester prior to transferring.

GRADUATION REQUIREMENTS: Minimum 133 credit hours. 2.75 cumulative GPA.

Required for Ohio Licensure: Must pass Praxis II "Principles of Learning and Teaching" and Praxis II specialty test "Business Education" (passing score 610).

COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Health Sciences
100 Nixon Hall
PH: 330-672-2197 | Fax: 330-672-2194
Web: <http://www.ehhs.kent.edu/hs/>

DESCRIPTION:

The Bachelor of Science in Integrated Health Studies is designed for students interested in pursuing studies related to the health professions. The primary mission of the Integrated Health Studies program is to educate individuals to serve present and future needs of an increasingly diverse society in the professional fields associated with health and/or medical services. Fundamental to its mission is the education of students to excel as practitioners and provide leadership to their respective disciplines.

All students complete the university's Kent Core (Kent Core). Integrated Health Studies (IHS) students also take a core of courses that relate to health studies. The core consists of coursework related to medical terminology, health care ethics, health care policy and delivery systems, research design and statistical analysis, quantitative statistics, a writing intensive class and a professional seminar class at the end of the program. The program may culminate in a practicum experience consistent with the student's career goals. The knowledge and understanding gained from the core coursework then are applied within the context of a specific concentration selected by the student based upon the student's interests. Each of the three concentrations, health sciences, health services, health care administration and services, prepares the student for specific occupational opportunities and/or advanced study in the health and human services fields.

The health sciences concentration includes a strong basic science core (biology, chemistry, physics) as well as an applied science core (physiology of exercise, nutrition). Integrated Health Studies majors in the health sciences concentration will be prepared for science-based graduate programs, especially physical or occupational therapy, and other advanced study options.

The health services concentration provides comprehensive study of health professions, human development, and human services. The students completing this program find careers in the service delivery sector of the health care industry such as non-profit and/or government agencies (e.g., health departments, national/state/local health organizations). This health services program also is designed to provide students in associate degree programs in the allied health areas, such as physical or occupational therapy assisting technology, with the opportunity to obtain a highly relevant bachelor's degree.

The health care administration and services concentration is designed to prepare students for administrative positions in the health care industry. This concentration includes a business minor and includes courses consisting of marketing, management, finance, economics, and computer applications, as well as specialized courses related to long term care administration and social welfare policy. The students completing this concentration assume positions in the business sector of a health related industry. Other students may wish to pursue graduate study in such fields as business administration, health administration, exercise/leisure/sports administration, and public health.

CAREER OPPORTUNITIES: According to the U.S. Bureau of Labor Statistics, employment in health and human services areas will grow faster than average through 2012. Students completing the IHS health services concentration are prepared to assume a role in the service delivery sector of the health care industry. Others may wish to

pursue graduate study leading to advanced professional credentials. Students completing the IHS health care administration and systems concentration are prepared for careers in the business sector of the health care industry though others may wish to pursue graduate study to obtain mid-management administrative credentials. Students completing the IHS health sciences concentration are prepared to pursue graduate study in health-medical fields. Possible graduate programs may include: Physical Therapy, Occupational Therapy, Athletic Training, Sports Medicine, Physician Assistant, Gerontology, Business Administration, Health Administration, Public Health, Health Education, Clinical Psychology, Nutrition, and Exercise/Leisure/Sport Administration.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students are admitted to health and human services programs and educational studies using the university admission criteria (see the Entering the University section of this Catalog), with the exception of the sport administration program, which requires a 2.75 high school GPA for entering freshmen and a 21 ACT or 980 SAT score. Selective admission criteria are used in some programs in the college. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required GPA. Students desiring to major in human development and family studies or speech pathology and audiology are admitted as pre-majors and later are accepted into the appropriate program only after specific requirements have been met. It is imperative that the student contact the individual school for detailed information.

GRADUATION REQUIREMENTS:

Minimum 121 credit hours. Minimum 2.25 major and 2.0 cumulative GPA. Minimum 2.50 cumulative GPA to declare and graduate with a Business minor

LANGUAGE REQUIREMENT:

None

STUDY ABROAD/AWAY OPPORTUNITIES:

COLLEGE: Education, Health and Human Services

DEPARTMENT: School of Teaching, Learning and Curriculum Studies

404 White Hall

Tel: 330-672-2580 | Fax: 330-672-3246

<http://www.ehhs.kent.edu/tlc/>

DESCRIPTION:

This program prepares candidates for Ohio licensure in Integrated Language Arts (grades 7-12). The combination of content and methods courses provides a strong foundation for graduates of the program, who will be licensed to teach English/Language Arts, journalism, communication and theater. (Please note that Ohio Integrated Language Arts teachers are only licensed to teach theater at the middle school level.) The program uniquely features a methods course devoted to the teaching of new media.

CAREER

OPPORTUNITIES:

Preschool, kindergarten, elementary school, middle school, and secondary school teachers, except special education, held about 4.0 million jobs in 2006. Of the teachers in those jobs, about 1.5 million are elementary school teachers, 1.1 million are secondary school teachers, 674,000 are middle school teachers, 437,000 are preschool teachers, and 170,000 are kindergarten teachers. The vast majority work in elementary and secondary schools. Preschool teachers, except special education, are most often employed in child daycare services (59 percent), public and private educational services (16 percent), and religious organizations (15 percent). Employment of teachers is geographically distributed much the same as the population. (Source: Bureau of Labor Statistics)

ADMISSION

REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. To be admitted to the program, students must display evidence of adequate communication skills; sound content area knowledge (language arts, mathematics, science or social studies); a basic understanding of the teaching profession; a basic understanding of adolescents; and dispositions aligned with the conceptual framework of the College of Education, Health, and Human Services, including being open-minded, flexible, caring and responsible. Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA; Praxis I scores; and performance in English and communication studies coursework. Applicants to the ADED program must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health, and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with admission to the adolescence/young adult education program.

GRADUATION

REQUIREMENTS:

Minimum 121 credit hours. Minimum 2.60 major GPA. Minimum 2.75 cumulative GPA. A minimum grade of C (2.0) grade is required in some courses; view the program requirements to see specific courses.

[University Requirements](#)

DESCRIPTION: The Integrated Mathematics (IMTH) program prepares students to become mathematics teachers in grades 7–12. Students take approximately 42 hours of mathematics-content coursework during the seven semesters prior to their internship (student teaching) semester. At the end of the junior year, students take the Praxis II content exam. Students must earn a 2.75 overall GPA and a 2.6 GPA in mathematics to complete the program. Students who successfully complete the IMTH program are eligible to apply for the 7–12 license in mathematics.

CAREER OPPORTUNITIES: Preschool, kindergarten, elementary school, middle school, and secondary school teachers, except special education, held about 4.0 million jobs in 2006. Of the teachers in those jobs, about 1.5 million are elementary school teachers, 1.1 million are secondary school teachers, 674,000 are middle school teachers, 437,000 are preschool teachers, and 170,000 are kindergarten teachers. [Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Adolescent/Adult Education (ADED) Integrated Science program is a five-year degree that prepares candidates for licensure in all areas of science, grades 7-12. Students take a broad range of science-content courses from the geology, geography, biology, chemistry, and physics departments and choose one area in which to specialize. Students complete most of their content coursework during their first four years and then begin their methods coursework during the spring of their fourth year. During the final year of the program, candidates complete remaining content courses, science teaching methods courses, and a year-long placement in a local school district, which concludes with 12 weeks of student teaching in the spring.

Integrated Science students are encouraged to meet with their faculty advisor early in their programs because many courses must be sequenced carefully.

CAREER OPPORTUNITIES: Of the 1.2 million secondary schools teachers in the U.S., about 109,500 are science teachers in public and private schools. Currently, many school districts have difficulty hiring qualified teachers in some subject areas; most often mathematics, science (especially chemistry and physics), bilingual education and foreign languages. Accordingly, job prospects for ADED science majors are promising, especially in urban or rural school districts.

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. To be admitted to the program, students must display evidence of adequate communication skills; sound content area knowledge (language arts, mathematics, science or social studies); a basic understanding of the teaching profession; a basic understanding of adolescents; and dispositions aligned with the conceptual framework of the College of Education, Health, and Human Services, including being open-minded, flexible, caring and responsible. Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA; Praxis I scores; and performance in English and communication studies coursework. Applicants to the ADED program must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health, and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with admission to the adolescence/young adult education program.

GRADUATION Minimum 142 credit hours. Minimum 2.75 cumulative and 2.60 major GPA. Students must earn a minimum

- University Requirements

DESCRIPTION: The Integrated Social Studies (INSS) program prepares prospective teachers to be purposeful, deliberative, reflective practitioners, who teach students to contribute to the deepening of democracy, and promote the common good. The program is designed to develop preservice teachers who learn from practice, engage in collaborative inquiry and partnerships to promote student learning and continued professional growth, create equitable classrooms, plan/organize meaningful lessons and assessments, and view themselves as curriculum developers who recognize that social studies content and curriculum are more than information in textbooks and standardized curriculum guides. Graduates are prepared to teach social studies in grades 7-12 and are recommended for Ohio licensure upon completion of all state requirements. The Integrated Social Studies major includes a choice of five concentrations: Economics, Geography, History, Political Science and Sociology.

The economics concentration challenges students to build on and integrate their economics content knowledge as part of developing participatory, democratic citizens.

The geography concentration challenges students to build on and integrate their geography-content knowledge as part of developing participatory, democratic citizens.

The history concentration challenges students to build on and integrate their history-content knowledge as part of developing participatory, democratic citizens.

The political science concentration challenges students to build on and integrate their political science-content knowledge as part of developing participatory, democratic citizens.

The sociology concentration challenges students to build on and integrate their sociology-content knowledge as part of developing participatory, democratic citizens.

CAREER OPPORTUNITIES: Preschool, kindergarten, elementary school, middle school, and secondary school teachers, except special education, held about 4.0 million jobs in 2006. Of the teachers in those jobs, about 1.5 million are elementary school teachers, 1.1 million are secondary school teachers, 674,000 are middle school teachers, 437,000 are preschool teachers, and 170,000 are kindergarten teachers. The vast majority work in elementary and secondary schools. Preschool teachers, except special education, are most often employed in child daycare services (59 percent), public and private educational services (16 percent), and religious organizations (15 percent). Employment of teachers is geographically distributed much the same as the population.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a

teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. To be admitted to the program, students must display evidence of adequate communication skills; sound content area knowledge (language arts, mathematics, science or social studies); a basic understanding of the teaching profession; a basic understanding of adolescents; and dispositions aligned with the conceptual framework of the College of Education, Health, and Human Services, including being open-minded, flexible, caring and responsible. Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA; Praxis I scores; and performance in English and communication studies coursework. Applicants to the ADED program must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health, and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with admission to the adolescence/young adult education program.

GRADUATION REQUIREMENTS:

Minimum 121 credit hours. Minimum 2.75 cumulative and minimum 2.6 major GPA. Students must earn a minimum grade of C (2.00) in all major coursework. A minimum grade of C (2.0) is required in some courses; view the program requirements to see specific courses.

LANGUAGE REQUIREMENT:

None

STUDY ABROAD/AWAY OPPORTUNITIES:

There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Lifespan Development and Educational Services
405 White Hall
Tel: 330-672-2294
Web: <http://www.ehhs.kent.edu/ldes>

DESCRIPTION:

The Bachelor of Science in Education in Intervention Specialist comprises five concentrations: Deaf Education, Educational Interpreter, Gifted Education with six options, Mild/Moderate Educational Needs and Moderate/intensive Educational Needs.

The Deaf Education Intervention Specialist license prepares candidates to work with students with hearing loss. The program develops expertise in a variety of areas, including: knowledge of content that crosses the general education curriculum (e.g., reading, mathematics, science, social studies) and specific methods for adapting content to meet the needs of students with hearing loss; language development; American Sign Language; Deaf Culture; audiological and medical aspects of hearing loss; assistive listening technology, and telecommunications. In addition, candidates learn skills necessary for working with families, other professionals, and the students themselves. Deaf Education candidates participate in practicum and student teaching experiences in residential and public schools within Ohio as well as other states. Graduates are eligible for teacher licensure through the Ohio Department of Education for students who are deaf from K-12.

The Educational Interpreter concentration prepares interpreters to work with children and adults who are deaf or hard-of-hearing (D/HH). The program prepares candidates to interpret in the classroom and to perform related student-support activities under the supervision of a licensed or certified classroom teacher. Candidates are required to complete a one-week internship (minimum five full school days) in a residential school for the deaf during the year of their method sequence. Additionally, to qualify for the final practicum, students must pass a sign language and proficiency examination. The Educational Interpreter program is not equivalent to a teaching license, and positions in public schools are not considered teaching positions. Graduates of the program receive state of Ohio licensure in educational interpreting for students from pre-K-12.

The Gifted Education concentration prepares candidates to work with learners who have extraordinary abilities intellectually or talents and creativity in one or more areas of performance. Linked to the middle childhood program, candidates completing this program are prepared to teach in two general education curricular areas. Candidates gain expertise in working with gifted students K-12 through specialized coursework, including assessment, social and emotional needs, and teaching methods. Students complete extensive practicum experiences and student teaching in middle childhood classrooms and in gifted education programs in the public schools. Program graduates will be eligible for licensure through the Ohio Department of Education to teach two curricular areas in grades 4-9, and an endorsement to teach in gifted programs.

The Mild/Moderate Intervention Specialist license is built upon extensive field-based experiences that are connected to theory and practical application of current evidence-based technologies/strategies for teaching students with learning disabilities, emotional and behavioral disorders, and mild cognitive delays. The program includes coursework from middle and early childhood education to ensure candidates are prepared to teach across the curricular areas of reading, math, science and social studies. In addition, specialized courses in characteristics of different disability and at-risk populations, collaborating with

families and other professionals, identifying and assessing strengths and areas of need, and academic and behavioral interventions ensure that candidates are responsive to the learning and social skills of individuals with disabilities. Graduates are eligible for licensure through the Ohio Department of Education to teach students with mild/moderate disabilities from K-12.

The Moderate/Intensive Intervention Specialist license is built upon extensive field-based experiences that are connected to theory and practical application of current evidence-based technologies/strategies for teaching students with significant learning and daily living needs. Students with more intensive needs include those with motor or sensory impairment, significant cognitive delays, autism or multiple disabilities. The program includes preparation across curricular areas in addition to specialized coursework focused on academic accommodations, adaptive daily living skills, technology to assist with physical, communication and mobility, alternative assessment, and transition from school to the world of work and adult living. Graduates are eligible for teacher licensure through the Ohio Department of Education for students with moderate/intensive needs from K-12.

CAREER OPPORTUNITIES:

Special education teachers held a total of about 459,000 jobs in 2006. Nearly all work in public and private educational institutions. A few worked for individual and social assistance agencies or residential facilities, or in homebound or hospital environments.
(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. A maximum of 100 students will be admitted to this program each academic year. A minimum ACT composite score of 21 (980 SAT combined critical reading and math score) OR a 2.75 cumulative high school grade point average and all 16 of the recommended college preparatory units is required. Students seeking admission to this program must meet all professional requirements for admission to advanced study and have a minimum cumulative 2.75 GPA in all previous undergraduate coursework. Because of the instituted enrollment management plan, meeting the above requirements does not automatically provide students admittance to the early childhood education major. Faculty will select the most qualified applicants based upon the number of available student spaces, students' standardized test scores, essay, interview and cumulative GPA. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission to advanced study and selective admission to the early childhood education program. Students transferring from another university should meet with an academic advisor in 304 White Hall at least one semester prior to transferring.

GRADUATION REQUIREMENTS:

Minimum 129 credit hours. Minimum 2.75 cumulative and a 3.00 major GPA. Students must earn a minimum grade of C (2.00) in all major coursework.

LANGUAGE REQUIREMENT:

Yes, for some concentrations (American Sign Language)

STUDY ABROAD/AWAY OPPORTUNITIES:

There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE:

\$35/semester

ACCREDITATION:

Deaf Education accredited by the Council on Education of the Deaf (CED)

STUDENT ORGANIZATIONS:

Kent Student Education Association

DESCRIPTION:

The adolescent/adult education (ADED) Life Science program is a four-year degree that prepares candidates for licensure in life science, grades 7-12. Students take a broad range of science-content courses from the geology, geography, chemistry and physics departments and specialize in biology content. Life Science majors complete most of their content coursework during their first three years; methods coursework typically begins during the spring of their third year. During the final year of the program, candidates complete remaining content courses, science teaching methods courses, a year-long placement in a local school district which concludes with 12 weeks of student teaching in the spring.

Life Science students are encouraged to meet with their faculty advisor early in their programs because many courses must be sequenced carefully.

CAREER OPPORTUNITIES:

Of the 1.2 million secondary schools teachers in the U.S., about 109,500 are science teachers in public and private schools. Currently, many school districts have difficulty hiring qualified teachers in some subject areas; most often mathematics, science (especially chemistry and physics), bilingual education and foreign languages. Accordingly, job prospects for ADED science majors are promising, especially in urban or rural school districts.

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

GRADUATION REQUIREMENTS:

Students seeking admission to this program must meet all professional requirements for admission to advanced study. To be admitted to the program, students must display evidence of adequate communication skills; sound content area knowledge (language arts, mathematics, science or social studies); a basic understanding of the teaching profession; a basic understanding of adolescents; and dispositions aligned with the conceptual framework of the College of Education, Health, and Human Services, including being open-minded, flexible, caring and responsible. Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA; Praxis I scores; and performance in English and communication studies coursework. Applicants to the ADED program must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health, and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with admission to the adolescence/young adult education program.

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Marketing Education program leads to the General Marketing Education license to teach at the high school level. Students complete coursework in marketing, professional education and Career-Technical teacher education including student teaching. Students must pass the Praxis series of examinations to become fully licensed.

CAREER OPPORTUNITIES: Teachers of self-enrichment education held about 261,000 jobs in 2006. The largest numbers of teachers were employed by public and private educational institutions, religious organizations, and providers of social assistance and amusement and recreation services.
(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. A maximum of 100 students will be admitted to this program each academic year. A minimum ACT composite score of 21 (980 SAT combined critical reading and math score) OR a 2.75 cumulative high school grade point average and all 16 of the recommended college preparatory units is required. Students seeking admission to this program must meet all professional requirements for admission to advanced study and have a minimum cumulative 2.75 GPA in all previous undergraduate coursework. Because of the instituted enrollment management plan, meeting the above requirements does not automatically provide students admittance to the early childhood education major. Faculty will select the most qualified applicants based upon the number of available student spaces, students' standardized test scores, essay, interview and cumulative GPA. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission to advanced study and selective admission to the early childhood education program. Students transferring from another university should meet with an academic advisor in 304 White Hall at least one semester prior to transferring.

GRADUATION REQUIREMENTS: Minimum 121 credit hours. 2.75 cumulative GPA.

Required for Ohio Licensure: Must pass Praxis II "Principles of Learning and Teaching grades 7-12" (passing score 165) and Praxis II specialty test "Marketing Education" (passing score 124)

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION:

The Middle Childhood teaching license is designed for grades 4-9. Students choose two concentration areas from reading and language arts, mathematics, science, and social studies. Upon completion of all program requirements, students are eligible for licensure in the selected subject areas, plus reading. In addition to content coursework and a substantial amount of field experiences, the program includes intensive pedagogy courses that prepare students to understand the unique social, physical, cognitive, and emotional needs of the young adolescent; these courses are taken as a cohort. Student teaching occurs during the final semester of the program.

The Ohio Department of Education has defined the Middle Childhood teaching license for grades four through nine. Students who choose this major will be required to select two concentration areas from reading and language arts, mathematics, science and social studies. Upon completion, they will be licensed to teach in those two subject areas.

While it is possible to complete the B.S.E. in middle childhood education in four years by taking 16-18 credits each semester, it is more probable that 4.5 years will be needed for certain combinations of concentrations.

Mathematics Concentration - The content coursework in the mathematics concentration includes classes in algebra, trigonometry, calculus, geometry and statistics.

Reading/Language Arts Concentration - The content coursework in the reading/language arts concentration includes classes in communication, grammar, literature, reading and writing.

Science Concentration - The content area coursework in the science concentration includes diverse classes in chemistry, biology, geology, and physics.

Social Studies Concentration - The content area coursework in the social studies concentration includes diverse classes in economics, history, political science, geography, and anthropology.

CAREER

OPPORTUNITIES:

Preschool, kindergarten, elementary school, middle school, and secondary school teachers, except special education, held about 4.0 million jobs in 2006. Of the teachers in those jobs, about 1.5 million are elementary school teachers, 1.1 million are secondary school teachers, 674,000 are middle school teachers, 437,000 are preschool teachers, and 170,000 are kindergarten teachers. The vast majority work in elementary and secondary schools. Preschool teachers, except special education, are most often employed in child daycare services (59 percent), public and private educational services (16 percent), and religious organizations (15 percent). Employment of teachers is geographically distributed much the same as the population.

(Source: Bureau of Labor Statistics)

ADMISSION

Students admitted to the College of Education, Health, and Human Services as freshmen must have been

REQUIREMENTS: fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. To be admitted to the program, students must display evidence of adequate communication skills; sound content area knowledge (language arts, mathematics, science or social studies); a basic understanding of the teaching profession; a basic understanding of adolescents; and dispositions aligned with the conceptual framework of the College of Education, Health, and Human Services, including being open-minded, flexible, caring and responsible. Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA; Praxis I scores; and performance in English and communication studies coursework. Applicants to the ADED program must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health, and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with admission to the adolescence/young adult education program.

GRADUATION REQUIREMENTS: Minimum 128 credit hours. Minimum 2.75 cumulative GPA. A minimum grade of C (2.0) grade is required in some courses; view the program requirements to see specific courses.

Required for Ohio Licensure: Must pass Praxis II "Principles of Learning and Teaching, Grades 5-9" and Praxis II specialty tests "Middle Childhood Language Arts (passing score 156) and "middle childhood Mathematics" (passing score 143).

LANGUAGE REQUIREMENT: None

DESCRIPTION: The Bachelor of Science in Nutrition and Food comprises two concentrations: Hospitality Management and Nutrition and Dietetics.

The hospitality management program prepares leaders for major hospitality industry segments through academic and research programs valuing quality of life, business success, collaborative partnerships, creative approaches, and ethical principles. Faculty members have advanced degrees in hospitality management and professional work experience in restaurants, hotels, club management, on-site foodservice, catering businesses, and conference centers.

The nutrition and dietetics program provides students with a broad general education and a strong foundation in nutrition, dietetics, and the sciences. The emphasis is on providing a program that integrates theory, research, and application of knowledge to the profession of dietetics. The curriculum meets the Didactic Program in Dietetics (DPD) requirements of the American Dietetic Association, and graduates are eligible for admission to accredited internships. The faculty has expertise in nutritional sciences, exercise science, clinical and community practice, and leadership studies.

CAREER OPPORTUNITIES: Hospitality management graduates manage restaurants, hotels, private clubs, and other related hospitality businesses or plan social and corporate events that include food, beverage, and lodging services. Sales management for food distribution companies or hotels and resorts are additional career paths of alumni. According to data from the National Restaurant Association, the number of foodservice management positions is projected to increase 8 percent from 2010 to 2020. U.S. Bureau of Labor Statistics projects a 3 percent increase in hotel and lodging managers, and a 13percent increase in casino hotel managers from 2008 to 2018.

Dietitians and nutritionists held about 60,000 jobs in 2008. U.S. Bureau of Labor Statistics projects a 9 percent increase in positions by 2018. More than half of all jobs are in hospitals, nursing care facilities, outpatient care centers, or offices of physicians and health practitioners. State and local government agencies provide additional jobs – mostly in correctional facilities, health departments, and other public health related areas. Some dietitians and nutritionists are employed in special food services, such as colleges and universities, airlines and company cafeterias. Other jobs are in public and private educational services, community care for the elderly, individual and family services, home health services, and the Federal Government. Some dietitians are self-employed working as consultants to facilities such as hospital and nursing care facilities or providing counseling to individuals. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: General Admissions for Freshman Students: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the [Admissions website for new freshmen](#).

[Audiology](#)[Sport Administration](#)[Trade and Industrial Education](#)[Minors](#)[Certificates](#)[Graduate Programs](#)[» College of Nursing](#)[» College of Public Health](#)[» College of Technology](#)[» Regional College](#)[» Honors College](#)

General Admissions for Transfer Student: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the [Admissions website for transfer students](#).

GRADUATION REQUIREMENTS:

By junior year in the hospitality program, students must complete and provide documentation of:

- Overall GPA of 2.0
- Valid standard first aid certificate
- Valid CPR certificate
- 400 hours of approved work hours within the hospitality industry
- Ohio Certified Manager status
- Completion of the following courses: HM 13022, 13023 and 13024

To graduate student must have a minimum of 121 credits (hospitality management) or 123 credits (nutrition and dietetics). Minimum of 2.25 major GPA and 2.0 cumulative GPA.

LANGUAGE REQUIREMENT:

None

PROGRAM FEE:

\$35/semester

ACCREDITATION:

Nutrition and Dietetics is accredited by the Commission on Accreditation for Dietetics Education (CADE) of the American Dietetic Association (ADA); Hospitality Management is accredited by the Accreditation Commission for Programs in Hospitality Administration (ACPHA)

STUDENT ORGANIZATIONS:

Student chapters of the Club Managers Association of America (CMAA), Professional Convention Management Association (PCMA), and Student Dietetic Association (SDA) provide opportunities for students to network with industry professionals.

<http://www.ehhs.kent.edu/tlc/>

DESCRIPTION:

The Bachelor of Science in Physical Education comprises three concentrations: Health and Physical Education, Physical Education Teacher Licensure and Human Movement Studies. Only the physical education teacher education and health and physical education concentrations lead to pre-kindergarten-through-grade-12 teaching licensure in Ohio.

A combined Health and Physical Education concentration in the physical education major is available to students who are seeking Ohio teacher licensure in both areas. The program is designed to be completed in five years and can allow students to satisfy up to 12 credit hours of program requirements with graduate courses. Graduates are eligible to sit for the pre-K-12 teacher licensing examinations.

The Physical Education Teacher Licensure program is a four year program for students who are seeking Ohio teacher licensure in physical education. Graduates are eligible to sit for the pre-K-12 teacher licensing examinations. The program includes multiple field experiences in a variety of school districts, followed by a full semester of student teaching.

The Human Movement Studies (HMS) concentration is anchored by the notion that the study of human movement is important in and of itself, as movement is a central biological and social phenomenon. The HMS concentration shares the core course requirements of the Bachelor of Science degree in physical education. Students extend their area of study outside physical education through the selection of a minor. The concentration provides students with the opportunity to become critical-evaluative actors in their educational experience by designing an individualized program of study that situates their interests in the broad phenomena of human movement within a continuously changing society. The interrelated goals transmitting specialized knowledge related to human movement, facilitating student agency, developing effective communication skills, and valuing human and cultural diversity are the bedrocks of HMS concentration.

CAREER OPPORTUNITIES:

Preschool, kindergarten, elementary school, middle school, and secondary school teachers, except special education, held about 4.0 million jobs in 2006. Of the teachers in those jobs, about 1.5 million are elementary school teachers, 1.1 million are secondary school teachers, 674,000 are middle school teachers, 437,000 are preschool teachers, and 170,000 are kindergarten teachers. The vast majority work in elementary and secondary schools. Preschool teachers, except special education, are most often employed in child daycare services (59 percent), public and private educational services (16 percent), and religious organizations (15 percent). Employment of teachers is geographically distributed much the same as the population.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high

Resources:

school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. A maximum of 100 students will be admitted to this program each academic year. A minimum ACT composite score of 21 (980 SAT combined critical reading and math score) OR a 2.75 cumulative high school grade point average and all 16 of the recommended college preparatory units is required. Students seeking admission to this program must meet all professional requirements for admission to advanced study and have a minimum cumulative 2.75 GPA in all previous undergraduate coursework. Because of the instituted enrollment management plan, meeting the above requirements does not automatically provide students admittance to the early childhood education major. Faculty will select the most qualified applicants based upon the number of available student spaces, students' standardized test scores, essay, interview and cumulative GPA. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission to advanced study and selective admission to the early childhood education program. Students transferring from another university should meet with an academic advisor in 304 White Hall at least one semester prior to transferring.

GRADUATION REQUIREMENTS:

Minimum 121 credit hours. Grade point average requirements vary by concentration. Students in Health and Physical Education need to provide evidence of certification in First Aid, CPR and a minimum equivalence to intermediate competency in Red Cross swimming.

LANGUAGE REQUIREMENT:

None

STUDY ABROAD/AWAY OPPORTUNITIES:

There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: \$35/semester

DESCRIPTION:

The adolescent/adult education (ADED) Physical Science program is a four-year degree that prepares candidates for licensure in physics and chemistry, grades 7-12. Students take a broad range of science-content courses from the biology, geology, and geography departments and specialize in physics and chemistry content. Physical Science majors complete most of their content coursework during their first three years and then begin their methods coursework during the spring of their third year. During the final year of the program, candidates complete remaining content courses, science teaching methods courses, and a year-long placement in a local school district, which concludes with 12 weeks of student teaching in the spring.

Physical Science students are encouraged to meet with their faculty advisor early in their programs because many courses must be sequenced carefully.

CAREER OPPORTUNITIES:

Of the 1.2 million secondary schools teachers in the U.S., about 109,500 are science teachers in public and private schools. Currently, many school districts have difficulty hiring qualified teachers in some subject areas; most often mathematics, science (especially chemistry and physics), bilingual education and foreign languages. Accordingly, job prospects for ADED science majors are promising, especially in urban or rural school districts.

ADMISSION REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. To be admitted to the program, students must display evidence of adequate communication skills; sound content area knowledge (language arts, mathematics, science or social studies); a basic understanding of the teaching profession; a basic understanding of adolescents; and dispositions aligned with the conceptual framework of the College of Education, Health, and Human Services, including being open-minded, flexible, caring and responsible. Faculty will select the most qualified applicants based on an interview; letters of recommendation; GPA; Praxis I scores; and performance in English and communication studies coursework. Applicants to the ADED program must have experience working with young adults in a supervisory capacity, such as tutoring, camp counseling, volunteer work or related experience. Students should contact the College of Education, Health, and Human Services' Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire about the procedures and criteria associated with admission to the adolescence/young adult education program.

GRADUATION

Minimum 134 credit hours. Minimum 2.75 cumulative and 2.60 major GPA. Students must earn a minimum

DESCRIPTION: The Bachelor of Science in Recreation, Park and Tourism Management is designed to provide students with an academic foundation and field experiences for preparation in the recreation and leisure services profession.

Students can select from one of three concentrations: park management, recreation management and tourism management.

The park management concentration focuses on providing opportunities for outdoor recreation and protecting the resources on which those opportunities depend.

The recreation management concentration focuses on recreation and leisure services in public, community and outdoor settings.

The tourism management concentration focuses on services in tourism industries and sustainable destination development.

CAREER OPPORTUNITIES: Recreation workers held about 320,000 jobs in 2006, and many additional workers held summer jobs in the occupation. About 32 percent of recreation workers worked for local governments, primarily in park and recreation departments. About 16 percent of recreation workers were employed by nursing and residential care facilities and another 10 percent were employed in civic and social organizations, such as the Boy Scouts or Girl Scouts or the Red Cross. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: General Admissions for Freshman Students: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the Admissions website for new freshmen.

General Admissions for Transfer Student: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the Admissions website for transfer students.

GRADUATION REQUIREMENTS: Minimum 121 credit hours. Minimum 2.25 major and 2.0 cumulative GPA.

Minimum 2.50 cumulative GPA to declare Business minor. Business minor and 2.50 minor GPA is required for graduation.

- University Requirements

DESCRIPTION: This major prepares individuals to teach health education in the schools. Students completing the program in a satisfactory manner are awarded multi-age licensure. Students complete a variety of field experiences and a culminating student teaching experience. Kent State's School Health Education Program is known for producing teachers of the highest quality.

A combined health and physical education concentration in the school health education major is available to students who are seeking Ohio teacher licensure in both areas. The program is designed to be completed in five years and can allow students to satisfy up to 12 hours of program requirements with graduate courses.

CAREER OPPORTUNITIES: School health educators work with groups of students with a range of abilities in preschool, elementary and secondary schools. In addition, they are professionally prepared to work in many community health agencies.

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students are admitted to health and human services programs and educational studies using the university admission criteria (see the Entering the University section of this Catalog), with the exception of the sport administration program, which requires a 2.75 high school GPA for entering freshmen and a 21 ACT or 980 SAT score. Selective admission criteria are used in some programs in the college. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required GPA. Students desiring to major in human development and family studies or speech pathology and audiology are admitted as pre-majors and later are accepted into the appropriate program only after specific requirements have been met. It is imperative that the student contact the individual school for detailed information.

GRADUATION REQUIREMENTS: Minimum 121 credit hours. Minimum 2.75 cumulative and major GPA. Student must provide evidence of certification in First Aid, CPR and minimum equivalence to intermediate competency in Red Cross Swimming

LANGUAGE REQUIREMENT: None

COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Health Sciences
100 Nixon Hall
PH: 330-672-2197 | Fax: 330-672-2194
Web: <http://www.ehhs.kent.edu/hs/>

DESCRIPTION: Speech Pathology and Audiology is a preprofessional undergraduate major focusing on the evaluation, treatment and research of human communication and its disorders. This undergraduate program provides a firm foundation leading to the master's degree in speech-language pathology or the doctorate in audiology and meets the academic and clinical requirements for the American Speech and Hearing Association certification and licensure by the Ohio Board of Speech Pathology and Audiology. The curriculum integrates a sequence of coursework designed to provide a strong liberal arts background and an understanding of normal and disordered aspects of the human communication process. Specific coursework includes: anatomy and physiology of the speech and hearing mechanisms, speech science, hearing science, neurology, phonetics, normal speech and language development, speech and language disorders, audiometry, and aural rehabilitation. Speech-language pathologists and audiologists are employed in a variety of settings: rehabilitation centers, hospitals, schools, community clinics, private practice, research laboratories, and colleges/universities.

CAREER OPPORTUNITIES: Speech-language pathologists held about 110,000 jobs in 2006. About half were employed in educational services, primarily in preschools and elementary and secondary schools. Others were employed in hospitals; offices of other health practitioners, including speech-language pathologists; nursing care facilities; home health care services; individual and family services; outpatient care centers; and child day care centers.

A few speech-language pathologists are self-employed in private practice. They contract to provide services in schools, offices of physicians, hospitals, or nursing care facilities, or work as consultants to industry.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. COLLEGE: College of Education, Health and Human Services

DEPARTMENT: School of Foundations, Leadership and Administration

316 White Hall

330-672-2012

Web: www.ehhs.kent.edu/fla

DESCRIPTION:

The Sport Administration major prepares students for careers in the sport industry through a balanced academic program and numerous practical experiences. Students complete a core group of courses developed to exceed accreditation guidelines, and all students are required to complete the business minor. The curricular balance of sport, business and sociological courses along with three required practical experiences make the program of study one that is cutting edge, particularly when compared to other programs within the state of Ohio and across the country.

CAREER

OPPORTUNITIES:

Upon completion of the major, students will have the opportunity to pursue numerous career paths in the sport industry including managing sport programs at all levels (youth, high school, collegiate, and professional), facility management, event planning, sport marketing and public relations.

ADMISSION

REQUIREMENTS:

Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students are admitted to health and human services programs and educational studies using the university admission criteria (see the Entering the University section of this Catalog), with the exception of the sport administration program, which requires a 2.75 high school GPA for entering freshmen and a 21 ACT or 980 SAT score. Selective admission criteria are used in some programs in the college. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required GPA. Students desiring to major in human development and family studies or speech pathology and audiology are admitted as pre-majors and later are accepted into the appropriate program only after specific requirements have been met. It is imperative that the student contact the individual school for detailed information.

Students must have a 2.50 GPA overall to be accepted into both the sport administration major and business minor. Students also must complete minimum 60 semester hours prior to being accepted into the business minor.

GRADUATION

REQUIREMENTS:

Minimum 121 credit hours. Minimum 2.50 major and cumulative GPA. Minimum 2.50 cumulative GPA to declare business minor. Business minor and 2.50 minor GPA required for graduation.

LANGUAGE

REQUIREMENT:

None

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Bachelor of Science in Education in Trade and Industry Education is designed for those individuals whose training and work experience is in a trade and/or industry and want to teach in a vocational setting.

ADMISSION REQUIREMENTS: Students admitted to the College of Education, Health, and Human Services as freshmen must have been fully admitted to the university. Admission to the college does not guarantee admission to a major and/or admission to professional coursework for a selective admission program. To be admitted directly into a teacher education program and Community Health, it is required that new freshmen have a 2.75 high school GPA and 16 units of college preparatory curriculum or a 21 ACT or 980 SAT score. Students who do not meet the GPA requirements of their intended major may enroll as pre-majors for selected programs or EHHS General until which time they have the required 2.75 GPA.

Students seeking admission to this program must meet all professional requirements for admission to advanced study. A maximum of 100 students will be admitted to this program each academic year. A minimum ACT composite score of 21 (980 SAT combined critical reading and math score) OR a 2.75 cumulative high school grade point average and all 16 of the recommended college preparatory units is required. Students seeking admission to this program must meet all professional requirements for admission to advanced study and have a minimum cumulative 2.75 GPA in all previous undergraduate coursework. Because of the instituted enrollment management plan, meeting the above requirements does not automatically provide students admittance to the early childhood education major. Faculty will select the most qualified applicants based upon the number of available student spaces, students' standardized test scores, essay, interview and cumulative GPA. Students should contact the Vacca Office of Student Services, 304 White Hall, during the first year of study to inquire into the procedures associated with admission to advanced study and selective admission to the early childhood education program. Students transferring from another university should meet with an academic advisor in 304 White Hall at least one semester prior to transferring.

GRADUATION REQUIREMENTS: Minimum 124 credit hours.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: \$35/semester

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Education, Health and Human Services > [Graduate Programs](#)

The College and Graduate School of Education, Health, and Human Services offers a full range of graduate programs resulting in the Doctor of Audiology, Doctor of Philosophy, Educational Specialist, Master of Education, Master of Arts, Master of Arts in Teaching and Master of Science degrees.

The Master of Education (M.Ed.) degree is available in a wide variety of program areas. Many of the programs lead to licensure through the Ohio Department of Education. The Master of Arts (M.A.) degree may include a thesis requirement. This option is favored by students who are seeking an opportunity to become involved in empirical or library-based research during their master's studies. The Master of Arts in Teaching (M.A.T.) degree is designed to prepare school teachers. It is a selective, full-time program serving individuals who have never held a teaching license. There are two Master of Science (M.S.) degrees available: M.S. in Nutrition and M.S. in Exercise Physiology.

The Educational Specialist degree is available in the areas of counseling, curriculum and instruction, educational administration, rehabilitation counseling, school psychology, special education and career-technical teacher education.

The Doctor of Audiology degree prepares students for clinical work in the field of audiology.

The Doctor of Philosophy degree is available in audiology; counseling and human development services; cultural foundations; curriculum and instruction; educational administration (K-12 school leadership and higher education administration); educational psychology; evaluation and measurement; health education and promotion; exercise physiology; school psychology; special education; and speech pathology.

Courses and workshops are also made available to professional educators who are not seeking advanced degrees and to students of the other graduate schools of Kent State University.

The College of Education, Health, and Human Services is accredited by the National Council for the Accreditation of Teacher Education for the preparation of early childhood teachers, middle childhood teachers, adolescence to young adult teachers, intervention specialist teachers, vocational teachers and school service personnel at the baccalaureate, master's, educational specialist and doctoral levels. Accreditation is also provided by the Accreditation Commission for Programs on Hospitality Administration (ACPHA), the Commission on Accreditation for Dietetics Education of the American Dietetic Association, American Psychological Association, American Speech-Language-Hearing Association, the Commission on Rehabilitation Education, the Council on Accreditation for Counseling and Related Educational Programs, the National Council on Education for the Deaf and the Ohio Department of Education. In addition, certification is provided by the National Council on Family Relations that enables students to become certified Family Life Educators (CFLE).

Student Services at the location listed above. The Office of Graduate Student Services welcomes prospective students who seek guidance in identifying an appropriate program area or who have general questions regarding the College of Education, Health, and Human Services. Office hours are Monday through Friday, 8:00 a.m. to 5:00 p.m. Information and the online admission application can also be obtained from the Web site at <http://www.kent.edu/ehhs/ogs/index.cfm>

For guidance in choosing a graduate program, contact:

Mike Hollenbaugh
330-672-0559
mhollenb@kent.edu

Program Defined Requirements

Program areas are guided by the standards of their professional association(s) and/or accrediting body/bodies in setting their degree Program Requirements. Students are required to follow the Program Requirements defined by their respective program areas. Substitutions and waivers of program requirements are initiated by the student in consultation with their faculty advisors and must be approved by the advisor.

Transfer and Non-Degree Credit

The College of Education, Health and Human Services will allow a total of 12 semester hours of graduate credit to be transferred into a master's program. These hours can be transferred from another institution, taken while admitted as a temporary, guest, workshop or special nondegree student, or a combination of the previous. In no case, however, can more than 12 hours be used. Students cannot use more than four (4) hours of workshop credit toward a degree program (if the workshops are transferred into Kent State, they must be a grade of B=3.0 or better). Also, coursework cannot be more than 6 years old for a master's program at the time of graduation. Student must have been admitted as a graduate student at the time the course was taken in order to transfer credit.

Student Teaching

For student teaching and any culminating internship in teacher education that requires candidates to be placed within a school or agency ("school/agency") setting, the college requires students to complete these background checks:

- Bureau of Criminal Investigation and Identification (BCII)
- Federal Bureau of Investigation and Identification (FBI)

The results should be submitted to authorized personnel at their assigned "school/agency" before the first day of the semester in which the student teaching/internship will take place. The authorized "school/agency" personnel determines whether a candidate may participate in fieldwork in that setting.

The BCII and FBI background checks are valid for one year and are mandatory for licensure application. Electronic fingerprinting is available for BCII and FBI in 221 White Hall and should be completed at least two months prior to student teaching/culminating internship. Candidates are responsible for fees incurred for this requirement. For more information on this policy, contact the Director of Clinical Field Experience, 304 White Hall.

Visit the Ohio Department of Education Web site at <http://ode.state.oh.us> for more information about background check requirements for Ohio educators.

For specific information about the results of the background check, contact the Office of Professional Conduct at the Ohio Department of Education.

Licensure, Endorsements and Validations

All areas eligible for licensure, endorsement and validation require current teacher certification/licensure unless noted otherwise.

PRAXIS II

Candidates for licensure in Ohio will need to satisfactorily complete the appropriate portion(s) of Praxis II. This applies to persons seeking initial teaching, pupil personnel and administrative licenses, as well as anyone adding an endorsement or validation to an existing certificate/license, required. Specific licensure tests are being phased in and may not yet be available. Please contact the Vacca Office of Student Services, 330-672-2862, for additional information. Individuals applying for initial licensure will also be required to complete a fingerprint check with the Bureau of Criminal Identification and Investigation (BCII). Anyone who has not lived continuously in Ohio for the last five years must also complete an FBI record check. Electronic fingerprinting is available in room 221 White Hall for BCII record checks. Please note: electronic fingerprinting is not an option for the FBI record check. FBI cards can be obtained in 304 White Hall.

Recommendation for licensure by the College of Education, Health, and Human Services and clearance of record checks by BCII and FBI (if appropriate) will result in the issuance of the appropriate provisional license. All students should apply for licensure during the last five weeks of the semester in which they expect to complete all requirements.

Applications will not be processed until a student has successfully completed Praxis II Examinations and all coursework requirements. Once all requirements are completed the application will be processed by the State Department of Education in Columbus. Licenses will be issued by the state once the application is processed (approximately four to six weeks) and the background check by BCII and FBI (if appropriate) is received.

If documentation is requested by a school system prior to issuance of the license, a letter of completion will be issued by the Vacca Office of Student Services, Room 304, White Hall.

This letter is a special service we offer to our students and will be available one week after the final date for which grades are to be posted on FlashFAST.

In order to be eligible to receive a letter of completion you must meet ALL of the following criteria:

- Completed all required coursework for licensure
- Licensure application on file
- Passing Praxis II score(s)

Licensure Areas

The following areas are eligible for Ohio Department of Education teacher licensure through coursework offered by the College of Education, Health and Human Services:

- Early Childhood*
- Early Childhood Intervention Specialist*
- Deaf Education*
- Library/Media*
- Middle Childhood Education* (MCED students can earn the generalist license. It typically only involves undergraduate coursework but a graduate student might also be eligible to add it onto the MCED license.)
- Mild/Moderate Intervention Specialist*
- Moderate/Intensive Intervention Specialist*
- Initial licensure available at the graduate level. Requires no prior certification or licensure.

The Master of Arts in Teaching program is available for initial licensure in specific areas of adolescence to young adult education, early childhood education, multi-age areas and career-technical teacher education. Major subject area coursework must be completed prior to entry into the program.

The following areas are eligible for Ohio Department of Education educational personnel licensure through coursework offered by the College of Education, Health, and Human Services:

- Principal
- School Counselor*
- School Psychologist*
- Superintendent
- Educational Administrative Specialist with concentrations in the following:
 - Educational Research
 - Pupil Services Administration
 - School Community Relations
 - Staff Personnel Administration
 - Vocational Education Administration, Curriculum, Instruction and Professional Development
- Audiologist*
- Speech-Language Pathologist*

Endorsements

The following areas are eligible as endorsements by the Ohio Department of Education through College of Education, Health and Human Services graduate studies:

- Computer Technology
- Gifted Education
- Pre-Kindergarten
- Reading
- Transition to Work

[University Requirements](#)

DESCRIPTION: The Doctor of Audiology is a professional doctorate that prepares students as competent audiologists. Graduates are independent professionals who specialize in the diagnosis, management and treatment of hearing and balance disorders.

The Ph.D. program in Audiology provides the student with a strong theoretical background and research competencies in communication processes and/or disorders.

ADMISSION REQUIREMENTS: Official transcript(s), GRE, goal statement and two letters of recommendation.

GRADUATION REQUIREMENTS: Au.D.: The curriculum is a continuous 48-month post baccalaureate course of study designed to integrate classroom, laboratory and clinical experiences. All students attend full-time and take the same courses in appropriate sequence. The emphasis of the program is on the principles and practices underlying evaluation, treatment and provision of hearing care services.

For progression and graduation, students must meet the following degree requirements:

- Maintain an overall grade point average of 3.0.
- Complete a minimum of 122 semester hours.
- Accrue 2000 clock hours of clinical experience.
- Meet the requirements for provisional Ohio licensure in audiology.
- Pass academic and clinical competency-based examinations.
- Satisfactorily complete the required course.

Ph.D.: After admission to the Ph.D. degree program, students plan a program of study with their respective faculty advisory committee headed by their advisor. Students' programs may include at least one appropriate graduate-level minor or cognate as well as the major.

Specific school requirements include completion of 45 semester hours of precandidacy graduate work beyond the master's degree and acceptable performance on a written and oral comprehensive examination.

Students who have not completed a master's thesis are required to complete and defend a research project prior to taking their comprehensive examination.

The 45 semester hours of precandidacy study consists of 24 hours in a major area of focus, 15 hours in two minor areas of focus, and 6 semester hours of research tool courses.

CANDIDACY: Students may be admitted to the Ph.D. Program on a part-time basis; however, students must also meet a residency requirement of two consecutive semesters of fulltime enrollment prior to acceptance into candidacy.

DESCRIPTION: The Educational Specialist in Career-Technical Teacher Education serves individuals who desire to continue as classroom and/or laboratory instructors in one of the career-technical service areas.

The Master of Education in Career-Technical Teacher Education serves individuals who desire to continue as classroom and/or laboratory instructors in one of the career-technical service areas. Available specializations include integrated business education, marketing education, family and consumer science education and trade and industrial education. The special needs specialization focuses on coursework and professional experiences related to the study of special needs populations in career-technical education.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement and two letters of recommendation.

GRADUATION REQUIREMENTS: The Master of Education (M.Ed.) degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.Ed. students have six years from the term of first enrollment to complete the degree.

DESCRIPTION: The Master of Education in Clinical Mental Health Counseling prepares students for employment as counselors in community-based human service agencies (e.g., substance abuse facilities, mental health centers, child and family service agencies) as well as private counseling facilities.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement, two letters of recommendation, good moral character statement and interview.

GRADUATION REQUIREMENTS: The M.Ed. degree curriculum is a minimum of 60 semester hours, including a 600 clock-hour internship. A pre-practicum examination and comprehensive examination must be passed for matriculation and graduation. This program is designed to fulfill the educational requirements for licensure as a Professional Clinical Counselor in the state of Ohio. The program may be pursued on a part-time or full-time basis, although some full-time study is urged.

DESCRIPTION: The Master of Arts and Master of Education in Cultural Foundations is oriented toward a critical understanding of broad normative and interpretive issues in education and human service professions. Course offerings apply traditional humanistic and social science modes of inquiry to theories and practices of education broadly conceived. Foundational study explores the often-conflicting demands placed upon educational institutions and examines a wide range of responses to them. The program offers students an overview of educational issues and policies emerging from a world increasingly dominated by technology and such concerns as poverty, social and political marginalization and environmental degradation. Coursework examines theories of society, morality and politics as these relate to the study of education. Classes focus on topics such as the political and moral dimensions of education and educational policy formation, the nature of multicultural and international education, the engagement of academic and public knowledge, and ideas of nature and education.

Graduates with a Ph.D. in Cultural Foundations have enjoyed success in finding (or sometimes creating!) jobs in school systems, higher education, foundations, policy research and government agencies.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement and two letters of recommendation. Admission into the Ph.D. also requires earned master's degree, GRE, résumé or vita and interview.

GRADUATION REQUIREMENTS: M.A. and M.Ed.: The degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.A. students have six years from the term of first enrollment to complete the program.

Ph.D.: After admission to the Ph.D. degree program, students plan a program of study with their respective faculty advisory committee headed by their advisor. Students' programs may include at least one appropriate graduate-level minor or cognate as well as the major.

THESIS/DISSERTATION: M.A. and M.Ed.: Some programs, but not all, have six hours of Thesis I or six hours of Master's Project.

DESCRIPTION: The Educational Specialist in Curriculum and Instruction provides a wide range of graduate study opportunities in progressive curriculum and teaching best practices. The program prepares educators for continuing professional development, education in a multicultural society and leadership for curriculum reform and renewal.

The Master of Education in Curriculum and Instruction provides a wide range of graduate study opportunities in progressive curriculum and teaching best practices. The program prepares educators for continuing professional development, education in a multicultural society and leadership for curriculum reform and renewal. It offers seven specializations for professional expertise: curriculum and teaching studies, English/language arts education, mathematics education, middle childhood education, physical education, science education and social studies education.

The Master of Education in Curriculum and Instruction—Physical Education Teacher Education is state accredited and leads to a multi-age (pre-K through grade 12) license to teach physical education. The program includes field experience components at the elementary and secondary levels, and culminates with a full-semester student teaching experience. Field experiences and student teaching require course requirements to be completed during school hours.

The Ph.D. in Curriculum and Instruction prepares scholars for successful careers in college and university setting and produces curriculum leaders for schools and other educational institutions.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement and two letters of recommendation. Admissions into the M.Ed. Physical Education Teacher Education concentration also requires interview and GRE if GPA is below than 2.75. Admission into the Ed.S. also requires GRE and résumé or vita.

Admission into the Ph.D. also requires GRE, sample of written work, résumé or vita and interview.

GRADUATION REQUIREMENTS: Ed.S.: This program is composed of a minimum of thirty semester hours of planned graduate study beyond the master's degree and must include a fundamentals of curriculum course (unless waived), an educational foundations course, a research course, and courses in a specialized C&I discipline or area of study. Completion of an appropriate internship experience is recommended.

M.Ed.: This program is composed of a minimum of thirty-two semester hours of planned graduate study.

Ph.D.: This program contains a minimum core of five C&I courses, one foundations course, and two research courses, doctoral students each design an individualized course of study with the assistance of a supervising prospectus committee, which they organize. The course phase of study culminates with a

written and oral comprehensive examination that is created and evaluated by each doctoral student's prospectus committee. Once doctoral students have passed the comprehensive examination, they organize a dissertation committee, which supervises their dissertation research project. Doctoral students achieve the Ph.D. degree upon successfully defending their dissertation research projects. This culminating peer review process, which is open to the public, formally acknowledges that the doctoral students have established an independent and respected research expertise.

DESCRIPTION: The Master of Arts and Master of Education in Early Childhood Education prepares critically reflective teachers with advanced knowledge in pre-school through primary multi-disciplinary curriculum. Students are prepared to be democratically accountable leaders, co-decision makers, pedagogical experts and committed professionals in various early childhood realms. The program emphasizes commitment to equitable and caring learning communities. Ohio endorsements for pre-school, pre-school with special needs or generalist (grades four and five) may be embedded in the program. The M.A. requires a thesis.

M.A. and M.Ed.: Pre-Kindergarten Special Needs Endorsement provides teachers with the coursework and field experiences necessary to work effectively with preschool aged children with disabilities in a variety of settings. The Pre-Kindergarten Special Needs Endorsement can be added to the Early Childhood Education License and/or the Early Childhood Pre-K Validation and any Special Education license.

The Master of Arts in Teaching in Early Childhood Education is for qualified persons who possess at least a baccalaureate in a discipline other than teacher education. This program leads to Ohio licensure for teaching children age three through grade three. Students have intensive field experiences in pre-school, kindergarten and primary programs, including those in urban/diverse settings.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement, two letters of recommendation and good moral character verification. Admission into the M.A.T. also requires GRE, Praxis I Mathematics, supplemental form and interview.

GRADUATION REQUIREMENTS: M.A. and M.Ed.: Students are then guided by faculty in the development of a program of study that satisfies both individual professional goals and expectations of the department, college and university. All students are expected to complete an exit project that involves a practicum, action research project or thesis (M.A.).

M.A.T.: The Master of Arts in Teaching degree in early childhood education is a program for students who have a bachelor's degree in an area other than teacher education. This program requires 18 months of full-time study which begins in June. Students are also required to take the Graduate Record Examination and the math portion of Praxis I for admission. See Web site for deadline dates. The Praxis II Specialty Test for Early Childhood Education is required for licensure.

CULMINATING REQUIREMENTS: M.Ed.: Students must complete an exit project.

M.A.T.: Student teaching is required.

THESIS: A thesis is required for the M.A. degree.

DESCRIPTION: The Educational Specialist in Educational Administration–Higher Education provides continuing educational opportunities for practitioners who wish to hold professional leadership positions such as a director of instruction, a special subject/area coordinator or a director of staff development.

The Ph.D. in Educational Administration–Higher Education prepares highly effective higher education administrators and staff professionals who possess the skills and competencies required to meet the varied challenges facing two-year, four-year and graduate institutions and communities today, and to help shape educational institutions in the future.

ADMISSION REQUIREMENTS: Official transcript(s), 3.0 GPA, GRE, goal statement, two letters of recommendation, résumé or vita and interview. Admission into the Ph.D. also requires a master's degree.

GRADUATION REQUIREMENTS: Ed.S: This degree requires a minimum of 30 hours of planned graduate study beyond the master's degree.

Ph.D: After admission to the Ph.D. degree program, students plan a program of study with their respective faculty advisory committee headed by their advisor. Students' programs may include at least one appropriate graduate-level minor or cognate as well as the major.

DESCRIPTION: The Educational Specialist in Educational Administration-K-12 provides continuing educational opportunities for practitioners who wish to hold professional leadership positions such as a director of instruction, a special subject/area coordinator, or a director of staff development.

The Master of Arts and the Master of Education in Educational Administration-K-12 Leadership prepares teachers to become administrators in public and private school settings. This is an academically rigorous and experientially intense program where future school leaders are challenged to excel and take their learning and potential to the next level by developing knowledge and understanding of current and developing leadership theories and practices.

The Ph.D. in Educational Administration-K-12 Leadership prepares reflective practitioners who can function effectively as leaders in complex educational settings. Graduates are employed in public and private institutions at the pre-kindergarten to grade 12 and higher educational levels, as well as in non-school settings, both public and private in nature.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement, two letters of recommendation and interview. A 3.0 GPA is required for the M.A. or M.Ed. (GRE required if undergraduate GPA is below 3.0). A 3.5 GPA is required for the Ed.S. A résumé or vita is required for Ph.D. The Ed.S. and Ph.D. both require the GRE (Ed.S.: 530 verbal, 510 quantitative, 4.5 writing; Ph.D.: 550 verbal, 530 quantitative, 4.5 writing).

GRADUATION REQUIREMENTS: Ed.S.: Thirty semester hours of planned graduate study beyond the master's degree is required to receive an Educational Specialist degree.

M.A.: The Master of Arts (M.A.) degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.A. students have six years from the term of first enrollment to complete the program.

Ph.D.: After admission to the degree program, students plan a program of study with their respective faculty advisory committee headed by their advisor. Students' programs may include at least one appropriate graduate-level minor or cognate as well as the major.

DESCRIPTION: The Master of Arts and the Master of Education in Educational Psychology provides advanced study in the psychological aspects of human learning and development. Students acquire a broad, basic knowledge of educational psychology and evaluation procedures and develop competencies for addressing problems of learning and development in educational settings. The program's flexibility—with respect to course equivalencies, thesis and elective options—makes it appropriate for classroom teachers, professionals in alternative educational settings and students wishing to pursue doctoral-level training in educational psychology.

The Ph.D. in Educational Psychology provides for advanced study and research in the psychological aspects of the educational enterprise. Under the more general rubric of Educational Psychology, students can choose an official concentration in Instructional Technology, which will include coursework that examines how to most effectively integrate today's information and communications technologies into instructional settings. Graduates are qualified to teach at the university level and are also prepared for professional leadership, instructional design, research and other activities in a variety of school and alternative educational settings.

Educational Psychology—Instructional Technology provides advanced coursework that examines current theories about how communications and information technologies can be most effectively designed, developed and utilized to enhance instruction in a variety of professional settings. Graduates are qualified to teach at the university level and to provide dynamic leadership in other professional roles that involve the implementation of instructional technology.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement and two letters of recommendation. Admission into the Ph.D. Instructional Technology concentration also requires GRE (combined score of 1000 or greater on verb and quantitative, 4.0 writing), résumé or vita and interview.

GRADUATION REQUIREMENTS: M.A. and M.Ed. degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.A. students have six years from the term of first enrollment to complete the program.

Ph.D: After admission to the Ph.D. degree program, students plan a program of study with their respective faculty advisory committee headed by their advisor. Students' programs may include at least one appropriate graduate-level minor or cognate as well as the major.

DESCRIPTION:

The highlight of the Master of Education in Evaluation and Measurement, designed for teachers, is the contemporary and relevant nature of the coursework. Coursework focuses on topics related to understanding and using value-added assessment, evidence-based research and data-driven decision making to improve instruction and student learning (all coursework is highly related to what teachers do on a daily basis, yet receive very little training in undergraduate teacher preparation programs). Cohorts have start dates in the fall and spring each year and are done in a 15-month period (both traditional classroom and online courses are utilized in this program).

The Ph.D. in Evaluation and Measurement seeks to develop professionals who have the theoretical knowledge base and application skills to teach courses at the college level in research design, statistics, measurement and evaluation; conceptualize, design and evaluate a wide variety of research methodologies; choose appropriate analyses for questions and designs that have been proposed; communicate effectively with educators and other professionals in the development and application of research and psychometric materials; and develop and evaluate programs and follow through with written reports. Course offerings encompass the broad range of expertise required of those who will assume leadership roles in the conduct and teaching of research, measurement, statistics and evaluation.

ADMISSION

REQUIREMENTS:

Official transcript(s), goal statement and two letters of recommendation. Admission into the Ph.D. program also requires GRE and résumé or vita.

GRADUATION

REQUIREMENTS:

M.Ed.: This degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.Ed. students have six years from the term of first enrollment to complete the degree.

Ph.D.: After admission to the Ph.D. degree program, students plan a program of study with their respective faculty advisory committee headed by their advisor. Students' programs may include at least one appropriate graduate-level minor or cognate as well as the major.

[Ph.D. Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION:

Graduates of the Master of Science in Exercise Physiology are prepared for a wide variety of career options, including exercise prescription and research, as well as doctoral study. Degree applicants are expected to have substantial preparation in the sciences, usually including coursework in biology, chemistry, physics, mathematics, anatomy, kinesiology and exercise physiology. Representative faculty research includes the areas of body composition, metabolism/nutritional requirements, environment, clinical exercise physiology and the psychophysiology of aging as it is influenced by physical activity and fitness.

The Ph.D. in Exercise Physiology prepares students for a wide variety of career options, including exercise prescription and research, as well as doctoral study. The program develops the competencies needed for those who intend to teach exercise physiology, pursue research or apply exercise physiology in practice.

ADMISSION REQUIREMENTS:

Minimum requirements for entry into the M.S. program is a 3.0 GPA (4.0 scale); a GRE of 1000; an undergraduate degree in Exercise Science or equivalent preparation; official transcript(s); goal statement and two letters of recommendation.

Admission into the Ph.D. also requires an interview and GRE.

GRADUATION REQUIREMENTS:

M.S.: The minimum credit-hour requirement for the masters is 34 semester hours beyond the bachelor's degree. However, only in rare instances does a student fulfill the educational and research expectations within this minimum-hour requirement. Any deficiencies in a doctoral student's academic preparation must be corrected very early in the approved academic program. This degree has both thesis and non-thesis options.

Ph.D.: The minimum credit-hour requirement for the doctorate is 90 semester hours beyond the bachelor's degree. However, only in rare instances does a student fulfill the educational and research expectations within this minimum-hour requirement. Any deficiencies in a doctoral student's academic preparation must be corrected very early in the approved academic program.

CANDIDACY:

Ph.D.: Students will be required to pass an oral and written candidacy exam after coursework is completed before beginning their dissertation.

THESIS/ DISSERTATION:

M.S.: Students in the masters program can choose to do a thesis.

Ph.D.: The dissertation for the doctorate must show that the student has the competency to conduct

research in a discriminating and original manner. The quality of the dissertation must be such that one of more articles acceptable for publication in a professional journal may be expected to be derived from it.

RESEARCH OPPORTUNITIES:

M.S.: Students in the masters program are encouraged to include research hours as part of their program.

Ph.D.: Prior to taking the candidacy examination, the student must demonstrate his or her ability to conduct independent research related to the field of exercise physiology. This may be in the form of a completed thesis, an independent study project, or an article published in an acceptable research journal. The acceptability of such evidence is to be determined by faculty advising students in exercise physiology.

DESCRIPTION: The Master of Arts in Exercise, Leisure and Sport consists of three concentrations: Athletic Training, Sport and Recreation Management and Sport Studies.

Athletic Training serves to provide post-certification athletic trainers a higher level of specialization in athletic training and prepares them for advanced study if they pursue a doctorate. This comprehensive program assures mastery of specified knowledge and skills necessary to be successful in the field of athletic training. Students have the opportunity to pursue advanced clinical and academic training while obtaining knowledge and skills relative to effective clinical instruction and supervision. Advanced research skills are also a critical component to this advanced track program. Opportunities to perform research independently and/or in conjunction with program faculty are widely available.

Sport and Recreation Management provides students with the knowledge, skills and experiences to enable them to become successful professionals in the field of sport and recreation management. The program's core gives students a knowledge base in management theory and application in both sport and recreation settings.

Sport Studies focuses on the pedagogical, historical and sociological aspects of physical activity and sport.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement and two letters of recommendation. Admission into the Sport Studies and Sport and Recreation Management concentrations also requires GRE if GPA is less than 2.75.

GRADUATION REQUIREMENTS: The departmental requirements are ELS 63050 (Research Processes in Exercise, Leisure and Sport) and 63018 (Ethics in Exercise, Leisure and Sport). Following, or concurrent with, enrollment in courses taken to fulfill the departmental requirements, students complete courses identified as concentration requirements that are unique to the chosen concentration.

DESCRIPTION: The Master of Arts in Family Studies consists of two concentrations: Gerontology and Human Development and Family Studies.

Gerontology provides students with an interdisciplinary course of study and opportunities to participate in aging-related research and community outreach projects. Students are assisted in developing a specialty area in gerontology to enable them to advance in their professional or academic careers.

Human Development and Family Studies provides students with advanced knowledge in the fields of family sciences and human development and the opportunity to develop multidisciplinary research and community outreach skills. Coursework enables students to apply to become Certified Family Life Educators. Graduates are prepared for leadership and teaching positions in the social services, junior and community colleges and cooperative extension, and/or for pursuing doctoral-level study.

ADMISSION REQUIREMENTS: Official transcript(s), 3.0 GPA, goal statement and three letters of recommendation.

GRADUATION REQUIREMENTS: Core courses required in both concentrations include HDFS 64023, EVAL 65510 and EVAL 65511. Human Development and Family Studies requires 32 semester hours, and Gerontology requires 33 semester hours.

THESIS/DISSERTATION: For Human Development and Family Studies either a Masters Thesis or a Masters Project is required. Gerontology requires a Masters Thesis.

The thesis track is intended for research-oriented students and is designed to provide the opportunity to conduct original research. Approval of a thesis proposal by the student's thesis committee is required, as is the successful completion of an oral final examination conducted by the thesis committee.

The master's project track is intended for students who do not plan to continue graduate work beyond the master's degree, and provides the opportunity to approach research and theory in a more applied manner. The presentation and interpretation of original research is not required. However, approval of the intended project by the student's master's project committee is required, as is the successful completion of an oral final examination conducted by the master's project committee.

DESCRIPTION: The Master of Education Health Education and Promotion enables graduates to pursue their diverse interests in the field while addressing competencies essential to professional development. Students are encouraged to pursue certification as Health Education Specialist.

The M.Ed. in Health Education and Promotion consists of two concentrations: Community Health and School Health Licensure,

Community Health provides background for those who will be involved in positions of leadership in a wide variety of health-related community settings as well as for those who will proceed to doctoral work in fields related to health education and health promotion.

School Health Licensure enables graduates to teach health in schools or pursue diverse interests in the field. Competencies essential to school health education are addressed.

The Ph.D. in Health Education and Promotion is for students with a completed master's degree in health education or a related field. It prepares them for leadership roles in academia and community or school settings. Health Education borrows from many disciplines, including community organization, education, medicine, biological science, psychology, statistics and communication. Graduates work in schools, higher education, government agencies, hospitals and non-profit agencies.

ADMISSION REQUIREMENTS: M.Ed: Official transcript(s), goal statement and two letters of recommendation. Admission into the School Health Licensure concentration also requires current Ohio teaching license.

Ph.D: Official transcript(s), earned master's degree, GRE, goal statement, two letters of recommendation, résumé or vita and interview.

GRADUATION REQUIREMENTS: The Master of Education (M.Ed.) degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.Ed. students have six years from the term of first enrollment to complete the degree.

The M.Ed. in Health Education in Promotion is 41-42 semester hours.

After admission to the Ph.D. degree program, students plan a program of study with their respective faculty advisory committee headed by their advisor. Students' programs may include at least one appropriate graduate-level minor or cognate as well as the major.

DESCRIPTION: The Master of Education in Higher Education Administration and Student Personnel prepares graduates to assume a wide variety of administrative positions within colleges and universities throughout the world, ranging from entry level to director level. The curriculum, grounded in theory and focused on practice, is designed to reinforce entry-level skills, to support diverse student populations in their development, and to cultivate the skills and competencies necessary to lead and administer programs. Focusing on the "big picture," students gain an understanding of the complex environment in which they will be working.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement, GRE if undergraduate GPA is below 3.0, goal statement, two letters of recommendation, résumé or vita and interview.

GRADUATION REQUIREMENTS: The master's degree requires the successful completion of 45 semester hours of approved graduate study. Graduates are prepared to work as staff and administrators in campus life, career services, judicial affairs, resident services, alumni, admissions, academic success, academic advising, international student services, institutional advancement, upward bound, student disability services, student multicultural center and undergraduate and graduate studies.

DESCRIPTION: The Master of Education in Instructional Technology consists of three concentrations: Computer/Technology, Instructional Technology/General and Library/Media. A degree can be obtained in any of the three concentrations, or the endorsement/licensure can be obtained without the degree for fewer credit hours

Computer/Technology is a licensure endorsement program intended for teachers who plan to teach computer applications in the classroom or who want to assume technology coordinator positions in a school or at the district level. This endorsement can only be added to an existing teaching license and cannot be obtained independently as a separate licensure.

ITEC General degree program is designed to prepare students to use a variety of technologies in classrooms, both in schools, in training facilities, or in a variety of other capacities associated with instruction.

Library/Media prepares students for positions in school media centers and libraries. This licensure can only be added to an existing teaching license and cannot be obtained independently as a separate licensure. It also requires the passing of the state Praxis examination in Library/Media.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement and two letters of recommendation. Admission into the Library-Media concentration also requires both GRE and good moral character verification if initial licensure.

GRADUATION REQUIREMENTS: The Master of Education (M.Ed.) degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.Ed. students have six years from the term of first enrollment to complete the degree.

THESIS/DISSERTATION: A thesis project can be chosen as part of the Masters Degree Program, in lieu of taking two courses (6 credit hours). Students select a committee comprised of two faculty members to supervise their work on this project.

PROGRAM FEE: None

ACCREDITATION: The Computing/Technology endorsement program has been fully accredited by the National Council for Accreditation of Teacher Education (NCATE).

DESCRIPTION: The Master of Education in Intervention Specialist consists of nine concentrations: Deaf Education, Early Child Intervention Specialist, Early Education of the Handicapped Endorsement, Educational Interpreting K-12, General Special Education, Gifted, Mild/Moderate Education Needs, Moderate/Intensive Educational Needs and Transition to Work.

Deaf Education provides students with the coursework and field experiences necessary to be licensed as an intervention specialist in the area of deaf education.

The goal of the *Early Child Interventional Specialist* is to make significant contributions to the early childhood intervention research base through applied and participatory research and to disseminate findings to local, state, national and international forums through publications, presentations and consultation. The program seeks to increase the number of family-guided and culturally responsive personnel to serve young children with disabilities and their families with the skills necessary to participate in the global community, serve as critical consumers and life long learners and operate as effective transdisciplinary team members.

Early Education of the Handicapped Endorsement can be added to any Special Education license, the Early Childhood Education license and/or the Pre-K validation. The endorsement provides teachers with the coursework and field experiences necessary to work effectively with pre-school aged children with disabilities in a variety of settings.

Educational Interpreting K-12 prepares interpreters to work with children and adults who are deaf or hard of hearing in an educational setting. Graduates are eligible to receive Ohio licensure in educational interpreting (grades kindergarten to 12). This prepares graduates to interpret in both classroom and non-classroom settings within educational settings and to perform related student support activities, including subject-matter tutoring and other student support tasks under the supervision of a licensed or certified classroom teacher.

General Special Education prepares quality teachers of exceptional learners. Moreover, graduates learn to use evidence-based practices to guide their direct service, support and consultation skills in schools and other agencies as professionals work together with individuals with exceptionalities and their families.

The *Gifted* concentration enables educators to obtain an Ohio Endorsement for Gifted Education.

Mild/Moderate Educational Needs provides students with the coursework and field experiences to be licensed, valid for teaching learners—ages five to 21, and grades kindergarten to 12—who have been identified with a disability that requires mild to moderate intervention (e.g. learning disabilities, emotional and behavioral disorders, developmental disabilities.)

Moderate/Intensive Educational Needs program provides students with the coursework and field experiences necessary to be licensed, valid for teaching learners—ages five to 21, and grades kindergarten to 12—who have been identified with a disability that requires moderate to intensive intervention (e.g. developmental disabilities, multiple disabilities.)

The *Transition to Work* concentration is for teachers licensed as intervention specialists and vocational educators. This endorsement leads to a single qualification applicable to all former transition roles (e.g., work study, vocational special education, Option IV). With field experience, graduates are prepared to support youth with disabilities in their transition planning and services.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement, two letters of recommendation and good moral character verification.

GRADUATION REQUIREMENTS: The Master of Education (M.Ed.) degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.Ed. students have six years from the term of first enrollment to complete the degree.

PROGRAM FEE: None

DESCRIPTION: The Master of Science in Nutrition consists of two concentrations: Dietetic Internship and Nutrition.

Dietetic Internship emphasizes nutritional sciences and opportunities to participate in interdisciplinary research in laboratory and community settings. Graduates obtain positions as nutritionists in health care and community agencies such as Head Start and WIC, nutrition-exercise specialists, cooperative extension nutrition specialists, teachers in junior and four-year colleges and as research associates.

The Nutrition program emphasizes a strong nutritional sciences foundation through coursework and provides opportunities to participate in interdisciplinary research in community settings.

ADMISSION REQUIREMENTS: Official transcript(s), 3.0 GPA, goal statement, three letters of recommendation and coursework in biochemistry, physiology, and advanced nutrition. Admission into the Dietetic Internship concentration also requires ADA verification statement and dietetic internship application (due February 15).

GRADUATION REQUIREMENTS: The concentration in nutrition requires 32 semester hours, including a master's thesis or master's project. The dietetic internship concentrations requires 43 semester hours.

THESIS/ DISSERTATION: Thesis or Master's Project required.

ACCREDITATION: Commission on Accreditation for Dietetics Education (CADE) of the American Dietetic Association (ADA)

DESCRIPTION: The Educational Specialist in Rehabilitation Counseling is designed to help people return to gainful lives. The history of modern rehabilitation focuses on assisting persons with both physical and mental disabilities. The discipline of rehabilitation covers areas of vocational, psychological, social and medical.

The Master of Education in Rehabilitation Counseling consists of two concentrations: Rehabilitation Counseling and Rehabilitation Counselor. Both programs features an interdisciplinary approach that focuses on the inclusion of persons with disabilities into the life of the community. Graduates are employed in vocational rehabilitation settings, mental health and developmental disabilities agencies, drug and alcohol rehabilitation, public and private hospitals, comprehensive rehabilitation centers, correctional facilities, community-based programs, private industry, proprietary rehabilitation and student disability services in higher education.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement, two letters of recommendation and good moral character verification. Also required for the major but not for the Rehabilitation Counselor concentration are 2.75 undergraduate GPA and interview.

GRADUATION REQUIREMENTS: The Master of Education (M.Ed.) degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required.

The program requires two years of study culminating in a semester-long internship under the field supervision of a certified rehabilitation counselor. Faculty members advise students in the development of a curriculum plan that includes required core, foundational, and elective courses. Early and continued exposure to rehabilitation practice is provided as students progress through the program.

CULMINATING REQUIREMENTS: Paid internships are available on a competitive basis and are arranged by program faculty.

DESCRIPTION: The Master of Education in School Counseling consists of two concentrations: Classroom Guidance for Teachers and Professional School Counseling.

The mission, intent and purpose of the School Counseling program at Kent State University is to prepare students for employment as professional school counselors in K-12 institutions.

ADMISSION REQUIREMENTS: Official transcript(s), goal statement, two letters of recommendation, good moral character verification and interview.

GRADUATION REQUIREMENTS: The M.Ed. degree curriculum is a minimum of 49 semester hours, including a 600 clock-hour internship. A pre-practicum examination and comprehensive examination must be passed for matriculation and graduation. This program is designed to fulfill the educational requirements for licensure as a Licensed School Counselor in the state of Ohio. The program may be pursued on a part-time or full-time basis, although some full-time study is urged.

CULMINATING REQUIREMENTS: Internship is required.

DESCRIPTION:

Students entering the Master of Education (M.Ed.) in School Psychology are expected to complete either an Educational Specialist or a Ph.D. Upon successful completion of the M.Ed., students matriculate into either the Ed.S. or Ph.D. program (depending on the program of study the applicant is admitted into) without an additional application procedure. Applicants with a previous master's degree may apply directly to either the Ed.S. or Ph.D. program.

The Educational Specialist (Ed.S.) in School Psychology prepares students to work effectively with school personnel, parents and children in (a) the assessment of academic, social and behavioral functioning, (b) consultation, and (c) the implementation of interventions geared toward both prevention and remediation.

The Ph.D. in School Psychology is committed to a scientist-practitioner model of training, which conceptualizes school psychologists as data-oriented problem-solvers and transmitters of psychological knowledge and skill. As such, students draw upon the scientific literature as a primary basis for professional practice and focus their research agendas to have meaningful implications for practice.

ADMISSION REQUIREMENTS:

Official transcript(s), GRE, goal statement, two letters of recommendation, sample of written work, résumé, or vita, SPSY Vita (online document), good moral character verification and interview.

GRADUATION REQUIREMENTS:

M.Ed.: The Master of Education (M.Ed.) degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required. M.Ed. students have six years from the term of first enrollment to complete the degree.

Ed.S.: Upon admission to the Ed.S. degree program, students will be assigned an advisor.

Ph.D.: Please refer to the program and college doctoral handbooks for information about graduation requirements.

CULMINATING REQUIREMENTS:

Ed.S.: An academic year internship under supervision of the faculty and a qualified school psychologist in public schools is required. Course requirements need to be successfully completed prior to the internship.

Ph.D.: Please refer to the program doctoral handbook for a description of all culminating experiences, including doctoral internship.

CANDIDACY:

Ph.D.: Once the student has successfully completed and orally defended his/her comprehensive exams, s/he is recommended for doctoral candidacy in line with all other program and college requirements.

Masters of Arts in Teaching Program

330-672-0629

jhutchi1@kent.edu

DESCRIPTION: The Masters of Arts in Teaching in Secondary Education serves individuals who have never held a teaching certificate or license. It requires full-time study beginning in the summer and continuing through the academic year.

Secondary Education consists of twenty-three concentrations: Art, Business, Chemistry, Chemistry/Physics, Dance, Earth Science, English/Language Arts, Family and Consumer Studies, French, German, Health, Integrated Science, Latin, Life Science, Life Science-Chemistry, Marketing, Mathematics, Music, Physics, Russian, Social Studies, Spanish and Technology Vocational Education.

ADMISSION REQUIREMENTS: Official transcript(s), GRE, two letters of recommendation, résumé, 1000-word essay, supplemental form, content evaluation, good moral character verification and interview.

GRADUATION REQUIREMENTS: The Master of Arts in Teaching degree requires a minimum of 44 semester hours of credit, of which at least 39 must be at the graduate level, and includes a school-based internship. For students who have an appropriate undergraduate background in the subject matter content, the program is designed to be completed in one summer and the following academic year.

CULMINATING REQUIREMENTS: Internship

DESCRIPTION: The Master of Arts in Speech Language Pathology trains competent speech-language pathologists to critically evaluate communication disorders and the methods used in the habilitation and rehabilitation of those disorders.

The Ph.D. in Speech Language Pathology is a highly flexible program of study in either speech-language pathology or in audiology.

ADMISSION REQUIREMENTS: Official transcript(s), GRE, goal statement and two letters of recommendation.

GRADUATION REQUIREMENTS: M.A.: The degree requires a minimum of 32 semester hours of graduate coursework including at least 16 semester hours at the 60000 level or above. A major consisting of 18 or more semester hours in the College of Education, Health, and Human Services is required.

Ph.D.: Requirements include completion of 45 semester hours of precandidacy graduate work beyond the master's degree and acceptable performance on a written and oral comprehensive examination. The 45 semester hours of precandidacy study consists of 24 hours in a major area of focus, 15 hours in two minor areas of focus, and 6 semester hours of research tool courses.

PROGRAM FEE: None

ACCREDITATION: American Speech-Language-Hearing Association (ASLHA)—Council on Academic Accreditation in Audiology and Speech-Language Pathology

TOTAL			42

¹ Students in technology education meet this requirement through TECH 13580, Engineering Graphics I (3) and TECH 23581, Computer-Aided Engineering Graphics (3)

² Students in foreign languages take MCLS 40657 Student Teaching. Students in TESL take ENG 41009 Student Teaching (9). Students in art education take ARTE 41557 Art Education: Student Teaching and Practicum. Students in music education take MUS 42357 Student Teaching and Seminar. Students in technology education take TECH 46031 Student Teaching. Students in dance education take DAN 47525 Student Teaching.

³ Students in foreign languages take MCLS 40525 Inquiry into Professional Practice. Students in TESL take ENG 41525 Inquiry into Professional Practice (3). Students in art education take ARTE 41525 Art Education: Inquiry into Professional Practice (3). Students in dance education take PEP 49525 Inquiry into Professional Practice in Physical Education (3). Students in technology education take TECH 41001 Methods in Technology Education (3) and TECH 41052 Technology Education for Elementary School (3).

⁴ Students in TESL take ENG 31007 TESL Pedagogy I (3) and ENG 41002 Computers in Second Language Teaching (3). Students in foreign languages meet this requirement through coursework MCLS 30660 Orientation to Second Language Pedagogy (3) and MCLS 40660 Methods in Teaching Foreign Language (3).

⁵ Students in foreign languages take the following courses:
 MCLS 40420 Foreign Languages and Culture Studies (3)
 MCLS 40654 Computers in Second Language Teaching (3)
 PSYC 30445 Cognitive Psychology (3) or 40461 Psychology of Language (3)
 Students in TESL take the following courses:
 ENG 41192 ESL/EFL Practicum (3)
 Two of the following (6):
 ADED 32142 Principles of Teaching Adolescents (3)
 CULT 49570 Social Foundations of Multicultural Education (3)
 MCED 40005 Effective Use of Phonics in Reading (3)

Note: PSYC 11762 is a prerequisite for professional requirements and may be used to meet Liberal Education Requirements in the

social sciences.

Those pursuing an education minor must satisfy the professional requirements and be admitted to advanced study prior to student teaching.

A cumulative 2.50 GPA (2.75 for art education majors) and a 2.75 major GPA with no grade lower than a C are required for student teaching, graduation and licensure. All courses in the minor must be completed with a minimum C (2.00) grade.

The preceding sequence may be slightly different depending upon the actual major. Contact an academic advisor in 304 White Hall for additional information and declaration of the minor.

The education minor is restricted to certain programs. The following are majors for which teacher licensure may be obtained by combining the major with a minor in education:

College of the Arts

Art Education-professional education courses are built into the major.

Music Education-professional education courses are built into the major.

College of Arts and Sciences

The minor in education is intended to allow students pursuing a traditional liberal arts degree to prepare for public school teaching. It is available only to students in those areas where the state of Ohio issues teaching licenses. The minor provides the professional coursework necessary for licensure.

Eligibility and Admission

The education minor is open to students pursuing a B.A./B.S. degree who are majoring in a teaching field such as American Sign Language, biology, earth science, French, German, Latin, mathematics, Russian, Spanish or teaching English as a second language. The College of Education, Health, and Human Services does not offer single licenses in English or individual social science areas (economics, geography, history, political science, psychology or sociology); however, students majoring in one of those disciplines may be able to pursue licensure in the field of language arts or social studies. Students interested in a Social Studies license or Integrated Language Arts license should consult the College of Education, Health, and Human Services about that possibility.

It should be noted that in many instances the combination of requirements for the education minor and for the field of concentration in the B.A. or B.S. degree program may total more than the 121 semester hours required for graduation. In such cases, students should expect to complete more than 121 hours.

College of Education, Health, and Human Services

Physical Education-professional education courses are built into the major.

College of Technology

Technology Education

Completion of the Bachelor of Science in Technology with the technology education concentration provides licensure to teach technology to grades four-12

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Education, Health and Human Services > Certificates > College Teaching (Post Bachelor's)

The College Teaching Certificate, established in 2005, is designed to enhance teaching competencies at the postsecondary level. It is particularly appropriate for graduate students (from any discipline) interested in a career in college teaching, but also for adjunct and full-time faculty who are currently in academia.

Student may select from a variety of courses that emphasize the knowledge and practice of college teaching and the organizational culture of postsecondary education institutions. The 15 credit hour certificate includes an internship in college teaching.

Additionally, students in the certificate program are encouraged to take effective teaching courses offered within their discipline specialty as part of the certificate requirements. This certificate program is grounded in the latest educational research of best practices in college teaching, and is designed to offer and/or enhance teaching and learning experiences.

» [Disability Studies and Community Inclusion-C618 and C827](#)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Education, Health and Human Services > Certificates > [Disability Studies and Community Inclusion](#)

The goal of this certificate is to prepare graduate students to understand the nature, meaning, health, social and political implications, and consequences of disability, within the context of diversity and global culture from which we live and operate. Courses selected for the core and as electives are based on guidelines from the Society for Disability Studies which recommends curriculums be (a) interdisciplinary/multidisciplinary, (b) challenge the view of disability as an individual defect that can be remedied through medical intervention, and (c) should include national and international perspectives, policies, literature, culture and history.

CERTIFICATE REQUIREMENTS (17 credits)

Course	Title	Credits
RHAB 67725	Psychosocial Impact of Disabilities	3
SRM 56001	Principles and Methods of Community Inclusion	3
63096	Individual Investigation in Exercise, Leisure and Sport	1
Electives		10
ANTH 58250	Culture and Curing (3)	
CI 65592	Internship in Motor Development (1-12)	
COMM 55459	Communication and Conflict (3)	
55960	Health Communications (3)	
EDAD 6/76518	Law and Special Education (3)x	
HDFS 54020	Adolescent Development (3)	
54021	Family Interventions Across the Lifespan (3)	
HED 57091	Current Issues in Health Education and Promotion (3)

» Gerontology (Post Bachelor's)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Education, Health and Human Services > Certificates > Gerontology (Post Bachelor's)

Kent State University and The University of Akron together offer a graduate-level Certificate in Gerontology, which may be received in conjunction with degrees from either institution at the specialist's, master's or doctoral levels. Students thus receive basic preparation in their selected discipline or major while concurrently obtaining specialized training in gerontology through the certificate program. Coursework completed at either institution may be applied to the certificate program. The two universities are located within a 15-minute drive from each other.

To be eligible for the Graduate Gerontology Certificate Program, a student must be matriculated in a graduate degree program or hold a graduate degree from an accredited institution. Students may be admitted with non-degree status, but they must complete a graduate degree program prior to being awarded the certificate.

The 18 credit hour certificate program is flexible with minimal required courses beyond those needed to complete degree requirements. Students can tailor the courses taken toward completion of the certificate to meet their unique professional interests. A thesis or dissertation may be applied toward certificate requirements if it involves an aging-related topic. Students can also apply a practicum/internship course within their degree program as a capstone experience in the certificate program. At least 12 of the required hours are to carry 600-level (University of Akron), 60000-level (Kent State University) or above designation. A maximum of 3 credit hours is transferable from outside the university. Certificate completion is acknowledged by special notation on student transcripts.

CERTIFICATE REQUIREMENTS (18 credits)

Course	Title	Credits
BSCI 50020	Biology of Aging	3
GERO 61191	Interdisciplinary Seminar	3
	Research Methods	3
	Research or Practicum	3
	Electives	3
Choose from the following*:		3
GERO 54030	Adult Development and Aging (3)	
PSYC 60610	Psychology of Aging (3)	
SOC 52010	Social Gerontology (3)	
TOTAL		18

*Meets the psychosocial requirement of the certificate.

The certificate program is based on the recommended standards of excellence established by the Association for Gerontology in Higher Education. The faculty at both Kent State University and The University of Akron are nationally and internationally recognized scholars in gerontology. Many are Fellows of the Gerontological Society of America (<http://www.geron.org>). Faculty are available to assist students with course selection, research projects and other matters of interest in the field of gerontology.

Additional information and application materials are available from our Web sites: <http://www.kent.edu/ehhs/gero/index.cfm> or <http://www3.uakron.edu/ilsdgl>. Interested students should contact one of the certificate directors:

International Higher Education-C607 and C812

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Education, Health and Human Services > Certificates > International Higher Education

In response to the globalized knowledge economy, one of the profound and transformational changes occurring in contemporary colleges and universities is internationalization. This institutional change requires administrative leaders, staff and faculty in higher education to have a comprehensive understanding of this phenomenon, along with well-articulated skills, knowledge and dispositions to improve the instructional capacity for internationalization. To meet this need, the Higher Education Administration and Student Personnel program offers a professional certificate program in Internationalization of Higher Education to strengthen teaching, administrative leadership and employability in colleges and university settings. The 15-credit hour certificate, which includes an internship experience, can be completed as a stand-alone program or as a complement to another degree program.

Online Learning and Teaching Certificate (Post Bachelor's)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > College of Education, Health and Human Services > Certificates > [Online Learning and Teaching \(Post Bachelor's\)](#)

Online instruction has become extremely important in higher education, in the corporate world, and in K-12 schools, both public and private. This certificate program provides students with the opportunity to learn the essential knowledge and skills they need to teach effectively online, whether they are teaching an entire course online or integrating Web-based activities into a traditionally taught class. Students examine recommendations from research, design their own online modules and develop effective strategies for delivering instruction online.

CERTIFICATE REQUIREMENTS (15 credits)

<http://www.kent.edu/honors>

What is our praise or pride
But to imagine excellence and try to make it?

—Richard Wilbur

The Honors College is a non-degree-granting college of the university whose primary role is to provide learning opportunities, intellectual challenge and a supportive environment for bright and motivated students. The Experimental and Integrative Studies division of the college offers nontraditional learning and teaching experiences for the entire university community's students and faculty.

The Honors College is at the center of Kent State University's nearly 100-year tradition of providing special attention to undergraduates with outstanding intellectual and creative ability. Within the framework of the larger university, with its diverse academic programs and excellent research and library facilities, the Honors College offers students enriched and challenging courses and programs, opportunities for close relationships with their peers and faculty, and careful advising to meet their interests and goals.

ADMISSIONS

Students interested in admission to the Honors College as freshmen are encouraged to apply during their senior year in high school. Application materials include records of academic performance and scores on nationally standardized tests. The admissions staff also seeks evidence of creative ability, leadership, service and motivation.

Interested students are invited to visit the campus to meet with an honors advisor, visit an honors class and learn about academic programs of interest to them. Arrangements may be made by contacting the Honors College (contact information above). Students currently enrolled in the university and transfer students may apply for admission to the college as late as the end of their junior year.

SCHOLARSHIPS

The Honors College awards merit scholarships to selected entering freshmen who have the potential for superior scholarly and creative work at the university. Scholarship recipients are members of the Honors College and can retain their scholarships for four years if they meet specified academic expectations. Students already enrolled in the Honors College also can apply for a limited number of merit scholarships.

Entering freshmen applying for admission to the University are automatically considered for admission to the Honors College and Freshman Honors Scholarships, ranging from \$1,500 to full in-state tuition, room, board and books. Most honors scholarships are awarded to students who may select any major for their undergraduate studies. Some scholarships, however, are reserved for students in specific academic disciplines (e.g., journalism, business, physics, humanities and education).

The Creative Artist Awards Competition (held annually on the Kent Campus) provides \$1,500 to \$3,500 to students majoring in art, dance, music, theatre and visual communication design. Recipients are selected on the basis of academic credentials and an audition or portfolio review. College students are welcome to join the Honors College as well as apply for \$1,000 Honors Academic Achievement Awards.

THE HONORS CONCEPT

The Honors College is guided by two basic principles: The first is a responsibility to provide academic work that offers intellectual challenge to the best students in the university and demands of them the best effort of which they are capable. To this end, courses are designed to stretch the mind, sharpen skills and encourage high standards of performance.

The second principle is a belief that, regardless of degree program, students should be liberally educated. That is, they should understand and appreciate the language, literature and history of our culture; the social, political and economic structure of our society; the creative achievements that enrich our lives; and the basic assumptions and substance of the natural sciences. Honors students are, therefore, encouraged to select courses that provide an understanding of the arts, humanities and sciences.

HONORS WORK

Johnson Hall

Honors courses are available throughout the undergraduate years and can be used to meet requirements in all degree-granting colleges and schools of the university and to satisfy the Kent Core. All honors freshmen are enrolled in the year-long Freshman Honors Colloquium. The colloquium is designed to be a rigorous course in reading, thinking and writing about literature and ideas. The goal of the course is to develop habits of intellectual inquiry, mature understanding and effective communication that will serve the students through the college years and afterward.

Beyond the freshman colloquium, many honors courses offered by distinguished faculty from academic departments throughout the university are available each semester. Although these courses differ significantly in content, from art to zoology, they share a common form. Class enrollments are small, and students can get to know each other and their professors in an environment that encourages learning through discussion, reading, individual work and writing. These programs combine a core of honors courses common to all majors and honors courses in basic disciplines including the humanities, the social sciences and mathematics/science.

Honors students are encouraged to study on a one-to-one basis with members of the faculty. Individual honors work is possible from freshman through senior years and can take many forms. For example, it has been used by students to enrich the content of a non-honors course, to "create" a course not available in the regular curriculum or to undertake a specialized scholarly or creative project.

Many honors seniors conclude their undergraduate careers by completing a sustained scholarly or creative project under faculty guidance. This Senior Honors Thesis/Project is one of the requirements for Graduation with Honors discussed below. Theses and projects have been submitted by seniors from all of the degree-granting colleges and schools at Kent State University and have ranged over many disciplines and areas of creative endeavor. Novels and plays have been written; research has been undertaken in the natural and social sciences; historical events and periods have been critically analyzed; architectural models have been proposed for urban renewal sites; and paintings and films have been created and exhibited. Each thesis/project attests to the willingness of honors students to extend learning beyond the classroom to self-directed efforts appropriate to the conclusion of an enriched program of study.

Other opportunities for honors work are available. These include sophomore, junior and senior honors colloquia that are frequently interdisciplinary in content; enrollment in graduate-level courses during the undergraduate years; and participation in combined bachelor's/master's degree programs.

GRADUATION WITH HONORS

The college offers three programs for Graduation with Honors. Although each has minimum GPA requirements, the primary emphasis is on the successful completion of an undergraduate degree program, including a Senior Honors Thesis or Project. Graduation with Departmental Honors stresses upper-division work in the students' major department. The requirements are sufficiently flexible to enable undergraduates who join honors in their junior year to participate in and complete this program. Graduation with General Honors requires sustained participation in honors work throughout the undergraduate years. Students who complete this program take approximately one-fourth of their credits in honors courses and independent study. The rigorous standards of performance required for Graduation with University Honors make this the highest recognition the university can bestow on a graduating senior.

Students who do not wish to graduate with honors may participate in honors work on a more informal basis, selecting courses and developing independent study projects to meet collegial and departmental requirements or to satisfy personal interests. Students who graduate from the university as Honors College Scholars are identified by a notation on their transcripts.

HONORS ADVISING

The Honors College has its own advising staff whose first contact with students is just before the start of the freshman year. At this time, students discuss opportunities for honors work and select courses for the fall. Freshmen maintain frequent contact with their advisors and are encouraged to develop a long-range plan to organize their academic work in accordance with their interests and career aspirations. In addition to the college advising staff, faculty throughout the university are available to assist honors students in selecting courses to meet departmental requirements for graduation. For students who are planning to go on to graduate and professional schools, the college sponsors an annual workshop dealing with application procedures and with financial assistance and fellowship opportunities.

COMMUNITY

The Honors College residence building, the Stopher-Johnson Complex, is located at the center of campus. Honors students living there have the best of both worlds—a nurturing and stimulating first-year experience with other honors students, as well as convenient access to the surrounding Kent State campus community.

The Honors Center includes the three-story Johnson and Stopher Halls, a library/computer room, gallery space, a reception lobby and advising offices. Students live just steps away from the Honors College dean and its academic advisors.

Student involvement in the affairs of the college is a tradition. For example, honors students are eligible to serve as voting members of the Honors College Policy Council. This group, composed of an equal number of honors students and faculty, participates in policy decisions affecting the college. Each year, honors students, faculty and staff cooperate to organize Honors Week, a celebration of intellectual and creative achievement. Outstanding individuals from both inside and outside the university are invited to present challenging ideas, innovative research and demonstrations of artistic talent to the university community.

ADVANCED PLACEMENT (AP) PROGRAM

Kent State University participates in the Advanced Placement Program administered by the College Board. The latter prepares tests to assess the work of high school students who have taken college-level courses at their high schools. Examinations are offered in art, biology, chemistry, computer science, economics, English literature and composition, government, history, mathematics, music, physics, psychology, statistics, French, German, Latin and Spanish. The university will grant college credit for such courses in which satisfactory scores have been attained by the high school student. The Honors College administers the AP program for Kent State; information can be found on the [Honors College website](#).

EXPERIMENTAL AND INTEGRATIVE STUDIES

The objectives of Experimental and Integrative Studies are:

1. To provide a means by which faculty and other qualified members of the university community may develop, offer and test innovative courses that meet a legitimate intellectual need of students but are not regular curricular offerings of the existing academic units.
2. To provide for the offering of courses on a temporary and topical basis that deal with matters of current social or cultural concern in a manner that presents a variety of perspectives.
3. To provide occasionally for the offerings of courses such as Career Exploration that support university programs.
4. To encourage interdisciplinary and integrative teaching and learning of a kind not frequently found in the traditional academic units.
5. To encourage generally a spirit of curricular experimentation, integration and innovation in course content and pedagogy throughout the university community.

Experimental and Integrative Studies provides opportunity for faculty and staff to develop courses not presently available in the university curriculum. This is accomplished through selected topics offerings, which are now letter-graded with a few exceptions. Commonly offered under this title are courses such as Career Exploration, Film Classics and Diabetes Management. While the coursework is often rigorous and demanding, the non-traditional approach toward teaching lends itself well to exploring new modes of learning. To ensure that experimental work does not preempt students' primary academic work, students may take only one experimental class a semester (exception: Service-Learning Contract). Each semester, Experimental and Integrative Studies publishes its own catalog (found on the [Honors College website](#)) describing the selected topics for that semester.

INTRODUCTION

The Kent State University College of Nursing provides a course of study at the baccalaureate, master's and doctoral level. After completion of the required course of study in the arts and sciences and professional nursing, graduates receive the degree of Bachelor of Science in Nursing and are eligible to apply to take the state licensing examination to become professional registered nurses. Additional successful study leads to the degree of Master of Science in Nursing with clinical focus in acute care, adult, family, geriatric, healthcare management, pediatric, psychiatric mental health or women's health, and role-function options in administration, education, clinical specialization or nurse practitioner. An accelerated combined Bachelor of Science/Master of Science in Nursing allows qualified undergraduate students to substitute selected master's core courses after completing 60 semester hours.

ACCREDITATION

The baccalaureate and master's programs are accredited by the Commission on Collegiate Nursing Education. The baccalaureate nursing program is approved by the state of Ohio Board of Nursing.

EXPENSES AND FINANCIAL AID

In addition to the regular university expenses, estimated undergraduate nursing school costs for the four years may approximate \$2500 or more. (Examples of the expenses included are the state licensure application fee, NCLEX-CAT fee, College of Nursing pin, pictures and fingerprinting for licensure, level testing and the NCLEX-CAT review, criminal background checks and course fees.) In addition to the regular university [financial aid](#), nursing students are eligible for financial assistance, exclusively for nursing students.

Federal traineeships for full- and part-time graduate students may be available for financial assistance on an annual basis subject to the amount of federal funds granted to the college. University graduate assistantships and fellowships are also available for students who apply and qualify. Other sources of financial aid are described elsewhere in this Catalog.

Undergraduate Programs

Kent State University Catalog 2011 > Colleges and Programs > College of Nursing > Undergraduate Programs

- Admission to and Progression in the Traditional Nursing Sequence
- Admission to and Progression in the Accelerated Nursing Sequence
- Admission to and Progression in the B.S.N. for Registered Nurses Concentration
- Progression to Junior and Senior Coursework
- Repeat of Clinical Nursing Courses
- Assigning Out-Of-Sequence Students to Clinical Nursing Courses
- Changing Campuses
- Dismissal Policy
- Reinstatement into the College Of Nursing
- Health Policy for Undergraduate Students
- Uniform for Clinical Experience

• Nursing (B.S.N.)

The specific purposes of the baccalaureate nursing program are the following:

- To prepare practitioners for the beginning practice of professional nursing
- To provide a base for the continuing development of the students as individuals, as citizens and as professional practitioners of nursing
- To provide a foundation for graduate study in nursing

The College of Nursing is committed to the education of professionals in nursing within the perspective of today's society. The faculty believes that the foremost aim of such education is the acquisition of knowledge and unique specialized skills of the nursing profession. Professional education for nursing lays a foundation for the proficient and competent performance of nursing practice, based on scientific principles and entailing self-directed activities and discriminative judgments. The faculty also believes that professional education in nursing stresses the development of high ethical standards and moral values, which enable future practitioners to make essential contributions to public welfare and social progress. Professional education in nursing strives to develop communication skills and personality traits for effective interpersonal relationships and provides a base for continuing study and for personal, social and professional development.

The Bachelor of Science in Nursing degree stresses the application of physical, biological and social sciences to professional nursing practice. Throughout the program, students learn to give professional nursing care to children and adults of various age groups in acute care, home and community settings.

ADMISSION TO AND PROGRESSION IN THE TRADITIONAL NURSING SEQUENCE

1. Students are eligible to make application during the semester in which they anticipate completing, or have completed, 30 credit hours. Students must have a 2.75 cumulative GPA, and a 2.75 GPA in the required sciences (BSCI 20020, 20021, CHEM 10050, 10052, or CHEM 10054) to be eligible for admission.
2. Students must earn a 2.0 (grade of C) in each of the prerequisite science courses (BSCI 20020, 20021, CHEM 10050, 10052, or CHEM 10054) to be eligible for admission.
3. Transfer students can apply if they have completed 30 credit hours. In addition, students must have a 2.75 cumulative GPA in all coursework, and a 2.75 GPA in the required sciences (BSCI 20020, 20021, CHEM 10050, 10052, or CHEM 10054 – including a grade of 2.0 or better in each course). Transfer students who have successfully completed 12 or more hours at Kent State University will be evaluated on their cumulative Kent State GPA only along with the previously described admission criteria.
4. Two recommendations, either academic or professional, are also required for admission.
5. The admission process is competitive; acceptance is never guaranteed. The Dean may review the students' educational files to determine if adequate progression has been made.

Associate degree nurses seeking admission:

1. Students who are currently enrolled, or were previously enrolled in the associate degree of nursing (ADN) program at Kent State University, and are seeking admission into the B.S.N. program will apply to the sequence per part A "Admission and Progression into the Traditional Nursing Sequence."
2. ADN students who meet criteria and are admitted and have successfully completed NRST 10001 will receive credit for NURS 20020 and NURS 10050. This credit is applicable to only associate degree students of the Kent State system.

Licensed Practical Nurses seeking admission:

1. Licensed Practical Nurses (LPN) seeking admission to the Traditional Nursing Sequence must completed 30 credit hours with a 2.75 cumulative GPA, and a 2.75 GPA in the required sciences (BSCI 20020, 20021, CHEM 10050, 10052, or CHEM 10054) to be eligible for admission.
2. Students must earn a 2.0 (grade of C) in each of the prerequisite science courses (BSCI 20020, 20021, CHEM 10050, 10052, or CHEM 10054) to be eligible for admission.
3. LPN students, who meet these requirements, will be eligible to complete the LPN Transition program.
 - i. Students who successfully pass the LPN Transition Program (grade of C or better) will receive credit for NURS 10050 and NURS 20010.
 - ii. Students who successfully pass the LPN Transition Program (grade of C or better) will be permitted to complete Credit by Exam for NURS 20020, NURS 20030, and NURS 20950.
4. The semester prior to the student is enrolled in the LPN Transition Program, the student must officially apply to the Sophomore Nursing Sequence per the guidelines above.
5. Upon completion of the LPN Transition Program and the Credit by Exams, LPN students will be placed into the Traditional Nursing Sequence on a space available basis following the guidelines established for assigning students who are out of sequence.
6. Due to space availability LPN students are not guaranteed their campus of choice.

ADMISSION TO AND PROGRESSION IN THE ACCELERATED NURSING SEQUENCE

1. Students are eligible to make application after having achieved a bachelors degree with a 2.75 cumulative GPA from their accredited degree granting institution and a 2.75 GPA in the required sciences (BSCI 20020, 20021, CHEM 10050, 10052, or CHEM 10054)
2. Students must earn a 2.0 (grade of C) in each of the prerequisite science courses (BSCI 20020, 20021, CHEM 10050, 10052, or CHEM 10054) to be eligible for admission.
3. Consideration for admission to the Accelerated Program is given to students who:
 - i. Have work or volunteer experience in a helping profession or healthcare/patient contact related experience.
 - ii. Completed any of the following courses: BSCI 30030, BSCI 30050, NUTR 33512, NURS 20950 and a qualifying statistics course.
 - iii. Submitted an essay.
4. Two recommendations, either academic or professional, are also required for admission
5. The admission process is competitive; acceptance is never guaranteed. The dean may review the students' educational files to determine if adequate progression has been made.

ADMISSION TO AND PROGRESSION IN THE B.S.N. FOR REGISTERED NURSES CONCENTRATION

Registered nurses who wish to complete a Bachelor of Science in Nursing degree must first meet Kent State University requirements for admissions. Registered nurses must also meet the following criteria:

1. Evidence of graduation in good standing from a state-approved associate degree or diploma nursing program.
2. A minimum GPA of 2.0 (on a 4.0 scale) for all college course work completed.
3. A current registered nurse license.

PROGRESSION TO JUNIOR AND SENIOR COURSEWORK

Calculation of averages for progression to junior and senior sequence nursing courses once a student is admitted into the nursing sequence:

1. Traditional and Accelerated B.S.N. students must have a minimum cumulative GPA of 2.0 each semester to continue in the Nursing program, failure to achieve this GPA each semester will result in dismissal from the College
2. Traditional and Accelerated B.S.N. students must have a minimum 2.0 GPA (grade of C) in each science course required in the College of Nursing B.S.N. curriculum. All required chemistry and biology courses must be successfully completed with a 2.0 (grade of C) or better in order to graduate.
3. Traditional and Accelerated B.S.N. students must have a minimum 2.0 (grade of C) in each of the sophomore nursing courses (N20010, N20020, N20030 and N20950) to progress to the junior Nursing Sequence; a 2.0 (grade of C) in each of the junior nursing courses (NURS 30010, 30020, 30030, 30040, 30050 and 30060) to progress to the senior Nursing Sequence. Seniors must have a 2.0 (grade of C) in each of the senior nursing courses (NURS 40005, 40010, 40020, 40030, 40045, and 40872).
4. Accelerated B.S.N. students may take NURS 30000 junior and NURS 40000 senior level courses concurrently as specified by the Accelerated B.S.N. curriculum.
5. Traditional B.S.N. students may take no more than two (2) clinical courses per semester. Accelerated B.S.N. students are permitted to take three (3) clinical courses per term.

REPEAT OF CLINICAL NURSING COURSES

1. A student who does not attain a GPA of 2.0 (grade of C) in a nursing clinical course cannot proceed to the next academic

level. A student who does not attain a 2.0 (grade of C) in a nursing course must repeat this course based on seat availability. A student can repeat a single course only one time. A student who earns below a 2.0 (grade of C) in a second (or is repeating a failure) nursing course will be dismissed from the College (see Dismissal Policy below)

2. Accelerated B.S.N. students who fail a course will no longer continue in the Accelerated program but can continue in the Traditional B.S.N. program

ASSIGNING OUT-OF-SEQUENCE STUDENTS TO CLINICAL NURSING COURSES

1. Students are responsible for contacting Student Services, Room 216, Henderson Hall to make arrangements for repeating a nursing course.
2. Readmission to the B.S.N. sequence for any reason is on a "space available" basis. Students already progressing in sequence have priority in placement over those requesting re-enrollment. Accelerated B.S.N. students have priority in summer scheduling.
3. Students are enrolled in courses using the following guidelines in order:
 - i. Are in good standing but lost a semester with verified illness or military service.
 - ii. Licensed Practical Nurses who have just successfully complete the LPN Transition Program. Once admitted to the Traditional Program, LPN transition students will be considered under traditional status for the remainder of their education.
 - iii. Have failed and successfully repeated a clinical course.
 - iv. Have withdrawn from one course.
 - v. Have withdrawn from a course more than once.
 - vi. Cumulative grade point average at the time of registration.

CHANGING CAMPUSES

1. Traditional and Accelerated B.S.N. students are admitted by campus and are required to complete the B.S.N. program at their admitted campus of origin.
2. Students wishing to change campuses during their program must comply with the following guidelines in order:
 - i. Once campus rosters have been set based on the procedure for assigning students, students who are in-sequence and approved to switch campuses by BRCC may be placed.
 - ii. Students who are out of sequence may switch campuses in order to repeat courses based on the order established for assigning out-of-sequence students (see above) once all students have been placed. No approval by BRCC is needed in this instance. Students will be directed to return to their campus of origin, once they have successfully repeated their course at another campus.

DISMISSAL POLICY

1. Students who fail any two nursing courses, or any single course twice will be dismissed from the College of Nursing. NURS 10050, NURS 20950, or approved NURS special topics courses are exempt from this rule. Students will have their major switched to Pre-Nursing in this situation.
2. Traditional and Accelerated B.S.N. students must have a minimum cumulative GPA of 2.0 each semester to continue in the Nursing program, failure to achieve this GPA each semester will result in dismissal from the College. Students will have their major switched to Pre-Nursing in this situation.
3. The College of Nursing retains the right to dismiss from the program any student who is deemed to violate the policies and procedures of the College of Nursing or of affiliating facilities.

REINSTATEMENT INTO THE COLLEGE OF NURSING

Applications for readmission to the College of Nursing following dismissal will be met with great scrutiny. Students wishing to appeal their dismissal should contact the Office of Student Services in Henderson Hall for the detailed procedure related to such an appeal.

HEALTH POLICY FOR UNDERGRADUATE STUDENTS

For admission and progression in the College of Nursing, undergraduate students must be immunized and follow the health requirements, as outlined below. Prospective students should make an appointment with a licensed clinician for a general physical. Once the clinician has administered immunizations or drawn blood for titres as needed, he/she must complete, sign and date the Immunization Compliance Form, available on the [College of Nursing website](#).

The student is responsible for submitting the following to the College of Nursing:

1. Certification in cardiopulmonary resuscitation (CPR). Student must provide a copy of current CPR card. Certification must be Basic Life Support (BLS) for Healthcare Provider through the American Heart Association ONLY.

In accordance with HIPAA rules and regulations, these records will be maintained.

1. Mantoux tuberculin (Tb) skin test using the two-step method. Two-step method means that student will receive a first Tb skin test and, one week later, will receive the second Tb skin test. Results of EACH step must be submitted.
 - i. Results of a one-step Mantoux Tb skin test must be submitted each year thereafter while the student remains in the nursing program.
 - ii. If the student has a positive reaction to Tb, he/she is required to have a chest X-ray, or indicate date of last CXR if it was completed within the past one year. Each year, thereafter, the student will be required to complete an Annual Mantoux/TB Screening Form.
2. Rubeola (Measles), Mumps and Rubella (MMR). Two vaccinations are required after one year of age and at least one month apart, or one MMR vaccination within the last six years. Titre-indicating immunity is also acceptable. Those born before January 1, 1957, are age deferred.
3. Adult Diphtheria Tetanus within the last 10 years, or Tdap (tetanus, diphtheria and pertussis). Tdap is also highly

recommended within the following parameters:

- i. Can be received only after at least two years of receiving the Adult Diphtheria Tetanus
 - ii. Can be received only one time as an adult
 - iii. If the student chooses not to receive the Tdap, the waiver section must be signed and dated
4. Hepatitis B vaccination is highly recommended. Dates of all three injections are required. A titre-indicating immunity is also acceptable. If the student chooses not to receive the Hepatitis B vaccination, the waiver section must be signed and dated. Since Hep. B is a series of three injections over the course of several months; it may not be completed before the deadline. Students should start the series immediately and submit documentation once future injections are completed.
 5. Varicella: date of immunization, date of disease or titre are acceptable.
 6. Physical examination within one year prior to admission to the program.

It is the students' responsibility to maintain their Tb annual one-step date/results, and Adult Diphtheria Tetanus or Tdap as needed. Students will also be responsible for providing copies of updated CPR cards to the College of Nursing. If a student's records indicate that information is not valid for the entire subsequent academic year, the student will not be approved to participate in the clinical setting.

UNIFORM FOR CLINICAL EXPERIENCE

1. The uniform consists of a white tunic top and pants embroidered with the Kent State University College of Nursing logo.
2. Students are required to purchase two sets of the official embroidered uniform, an embroidered white scrub jacket, and the required College of Nursing name tag, which must be worn at all times during each clinical experience (per Ohio Board of Nursing rules). Uniforms may only be purchased from the uniform company authorized to sell the official Kent State University College of Nursing uniforms.
3. Female students who need a maternity uniform should contact the official Kent State University College of Nursing uniform company to purchase a maternity uniform embroidered with the Kent State University College of Nursing logo, similar to the typical tunic and pants.
4. Students requiring a uniform dress to meet religious guidelines should contact the official Kent State University College of Nursing uniform company to purchase a uniform embroidered with the Kent State University College of Nursing logo dress similar in style to the tunic top.
5. In selected areas such as obstetrics, community health, and psychiatric/mental health, scrubs or street clothes are worn. Specific apparel requirements for these areas are provided by the affiliating clinical agencies, the course syllabus and/or the faculty.
6. It is required that baccalaureate nursing students dress in a professional manner at all times in the clinical area. In order to maintain a professional appearance, a limited number of accessories may be worn with the uniform:
 - i. A watch with a second hand, a single pair of plain gold or silver posts worn in the lower ear lobe of pierced ears and a wedding band are acceptable in most settings.
 - ii. A chain that does not show when worn may also be acceptable, depending on the clinical agency.
 - iii. Not permitted in the clinical area are visible piercings with jewelry in places other than the lower ear lobes (e.g. upper ear, nose, tongue, eyebrows, etc.).
7. While at the clinical agency, tattoos must be covered with a long sleeve top, white or neutral undershirt, socks or dressing/band aid.
8. If nail polish is worn, only a clear or light, neutral shade is permitted. Nails should be trimmed to avoid extending beyond the end of the fingers. Per OSHA rules, artificial nails may not be worn in any clinical facility.
9. Hair should be neat and worn above the collar in a style becoming to the person. Established beards are to be neatly trimmed. Males without beards are to be clean shaven.
10. Shoes should be clean and in good repair. With the official Kent State University College of Nursing uniform, students may wear white nursing shoes; white, closed front clogs with backs; or white, leather athletic shoes, without large or colorful logos.
11. At all times during clinical experiences, students must adhere to the uniform code of Kent State University College of Nursing. Clinical agency policies may be more restrictive and require further or additional accommodations by students.

- [Program Requirements](#)
- [College Requirements](#)
- [Academic Policies](#)

DESCRIPTION: The Bachelor of Science in Nursing is designed to prepare practitioners for professional nursing, help them understand their role in society and prepare them for graduate study. The program emphasizes professional knowledge, skills and compassionate nursing practices. Students begin with courses that demonstrate the core foundations of the nursing profession and its historical roots. The capstone preceptorship exposes students to research and professional-practice concepts that will ensure their abilities to be nurse leaders and healthcare advocates. Throughout the program, students study life-span and cultural diversity issues while applying evidence-based practice to their profession.

The BSN for Registered Nurses, within the Bachelor of Science in Nursing, allows RNs with a diploma or associate degree in nursing to earn a baccalaureate. Although there are basic core courses that nursing programs require, there is a variation among the programs. Upon admission, students receive an individualized education plan to complete the program. Students who have completed the majority of their Kent Core and foundation courses may be able to complete their nursing courses in an accelerated manner. This program is available online only.

The Combined Bachelor of Science/Master of Science in Nursing Program
An accelerated combined degree program for undergraduate KSU nursing students who have complete 60 semester hours and meet the GPA requirements delineated in Combined Baccalaureate/Master's for Degree students early in their undergraduate studies. Qualified students may apply by completing an application for admission to the Master of Science in Nursing (MSN) program of choice and gaining approval from the appropriate graduate faculty program director. Plan of substituting selected master's core courses for selected undergraduate courses should be carefully worked out with the faculty advisor. Following graduation and passing the state licensing examination (NCLEX-RN), students' MSN application may be activated for admission into the selected master's program.

CAREER OPPORTUNITIES: As the largest healthcare occupation, registered nurses held about 2.6 million jobs in 2008. Hospitals employed the majority of RNs, with 60 percent of such jobs. About 8 percent of jobs were in offices of physicians, 5 percent in home healthcare services, 5 percent in nursing care facilities, and 3 percent in employment services. The remainder worked mostly in government agencies, social assistance agencies, and educational services.

ADMISSION REQUIREMENTS: Freshman Students: Admission to pre-nursing requires the completion of high school math, biology, and chemistry. In addition, students should have at least a 2.7 cumulative high school grade point average (on a 4.0 scale) AND minimum ACT composite and science reasoning scores of 22 (or an SAT combined critical reading+math score of 1020). Students with an ACT composite score of 21 (SAT combined critical reading+math score of 980) need a 3.0 high school grade point average; those with an ACT composite score of 20 (SAT combined critical reading+math score of 940) need a 3.3 cumulative high school grade point average.

Transfer Students: All transfer applications to the College of Nursing must include both college and high school transcripts to be complete. Enrollment in the sophomore sequence is each year. Preference will be given to applicants who have at least a 2.75 GPA, both as a cumulative average and in the first-

year sciences (Structure and Function, Basic Microbiology, Fundamentals of Chemistry, Organic Chemistry), based on 30 semester hours of college-level coursework. Students should contact the College of Nursing regarding special information and deadlines by calling 330-672-7911.

GRADUATION REQUIREMENTS: Minimum 122 total credit hours and 39 upper-division hours for graduation. Minimum 2.50 GPA overall and 2.50 GPA in major required for graduation.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: B.S.N.: \$50/semester

ACCREDITATION: Ohio Board of Nursing, State of Ohio Board of Nursing

STUDENT ORGANIZATIONS: Students for Professional Nursing

I. DESTINATION KENT STATE: FIRST YEAR EXPERIENCE (1 credit)			
Type	Course	Title	Credits
	US 10097	Destination Kent State: First Year Experience	1
II. MAJOR PROGRAM REQUIREMENTS (78-79 credits) <i>Courses count in major GPA</i>			
Type	Course	Title	Credits
	BSCI 20021	Basic Microbiology*	3
		30030 Human Physiology*	4
		30050 Human Genetics*	3
	NUTR 33512	Nutrition	3
		Choose from the following:	3-4
	MATH 10041	Elementary Probability and Statistics (3)	
	PSYC 21621	Quantitative Methods in Psychology I (3)	
		SOC 32220 Data Analysis (3)	
		and	
		SOC 32221 Data Analysis Laboratory (1)	
Additional Major Requirements			
<i>Students declaring the BSN for Registered Nurses concentration should instead take the requirements listed under that concentration</i>			
	NURS 10050	Introduction to Professional Nursing* (1)	1
		20010 Interpersonal and communication Skills for Health Care Professionals*	2
		20020 Foundations of Assessment and Communication in Nursing*	3
		20030 Foundations of Nursing Intervention*	5
		20950 Human growth and Development for Health Professionals*	3
		30010 Parents and Newborn Nursing*	4
		30020 Health Care of Children*	4
		30030 Nursing of Adults*	5
		30040 Nursing of Adults with Rehabilitation Needs and/or Gerontologist Changes*	4
		30050 Basic Nursing Informatics*	2
		30060 Basic Pharmacology for Nursing Practice*	2
WIC		40005 Professional Nursing Development**	3
		40010 Nursing of the Critically Ill*	4
		40020 Community Health Nursing*	4
		40030 Psychiatric Nursing and Mental Health Nursing Care*	4
		40045 Integration of Leadership and Management in Nursing*	6
		40872 Introduction to Nursing Research*	3
	XXXX 3/4xxxx	NURS, PSYC or SOC elective (upper division)*	3
III. ADDITIONAL PROGRAM REQUIREMENTS (43 credits)			

Type	Course	Title	Credits
KBS	BSCI 20020	Biological Structure and Function*	5
KAD	CHEM 10050	Fundamentals of Chemistry*	3
KBS	10052	Introduction to Organic Chemistry*	2
KSS	PSYC 11762	General Psychology	3
KSS	SOC 12050	Introduction to Sociology	3
	Kent Core Additional (must be from two categories)		3
	Kent Core Composition		6-8
	Kent Core Humanities and Fine Arts (minimum one course from each)		9
	Kent Core Mathematics and Critical Reasoning		3-5
	General Electives (lower or upper division) <i>Credits required depends on meeting minimum 122 credit hours.</i>		5-6
MINIMUM TOTAL			122

* Minimum C (2.0) grade is required in all NURS, BSCI and CHEM course.

**A minimum C (2.0) grade must be earned with to fulfill the writing-intensive requirement.

Students may substitute CHEM 10054 General and Elementary Organic Chemistry for the required CHEM 10050 and 10052. All three courses fulfill the Kent Core.

Special Note:

- Completion of BSCI 20020 and CHEM 10050 with a combined minimum 2.75 GPA.
- Completion of BSCI 20021 and CHEM 10052 with a combined minimum 2.75 GPA.

BSN for Registered Nurses concentration

For semester-by-semester course sequencing for this program, view the [2011-2012 Roadmap](#).

Registered nurse students take the same 36 credits of Kent Core and 19 credits of foundational courses that are required of all BSN students. Once RN/BSN students enter the BSN for Registered Nurses concentration, they take 27 credits of nursing courses specially designed for the RN and a 3 credit upper-division health care or nursing elective. After successful completion of Nursing 41000, Concepts and Issues for Professional Nursing Practice, the BSN for Registered Nurses student receives up to 33 University credits in nursing following the Ohio Nursing Articulation Model. Students must have 122 credits to graduate.

I. CONCENTRATION PROGRAM REQUIREMENTS (63 credits) <i>Courses count in major GPA</i>			
Type	Course	Title	Credits
	NURS 40075	Information and Patient Care Technology	3
WIC	40085	Inquiry and Research for Professional Nursing Practice	3
	41000	Concepts and Issues for Professional Nursing Practice	3
	42000	Leadership and Management for Professional Nursing Practice	3
	43000	Health Promotion for Professional Nursing Practice (clinical)	3
	44000	Population-based Nursing for Professional Nursing Practice (clinical)	3
	45000	Health Maintenance and Restoration for Professional Nursing Practice	3
	46000	Health Care Policy	3
	47000	Capstone Clinical Course for Professional Nursing Practice	3
	Upper-division nursing or health care elective*		3
	Escrow credits**		33
MINIMUM SUBTOTAL			63

*Permission of director required.

**BSN for Registered Nurse students will receive credit for up to 33 University semester hours of nursing courses upon completion of NURS 41000 Concepts and Issues in Professional Nursing Practice.

Progression

The student must complete all nursing course with a 2.0 grade point average or higher. The student may not repeat any clinical course more than one time and no more than two clinical courses may be repeated. Students attaining two failures in clinical nursing courses are automatically dismissed from the nursing program. A grade of C (2.00) must be obtained on repeat to avoid dismissal from the nursing program.

Graduation

The Bachelor of Science in Nursing is granted to registered nurses who complete the planned program of study with a cumulative GPA of at least 2.00 (C) and a minimum of 2.00 in each nursing course. Students also need to meet all other university requirements for graduation and complete a minimum of 30 semester hours at Kent State University.

college. Enroll today to start pursuing your future at one of the best colleges in Ohio. We've been educating successful graduates for over 100 years; join us today.

Kent State University Catalog 2011 > Colleges and Programs > College of Nursing > [Graduate Programs](#)

The Kent State University College of Nursing offers the Doctor of Philosophy (Ph.D.), the Doctor of Nursing Practice (D.N.P.), the Master of Science in Nursing (M.S.N.), several post-master's certificate programs and two dual-degree programs in combination with other non-nursing master's programs at Kent State University. The dual-degree programs offered are the Master of Science in Nursing/Master of Business Administration and the Master of Science in Nursing/Master of Public Administration.

The Ph.D. in Nursing is offered jointly with The University of Akron College of Nursing. The purpose of the program is to prepare nurse scholars who will conduct research that advances nursing science. This purpose is realized through a curriculum focused on developing and testing theories and models of nursing science; on the dissemination of scientific nursing knowledge; and on health care and nursing policy and leadership. Graduates are characterized by the excellence of their leadership, research, teaching, and application of nursing and health care policy.

The Doctor of Nursing Practice (D.N.P.) program prepares advanced practice nurses to lead in applying research evidence to clinical practice, and to contribute to improved health care outcomes via direct practice, policy change, systems evaluation and practice scholarship. Program emphasis is on the interplay among advances in scientific knowledge, technology, and information systems in support of quality patient care outcomes and their impact on human health. Six of 12 courses are offered cooperatively with the University of Akron College of Nursing.

The Master of Science in Nursing (M.S.N.) incorporates concepts of advanced practice nursing throughout the program. Students are prepared to function in clinical, managerial or leadership roles as dictated by their concentration and role specialties, and to be eligible for doctoral study. The program's graduates hold leadership positions in a variety of roles in urban and rural settings in Ohio and nationally. Graduates of the advanced practice concentrations at Kent State University are eligible for national certification examination.

The M.S.N. program includes concentrations in the focal areas of acute care, the adult, family, geriatric, health care management, nurse educator, psychiatric-mental health, women's health and pediatric nursing. The roles of Clinical Nurse Specialist (CNS) and Nurse Practitioner (NP) exist in all the focal areas except health care management and nurse educator; and in acute care, family, and women's health, only the NP is available. The two roles can be combined or separately pursued in psychiatric-mental health nursing. Psychiatric mental health nursing CNS role is further subdivided into adults or child-adolescent.

The dual-degree programs of the Master of Science in Nursing and the Master of Business Administration (M.S.N.-M.B.A.) and the Master of Science in Nursing and the Master of Public Administration (M.S.N.-M.P.A.) are designed for experienced nurses whose career goals include assuming middle- or executive-management positions in health services agencies or companies, or who are interested in starting their own businesses. Practical management knowledge and skills are concurrently integrated with nursing courses and relevant management experiences in the form of practica and internships. Both curricula are cost- and time-effective for nurses with clear goals and demanding schedules. Clinical courses are not required but may be added if desired.

A BSN-MSN Bridge Option is available for qualified undergraduate KSU nursing students seeking to expedite the transition from undergraduate to graduate studies in nursing. Qualified undergraduate students may take up to 12 credit hours at the master's level and apply those hours toward completion requirements for their undergraduate degrees. Applying for the Bridge Option just prior to junior year of undergraduate studies will give students the greatest opportunity to use up to 12 credit hours of substitute MSN coursework. The college/department determines the undergraduate coursework for which graduate credits may be substituted.

The College of Nursing is accredited by the Commission on Collegiate Nursing Education.

Persons seeking additional information on graduate study in nursing should consult the College of Nursing, Graduate Office at 330-672-2234 or <http://www.kent.edu/nursing>.

As one of Ohio's top universities, Kent State offers the resources and facilities of a large university with the friendly, casual atmosphere of a liberal arts college. Kent State University Catalog 2011

» Master of Science in Nursing/Master of Public Administration Dual Degree Program

Kent State University Catalog 2011 > Colleges and Programs > College of Nursing > Graduate Programs > [Master of Science in Nursing/Master of Public Administration Dual Degree Program](#)

A dual degree in nursing and public administration is offered for those nurses who desire to integrated knowledge and skills from nursing with the public sector and public policy (MSN/MPA).

The MSN/MPA program is relevant for nurses who seek to improve the quality of healthcare delivery to populations and communities. Graduates are typically employed by or seek employment from government, non-governmental community agencies, voluntary organizations and non-profits. Activities of our graduates typically revolve around: community-based health promotion and disease prevention, seeking health care funding for core community health services, disaster preparedness, economics and management of public health care systems, and policy-making to ensure health care access.

In the MSN/MPA program, nursing courses focus on advanced nursing practice and management. The public administration courses focus on the management of human and material resources, finances and accounting, organizational analysis, statistics, program evaluation, strategic planning and operations, economics and marketing, as well as leadership theory and behavior, law, and the social impacts of management. Capstone courses aid the student in integration of the theory and practical application from coursework.

The MSN/MPA program offers:

- High value: A combination of academic quality, efficiency, and reasonable education cost
- Practicum experiences with leaders and managers with nursing and/or business backgrounds
- Accessible location
- Many course offerings online
- A customized, flexible program plan developed with a consistent faculty adviser

The Master of Science in Nursing/Master of Public Administration dual degree coursework is integrated and concurrent. The MSN/MPA is 54 credit hours, significantly shorter than if each graduate degree were pursued separately. The program can be completed full time in 6 semesters (2.5-3 full time years), or if part time, within 4-5 years. In the MSN/MPA program, the MSN contributes 21-30 credits, while the MPA contributes 36-39 credits. Elective choice is available in either of the dual degree programs.

DESCRIPTION: The Master of Science in Nursing (M.S.N.) degree consists of 14 concentrations. Graduates are eligible to sit for national certification examination in their respective concentrations.

1. Acute Care Nurse Practitioners provide advanced nursing care to adults with complex, acute and chronic illnesses in a variety of acute care settings. The demand for acute care nurse practitioners corresponds with the rapid growth in complexity in the acute healthcare environment. Students are prepared to find positions in hospices, neurology, cardiology and other hospital services, and with physician groups.
2. Family Nurse Practitioners are prepared to focus their care on health promotion, risk detection, illness prevention and management of acute and chronic illnesses of children and adults. Students learn clinical judgment and primary care skills through faculty mentorship and clinical preceptors in a variety of ambulatory care settings and specialty clinics. Family nurse practitioners are employed in primary care offices, including family practice, internal medicine, clinics, managed care offices, emergency rooms, free clinics, long-term care facilities, academic and occupational health settings.
3. Geriatric Nurse Practitioners focus their care on health promotion, risk detection, illness prevention and management of acute and chronic illnesses of older adults. Students learn clinical primary care and palliative and rehabilitation skills through faculty mentorship and clinical preceptors in a variety of geriatric care settings such as specialty clinics, rehabilitation centers and long-term care facilities. Geriatric nurse practitioners are employed in geriatric clinics as well as in long-term care, rehabilitation and home health settings.
4. Gerontological Clinical Nurse Specialists are advanced practice nurses that address health care needs of older adults. Students are prepared to care for older adult patients with a broad and complex range of health care needs; collaborate with nurses and a variety of other healthcare professionals and health agencies in order to provide acute and long term restorative care and ongoing support to the oldest of clients; provide direct care, consultation, education, research, program planning and evaluation across a variety of settings and the continuum of care.
5. Nurse Educators are prepared for teaching roles as faculty in academic settings, staff development and continuing education. Students acquire advanced nursing knowledge in curriculum design, instruction and evaluation, apply educational theories and principles, in curriculum development and evaluation and acquire skills in role development as an educator.
6. Nursing of the Adult–Clinical Nurse Specialists are prepared as advanced practice nurses to design, provide, facilitate and evaluate care for adult patients and their families across a variety of health care settings and specialties. The adult clinical nurse specialist role incorporates direct care, consultation, education, research, program planning and evaluation. Students have the opportunity to apply and evaluate theory and research in pathophysiological processes, evidence-based interventions for disease management and principles of teaching across the continuum of

adult healthcare settings. Students acquire advanced practice competencies in a specialty area of adult nursing.

7. Nursing Healthcare Management prepares graduates for mid- and upper-level management positions in public and private health care organizations. Students integrate management and nursing knowledge and skills through courses and practicums in management, health care leadership and advanced nursing. Students who are in the dual degree with the Master of Public Administration are also in this concentration.
8. Pediatric Clinical Nurse Specialists promote health, prevent illness, identify illness risk and provide acute and chronic care of children from birth to age 21. Pediatric clinical nurse specialist students are prepared to plan and individualize care for children and groups of children within the context of their families and communities to improve the quality of their lives. The clinical nurse specialist advanced practice role differs from the nurse practitioner role in that the focus is on family management and education and nursing staff support rather than direct treatment. Pediatric clinical nurse specialists often provide education and support to staff nurses regarding implementation of evidence-based practice and new technology.
9. Pediatric Nurse Practitioners are prepared to promote health, prevent illness, identify risk and provide advanced acute and chronic care of children from birth to age 21. Pediatric nurse practitioners are uniquely positioned to serve children within the context of their families and provide individualized and culturally competent care. Pediatric nurse practitioners often work in doctors' offices, hospitals, outpatient clinics and specialty clinics, such as cardiology and gastroenterology, home healthcare settings and schools; students have supervised practicum in these settings.
10. Primary Care Adult Nurse Practitioners give broad, comprehensive care to adults across the life span in ambulatory settings. Adult nurse practitioners focus their care on health promotion, risk detection, illness prevention and management of acute and chronic illnesses. Students are prepared to practice directly or in collaboration with other health professionals in order to maximize the effectiveness of community and health care system services. Nurse practitioners are employed in primary care offices, including internal medicine and family practice, clinics, managed care offices, emergency rooms, free clinics and occupational health settings.
11. Psychiatric Mental Health Nursing–Child/Adolescent Nurse Specialists possess proficient skills in individual, family and group psychotherapy and consultation; as well as advanced knowledge of psychopharmacology, mental health assessment and diagnosis of children and adolescents. Students are prepared to assume the psychiatric mental health child and adolescent clinical nurse specialist role, which includes teaching, research, supervision, case management and practice directed toward the mental health needs of children and adolescents.
12. Psychiatric Mental Health Nursing–Nurse Practitioners are prepared to administer advanced primary mental health care to adults. The psychiatric mental health nurse practitioner role includes comprehensive physical assessment, diagnosis and medication management, and psycho-therapeutic interventions. All successful graduates meet requirements for the American Nurses Credentialing Center exam for the Adult Psychiatric and Mental Health Nurse Practitioner. Graduates are eligible to apply for a Certificate to Prescribe from the Ohio Board of Nursing.
13. Psychiatric Mental Health Nursing–Adult Clinical Nurse Specialists possess psycho-therapeutic skills in individual, family and group psychotherapy and consultation, as well as advanced knowledge of psychopharmacology and assessment and diagnosis of adult mental health. Students are prepared to assume the psychiatric mental health nursing adult clinical nurse specialist role, which includes teaching, research, supervision, case management and practice directed toward the mental health needs of adults.
14. Women's Health Nurse Practitioners focus on primary health care for women. Primary health care is first access to comprehensive care involving health promotion, disease prevention and nursing management of common acute and chronic conditions. Women's health nurse practitioners practice directly or in collaboration with other health professional to provide continuity of health care and to maximize the effectiveness of community and health care system services. Students learn clinical judgment and primary health care skills through faculty mentorship and clinical preceptors in a variety of ambulatory care settings and specialty clinics.

Dual Degree with the Master of Business Administration is for experienced nurses whose career goals include assuming middle or executive management positions in health services agencies or in health-related companies, or who are interested in starting their own business. It combines the strengths of advanced nursing preparation with the practical management knowledge needed to develop significant leadership capabilities.

Dual Degree with the Master of Public Administration is for experienced nurses whose career goals include assuming middle or executive management positions in public agencies or health policy development. It combines the strengths of advanced nursing preparation with the practical management knowledge needed to develop significant leadership capabilities. Students in this dual degree program are declared in the Nursing Healthcare Management concentration.

The Doctor of Nursing Practice (D.N.P.) degree prepares advanced practice nurse (APN) clinical scholars who will possess leadership skills to effect health outcomes of individuals and populations by translating scientific evidence into clinical interventions, managing healthcare systems and collaborating with other health care providers. The curriculum incorporates new core courses covering genomics, epidemiology, program evaluation, statistics, translating evidence into practice and advanced leadership into the nurse practitioner and clinical nurse specialist advanced practice nursing concentrations of the

Master Science in Nursing degree; and includes 540 clinical practicum hours in addition to the 500-700 hours already required in the APN clinical specialty courses.

The Ph.D. degree in Nursing is offered jointly between Kent State University and the University of Akron. The program is built on the Boyer model of scholarship and through a single, unified doctoral nursing faculty and doctoral student body, prepares nurses for scholarship in discovery and integration.

**ADMISSION
REQUIREMENTS:**

Admission into the M.S.N.: official transcript(s); current Ohio RN license; BSN and/or graduate degree (an RN with a bachelor's degree in a non-nursing field may be considered); 3.0 GPA (if GPA is below 3.0, GRE or MAT and/or other evidence of ability to complete graduate coursework may be required); successful completion of a statistics course, recommended to have been taken within five years before admission; three letters of recommendation; pre-admission interview, by telephone or in person, with the program director; and 300-word essay of professional goals and reasons for seeking graduate nursing education. Admission into the Dual Degree with the MBA or the MPA concentrations also requires the GRE. International students must have achieved a TOEFL score of 550 (PBT); applicants with scores greater than 525 but less than 550 will be considered for conditional admission.

Admission into the D.N.P.: current Ohio licensure as a registered nurse and current national APRN certification; an undergraduate grade point average of 3.0 on a 4.0 scale. Applicants must have earned master's degrees from a CCNE or NLNAC accredited Advanced Practice M.S.N. program with a cumulative grade point average of 3.0 on a 4.0 scale; three letters of reference from individuals who can address the applicant's potential to succeed in the D.N.P. program; current resume; a pre-admission interview, by telephone or in person, with the D.N.P. director; and a 300-word essay describing professional goals and reasons for seeking the professional practice doctorate. International students must have achieved a TOEFL score of 550 (PBT); applicants with scores greater than 525 but less than 550 will be considered for conditional admission.

Admission into the Ph.D.: official transcript(s); BSN and MSN or master's in a closely related health field (a bachelor's degree in a closely related health field and MSN also will be considered); 3.0 GPA; GRE; current resume or curriculum vitae; three letters of recommendation; statement of career goals; statement of research interests; sample of written work; current Ohio RN license or legally able to practice nursing in country of origin; and 550 TOEFL (PBT) for international students (applicants with scores greater than 525 but less than 550 will be considered for conditional admission).

**GRADUATION
REQUIREMENTS:**

M.S.N.: The program requirements vary by concentration and by the dual-degree programs; however, concentrations typically require between 33-56 semester credit hours and 500-700 clinical hours. In most of the curriculum designs, 12-24 semester credits of courses are related to the area of clinical concentration, 9 semester credit hours to advanced nursing practice courses, and 12 credits to core courses related to theory development, research, ethics and culture, and health policy. All concentrations are four to five semesters (two full-time academic years) except for the dual-degree programs (see dual-degree programs). Part-time students typically take three to four years of study to complete their program; the university mandates a six year time limit in obtaining a master's degree. Under selected circumstances and upon the consent of the advisor, petitions for extensions of an additional one year to completion may be submitted to the Director of Graduate Programs. A minimum 3.0 GPA is required for graduation.

D.N.P.: In addition to completion of the appropriate program plan with a grade point average of at least 3.0, the student must complete and successfully defend an evidence-based project to a committee that is composed of the academic advisor and a preceptor member of the healthcare community. Preferably, the preceptor will hold a doctoral degree. The project must result in a manuscript suitable for publication.

Ph.D.: The joint program in nursing is a post-master's degree requiring 72 semester credit hours including the dissertation. It consists of five components: (1) Nursing Knowledge Component (9 credit hours), (2) Research Methods, Designs and Statistics (24 credit hours), (3) Cognates (6 credit hours), (4) Health Care Policy (3 credit hours), and (5) Dissertation (30 credit hours). Students must demonstrate successful retention, application and integration of seven foundational courses by completion of a preliminary examination to progress to the seven advanced courses. At the conclusion of coursework, students sit for the candidacy examination. The examination provides the basis for evaluation of the student's readiness for completing the dissertation. Successful defense of the dissertation is required for graduation.

**THESIS/
DISSERTATION:**

M.S.N.: The thesis is optional.

D.N.P.: Dissertation not required; however, students must complete an evidence-based project, see graduation requirements above.

Ph.D.: A dissertation is required.

**LANGUAGE
REQUIREMENT:**

None

PROGRAM FEE:

None

ACCREDITATION:

The College of Nursing is accredited by the Commission on Collegiate Nursing Education.

The Nursing and Home Care Management certificate focuses on management knowledge, skills and functions. Courses augment knowledge gained from undergraduate and graduate nursing courses by adding new material specific to the management role. These include budgeting; human resource management; managing organizational politics and conflict; interpersonal relationships, group dynamics and leadership; understanding organizational structures, processes, and design, including strategy formulation, organizational theory and culture, inter-organizational relationships, technology and managing organizational change; and practice or mentoring practicum experiences with selected health care leaders.

CIP code: 51.3802.

The Primary Adult Nurse Practitioner certificate focuses on clinical decision-making for clients with common acute and chronic problems of adulthood. A clinical component provides for development of skills in advanced health assessment, the diagnostic process, treatment and ongoing management of clients. Graduates are eligible to site for National Certification Examinations. CIP code: 51.3803.

PREREQUISITES: (12 credits)

Course	Title	Credits
NURS 60041	Advanced Assessment of Adult Clients (3)	
60045	Pathophysiology for Advanced Practice Nurses (3)	
60205	Introduction to Applied Epidemiology (1)	
60206	Ambulatory Diagnostics for Advanced Nursing Practice (2)	
60441	Pharmacology for Advanced Practice Nurses (3)	

CERTIFICATE REQUIREMENTS (15 credits)

Course	Title	Credits
BSCI 60446	Advanced Human Physiology	3
NURS 60042	Adult Primary Health Care I	5
60043	Adult Primary Health Care II	5
60092	NP Summer Practicum	2
TOTAL		15

Note: Students must complete 500 hours of supervised clinical practice as a part of this program to be eligible for National Certification.

Web: <http://www.kent.edu/publichealth/>

Lowry Hall

Kent State University's College of Public Health was established in 2009 to educate and train students to meet the current and projected shortage of public health professionals in Ohio and the nation. It is one of only two schools of public health in Ohio and the first to offer a Bachelor of Science in Public Health. Our academic programs integrate theory and practice to equip graduates with the knowledge and skills to address the health challenges of the 21st century. Our faculty engage in cutting edge research that seeks answers to some of society's most difficult problems including preventing violence, responding to natural and man made disasters, curbing substance abuse, and improving the delivery of health care. Our partners include local health departments, community organizations, health care institutions, and businesses that enable us to provide our students with real-world experiences in the exciting field of public health. If you are looking for a stimulating academic experience and a rewarding career, Kent State's College of Public Health is the place for you.

Why is Public Health important? Most of the gains in lifespan for individuals living in the U.S. and elsewhere over the past 100 years have been due to public health programs, not improved health care. Here's some examples:

- Since 1900, the average lifespan of persons in the United States has lengthened by greater than 30 years; 25 years of this gain are attributable to advances in public health (*Bunker JP, Frazier HS, Mosteller F. Improving health: measuring effects of medical care. Milbank Quarterly 1994;72:225-58*).
- Since 1972, death rates for coronary heart disease have decreased 51% due in large part to public health programs (*The sixth report of the Joint National Committee on Prevention, Detection, Evaluation, and Treatment of High Blood Pressure. Arch Intern Med 1997;157:2413-46*).

Public health programs are responsible for improving the quality of our water and air; they remove toxins from the environment and ensure that our food supply is kept free of contaminants; and they educate us about health risks associated with lifestyle issues such as poor nutrition, lack of physical activity, tobacco use, and substance abuse.

A growing area of responsibility for public health is emergency management and biopreparedness. Public health agencies are responsible for developing plans and mobilizing resources to respond to natural disasters and disease epidemics. They also work with law enforcement and public safety to protect us from man-made catastrophes such as terrorist attacks.

Increasingly, public health agencies are also becoming involved in developing sustainable, green technologies and working with urban planners to create community designs that increase safety and promote healthy living.

In short, public health impacts many different areas of life with the goal of improving the health of everyone.

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[Academic Policies](#)

DESCRIPTION: The Bachelor of Science in Public Health comprises five concentrations: Environmental and Occupational Health, Global Health, Health Care Administration, Health Promotion and Education, and Pre-Clinical Professions: Dentistry, Medicine, Osteopathy, Veterinary Medicine.

The Environmental and Occupational Health concentration prepares students to help reduce the burden of human illness that results from natural and man-made environmental exposures. The courses train students for a challenging, dynamic, and interdisciplinary career focused on public health risks associated with human invasion of the environment. Students learn the use of risk assessment to effect policy change, along with the administration and enforcement of environmental and public health laws. Graduates typically enter the public health workforce at local, state and national levels. They also work in academic institutions, private industry and for international health agencies.

The Global Health concentration in the Bachelor of Science in Public Health program aims to educate students in identifying and working to address the critical public health and human needs of diverse, underserved and vulnerable populations locally and globally. Students learn the need for multidisciplinary (biological and social sciences) approaches and cooperation to address the major global public health problems. Students have the opportunity to focus on a specific aspect of global health, e.g. HIV/AIDS, health policy, health disparities, health education, environmental health, nutrition, through various elective groupings. The Global health concentration prepares students to work at entry level positions in public health with local, regional, national or international public health agencies in both public and private sectors.

The Health Care Administration concentration prepares students for entry-level positions in health care management and establishes a foundation for graduate work in health policy and management. Students analyze national and local public health infrastructure, evaluate the effectiveness and efficiency of health care delivery and explore the legal and ethical issues of health care administration. Graduates enter the health care workforce as finance managers, compliance officers, patient navigators, insurance specialists and other health care managers.

The Health Promotion and Education concentration focuses on the social determinants of health behaviors. Such behaviors include alcohol, tobacco, other drug use, exercise, physical activity, injury and violence and sexual activity. Prevention approaches address community-level strategies to promote healthy behaviors, including media, policy and education initiatives. Students typically work in the public sector in social service agencies or non-profit agencies. There is also a demand in the private sector as large corporations actively promote healthy lifestyles among employees as a means of increasing productivity and lowering health care costs. [This concentration is also offered 100 percent online, pending approval from the Ohio Board of Regents.](#)

The Pre-Medicine, Dentistry, Osteopathy concentration includes preparatory courses for the Medical College Admissions Test (MCAT) and the Dental Admissions Test (DAT) and other professional schools are covered as a part of the Kent Core, public health core requirements, concentration electives and general electives. The overall curriculum of the B.S.P.H. program focusing on biological, social and

economic determinants of health, prevention and control of diseases, introduction to biostatistics and public health research, makes this program highly desirable for professional schools. These unique features of the program open up new opportunities and offers competitive advantages for students seeking to enter into clinical medicine.

CAREER OPPORTUNITIES:	Health educators held about 62,000 jobs in 2006. They work primarily in two industries with 20 percent working in State and local government and 53 percent working in health care and social assistance. In addition, a small percent of health educators work in grant-making services and social advocacy organizations. (Source: Bureau of Labor Statistics)
ADMISSION REQUIREMENTS:	General Admissions for New Freshman: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the admissions website for new freshmen . General Admissions for Transfer Students: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the admissions website for transfer students .
GRADUATION REQUIREMENTS	Minimum 121 total credit hours. Minimum 39 upper-division credit hours. Minimum 2.0 GPA cumulative and in major.
LANGUAGE REQUIREMENT:	Yes, for Global Health concentration only
STUDY ABROAD/AWAY OPPORTUNITIES	There are many study abroad/away opportunities including two-week classes and full semesters or year away. For more information contact the Office of International Affairs .
PROGRAM FEE:	None

III. ADDITIONAL PROGRAM REQUIREMENTS (21 or 33 credits)			
Type	Course	Title	Credits
		Kent Core Composition	6-8
		Kent Core Humanities and Fine Arts (minimum one course from each)	9
		Kent Core Social Sciences (must be from two disciplines) Students pursuing Global Health concentration should take GEOG 22061	6
		Suggested Advisor-Approved Electives see courses below; Not required for the Pre-Medicine, Dental, Osteopathy Concentration	0 or 12
IV. CONCENTRATION REQUIREMENTS (51-63 credits)			
		Environmental and Occupational Health (51)	
		Global Health (51)	
		Health Care Administration (51)	
		Health Promotion and Education (51)	
		Pre-Medicine, Dental, Osteopathy (63)	
MINIMUM TOTAL			121

* A minimum C (2.0) grade must be earned to fulfill the writing-intensive requirement.

ADVISOR-APPROVED ELECTIVES (12 Credits) suggested groupings of courses			
Type	Course	Title	
		Drug Abuse and Violence Prevention	
	HED 32530	Drug Use and Misuse (3)	
		44550 Drug Abuse and Violence Prevention (3)

COLLEGE: College of Public Health

DEPARTMENT: 126 Lowry Hall
Tel: 330-672-6500
E-mail: publichealth@kent.edu
Web: www.kent.edu/publichealth

DESCRIPTION: The Master of Public Health in Public Health consists of five concentrations: Biostatistics, Environmental Health Sciences, Epidemiology, Health Policy and Management and Social and Behavioral Sciences.

Biostatistics trains students in the quantitative science of health data collection, storage, retrieval, analysis and interpretation. Graduates are equipped use statistical methods to design and analyze health-related surveys and experiments for the purpose of improving health. The college's faculty research interests include applying biostatistical analysis to better understand critical health problems such as adolescent substance abuse, HIV/AIDS, cancer and Alzheimer' disease. Graduates in biostatistics are in demand at hospitals, pharmaceutical companies, state and local health departments, federal health agencies and biotechnology companies to analyze the effectiveness of new drugs and interventions, identify risk factors for disease and develop effective prevention strategies.

Environmental Health Sciences is designed to (a) help students understand how environmental factors including biological, physical and chemical factors affect the health of a population; and (b) gain knowledge and skills to develop practical strategies for mitigating the effects of harmful environmental hazards. Graduates learn how to conduct laboratory analysis of environmental contaminants, develop plans to prepare communities to respond to manmade and natural disasters, incorporate health promoting principles into urban design, and develop safety plans for companies. Students benefit from the college's faculty research expertise in bio-preparedness, microbiology, pesticides and occupational health and safety. Career opportunities in environmental health sciences include positions in research and clinical laboratories, environmental protection agencies, manufacturing companies, emergency management agencies and state and local health departments.

Epidemiology trains students to analyze the distribution and determinants of disease, disabilities and death in populations. Graduates are able to apply quantitative and qualitative methods to investigate disease outbreaks, determine causal relationships between environmental and biological factors and conduct studies to project health trends in populations. Students in this specialization benefit from public health faculty research agendas in bio-preparedness, public health surveillance systems, chronic disease, cancer and infectious disease epidemiology. Career opportunities for graduates include research positions in universities, medical schools and pharmaceutical companies; disease prevention specialists in hospitals; and surveillance managers in state and local health departments.

Health Policy and Management trains students to address public health risks and develop effective health services delivery models. It is an interdisciplinary program that incorporates health services research, health policy analysis and health care planning and management. Given the active research of the college's faculty in identifying service gaps and in developing evidence-based practices and policy analysis, students emerge with strong skills in health care organization management, alternative models of service financing and strategies for improving services. Career opportunities for graduates include administrative and management positions in hospitals, clinics, state and local health departments, nursing homes and mental health facilities; policy analyst positions in health planning organizations and governmental agencies; and planning and management positions in health maintenance organizations and health insurance companies.

Social and Behavioral Sciences provides students with an interdisciplinary understanding of the theoretical basis of health behavior in populations across the life course and how to apply theoretical principles to

[M.P.H. Program Requirements](#)

[Ph.D. Program Requirements](#)

[College Requirements](#)

[Academic Policies](#)

design effective behavior change strategies. Graduates are able to design and evaluate public health interventions intended to improve health for families, workplaces, communities and law enforcement/criminal justice settings. The active research of the college's faculty, particularly in the areas of violence and substance abuse prevention, HIV/AIDS and alcohol and tobacco use provides students the opportunity to work on large-scale externally funded prevention research. Students are prepared for careers in health education and promotion; program design and evaluation; and curriculum development for state and local health departments, corporate wellness programs, hospitals, international health agencies, mental health centers and non-profit organizations.

The Ph.D. in Public Health consists of a concentration in Prevention Science. Future doctoral concentrations in Epidemiology and Health Policy Management are pending approval by the Ohio Board of Regents.

Prevention Science is an interdisciplinary program aimed at promoting adaptive health behavior in populations across the life course. Graduates of this program will be able to design and evaluate public health interventions and have expertise in a variety of theoretical and substantive perspectives for the purpose of conducting research within systems of the family, health and education, workplace, community, law enforcement/criminal justice settings and social welfare. The active research of Kent State University's College of Public Health faculty, particularly in the area of violence and substance abuse prevention, will provide students the opportunity to work on large-scale externally funded prevention research.

ADMISSION REQUIREMENTS:	M.P.H.: Minimum undergraduate GPA of 2.75, official transcript(s), goal statement, three letters of recommendation and acceptable GRE score or other standardized graduate admission exam (GMAT, MCAT, LSAT, PSAT, MAT or Miller's Analogies). GRE scores may be waived for significant graduate education or professional experience as determined by graduate coordinator.
	Ph.D.: Master's degree from an accredited college/university in related discipline with a minimum graduate GPA of 3.0, acceptable GRE score or other standardized graduate admission exam with a quantitative components (may be waived for significant graduate education or professional experiences as determined by graduate coordinator), personal statement and resume, three letters of recommendation, TOEFL score (if applicable), required interview with faculty.
GRADUATION REQUIREMENTS:	M.P.H.: Minimum 45 total credit hours.
	Ph.D.: Minimum 90 total credit hours.
CULMINATING REQUIREMENT:	M.P.H.: Students are required to complete two components: (1) 300 hours of Placement at an approved public health agency, under the guidance of a qualified preceptor; and (2) a final portfolio/report and a seminar presentation integrating theory and practice.
THESIS/ DISSERTATION:	M.P.H.: None
	Ph.D.: Required (30 credit hours)
PROGRAM FEE:	None

E-mail: publichealth@kent.edu

Web: www.kent.edu/publichealth

The Public Health certificate integrates key aspects of preventing disease, prolonging life and promoting health through the organized efforts and informed choices of society, organizations, communities and individual. Certificate graduates have an understanding of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, the changing U.S. health care system, and the monitoring of diseases in the community through applied public health research.

Kent State University admission requirements apply, including assessment testing. Students may enroll in the program even if they have prior degrees. Students must declare themselves as a certificate candidate prior to completing half of the courses and must complete a minimum of 15 credits at Kent State University.

Regional College

Kent State University Catalog 2010 - 2011 > Colleges and Programs > [Regional College](#)

ACADEMIC ADVISING OFFICES:

See campus listings below for each office contact information.

The Regional College comprises a network of seven distinct campuses within Kent State University. Three of them—the Ashtabula, East Liverpool and Salem campuses—are named for the cities in which they are located. The remaining four—the Geauga, Stark, Trumbull and Tuscarawas campuses—are named for their counties and are located near the cities of Burton, Canton, Warren and New Philadelphia, respectively.

As part of the Kent State University system, all of the Regional Campuses are accredited by the The Higher Learning Commission and are members of the North Central Association. Some associate degree programs also have earned specialized accreditation (see specific programs for their accrediting body).

MISSION

The mission of the Regional College is to make the resources of the 27th largest university in the country accessible to the citizens of Northeast Ohio. The Regional College is also charged with the task of delivering a wide variety of area-specific technical education and training to the communities it serves. Finally, delivering programs and services that enhance business and employment opportunities in a time of economic transition is an integral part of the mission of the Regional College. It carries out this mission through the efforts of a faculty committed to the highest standards in the scholarships of discovery, integration, application, teaching and university citizenship. Faculty members actively pursue a variety of creative endeavors, regularly contribute to the scholarship in their disciplines, take pride in their continuing pedagogical successes, and are recognized by the wider University community with teaching and professional development awards. Regional campus faculty are visible citizens in the communities they serve, as well as at every level of university governance.

The Regional Campuses have an open enrollment policy and an expanding post-secondary enrollment option program. Many are “nontraditional” students: people returning to the classroom after having begun or raised a family; manufacturing and business workers in need of retraining in the face of economic change; bright, motivated young students earning college credit while still in high school; and for the “traditional” student, the Regional Campuses offer the first and second years of coursework leading to the bachelor’s degree in numerous programs.

THE REGIONAL CAMPUSES

Each of the Regional Campuses—Ashtabula, East Liverpool, Geauga, Salem, Stark, Trumbull and Tuscarawas—is an integral part of the community it serves, whether through the promotion of fine arts and humanities, the extensive offering of continuing education courses and programs, the enhancement of primary and secondary education, the development of carefully crafted associate degree programs, the offering of selected upper-division and graduate coursework, a wide variety of partnerships with business and industry, the leadership in the development of distance learning technology, or as a first step—close to home—toward the goal of a four-year baccalaureate at Kent State University. The Regional College is itself an integral part of Kent State, advancing the mission of the university by delivering its programs and services throughout Northeast Ohio.

Kent State University at Ashtabula
3300 Lake Road West
Ashtabula, OH 44004
Tel: 440-964-3322; Fax: 440-964-4269
Web: www.ashtabula.kent.edu

The northern-most campus of Kent State University's eight-campus system is centrally located between Cleveland, Erie and

Regional Campuses Network

- » THE REGIONAL CAMPUSES
- » STUDENT SERVICES AND FINANCIAL AID
- » THE ASSOCIATE DEGREE
- » THE BACHELOR'S DEGREE
- » CERTIFICATE PROGRAMS

Youngstown. The Ashtabula Campus is situated on an 80-acre site along State Route 531 overlooking Lake Erie. The campus comprises four buildings: Main Hall, Library, Technology Building and the Robert S. Morrison Health and Science Building, which provides state-of-the-art learning environments and includes a cadaver lab, x-ray lab, human patient simulator and a living lab with a full-size apartment. Campus facilities include modern classrooms, wireless Internet access, computer labs, conference space, electronic classrooms, academic support services, auditorium and gymnasium. Additionally, the campus has a corporate training center at the Lodge & Conference Center at Geneva State Park offering customized training and workforce development to meet the needs of local business and industry. The campus offers coursework for [associate](#), [bachelor's](#) and master's degrees and [certificate](#) programs. Please see the [GPS website](#) for more information on Ashtabula Campus program offerings.

Kent State University at East Liverpool

400 E. 4th Street
East Liverpool, OH 43920
Tel: 330-382-7400; Fax: 330-382-7562
Web: www.eliv.kent.edu

East Liverpool is an urban campus that overlooks the Ohio River and serves students from Columbiana, Carroll, Jefferson and Mahoning counties in Ohio, and from the neighboring states of West Virginia and Pennsylvania. The University District links Kent State students with some of East Liverpool's renowned institutions, including the Pottery Museum, Carnegie Public Library and the East Liverpool High School Alumni Association. East Liverpool is the hometown of Kent State alumnus and nationally recognized college football coach Lou Holtz. Excellent resources, wireless access, small class size and a comprehensive developmental education curriculum are in place to help every student succeed. The campus offers coursework for [associate](#) and [bachelor's](#) degrees and [certificate](#) programs. Please see the [GPS website](#) for more information on East Liverpool Campus program offerings.

Kent State University at Geauga

14111 Claridon-Troy Road
Burton Township, OH 44021
Tel: 440-834-4187; Fax: 440-834-8846
Web: www.geauga.kent.edu

The Geauga Campus is located in the heart of Ohio's maple syrup county, one mile north of state Routes 87 and 700 and easily accessible from Cleveland and the eastern suburbs. The campus offers coursework for [associate](#), [bachelor's](#) and master's degrees and [certificate](#) programs. Please see the [GPS website](#) for more information on Geauga Campus program offerings. The campus also offers select programs and courses at its Twinsburg Center (8990 Darrow Road, Twinsburg, OH 44087 [The "Old School House" Building], Tel: 330-487-0574).

Kent State University at Salem

2491 State Route 45 South
Salem, OH 44460
Tel: 330-332-0361; Fax: 330-332-9256
E-mail: ask-us@salem.kent.edu
Web: www.salem.kent.edu

The Salem Campus offers the first two years of study in most Kent State University baccalaureate programs, as well as selected upper-division and graduate courses. Located on a 99-acre site just two miles south of the city of Kent, the campus features a lake and an arboretum—a 25-acre mixed hardwood forest—used by students for studies and recreation. A nature trail winds through the campus, attracting both bird watchers and runners. Students may use the outdoor tennis courts and the student activities center. In addition to offering a variety of cultural, social and student activities, the campus offers an honors program, continuing studies, Kent Core (general education) courses, academic support services and developmental education. The campus offers coursework for [associate](#), [bachelor's](#) and master's degrees and [certificate](#) programs. Please see the [GPS website](#) for more information on Salem Campus program offerings.

Kent State University at Stark

6000 Frank Avenue N.W.
North Canton, OH 44720
Tel: 330-535-3377 (Akron) or 330-499-9600 (Canton); Fax: 330-494-6121
Web: www.stark.kent.edu

Located on a 200-acre site in Jackson Township, just south of the Akron-Canton Regional Airport, Stark Campus is the largest of Kent State's Regional Campuses and Stark County's only public university. Campus relationships with numerous community, cultural and business organizations bring a wide range of programs and services to the area. The campus' University Center is one of Ohio's most technologically advanced meeting and events facilities and is among the few in the state to receive the stringent accreditation of the International Association of Conference Centers. Along with a variety of cultural, social and student activities, small class size and more than 100 full-time faculty, the campus offers corporate and community services, management and small business development expertise, developmental education and academic support services. The campus offers coursework for [associate](#), [bachelor's](#) and master's degrees and [certificate](#) programs. Please see the [GPS website](#) for more information on Stark Campus program offerings.

Kent State University at Trumbull

4314 Mahoning Avenue N.W.
Warren, OH 44483
Tel: 330-847-0571; Fax: 330-847-6172
Web: www.trumbull.kent.edu

The Trumbull Campus is located just north of the Route 5 bypass on State Route 45 and boasts one of the best Police Academy and Criminal Justice Institutes in Ohio. Trumbull Campus students have more than 170 major career fields to explore. The campus also offers developmental education courses, a varied continuing studies program and a strong liberal arts core. Campus facilities include a theater, tennis courts and a one-mile fitness trail. The campus offers a variety of social and cultural activities for area residents and a wide variety of student activities, academic support services and programs for business and industry. The Trumbull Campus offers coursework for [associate](#), [bachelor's](#) and master's degrees and [certificate](#) programs. Please see the [GPS website](#) for more information on Trumbull Campus program offerings.

Kent State University at Tuscarawas
 330 University Drive N.E.
 New Philadelphia, OH 44663
 Tel: 330-339-3391; Fax: 330-339-3321
 Web: www.tusc.kent.edu

Located on 170 acres in New Philadelphia, the Tuscarawas Campus boasts a vibrant and friendly atmosphere with an enrollment of 2400 students served through credit programming and another 3700 individuals served through non-credit courses offered by the Office of Business and Community Services. The campus offers coursework for [associate](#), and [bachelor's](#) degrees, and master's degrees and [certificate](#) programs. A few of the largest majors include nursing; business; computer design, animation and game design; and veterinary technology, which is one of only seven AVMA accredited programs in Ohio. Students can participate in numerous activities, cultural events, organizations and clubs to enhance their educational experience. Academic support and enrichment are available through academic advising, free tutoring services, state-of-the-art technology labs and a challenging Honors Program. Campus facilities include Founders Hall, a high-tech Science and Advanced Technology Center, and a Performing Arts Center scheduled to open in the fall of 2010. Please see the [GPS website](#) for more information on Tuscarawas Campus program offerings.

STUDENT SERVICES AND FINANCIAL AID

Each Regional Campus provides a number of student services. One of the most important services is providing information about financial aid and scholarships. For students who qualify, a number of financial aid opportunities are available, including the Federal Perkins Loan, the Ohio Instructional Grant Program, the Federal Pell Grant Program and other special aid programs. Financial help may also be available through the Federal College Work-Study Program or through other part-time job opportunities. Local employers often seek part-time help through Regional Campus offices. While each campus has scholarship funds available, the amount and number of scholarships and the requirements for them vary considerably. All of the campuses have funds available for short-term loans. Because of the variety in number and character of these programs, it is suggested that interested students contact the financial aid advisor of the campus they wish to attend.

Other student services at the Regional Campuses include pre-admission counseling, academic advising, child care and career counseling. An important feature of the Regional College is a commitment to help students become successful. Many students enter directly from high school, while others combine full-time jobs and families with classwork. Success in college depends largely upon skills in reading, studying, mathematics and composition.

Basic Skills Assessment: Free testing is required of all students to assess learning skills. This information is used by students and advisors to determine the best course placement for academic success. If testing shows the need for additional preparation in reading, studying, mathematics or composition, support courses are available to meet these needs and will be required.

Support Services: These services include peer tutors, who are available for certain courses, and special assistance in writing, reading and mathematics. Also available are skill development centers, learning centers and workshops in writing.

Advising: Regional Campuses consider advising to be an essential component in student success. Professional staff provide general advising, while faculty have primary responsibility for major advising.

Cost: Because the university is state-supported, fees are adjusted to provide quality education at the lowest possible cost. One important advantage to students attending a Regional Campus is that they can live at home, thus saving room and board expenses.

Student Accessibility Services: The Regional College is committed to providing equal access to students with disabilities. Each campus has a student disability coordinator who works with students to identify appropriate academic accommodations and support services to foster success at the university. Services for students with disabilities are determined by appropriate educational, medical and/or psychological documentation provided by the student. After documentation is reviewed and the disability is verified, students receive a letter of accommodations to present to instructors, and instructors then will know how best to work with students to meet their individual needs. If students are requesting accommodations, it is suggested that they contact the student disability coordinator on the campus they plan to attend at least two months prior to enrollment so that accommodations can be in place at the beginning of the semester. Contact the student disability coordinator for more information.

THE ASSOCIATE DEGREE

Associate degrees are awarded for the successful completion of 61 or more semester hours of coursework. They are designed to fulfill two major purposes: to permit students to complete the freshman and sophomore years of a baccalaureate program; or to prepare them for immediate employment in a technology field. While associate degrees are awarded after the successful completion of at least 61 semester hours, it should be noted that most programs actually require additional hours to complete. Students who are studying part time should expect to take more than two years to complete their programs.

The Associate of Arts is awarded to students who successfully complete a minimum of 61 semester hours toward the Bachelor of Arts, the Bachelor of Fine Arts, the Bachelor of Business Administration, the Bachelor of General Studies or the Bachelor of Music degrees. The degree can become the foundation for baccalaureate programs. Students in the degree must fulfill the 36-hour [Kent Core](#).

The Associate of Science is awarded to students who successfully complete a minimum of 61 semester hours toward a Bachelor of Science degree. The degree can become the foundation for baccalaureate programs. Students in the degree must fulfill the 36-hour [Kent Core](#).

The Associate of Applied Business is awarded to students who successfully complete prescribed coursework in any of the following business technology programs: accounting technology, business management technology, computer technology or information technology for administrative professionals. Students in the degree are expected to choose their general studies courses from the [Kent Core](#). All exceptions must be approved by the students' academic advisor. The availability of specific Kent Core courses varies by campus. Many credits earned in a technical associate degree program are also applicable to bachelor's degrees

both at Kent State and at other colleges and universities. Which credits apply depend upon the associate degree earned and the bachelor's degree toward which students wish to work. Working closely with an advisor is strongly suggested as students explore options for majors and plan their schedules.

The Associate of Applied Science is awarded to students who successfully complete prescribed coursework in any of the following environmental, health or engineering technology-related programs: aviation maintenance technology; computer design, animation and game design; early childhood education technology; electrical/electronic engineering technology; engineering of information technology; environmental technology; horticulture technology; human services technology; legal assisting; manufacturing engineering technology; mechanical engineering (integrated manufacturing) technology; nursing; occupational therapy assistant technology; physical therapist assistant technology; radiologic technology; respiratory therapy technology; systems/industrial engineering technology; and veterinary technology. Students in the degree are expected to choose their general studies courses from the [Kent Core](#). All exceptions must be approved by the students' academic advisor. The availability of specific Kent Core courses varies by campus.

The Associate of Technical Study is open to students who need a specially designed course of study in a technical field. It consists of courses offered at the students' campus that suit the students' career goals. Degree programs must be planned with the assistance of a faculty advisor. The program consists of a minimum 61 semester hours of coursework, including the [Destination Kent State: First Year Experience](#) course. At least 30 hours are "technical core" courses that offer education central to students' career goals. At least 15 hours must consist of basic courses that provide background to the technical core; at least 15 hours must be selected from the [Kent Core](#). The degree program should not exceed 73 hours. Degree programs must be approved by the faculty advisor, the campus dean and the Regional College dean. At least 32 hours must be completed after approval of the written degree program proposal.

The Associate of Technical Study may be conferred as a concurrent degree or after receiving a prior degree. At least 24 hours of coursework must be completed after approval of the program, and the program must include at least 24 hours of work in addition to the prior or concurrent degree. Forms for developing an ATS program proposal can be obtained at any Regional Campus student services office.

Degree-Category A: This degree requires a minimum of 61 credit hours selected in consultation with an academic advisor from existing courses at that campus. The program permits students to develop a curriculum based on specific career objectives that are not served by existing degree programs.

Degree-Category B: This degree provides associate degree-level completion based on a technical certificate or other formal technical training program acquired outside Kent State University. Programs available are the following: allied health management technology; diagnostic medical sonography; emergency medical services technology; environment management; industrial trades technology; nuclear medicine technology; radiation therapy technology; and radiologic technology.

Options in Technical Programs: Some business and engineering technology programs have different options from which students can choose. While options provide students with opportunities for focused study, not all options possible within a program are offered at all campuses. Students should check with an advisor to see what program options are available at the campus they are attending.

THE BACHELOR'S DEGREE

Each Regional Campus offers programs designed to complete the freshman and sophomore years of most of the bachelor's degrees offered by Kent State. The intention of such programs is to provide students interested in eventually obtaining a four-year degree the opportunity of remaining at home while beginning their degree. It is expected that such students eventually will complete their degree at a Regional Campus, transition to the Kent Campus or transfer to another baccalaureate-granting institution to complete the degree. Some baccalaureate programs may be completed at each Regional Campus. See the [GPS website](#) for baccalaureate offerings per campus. Completion of the freshman and sophomore years of a baccalaureate program leads to the award of the Associate of Arts or Associate of Science degree.

Several baccalaureate programs at Kent State University often can be completed with approximately two years of additional full-time study after completion of an associate degree. Some course selections leading to associate degrees are more applicable than others as components of the bachelor's degrees, and exact requirements for additional study vary. Students interested in baccalaureate completion programs should see an advisor at the earliest possible date.

CERTIFICATE PROGRAMS

The Regional College awards approved certificates to students who successfully complete a course of study designed to meet a specific need. These programs consist of a minimum of 15 credit hours and a maximum of 30. Some certificate programs articulate fully or in part with associate degrees. Students wishing to participate in certificate programs must meet the standards set forth in the university admissions policy, except where a program has been designed for a group with unique needs, such as a contract training group. Students already enrolled at Kent State must declare their intent to pursue a certificate before completing 50 percent of the courses required. Courses completed pass/fail or through Credit-By-Examination will not count toward completion of the certificate requirements. If a student already has completed a program requirement by pass/fail or Credit-By-Examination, an alternative requirement will be designated.

To successfully earn a certificate, students must achieve a minimum 2.50 cumulative GPA in the courses required for the following programs: child and family advocacy, computer forensics and information security, database administrator, legal nurse consulting/nurse paralegal, solutions developer and systems engineer. Students enrolled in the computed tomography and magnetic resonance imaging must achieve a minimum GPA of 2.75. All other certificates require a minimum cumulative GPA of 2.00 in the courses required for the programs.

As one of Ohio's top universities, Kent State offers the resources and facilities of a large university with the friendly, casual atmosphere of a liberal arts college. Enroll today to start pursuing your future at one of the best colleges in Ohio. We've been educating successful graduates for over 100 years; join us today.

Resources:

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Business in Accounting Technology provides students with a broad range of practical accounting and communication skills and teamwork experience. These combined skills prepare students for immediate entry into the accounting technology field in numerous environments including manufacturing, retail, service and governmental organizations. Requirements articulate with the Accounting Technology certificate; contact an advisor for more information. The degree is available at the [Ashtabula](#), [East Liverpool](#), [Trumbull](#) and [Tuscarawas](#) campuses. Most of the courses for this major are available at the [Geauga](#) and [Salem](#) campuses.

CAREER OPPORTUNITIES: Payroll and timekeeping clerks held about 214,000 jobs in 2006. They can be found in every industry, but a growing number work for employment services companies as temporary employees. Many also work for accounting, tax preparation, bookkeeping, and payroll services firms, which increasingly perform the payroll function as a service to other companies. Approximately 16 percent of all payroll and timekeeping clerks worked part time in 2006. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 60 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

ACCREDITATION: Association of Collegiate Business Schools and Programs (ACBSP)

STUDENT ORGANIZATIONS: See individual campuses

COLLEGE: Regional College
 DEPARTMENT: Division of Health Occupations

Resources:

- Roadmaps
- Program Requirements
- College Requirements
- University Requirements

DESCRIPTION: The Associate of Technical Study in Allied Health Management is for students who have completed a state-certified allied health program and hold an accredited certificate. This flexible program enables students with an allied health certificate and health care experience to develop the skills necessary to upward mobility. Graduates are prepared to work in variety of health care settings as administrative and supervisory personnel.

The Trumbull Campus offers an associate of technical studies degree completion program for students who have completed a state-certified allied health program and hold an accredited certificate.

CAREER OPPORTUNITIES: Medical and health services managers held about 262,000 jobs in 2006. About 37 percent worked in hospitals, and another 22 percent worked in offices of physicians or in nursing and residential care facilities. Most of the remainder worked in home health care services, Federal Government health care facilities, outpatient care centers, insurance carriers, and community care facilities for the elderly. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students interested in this program should apply to the Trumbull Campus and must meet with an advisor to be admitted to the program. Upon admission to this program, up to 27 credit hours will be held in escrow on the basis of student's accredited certification. These credit hours will be awarded upon successful completion of at least 39 additional credit hours of courses selected in accordance with the following curriculum.

GRADUATION REQUIREMENTS: Minimum 66 credit hours. Minimum 2.0 cumulative and major GPA.

COLLEGE: Regional College
DEPARTMENT: Division of Applied Business

Resources:

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Bachelor of Applied Studies is an adult completion degree offered through the Regional Campuses. It is designed to accommodate varied educational backgrounds, develop competencies needed for success in a variety of work settings, and offer major courses in schedules attractive to time- and place-bound adults. Self-management of one's career in the 21st century is a major goal of this degree.

This degree provides a blended, breadth of learning experience that is trans-disciplinary, and is quite different from the traditional degree which provides depth within a single discipline. Students who desire a major with depth in a specific discipline should consider a traditional degree.

The Bachelor of Applied Studies requires a prescribed core of skills/knowledge-based courses which bridge multiple disciplines in multiple colleges. The skills/knowledge provided by this degree are civic engagement, computer literacy, critical thinking, diversity/internationalization, ethics, information literacy, leadership, oral and written communication, self-management, and statistical and algebraic thinking. Students construct a meaningful plan for using the curriculum in Applied studies to explore and prepare for their preferred futures by completing a cornerstone course and developing an electronic portfolio. This enables students to collect artifacts of their learning which can be used to advance their careers. A capstone course features a synthesizing of learning focused on the ten foundational competencies and finalization of the electronic portfolio for job search and career development purposes.

This program is available at all seven Regional Campuses: [Ashtabula](#), [East Liverpool](#), [Geauga](#), [Salem](#), [Stark](#), [Trumbull](#) and [Tuscarawas](#).

GRADUATION REQUIREMENTS: Minimum 121 credit hours. Minimum 2.0 cumulative and major GPA.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: None

DESCRIPTION: The Associate of Arts and Associate of Science degrees may be used for several purposes: they may serve as freshman- and sophomore-year programs for students who are planning to complete a bachelor's degree program; they may serve as degrees unto themselves for students who want to obtain a general education by sampling a variety of different subject areas; they may advance students' careers or provide job retraining; and they provide opportunities for intellectual growth and personal satisfaction.

Because of the general nature of the programs, students may achieve emphasis in areas that will meet specific educational needs by taking a concentration of six courses in a particular field of study. *However, students should consult with their advisors in the selection of their courses prior to the beginning of each semester.*

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Undergraduate Programs > [Aviation Maintenance Technology](#)

COLLEGE: Regional College

DEPARTMENT: Division of Professional Studies

DESCRIPTION:

The Associate of Applied Science in Aviation Maintenance Technology provides students with the knowledge, skills and experience necessary to become an aircraft technician. Coursework meets Federal Aviation Administration (FAA) training requirements and qualifies graduates to sit for FAA examinations to become a certified Airframe and Powerplant technician. Topics include aircraft structures, aircraft power systems, aviation electronics and hydraulic systems. Students interested in this program must meet with an advisor prior to admission to the major. The degree is available at the [Ashtabula](#) Campuses.

CAREER OPPORTUNITIES:

Aircraft and avionics equipment mechanics and service technicians held about 138,000 jobs in 2006; about 5 in 6 of these workers was an aircraft mechanic and service technician.

Employment of aircraft and avionics equipment mechanics and service technicians primarily is concentrated in a small number of industries. More than half of aircraft and avionics equipment mechanics and service technicians worked in air transportation and support activities for air transportation. Around 18 percent worked in aerospace product and parts manufacturing and about 16 percent worked for the Federal Government. Most of the rest worked for companies that operate their own planes to transport executives and cargo.

Most airline mechanics and service technicians work at major airports near large cities. Civilian mechanics employed by the U.S. Armed Forces work at military installations. Mechanics who work for aerospace manufacturing firms typically are located in California or in Washington State. Others work for the FAA, many at the facilities in Oklahoma City, Atlantic City, Wichita, or Washington, DC. Mechanics for independent repair shops work at airports in every part of the country.

ACCREDITATION:

STUDENT ORGANIZATIONS:

Regional College

Division of Applied Business

The Associate of Applied Business in Business Management Technology provides students with a core consisting of written and oral communication skills, management skills, accounting, marketing, e-commerce, economics and liberal arts courses. In addition, the program offers technical options that allow students to specialize in business management (that articulates with the Bachelor of Business Administration), computer applications, general business management/entrepreneurship/manufacturing, information technology and marketing sales. In some cases, students may have the opportunity to participate in internships, which help to link theory with hands-on practice. Requirements articulate fully or in part with the Business Management, Entrepreneurship and Manufacturing Management certificates; contact an advisor for more information. This major is accredited by the Association of Collegiate Business Schools and Programs (ACBSP), 7007 College Blvd., Suite 420, Overland Park, KS 66211, 913-339-9356. The degree is available at the [Ashtabula](#), [East Liverpool](#), [Salem](#), [Trumbull](#) and [Tuscarawas](#) campuses. Most of the courses in this major are available at the [Geauga Campus](#) and the [Kent Campus](#) through the [College of Technology](#).

Administrative services managers held about 247,000 jobs in 2006. About 65 percent worked in service-providing industries, including Federal, State, and local government; health care; finance and insurance; professional, scientific, and technical services; administrative and support services; and educational services, public and private. Most of the remaining managers worked in wholesale and retail trade, in management of companies and enterprises, or in manufacturing. (Source: Bureau of Labor Statistics)

Admission is open to anyone with a high school diploma or its equivalent.

Minimum 60 credit hours. Minimum 2.0 cumulative GPA and in major.

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Computer Design, Animation and Game Design provides students with coursework in design, animation, game design and virtual reality. Computer-aided design (CAD) is used throughout the program for computer modeling and multimedia development. This program prepares students for entry-level positions as technical illustrators, drafter/designer technicians in business and computer animation and game design industries, as well as in the field of multimedia development. This major articulates with the Computer-Aided Drafting certificate and the technology 2+2 baccalaureate degree; please contact an advisor for more information. This program is available at the Tuscarawas Campus, with coursework available at the Geauga Campus, and Kent, through the College of Technology.

CAREER OPPORTUNITIES: Computer software engineers held about 909,600 jobs in 2008. Approximately 514,800 were computer applications software engineers, and about 394,800 were computer systems software engineers. Although they are employed in most industries, the largest concentration of computer software engineers—more than 30 percent—is in computer systems design and related services. Many computer software engineers also work for establishments in other industries, such as software publishers, government agencies, manufacturers of computers and related electronic equipment, financial institutions, insurance providers, and management of companies and enterprises.

An increasing number of computer software engineers work as independent consultants on a temporary or contract basis, many of whom are self-employed. About 27,000 computer software engineers were self-employed in 2008.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 62 credit hours. Minimum 2.0 cumulative GPA and in major.

COLLEGE: Regional College
DEPARTMENT: Division of Applied Business

Resources:

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Business in Computer Technology provides students with a core consisting of programming, operating systems and networks, Web site development and workgroup productivity technologies. Students may choose from concentrations in specific areas including applications development, Internet/multimedia, and network technologies. These concentrations allow students to focus their studies and begin to prepare for various professional certifications. There is also a general concentration that prepares students for positions in small- and medium-sized organizations that require computer staff to perform a wide variety of technical duties. In addition, the concentrations may articulate fully or in part with available certificates in microcomputer applications, database administrator and advanced Internet; please contact an advisor for more information. The degree is available at the [Ashtabula](#), [East Liverpool](#), [Trumbull](#) and [Tuscarawas](#) campuses. Most of the courses for this major are available at the [Geauga](#) and [Salem](#) campuses.

CAREER OPPORTUNITIES: Computer support specialists and systems administrators held about 862,000 jobs in 2006. Of these, approximately 552,000 were computer support specialists and about 309,000 were network and computer systems administrators. Although they worked in a wide range of industries, about 23 percent of all computer support specialists and systems administrators were employed in professional, scientific, and technical services industries, principally computer systems design and related services. Substantial numbers of these workers were also employed in administrative and support services companies, financial institutions, insurance companies, government agencies, educational institutions, software publishers, telecommunications organizations, health care organizations, and management of companies and enterprises.

Employers of computer support specialists and systems administrators range from startup companies to established industry leaders. As computer networks become an integral part of business, industries not typically associated with computers—such as construction—increasingly need computer support workers. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 60 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

ACCREDITATION: Association of Collegiate Business Schools and Programs

STUDENT: See individual campuses

[Kent State University Catalog 2010 - 2011](#) > [Colleges and Programs](#) > [Regional College](#) > [Undergraduate Programs](#) > [Diagnostic Medical Sonography](#)

COLLEGE: [Regional College](#)

DEPARTMENT: [Division of Health Occupations](#)

DESCRIPTION:

The Salem Campus offers the Associate of Technical Study in Diagnostic Medical Sonography as a completion program for certified radiologic technologists and diagnostic medical sonographers who have finished their training at an accredited institution and have been certified by the American Registry of Radiologic Technologists or American Registry of Diagnostic Medical Sonographers.

Students interested in one of these programs should apply to the Salem Campus and meet with the director of radiologic technology for additional application details. Upon admission to these programs, students will be granted 32 credit hours on the basis of their certification. The Salem Campus also offers the Associate of Technical Study in the following:

- [Nuclear Medicine Technology](#)
- [Radiation Therapy Technology](#)
- [Radiologic Technology](#)
- [Radiologic Technology with a concentration in Radiology Department Management](#)

CAREER

OPPORTUNITIES:

Radiologic technologists held about 196,000 jobs in 2006. More than 60 percent of all jobs were in hospitals. Most other jobs were in offices of physicians; medical and diagnostic laboratories, including diagnostic imaging centers; and outpatient care centers. (Source: Bureau of Labor Statistics)

ADMISSION

REQUIREMENTS:

Must be a registered radiologic technologist, nuclear medicine technologist or diagnostic medical sonographer prior to program start. Program applicants are encouraged to meet with an advisor at the Salem campuses to discuss the program requirements.

GRADUATION

REQUIREMENTS:

Minimum 66-68 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE

REQUIREMENT:

None

PROGRAM FEE:

None

ACCREDITATION:

The Salem Campus program is approved and accredited by the Joint Review Committee on Education in Radiologic Technology, JRCERT. The Ashtabula Campus program is not JRCERT accredited, nor has it applied to the JRCERT for accredited status.

STUDENT

ORGANIZATIONS:

See individual campuses.

COLLEGE: Regional College
 DEPARTMENT: Division of Professional Studies

Resources:

- Roadmaps
- Program Requirements
- College Requirements
- University Requirements

DESCRIPTION: The Associate of Applied Science in Early Childhood Education Technology (ECET) is offered at the Salem and Tuscarawas Campuses. A minimum of 2.00 GPA (C grade) is required in each technical course and a minimum 2.00 cumulative GPA is required for graduation. Students who successfully complete this program are eligible to apply for Ohio's associate degree preschool license.

The coursework for this associate degree also is fully applicable to the baccalaureate degree in early childhood education at either the Kent, Salem or Tuscarawas campuses, although completion of the associate degree does not guarantee admission to the baccalaureate program. Students who wish to be admitted to the baccalaureate degree program at the Kent Campus need to check the Early Childhood Education section under the College of Education, Health, and Human Services for admission requirements and other information about this selective admission program.

The baccalaureate program at Kent State Salem is also selective, following standards established at the Kent Campus. To be considered for admission, students must meet all professional requirements for admission to advanced study, have a minimum cumulative 2.75 GPA in all previous Kent State undergraduate coursework and have completed the ECET associate degree. The most qualified applicants will be accepted based upon the number of available student spaces and consideration of the student's standardized test scores, cumulative GPA, written essay and interview.

For information about the Kent State Salem baccalaureate program, students should contact the Kent State Salem program director for early childhood education the semester before beginning the associate degree student-teaching experience. Because there are limited spaces available, meeting the minimum criteria listed above does not guarantee admission to the program. Students who successfully complete the baccalaureate curriculum are eligible to apply for an Ohio license, valid for teaching children in preschool through grade three.

CAREER OPPORTUNITIES: Teacher assistants held 1.3 million jobs in 2006. About 3 out of 4 worked for public and private elementary and secondary schools. Child care centers and religious organizations employed most of the rest. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 68 credit hours. Minimum 2.0 cumulative GPA and in major.

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Electrical/Electronic Engineering Technology provides students with a core of engineering-related courses and a focus on digital and electronic systems, robotics, microsystems and the design/development of electrical and electronic circuits. Computer and general options are available which allow students to further specialize; adjustments to optional course requirements may be made by a faculty advisor based upon student need and course availability. Requirements articulate with the technology 2+2 baccalaureate degree. This major is available at the [Ashtabula](#), [Trumbull](#) and [Tuscarawas](#) campuses.

CAREER OPPORTUNITIES: In 2008, engineers held about 1.6 million jobs.

About 36 percent of engineering jobs were found in manufacturing industries, and another 30 percent were in the professional, scientific, and technical services industries, primarily in architectural, engineering, and related services. Many engineers also worked in the construction, telecommunications, and wholesale trade industries.

Federal, State, and local governments employed about 12 percent of engineers in 2008. About 6 percent were in the Federal Government, mainly in the U.S. Departments of Defense, Transportation, Agriculture, Interior, and Energy, and in the National Aeronautics and Space Administration. Many engineers in State and local government agencies worked in highway and public works departments. In 2008, about 3 percent of engineers were self-employed, many as consultants.

Engineers are employed in every State, in small and large cities and in rural areas. Some branches of engineering are concentrated in particular industries and geographic areas; for example, petroleum engineering jobs tend to be located in States with sizable petroleum deposits, such as Texas, Louisiana, Oklahoma, Alaska, and California. Other branches, such as civil engineering, are widely dispersed, and engineers in these fields often move from place to place to work on different projects.

DESCRIPTION: The Associate of Technical Study in Emergency Medical Services Technology is for students who have completed a state-certified paramedic training program and hold a current paramedic certificate. Interested students must meet with an advisor to be admitted. Upon admissions, students are granted 30 credit hours toward the degree on the basis of their paramedic certification training. In addition, they must successfully complete a minimum 34-35 hours of coursework. The degree is available at the [Trumbull](#) Campus.

ADMISSION REQUIREMENTS: Applicants must have a high school diploma or its equivalent and have a completed a state-certified paramedic training program and hold a current paramedic certificate.

GRADUATION REQUIREMENTS: Minimum 63 credit hours. Minimum 2.0 cumulative GPA and in major.

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Engineering of Information Technology provides students with a core of engineering-related courses and a focus on digital/electronic systems, robotics, microsystems, fiber optics, network engineering and electronic communications. Skills obtained in this program prepare students for positions dealing with designing and troubleshooting information acquisition, storage, processing, conversion, transmission and display systems. This major is available at the [Tuscarawas](#) Campus with most courses available at the Kent Campus through the College of Technology.

CAREER OPPORTUNITIES: In 2006, engineers held about 1.5 million jobs.

About 37 percent of engineering jobs were found in manufacturing industries and another 28 percent were in the professional, scientific, and technical services sector, primarily in architectural, engineering, and related services. Many engineers also worked in the construction, telecommunications, and wholesale trade industries.

Federal, State, and local governments employed about 12 percent of engineers in 2006. About half of these were in the Federal Government, mainly in the U.S. Departments of Defense, Transportation, Agriculture, Interior, and Energy, and in the National Aeronautics and Space Administration. Most engineers in State and local government agencies worked in highway and public works departments. In 2006, about 3 percent of engineers were self-employed, many as consultants.

Engineers are employed in every State, in small and large cities and in rural areas. Some branches of engineering are concentrated in particular industries and geographic areas—for example, petroleum engineering jobs tend to be located in areas with sizable petroleum deposits, such as Texas, Louisiana, Oklahoma, Alaska, and California. Others, such as civil engineering, are widely dispersed, and engineers in these fields often move from place to place to work on different projects.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Undergraduate Programs > [Environmental Technology](#)

COLLEGE: Regional College

DEPARTMENT: Division of Professional Studies

DESCRIPTION:

The Associate of Applied Science in Environmental Technology provides students with a working knowledge of the source, nature and scope of conditions that are or could be hazardous to the environment. Topics include toxic waste, occupational safety, pollution and industrial hygiene. In addition to the environmental core, students complete selected basic science and appropriate liberal education courses. Students interested in continuing their studies at the baccalaureate level should consult with an advisor. This major is available at the Trumbull Campus.

CAREER OPPORTUNITIES:

Science technicians held about 267,000 jobs in 2006.

About 30 percent of biological technicians worked in professional, scientific, or technical services firms; most other biological technicians worked in educational services, Federal, State, and local governments, or pharmaceutical and medicine manufacturing. Chemical technicians held jobs in a wide range of manufacturing and service-providing industries. About 39 percent worked in chemical manufacturing and another 30 percent worked in professional, scientific, or technical services firms. Most environmental science and protection technicians worked for State and local governments and professional, scientific, and technical services firms. About 76 percent of forest and conservation technicians held jobs in the Federal Government, mostly in the Forest Service; another 17 percent worked for State governments. Around 32 percent of agricultural and food science technicians worked in educational services and 20 percent worked for food processing companies; most of the rest were employed in agriculture. Forensic science technicians worked primarily for State and local governments. Approximately 37 percent of all geological and petroleum technicians worked for oil and gas extraction companies and 49 percent of nuclear technicians worked for utilities.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Undergraduate Programs > [Human Services Technology](#)

COLLEGE: Regional College

DEPARTMENT: Division of Health Occupations

DESCRIPTION:

The Associate of Applied science in Human Services Technology is offered at the [Ashtabula](#) and [Salem](#) campuses. The program is designed to prepare graduates for entry-level positions in a variety of human services agencies. The program includes applied courses in human services and joint university-agency supervised internships. The core courses provide a solid foundation in case management and client advocacy. The coursework in the associate degree articulates in part with the certificate in Child and Family Advocacy and is fully applicable to the Bachelor of Science in Human Development and Family Studies, Human Services Technology Option.

Entrance into the Bachelor of Science in Human Development and Family Studies, Human Services technology option, at Kent is selective. To be considered for admission, students must meet all professional requirements, and have completed the Associate of Applied Science in Human Services Technology degree requirements. Additional requirements include a cumulative GPA of 2.5 for the following courses: ENG 11011 and 21011, HDFS 14027 or HST 11000, HDFS 24011 and 24012, PSYC 11762, SOC 12050. Students must also attain a cumulative GPA of 3.0 or higher in HDFS 14027/HST 11000, HDFS 24011 and 24012. For more information about the Kent State baccalaureate program, contact your advisor.

CAREER OPPORTUNITIES:

Social and human service assistants held about 339,000 jobs in 2006. Over 60 percent were employed in the health care and social assistance industries. Nearly 3 in 10 were employed by State and local governments, primarily in public welfare agencies and facilities for mentally disabled and developmentally challenged individuals.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Admission is open to anyone with a high school diploma or its equivalent. Admission includes approval of an application and remediation of deficiencies in English, reading and mathematics.

GRADUATION REQUIREMENTS:

Minimum 60 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT:

None

PROGRAM FEE:

DESCRIPTION: The Associate of Technical Study in Industrial Trades Technology is a completion program for students who have finished four years of apprenticeship/journeyman training. Apprentices must have completed their training from an organization working in cooperation with the Bureau of Apprenticeship and Training in the U.S. Department of Labor. Interested students must meet with an advisor to be admitted. Upon admission, students will be granted 30 credit hours toward the program on the basis of their apprenticeship training. In addition, they must successfully complete a minimum 35 hours of course work.

The Trumble Campus offer an associate degree completion program for students who have completed four years of apprenticeship/journeyman training. Apprentices must have completed their training from an organization working in cooperation with the Bureau of Apprenticeship and Training in the U.S. Department of Labor.

CAREER OPPORTUNITIES: Engineering technicians held 511,000 jobs in 2006.

About 35 percent of all engineering technicians worked in manufacturing, mainly in the computer and electronic equipment, transportation equipment, and machinery manufacturing industries. Another 25 percent worked in professional, scientific, and technical service industries, mostly in engineering or business services companies that do engineering work on contract for government, manufacturing firms, or other organizations.

In 2006, the Federal Government employed 37,000 engineering technicians. State governments employed 29,000, and local governments employed 25,000.
(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students interested in this program should apply to the Kent State Trumbull campus and must meet with an advisor to be admitted. Upon admission to this program, students will be granted 30 credit hours on the basis of their apprenticeship training. In addition, they must successfully complete a minimum of 35 hours of courses selected in accordance with the program's curriculum.

GRADUATION REQUIREMENTS: Minimum 61 credit hours. Minimum 2.0 cumulative GPA and in major.

 DEPARTMENT: Division of Applied Business

Resources:

- Roadmaps
- Program Requirements
- College Requirements
- University Requirements

DESCRIPTION: The Associate of Applied Business in Information Technology for Administrative Professionals provides students with the opportunity to learn current business developments that shape administrative functions. Students use the most current versions of business software applications including word processing, spreadsheets, desktop publishing and visual presentations. In addition, students learn the fundamentals of accounting, automated records management, business communications and resource management. Requirements articulate fully with the Desktop Publishing certificate; contact an advisor for more information. The degree is available at the [Ashtabula](#), [Salem](#), [Trumbull](#) and [Tuscarawas](#) campuses.

CAREER OPPORTUNITIES: Secretaries and administrative assistants held more than 4.3 million jobs in 2008, ranking it among the largest occupations in the U.S. economy.

Secretaries and administrative assistants are employed in organizations of every type. The field has elevated from taking dictation and making coffee to one of assuming major responsibilities once reserved for managerial and professional staff. In a number of organizations, secretaries and administrative assistants work in teams to work flexibly and share their expertise. Secretaries and administrative assistants usually work in schools, hospitals, corporate settings, government agencies, or legal and medical offices. Virtual assistants work from a home office.

DESCRIPTION: The Associate of Arts in Justice Studies prepares graduates for para-professional positions in the field of justice studies. It is also designed as a pre-bachelor's degree program since credits earned are applicable to a Bachelor of Arts in Justice Studies. It can serve as a foundation for advanced justice studies in several areas, including retail security, industrial security, forensics, law and corrections. Graduates typically seek employment in probation offices, social service agencies, courts, local law enforcement offices and crime labs.

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 61 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

Legal Assisting Technology - A.A.S.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Undergraduate Programs > Legal Assisting Technology

COLLEGE: Regional College
 DEPARTMENT: Division of Professional Studies

Resources:

- Roadmaps
- Program Requirements
- College Requirements
- University Requirements

DESCRIPTION: The Associate of Applied Science in Legal Assisting Technology prepares students to work as legal assistants (paralegals) under the supervision of an attorney in all areas of law and law-related practice. The program consists of legal assisting, law-related and general studies courses. This major is available at the [East Liverpool](#) and [Trumbull](#) campuses.

CAREER OPPORTUNITIES: Paralegals and legal assistants held about 238,000 jobs in 2006. Private law firms employed 7 out of 10 paralegals and legal assistants; most of the remainder worked for corporate legal departments and various levels of government. Within the Federal Government, the U.S. Department of Justice is the largest employer, followed by the Social Security Administration and the U.S. Department of the Treasury. A small number of paralegals own their own businesses and work as freelance legal assistants, contracting their services to attorneys or corporate legal departments. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 68 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

- University Requirements

DESCRIPTION: The Associate of Applied Science in Manufacturing Engineering Technology provides students with knowledge and skills in the areas of computer-aided design (CAD), computer-aided manufacturing (CAM), computer numerical controlled machining (CNC), industrial controls and programmable logic controllers (PLCs). Options are available in automated machining and industrial automation. Requirements articulate with the technology 2+2 baccalaureate degree. This major is available at the [Trumbull](#) Campus.

CAREER OPPORTUNITIES: In 2006, engineers held about 1.5 million jobs. About 37 percent of engineering jobs were found in manufacturing industries and another 28 percent were in the professional, scientific, and technical services sector, primarily in architectural, engineering, and related services. Many engineers also worked in the construction, telecommunications, and wholesale trade industries.

Federal, State, and local governments employed about 12 percent of engineers in 2006. About half of these were in the Federal Government, mainly in the U.S. Departments of Defense, Transportation, Agriculture, Interior, and Energy, and in the National Aeronautics and Space Administration. Most engineers in State and local government agencies worked in highway and public works departments. In 2006, about 3 percent of engineers were self-employed, many as consultants.

Engineers are employed in every State, in small and large cities and in rural areas. Some branches of engineering are concentrated in particular industries and geographic areas—for example, petroleum engineering jobs tend to be located in areas with sizable petroleum deposits, such as Texas, Louisiana, Oklahoma, Alaska, and California. Others, such as civil engineering, are widely dispersed, and engineers in these fields often move from place to place to work on different projects.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 62 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

STUDENT ORGANIZATIONS: See individual campuses

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Mechanical Engineering (integrated manufacturing) Technology provides students with knowledge and skills in the manufacturing areas related to computer-controlled equipment and integrated manufacturing. Topics include drafting, CAD/CAM, materials testing and robotics applications. There are four concentrations available: General (available at the [Ashtabula](#), [Trumbull](#) and [Tuscarawas](#) campuses); Mechtronics (available at the Ashtabula Campus), which is a cross disciplinary in electrical and electronic devices, hydraulics and pneumatics and programmable logic controllers, intended to provide students with the skills currently in demand in most industries; Polymer and Radiation Polymer (available at the Ashtabula and Trumbull campuses); and Systems, which is individualized and developed with the guidance of a faculty advisor (available only at the Ashtabula Campus). In addition, the concentrations may articulate fully or in part with available certificates in computer-aided drafting, plastics manufacturing and radiation polymers and the technology 2+2 bachelor's degree.

CAREER OPPORTUNITIES: In 2006, engineers held about 1.5 million jobs.

About 37 percent of engineering jobs were found in manufacturing industries and another 28 percent were in the professional, scientific, and technical services sector, primarily in architectural, engineering, and related services. Many engineers also worked in the construction, telecommunications, and wholesale trade industries.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Undergraduate Programs > [Nuclear Medicine Technology](#)

COLLEGE: Regional College

DEPARTMENT: Division of Health Occupations

DESCRIPTION:

The Salem Campus offers the Associate of Technical Study in Nuclear Medicine Technology as a completion program for certified radiologic technologists and diagnostic medical sonographers who have finished their training at an accredited institution and have been certified by the American Registry of Radiologic Technologists or American Registry of Diagnostic Medical Sonographers.

Students interested in one of these programs should apply to the Salem Campus and meet with the director of radiologic technology for additional application details. Upon admission to these programs, students will be granted 32 credit hours on the basis of their certification. The Salem Campus also offers the Associate of Technical Study in the following:

- Diagnostic Medical Sonography
- Radiation Therapy Technology
- Radiologic Technology
- Radiologic Technology with a concentration in Radiology Department Management

CAREER OPPORTUNITIES:

Radiologic technologists held about 196,000 jobs in 2006. More than 60 percent of all jobs were in hospitals. Most other jobs were in offices of physicians; medical and diagnostic laboratories, including diagnostic imaging centers; and outpatient care centers. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Must be a registered radiologic technologist, nuclear medicine technologist or diagnostic medical sonographer prior to program start. Program applicants are encouraged to meet with an advisor at the Salem campuses to discuss the program requirements.

GRADUATION REQUIREMENTS:

Minimum 66-68 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT:

None

PROGRAM FEE:

None

ACCREDITATION:

The Salem Campus program is approved and accredited by the Joint Review Committee on Education in Nuclear Medicine Technology (JRCNMT). The Ashtabula Campus program is not JRCNMT accredited, nor has it applied to the JRCNMT for accredited status.

STUDENT ORGANIZATIONS:

See individual campuses.

Program Requirements

College Requirements

University Requirements

DESCRIPTION: The Associate of Applied Science in Nursing is available at the Ashtabula, East Liverpool, Geauga (including the Twinsburg Academic Center) and Tuscarawas campuses. Students interested in the program should apply directly to one of these campuses and meet with the director of nursing for additional application details concerning advanced placement, etc. Detailed information and requirements for admission, satisfactory progress and graduation are in the brochure for this program. A copy of the brochure may be obtained from the program director. Students are required to complete civilian (BCI&I) and Federal (FBI) background checks after acceptance into the program. The coursework for this degree may be applied toward a [Bachelor of Science in Nursing](#).

With the successful completion of the program, graduates are awarded an Associate of Applied Science in Nursing and are eligible to apply to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

The associate degree in nursing program, Regional Campuses, reserves the right to initiate changes in the program as deemed necessary for maintaining quality nursing education.

CAREER OPPORTUNITIES: As the largest health care occupation, registered nurses held about 2.5 million jobs in 2006. Hospitals employed the majority of RNs, with 59 percent of jobs. Other industries also employed large shares of workers. About 8 percent of jobs were in offices of physicians, 5 percent in home health care services, 5 percent in nursing care facilities, 4 percent in employment services, and 3 percent in outpatient care centers. The remainder worked mostly in government agencies, social assistance agencies, and educational services. About 21 percent of RNs worked part time.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 63 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: No

PROGRAM FEE: None

ACCREDITATION: National League for Nursing Accrediting Commission, 3343 Peachtree NE, Suite 500, Atlanta GA 30326, (404) 975-5000

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Occupational Therapy Assistant Technology is offered at the Ashtabula and East Liverpool campuses. Occupational therapist assistants and aides work under the direction of occupational therapist to provide rehabilitative services to persons with mental, physical, emotional or developmental impairments. The Ultimate goal is to improve clients' quality of life and ability to perform daily activities. With successful completion of the program, graduates are awarded the Associate of Applied Science in Occupational Therapy Assistant Technology (OCAT) and are eligible to sit for the National Certification Examination for Occupational Therapy Assistants administered by the National Board for Certification in Occupational Therapy (NBCOT).

The associate degree in the occupational therapy assistant program, Regional Campuses, reserves the right to initiate changes in the program as deemed necessary for maintaining quality education for the students.

CAREER OPPORTUNITIES: Occupational therapy assistants held about 26,600 jobs in 2008. They worked in hospitals, nursing facilities, offices of other health practitioners, home health services, individual and family services and governmental agencies. Job prospects should be very good for occupational therapy assistants. Employment is expected to grow by about 20% between 2008 and 2018 as the demand for occupational therapy services rises. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission to the OCAT major requires the following: admission to the university; completion of the COMPASS test and, if necessary, recommended coursework; a minimum of 40 hours of volunteer time in at least two different occupational therapy settings; high school or college courses in algebra and general biology; and a 2.70 GPA. Students interested in the program should apply directly to the [Ashtabula](#) or [East Liverpool](#) campus and meet with the program director. Applicants not admitted directly to the OCAT program will be admitted as pre-major students. Detailed information and requirements for admission may be obtained from the Kent State [Ashtabula](#) or [East Liverpool](#) campus program offices.

GRADUATION REQUIREMENTS: Minimum 68 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

ACCREDITATION: Accreditation Council for Occupational Therapy Education (ACOTE)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Physical Therapist Assistant Technology program is offered at the Ashtabula and East Liverpool campuses. With the successful completion of the program, graduates are awarded the Associate of Applied Science in Physical Therapist Assistant and are eligible to take the licensing examination given by the state of Ohio Board of Occupational and Physical Therapy.

Physical therapist assistants provide treatment that improves patient mobility, relieves pain, and prevents or lessens physical disabilities of patients. Physical therapist assistants work under the direction and supervision of physical therapists and provide exercise, instruction; therapeutic methods like electrical stimulation, mechanical traction, and ultrasound; massage; and gait and balance training. Physical therapist assistants record the patient's responses to treatment and report the outcome of each treatment to the physical therapist.

The associate degree in physical therapist assistant technology program reserves the right to initiate changes in the program as deemed necessary for maintaining quality education for the students.

CAREER OPPORTUNITIES: Physical therapist assistants held about 63,800 jobs in 2008. Physical Therapist Assistants work with physical therapists in a variety of settings. About 72 percent of jobs were in offices of other health practitioners and in hospitals. Others worked primarily in nursing care facilities, home healthcare services, and outpatient care centers.

Job prospects for physical therapist assistants are expected to be very good and employment is expected to grow much faster than average because of increasing demand for physical therapy services. Employment of physical therapist assistants is expected to grow by 33 percent from 2008 through 2018, much faster than the average for all occupations. Median annual wages of physical therapist assistants were \$46,140 in May 2008. (source: U.S. Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students interested in the program should apply directly to the Ashtabula Campus prior to October 1, or East Liverpool Campus prior to May 15, and meet with the campus program director. Applicants not admitted directly to the program may be admitted as pre-major students. Detailed information and requirements for admission may be obtained from the [Ashtabula](#) or [East Liverpool](#) campus program offices.

GRADUATION REQUIREMENTS: Minimum 71 credit hours. Minimum 2.0 cumulative GPA and in major.

DESCRIPTION: The Salem Campus offers the Associate of Technical Study in Radiation Therapy Technology as a completion program for certified radiologic technologists and diagnostic medical sonographers who have finished their training at an accredited institution and have been certified by the American Registry of Radiologic Technologists or American Registry of Diagnostic Medical Sonographers.

Students interested in one of these programs should apply to the Salem Campus and meet with the director of radiologic technology for additional application details. Upon admission to these programs, students will be granted 32 credit hours on the basis of their certification. The Salem Campus also offers the Associate of Technical Study in the following:

- Diagnostic Medical Sonography
- Nuclear Medicine Technology
- Radiologic Technology
- Radiologic Technology with a concentration in Radiology Department Management

CAREER OPPORTUNITIES: Radiologic technologists held about 196,000 jobs in 2006. More than 60 percent of all jobs were in hospitals. Most other jobs were in offices of physicians; medical and diagnostic laboratories, including diagnostic imaging centers; and outpatient care centers. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Must be a registered radiologic technologist, nuclear medicine technologist or diagnostic medical sonographer prior to program start. Program applicants are encouraged to meet with an advisor at the Salem campuses to discuss the program requirements.

GRADUATION REQUIREMENTS: Minimum 66-68 credit hours. Minimum 2.0 cumulative GPA and in major.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

ACCREDITATION: The Salem Campus program is approved and accredited by the Joint Review Committee on Education in Radiologic Technology, JRCERT. The Ashtabula Campus program is not JRCERT accredited, nor has it applied to the JRCERT for accredited status.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Undergraduate Programs > [Radiologic Imaging Sciences](#)

COLLEGE: Regional College

DEPARTMENT: Division of Health Occupations

DESCRIPTION:

The Salem Campus provides a Bachelor of Radiologic and Imaging Sciences Technology, designed for students pursuing studies related to medical imaging. Five concentrations are offered: computed tomography (CT), diagnostic medical sonography (DMS), magnetic resonance imaging (MRI), nuclear medicine technology (NMT) and radiation therapy (RTH). The options to pursue this major are the following:

- Option I: Completion of the Associate of Applied Science in Radiologic Technology prior to acceptance into the major. Available in the following concentrations: CT, DMS, MRI, NMT or RTH.
- Option II: Completion of an Associate of Science degree or completion of electives (freshman entry) prior to acceptance into the major. Available in the following concentrations: DMS, NMT or RTH. No previous radiologic technology program is required prior to acceptance into this option.
- Option III: Graduation from a hospital-based certificate program in radiologic technology (32 semester credits will be awarded), successful completion of the American Registry of Radiologic Technologist (ARRT) certification exam and completion of the Associate of Technical Studies in Radiologic Technology prior to acceptance into the major. Available in the following concentrations: CT, DMS, MRI, NMT or RTH.

CAREER

OPPORTUNITIES:

Radiologic technologists held about 196,000 jobs in 2006. More than 60 percent of all jobs were in hospitals. Most other jobs were in offices of physicians; medical and diagnostic laboratories, including diagnostic imaging centers; and outpatient care centers.
(Source: Bureau of Labor Statistics)

ADMISSION

REQUIREMENTS:

Admission to the program is on a selective basis due to the limited number of students approved for each clinical education center. The application deadlines are April 1 for CMS, NMT and RTH and August 1 for CT and MRI. Program applicants are encouraged to meet with an advisor at the Salem campuses to discuss the minimum admission requirements. Detailed information and requirements for admission, satisfactory progress and graduation are in the student handbook for this program. A copy of the handbook may be obtained from the program directors.

GRADUATION

REQUIREMENTS:

To receive a Bachelor of Radiologic and Imaging Sciences Technology, students must satisfy the 37-hour minimum requirements stipulated in the Kent Core and diversity requirement as indicated in this Catalog. Students must complete a minimum 39 upper-division (junior- and senior-level) courses. The cumulative grade point average must be minimum 2.00 for all coursework taken at Kent State University. Students must complete all radiologic and imaging sciences courses as noted in program requirements, with a 2.0 or higher. Students must have minimum 2.75 GPA in the radiologic and imaging sciences technology core courses. Only general elective courses may be taken pass/fail. Students must complete all academic and clinical competencies in their core concentration.

[Roadmaps](#)

[A.A.S. Program Requirements](#)

[A.T.S. Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Radiologic Technology is offered at the Ashtabula and Salem campuses. Radiologic technologists take x-rays and administer nonradioactive materials into patients' bloodstreams for medical diagnostic purposes. With the successful completion of the program, graduates are eligible to take the certification examination administered by the American Registry of Radiologic Technologists.

The Salem Campus offers the Associate of Technical Study in Radiologic Technology as a completion program for certified radiologic technologists and diagnostic medical sonographers who have finished their training at an accredited institution and have been certified by the American Registry of Radiologic Technologists or American Registry of Diagnostic Medical Sonographers.

Students interested in one of these programs should apply to the Salem Campus and meet with the director of radiologic technology for additional application details. Upon admission to these programs, students will be granted 32 credit hours on the basis of their certification. The Salem Campus also offers the Associate of Technical Study in the following:

- Diagnostic Medical Sonography
- Nuclear Medicine Technology
- Radiation Therapy Technology

CAREER OPPORTUNITIES: Radiologic technologists held about 196,000 jobs in 2006. More than 60 percent of all jobs were in hospitals. Most other jobs were in offices of physicians; medical and diagnostic laboratories, including diagnostic imaging centers; and outpatient care centers. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: A.A.S.: Admission to the program is on a selective basis due to the limited number of students approved for each clinical education center. The application deadlines are February 1 at the Salem Campus and March 1 at the Ashtabula Campus. Program applicants are encouraged to meet with an advisor at the Ashtabula or Salem campuses to discuss the minimum admission requirements. Detailed information and requirements for admission, satisfactory progress and graduation are in the student handbook for this program. A copy of the handbook may be obtained from the program directors.

A.T.S.: Must be a registered radiologic technologist, nuclear medicine technologist or diagnostic medical sonographer prior to program start. Program applicants are encouraged to meet with an advisor at the Salem campuses to discuss the program requirements.

GRADUATION REQUIREMENTS: A.A.S.: Minimum 70-71 credit hours. Minimum 2.0 cumulative GPA and in major. Students must receive a grade of C (2.0) or better in all RADT and BSCI 11010 and 11020 courses.

COLLEGE: [Regional College](#)

DEPARTMENT: [Division of Health Occupations](#)

DESCRIPTION:

The Associate of Applied Science in Respiratory Therapy Technology is offered at the Ashtabula Campus. With successful completion of the program, graduates are eligible to sit for the registry examination to become a Registered Respiratory Therapist. Respiratory therapists work as members of a team of healthcare professionals working in a wide range of clinical settings to evaluate, treat and manage patients of all ages with respiratory illnesses and other cardiopulmonary disorders.

CAREER OPPORTUNITIES:

Respiratory therapists held about 122,000 jobs in 2006. About 79 percent of jobs were in hospitals, mainly in departments of respiratory care, anesthesiology, or pulmonary medicine. Most of the remaining jobs were in offices of physicians or other health practitioners, consumer-goods rental firms that supply respiratory equipment for home use, nursing care facilities, and home health care services. Holding a second job is relatively common for respiratory therapists. About 12 percent held another job, compared with 5 percent of workers in all occupations. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS:

Students must have a GPA of 2.75 for admission to the program. Applicants not admitted directly into the program may be admitted as pre-major students. Students interested in the program should apply directly to the Ashtabula Campus and meet with the program director.

GRADUATION REQUIREMENTS:

Minimum 69 credit hours. Minimum 2.75 GPA in major and 2.0 cumulative GPA. Minimum grade of C (2.0) in all required courses, including RTT and related courses, general studies courses and prescribed developmental courses.

LANGUAGE REQUIREMENT:

None

PROGRAM FEE: \$74/semester

[Roadmaps](#)

[Program Requirements](#)

[College Requirements](#)

[University Requirements](#)

DESCRIPTION: The Associate of Applied Science in Systems/Industrial Engineering Technology provides students with knowledge and skills in the areas of analysis and measurement in a variety of industries. Students receive hands-on experience with the equipment used in machine tool operations, testing and analysis and computer-aided design. This major is available at the [Trumbull](#) and [Tuscarawas](#) campuses. Systems engineering also is available as an individualized program option under mechanical engineering technology at the [Ashtabula](#) Campus. Not all courses are available at all campuses, nor are all courses regularly scheduled.

CAREER OPPORTUNITIES: In 2006, engineers held about 1.5 million jobs.

About 37 percent of engineering jobs were found in manufacturing industries and another 28 percent were in the professional, scientific, and technical services sector, primarily in architectural, engineering, and related services. Many engineers also worked in the construction, telecommunications, and wholesale trade industries.

Federal, State, and local governments employed about 12 percent of engineers in 2006. About half of these were in the Federal Government, mainly in the U.S. Departments of Defense, Transportation, Agriculture, Interior, and Energy, and in the National Aeronautics and Space Administration. Most engineers in State and local government agencies worked in highway and public works departments. In 2006, about 3 percent of engineers were self-employed, many as consultants.

Engineers are employed in every State, in small and large cities and in rural areas. Some branches of engineering are concentrated in particular industries and geographic areas—for example, petroleum engineering jobs tend to be located in areas with sizable petroleum deposits, such as Texas, Louisiana, Oklahoma, Alaska, and California. Others, such as civil engineering, are widely dispersed, and engineers in these fields often move from place to place to work on different projects.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Admission is open to anyone with a high school diploma or its equivalent.

GRADUATION REQUIREMENTS: Minimum 65 credit hours. Minimum 2.0 cumulative GPA and in major.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Undergraduate Programs > [Veterinary Technology](#)

COLLEGE: Regional College
 DEPARTMENT: Division of Health Occupations

Resources:

- Roadmaps
- Program Requirements
- College Requirements
- University Requirements

DESCRIPTION: The Associate of Applied Science in Veterinary Technology prepares graduates to serve as veterinary technicians performing support functions including routine laboratory and clinical procedures. Other growing employment opportunities are expected in biomedical research, diagnostic laboratories, wildlife facilities, humane societies and animal control facilities. With the successful completion of the program, graduates are awarded the Associate of Applied Science in Veterinary Technology and are eligible for registration in the state of Ohio.

Minimum C (2.0) grades both in lecture and in the laboratory area must be achieved for each veterinary technology course. A 2.00 cumulative grade point average (GPA) must be maintained in the veterinary technology program in order to progress in the program. Minimum C (2.00) grade is mandatory in all required courses in the Veterinary Technology curriculum, including related courses, general studies courses, electives, technical courses and prescribed developmental courses.

All students in the Veterinary Technology program must complete all coursework in sequence before continuing to the next level.

CAREER OPPORTUNITIES: Veterinary technologists and technicians held about 71,000 jobs in 2006. About 91 percent worked in veterinary services. The remainder worked in boarding kennels, animal shelters, stables, grooming salons, zoos, State and private educational institutions, and local, State, and Federal agencies. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: Students interested in the program should apply directly to the Tuscarawas Campus and meet with the campus program director. Admission to the program is selective. A minimum collegiate or high school cumulative GPA of 2.50 (on a 4.00 scale) is required of all students for admission to the program. Applicants not admitted directly to the program may be admitted as pre-major students. Detailed information and requirements for admission, satisfactory progress and graduation can be obtained from the Kent State Tuscarawas program office.

GRADUATION REQUIREMENTS: Minimum 70 credit hours. Minimum 2.0 cumulative and major GPA.

LANGUAGE REQUIREMENT: None

PROGRAM FEE: None

ACCREDITATION: American Veterinary Medical Association

STUDENT ORGANIZATIONS: See individual campuses.

Advanced Internet Certificate (Post Secondary)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Advanced Internet \(Post Secondary\)](#)

This certificate program provides students with an advanced background in application development for the Internet/World Wide Web. The focus is on hands-on experience with some theoretical foundations.

Students must satisfy the prerequisites, if any, of all courses in the program by either completing the prerequisite course or demonstrating to a Computer Technology faculty member that they have otherwise met the prerequisite. Transfer credits may be used only if letter grades appear on original transcript. Student must maintain at least a 2.00 GPA in all courses to receive the certificate. Courses may not be taken on a pass/fail basis or via credit-by-exam. Students must complete a minimum of 15 credit hours at Kent State University.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Business Management Technology \(Post Secondary\)](#)

This certificate program provides a background in business management for both experienced business managers and aspiring managers. For the business manager who may already have a degree in a field other than business, the program offers professional certification. For the person who aspires to a management position, the program offers coursework that directly applies to an Associate of Applied Business degree.

Students must satisfy the prerequisites of each course in the program by either: (a) completing the prerequisite courses, or (b) demonstrating to a Business Management Technology faculty member that they have otherwise met the prerequisites. A minimum of 15 credit hours must be completed at Kent State University.

Child and Family Advocacy Certificate (Post Secondary)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Child and Family Advocacy \(Post Secondary\)](#)

This certificate program provides students the opportunity to obtain a better understanding of the advocacy needs of children and families and to learn the necessary skills to be an effective advocate in a human service or legal setting. This certificate is grounded in the premise that a holistic approach to family advocacy is integral to serving client needs in a social service setting.

Students must satisfy the prerequisites of each course in the program. A minimum of 12 hours of the certificate's curriculum must be completed at Kent State University.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Computed Tomography \(Post Secondary\)](#)

Students completing this certificate program are able to perform Computed Tomography (CT) procedures in a healthcare setting, after completing clinical competencies. Students are expected to take the American Registry of Radiologic Technologist's certification exam in CT upon completion of the program. Computed Tomography certificate application packets are available at the Salem Campus.

Kent State University admission requirements apply, including assessment testing. Students may enroll in the program even if they have prior degrees. Students must declare themselves as a certificate candidate prior to completing half of the courses and must complete a minimum of 15 credits at Kent State University.

COMPUTED TOMOGRAPHY CERTIFICATE REQUIREMENTS (22 credits)

Course	Title	Credits
RIS 34084	Computed Tomography and Magnetic Resonance Imaging Sectional Anatomy I	2

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Database Administrator \(Post Secondary\)](#)

This certificate program provides students with the necessary background in preparation to take the MCDBA (Microsoft Certified Database Administrator) exams. The focus is on providing the content necessary to be successful in those exams. This is NOT certified by Microsoft, and passing the MCDBA certification exams is not required to earn credit for these courses.

Students must satisfy the prerequisite, if any, of all courses in the program by either completing the prerequisite courses or by demonstrating to a computer technology faculty member that they have otherwise met the prerequisites. A minimum of 15 hours of coursework must be completed at Kent State University.

Desktop Publishing Certificate (Post Secondary)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Desktop Publishing \(Post Secondary\)](#)

Desktop publishing is a natural and popular extension of word processing, and its appeal is widespread. The desktop publishing certificate program addresses the needs of not only office professionals, but also of individuals who believe they would like to start their own publishing business from home and individuals who simply enjoy being creative as a hobby. Most publishing tasks such as newsletters, directories, business cards, flyers, reports, forms, brochures, pamphlets, manuals, invitations, announcements, advertisements, and catalogs can now be done quickly and professionally in-house by people with modest levels of training and expertise rather than by expensive career professionals.

Students must satisfy the prerequisites, if any, of each course in the program by either (a) competing the prerequisite courses, or (b) demonstrating to an information technology for administrative professionals faculty member that they have otherwise met the prerequisites. Students must complete a minimum of 15 hours of coursework at Kent State University. Transfer credits may be used provided a letter grade appears on original transcript.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Entrepreneurship \(Post Secondary\)](#)

As large business downsize and the number of smaller businesses increases, the need for small business management or entrepreneurial education increases. The entrepreneurship certificate program addresses the needs of individuals who manage small businesses, as well as individuals who believe they would like to start a business in the future. In addition, the entrepreneurship certificate program addresses the intrapreneurship (innovative risk taking) needs of individuals who are currently working for larger organizations in which management is sharing decision making and product development with all employees.

Students must satisfy the prerequisites of each course in the program by either (a) completing the prerequisite courses, or (b) demonstrating to a Computer Technology faculty member that they have otherwise met the prerequisites. Students must complete a minimum of 15 hours at Kent State University.

Legal Nurse Consulting—Nurse Paralegal Certificate (Post Secondary)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Legal Nurse Consulting: Nurse Paralegal \(Post Secondary\)](#)

This certificate program is designed to further educate and advance the skills of licensed registered nurses. A Legal Nurse Consultant (LNC) is a part of a growing field of experts contracted or employed by various legal entities for expert opinions and advice relating to medical issues. A LNC is a licensed registered nurse who has broad clinical experience coupled with training in law and legal procedures. A LNC offers the legal system an affordable alternative to higher priced physicians and other medical experts. A LNC is able to project medical costs, review patient care, conduct medical records review, provide life care planning and conduct medical bill audits.

The program is limited to licensed registered nurses with a minimum of an Associate Degree in Nursing, Bachelor Degree in Nursing is preferred. A minimum of two years full-time (2000 hours or equivalent experience) of demonstrable work experience as an RN is also required. For admission to the program students must submit a copy of the RN license, transcripts showing completion of at least an Associate Degree in Nursing, and some proof of two years of work experience.

Students must satisfy the prerequisite of each course in the program by either: (a) completing the prerequisite courses, or (b) demonstrating to the legal assisting technology program director that they have otherwise met the prerequisites. Students must complete a minimum of 15 hours of the certificate curriculum at Kent State University. A maximum of 10 transfer credit hours may be applied to the certificate ate provided the original course grade appears on the transcript.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Magnetic Resonance Imaging \(Post Secondary\)](#)

Students completing this certificate program are able to perform Magnetic Resonance Imaging (MRI) procedures in a healthcare setting, after completing clinical competencies. Students are expected to take the American Registry of Radiologic Technologist's certification exam in MRI upon completion of the program. MRI application packets are available at the [Salem](#) campus.

Kent State University admission requirements apply, including assessment testing. Students may enroll in the program even if they have prior degrees. Students must declare themselves as a certificate candidate prior to completing half of the courses and must complete a minimum of 15 credits at Kent State University.

MAGNETIC RESONANCE IMAGING CERTIFICATE REQUIREMENTS (27 credits)

Course	Title	Credits

Manufacturing Management Technology Certificate (Post Secondary)

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Manufacturing Management Technology \(Post Secondary\)](#)

This certificate program provides people interested in or already working in the field of manufacturing management with a well-rounded background. Study is focused on basic principles of management, supervision, labor relations, manufacturing processes, technical writing, computer applications software, and how to make oral presentations as related to industrial manufacturing.

Students must satisfy the prerequisites of each course in the program by either (a) competing the prerequisite courses, or (b) demonstrating to a business management technology faculty member that they have otherwise met the prerequisites. Students must complete a minimum of 15 hours at Kent State University.

Kent State University Catalog 2010 - 2011 > Colleges and Programs > Regional College > Certificates > [Microcomputer Applications \(Post Secondary\)](#)

This certificate program provides students with a well-rounded microcomputer applications background that allows them to integrate technological tools into the workplace. The focus is on hands-on experience with some theoretical foundations. The program is not meant to produce programmers/analysts as does the associate degree in computer technology, yet may inspire student to continue toward that degree.

Students must satisfy the prerequisites, if any, of all courses in the program by either (a) completing the prerequisite course, or (b) by demonstrating to a computer technology faculty member that they have otherwise met the prerequisite. A minimum of 15 credit hours must be completed at Kent State University. Transfer credits may be used only if the letter grades appear on transcript.

The mission of the College of Technology is to enhance technological Literacy, education and training essential to the knowledge economy, socio-economic well-being and to the workforce development of the state of Ohio in general and Northeast Ohio in particular. The college's curricula lead to various certificates in emerging/high-technology areas and to a seamless articulation with technical associate, bachelor's and master's degree programs with global perspectives for careers in business, industry, education and government sectors.

Statistics indicate that at the start of the 21st century, employment opportunities will be the greatest in high-technology fields. Kent State University's College of Technology, part of Kent State's eight-campus network, offers nationally accredited technology-based programs that provide students with the skills needed to compete in today's job market.

The College of Technology offers programs at the certificate, bachelor's and master's degree levels throughout Kent's eight-campus network. With a talented faculty and flexible schedules that include evening, weekend, distance-learning and Web-based classes, the College of Technology has a program to match students' needs and interests. Academic programs are divided into three areas: aeronautics, applied engineering and technology.

The Applied Engineering and Technology programs are accredited through the Association of Technology, Management, and Applied Engineering.

The Aeronautics program is accredited through the Council on Aviation Accreditation Incorporated and Aviation Accreditation Board International Federal Aviation Administration

Our graduates find employment in many areas which include: commercial airline pilots, engineering technologist, animators, teachers, and construction managers.

Undergraduate Programs

Kent State University Catalog 2011 > Colleges and Programs > College of Technology > Undergraduate Programs

On the Kent Campus, the College of Technology offers Bachelor of Science degrees in aeronautics, applied engineering and technology.

The College of Technology offers five concentrations in Aeronautics which include: Aeronautical Studies, Aeronautical Systems Engineering, Air Traffic Control, Aviation Management and Flight Technology.

In The Applied Engineering major, there are three concentrations which include: Applied Engineering and Technology Management, computer and Electronics and Manufacturing Systems.

The Technology program offers three concentrations which include: General Technology, Construction Management and Technology Education Licensure

There are also three 2+2 options programs for student that earn specific Associate degrees from Kent State University, The Bachelor degrees programs are: Computer Design, Animation and Game Design option, Electric/Electronics option and Manufacturing/Mechanical Systems option.

Note: To receive a baccalaureate degree from the College of Technology, students must, in addition to other requirements, satisfy the 36-hour minimum stipulated in the [Kent Core](#) Requirements.

DESCRIPTION: The programs offered under the Bachelor of Science in Aeronautics consist of five separate areas of concentration: aeronautical studies, aeronautical systems engineering technology, air traffic control, aviation management and flight technology. All five programs lead to a Bachelor of Science with a major in Aeronautics. The Bachelor of Science in Aeronautics is accredited by the Aviation Accreditation Board International (AABI).

Aeronautical Systems Engineering Technology prepares students to enter the field of aeronautical engineering as technologists with educational experience in the practical application of theoretical principles. This concentration stresses subjects associated with advanced propulsion, materials and structure and aircraft design. Students entering this program should have an extensive background in high school mathematics and science.

Aeronautical Studies prepares students for entry-level technological positions in aviation and related areas. Although focused on a fundamental foundation of aeronautically related subjects, the program also provides a significant number of electives that allow students to explore other areas of interest or earn a minor in a particular area of study. It is well suited for those entering the program with previous flight experience.

Air Traffic Control is structured to prepare students for professional work in air traffic control and management. As part of the Federal Aviation Administration's Air Traffic-Collegiate Training Initiative, the concentration provides practical simulation-based training in air traffic control that enables the students to work as air traffic controllers and managers in the National Airspace System.

Flight Technology is designed for students who aspire to become professional pilots. This concentration stresses subjects associated with flight systems, propulsion, structures and electronics. Students entering this program should have a strong desire for excellence in aviation as well as the flying skills required of a professional pilot.

Aviation Management prepares students for entry-level positions in aviation and other aviation-related professional fields. This course of study combines technical and aeronautical courses with courses in management and information systems. Students entering this program should have a technical interest, mathematical proficiency and an ability to develop analytical and communicative capabilities. Students also earn a minor in Computer Information Systems from the College of Business Administration.

CAREER OPPORTUNITIES: Students have an opportunity to apply and obtain established internships with all airlines and airports that pertains to their major. Kent State University is the only university to have a bridge program with Continental express and one of three universities to have a Delta preferred internship partnership. These internships often lead to full time careers upon graduation.

Students in the Aeronautical Systems Engineering program may enter the job field as systems engineers working with companies such as Boeing, Lockheed Martin and NASA.

Our Flight Technology students, who will be trained to be a professional pilot, can seek employment with a major airline, regional air carriers, FBO's, and flight instructors in various capacities. We also have graduates that become pilots in the military.

Students majoring in Aviation Management find entry level positions at airports such as Miami International, Houston George Bush, and Philadelphia International Airport.

Air traffic controllers held about 26,200 jobs in 2008. The vast majority were employed by the FAA, while a small number of civilian controllers also work for the U.S. Department of Defense. In addition to controllers employed by the Federal Government, some work for private air traffic control companies providing service to non-FAA towers and contract flight service stations. There is a high demand for students to be trained as air traffic controllers. (Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: General Admission for Freshman Students: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the [Admissions website for new freshmen](#).

Transfer Student: Entry into the aeronautics program requires at least a 2.25 GPA in all college coursework.

GRADUATION REQUIREMENTS: Aeronautical Systems Engineering Technology: Minimum 124 total credit hours and 39 upper-division hours for graduation.

All Other Concentration: Minimum 124 total credit hours and 39 upper-division hours for graduation. Minimum 2.00 GPA overall and 2.25 GPA in major required for graduation.

Flight Course Completion: Students must complete all flight courses by the end of the semester following that in which they enrolled. In other words, if a student enrolls in a course in the fall, they must complete the course no later than the end of the following spring semester. This requirement is subject to waiver by the director of aeronautics. In the absence of an authorized waiver, students who fail to complete any flight course by the end of the subsequent semester after course enrollment will receive a failing grade (F) and a complete forfeiture of the balance of the flight fees. Students who wish a refund of flight fees are required to withdraw from their flight course by the withdrawal deadlines established by the Office of the University Registrar. Flight fees will be refunded in accordance with the University policy regarding student fee refunds, policy number 3342-7-06.

Comprehensive Exit Exam: All students must successfully complete the comprehensive exit exam requirement prior to graduation with the B.S. in Aeronautics. Exit exam requirements are to be satisfied by all graduation candidates no later than the eighth week of the semester of intended graduation. The exit exams shall be offered during the fourth and eighth weeks of the fall and spring semesters. Students who fail will be allowed to retake the exit exams. An overall passing grade of 70 is required. Students who transfer into the aeronautics program and receive academic credit for core areas are still responsible for taking the exam in its entirety.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: None

ACCREDITATION: Council on Aviation Accreditation Incorporated, Aviation Accreditation Board International, Federal Aviation Administration

STUDENT ORGANIZATIONS: Alpha Eta Rho; American Institute of Aeronautics and Astronautics; Kent State Precision Flight Team; Silver Wings; Women in Aviation International Flying Black Squirrels

B.S. Program Requirements

College Requirements

Academic Policies

DESCRIPTION: The Bachelor of Sciences in Applied Engineering consists of three concentration: Applied Engineering and Technology Management, Computer Engineering Technology and Manufacturing Systems.

The applied engineering field is concerned with the application of management, design and technical skills for the design and integration of systems, the execution of new product designs, the improvement of manufacturing processes and the management and direction of physical and/or technical functions of a firm or organization. Applied Engineering and Technology Management provides students the necessary skills to manage complex technological systems. It also functions as a completer degree for students with engineering technology associate degrees. The majority of the coursework in the last two years focuses on the management of applied engineering.

The Computer Engineering Technology concentration is an in-depth, hands-on curriculum that prepares students for computer technology or computer engineering technology related careers. The program emphasis is on the system-level design, development, integration, management, and evaluation of computer and network components and systems in a variety of settings. The program focuses on the development of computer system performance analysis and troubleshooting knowledge and skills, and laboratory experiences are extensively integrated throughout the curriculum. Students graduating from this concentration are able to design, develop, install, interface, upgrade, analyze, evaluate, maintain, repair, manage, and secure personal computer and computer networking hardware components and systems.

Manufacturing Systems is a management-oriented technical curriculum built upon a balanced program of studies drawn from a variety of disciplines related to manufacturing systems technology. It involves the study of the core areas of manufacturing required to understand, design, manage and maintain complex, state-of-industry manufacturing systems. Included are a strong knowledge and understanding of materials and production processes and proficiency in design and computer-aided manufacturing. These skills are combined with principles of management, a strong proficiency in physical sciences and mathematics and a broad-based liberal education.

CAREER OPPORTUNITIES: Industrial production managers held about 156,100 jobs in 2008. About 80 percent are employed in manufacturing industries, including fabricated metal product, transportation equipment, and computer and electronic product manufacturing. Production managers work in all parts of the country, but jobs are most plentiful in areas where manufacturing is concentrated.

Students can find position in product design, facility planning, technical sales, and quality assurance. While they may start out in entry-level positions, they will lead to positions in management.

(Source: Bureau of Labor Statistics)

ADMISSION REQUIREMENTS: General Admissions for New Freshman: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of

2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the [Admissions website for new freshmen](#).

General Admissions for Transfer Students: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the [Admissions website for transfer students](#).

GRADUATION REQUIREMENTS: Minimum 123 total credit hours and 39 upper-division hours for graduation. Minimum 2.00 GPA overall and 2.25 GPA in major required for graduation.

LANGUAGE REQUIREMENT: None

STUDY ABROAD/AWAY OPPORTUNITIES: There are many study abroad/away opportunities, for more information contact the [Office of International Affairs](#).

PROGRAM FEE: None

ACCREDITATION: The Association of Technology, Management and Applied Engineering

STUDENT ORGANIZATIONS: American Foundry Society, Society of Manufacturing Engineers

GRADUATE PROGRAMS: [Technology \(M.T.E.C.\)](#), [Computer Science \(M.A. and M.S.\)](#)

B.S. Program Requirements

2+2 Option Program Requirements

College Requirements

Academic Policies

DESCRIPTION: The Bachelor of Science in Technology consists of Technology, Construction Management and Technology Education Licensure.

Technology provides students with a breadth of knowledge and experience and gives students the option of using electives to develop depth in a chosen area. This program, best suited for students with general career goals or who want depth of knowledge in a specific technical area such as casting or quality, is accredited by the Association of Technology, Management, and Applied Engineering.

The construction management concentration is a professional-service approach that applies effective management techniques to the planning design. The concentration includes construction of a project from inception to completion, including emphasis on construction materials and methods to enable graduates to estimate costs, schedule work, oversee construction work site activities and manage projects. The presence of major construction firms and large architect/engineering firms in the region provides ample internship opportunities. The migration to green technology emphasis and increasingly sophisticated construction projects require stronger project management emphasis, making this program viable well into the future.

The technology education licensure concentration provides students the opportunity to learn the application of technical skills in concert with educational expertise through targeted courses in the College and Graduate School of Education, Health, and Human Services. Students completing the technology education concentration are prepared to take the state licensing exam for teachers (K-12). Kent State is one of 22 institutions nationwide that offers the fully accredited National Council for Accreditation of Teacher Education (NCATE) curriculum.

The computer design, animation and game design concentration gives students the skills and academic knowledge necessary to enter the field of computer animation. Designing in virtual environments, computer-aided design, modeling and game design, and through courses in 2D, 3D and experimental animation, students learn theory and practice modern techniques and artistic applications. Drawings and illustrations are brought to life on digital video or film through the effective use of the latest software for capturing and animating hand-drawn or digitally created imagery. In addition, students experience creative possibilities as they explore artistic options and processes through experimental animation and modeling. Combining these modern theories of visual creation with digital imaging, motion capture, multimedia, computer animation and film production, graduates of this program will be prepared for jobs in modeling and technical illustration, as well as in artistic production, exhibition, broadcast and in the fast-growing field of game design.

CAREER OPPORTUNITIES: Students in the construction management major will be able to find wonderful careers in the construction field whether it's in an architecture company, a residential or commercial construction company or running their business. Students in this program are in heavy demand and also have many internship opportunities during their academic career.

Through our Technology Education program, students are hired almost immediately in school systems, not only in Ohio, but throughout the country.

In regards to graduates in the Computer Design and Gaming program, we have students that have earned jobs at Disney or find employment in manufacturing companies designing products.

Students majoring in General Technology often find positions in entry-level engineer positions working in areas such as Auto-Cad design, product design and quality assurance. Some of our graduates have found excellent careers in companies such as Elwood Engineered Casting, Soft-lite Window Corporation, Ford and GM.

ADMISSION REQUIREMENTS:	General Admission for Freshman Students: Students most likely to be admitted and succeed at the Kent Campus are those who have graduated with at least 16 units of the recommended college preparatory curriculum in high school, who have achieved a cumulative high school grade point average of 2.5 or higher (on a 4.0 scale), and whose composite ACT score is 21 or better (980 combined critical reading and math SAT score). For more information on admissions, visit the Admissions website for new freshmen .
	General Admission for Transfer Students: Generally, a transfer applicant who has taken 12 or more semester hours with a college cumulative GPA of at least 2.0 on a 4.0 scale may be admitted. An applicant who has taken fewer than 12 semester hours will be evaluated on both collegiate and high school records. For more information on admissions, visit the Admissions website for transfer students .
GRADUATION REQUIREMENTS:	Minimum 123 total credit hours and 39 upper-division hours for graduation. Minimum 2.00 GPA overall and 2.25 GPA in major required for graduation.
LANGUAGE REQUIREMENT:	None
STUDY ABROAD/AWAY OPPORTUNITIES:	There are many study abroad/away opportunities, for more information contact the Office of International Affairs .
PROGRAM FEE:	None
ACCREDITATION:	The Association of Technology, Management and Applied Engineering
STUDENT ORGANIZATIONS:	Construction Management Student Chapter; Animation Imagineers; American Foundry Society, Society of Manufacturing Engineers
GRADUATE PROGRAMS:	Technology (M.T.E.C.)

Kent State University Catalog 2011 > Colleges and Programs > College of Technology > [Graduate Programs](#)

The College of Technology offers a program of graduate study leading to the Master of Technology degree. The program, which provides advanced technical and management skills, meets the needs of the technical workforce in industry and business. It also offers students flexibility in course selection to meet the diverse demands of careers in rapidly changing fields in a technology-based economy. Under established university policy for institutional collaboration and partnerships, the Master of Technology degree program provides a concurrent degree under a bilateral memorandum of agreement with various international institutions. Information about the College and its programs is available at <http://www.kent.edu/tech>.

The Master of Technology degree program is designed to provide students with a graduate education with advanced and comprehensive technical management skills to support, analyze, modify and manage complex technical systems in the contemporary knowledge economy. Specific objectives of the program are to:

- Enhance proficiency in planning, organizing, decision making and management of technology and complex systems.
- Understand production and process control to improve quality, reliability and productivity in business, industry and government sectors.
- Apply and control the use of high technologies to improve the efficiency and effectiveness of productive processes and systems in the workforce.
- Enhance problem-solving and creative-thinking skills in interdisciplinary settings.
- Contribute to applied research, development and outreach activities to foster economic development.

[Program Requirements](#)

[College Requirements](#)

[Academic Policies](#)

DESCRIPTION: Sustained growth in the integration of various technologies into all professional fields to improve productivity points to an increasing need for technology education in the 21st century. The Master of Technology meets various needs for graduate education in several critical fields of technology. The curriculum, also offered in a flexible distance learning mode, allows students to take additional graduate courses leading to specialization in aviation and aeronautics, automated manufacturing, computer technology, electronics and control systems, quality systems, sustainability and technology education.

ADMISSION REQUIREMENTS: An admissions committee of the College of Technology Graduate Faculty will review all applications. Admission will be considered by examination of the applicant's background on an individual basis. Applicants with deficiencies may be admitted conditionally, which may include a requirement for completion of appropriate undergraduate coursework that will not count toward the master's degree. A baccalaureate from an accredited college or university is required. Applicants with an undergraduate degree in an approved science- or technology-related discipline, and who have a composite undergraduate 2.75 GPA will be admitted unconditionally.

In exceptional cases, an applicant without a technical degree or with a composite GPA below 2.75 may be admitted, conditionally or unconditionally, based on strong letters of recommendation or significant experience related to the intended area of study. These applicants should submit any additional information that may assist the admissions committee in assessing their academic, technical, or professional background and abilities. The additional information may include a resume or professional portfolio summarizing any relevant technical competencies, professional experience, and any academic and professional achievements in areas related to their intended studies.

Each applicant must submit three letters of recommendation from an individual familiar with the applicant's academic or professional background and abilities. The letters should attest to the applicant's potential to complete graduate work successfully. Letters of recommendation from persons who are experienced professionals in the applicant's intended field of study or in a closely related area are acceptable. Recommendations from former or current professors are preferred. In addition, each applicant must submit a one-page statement describing his/her background, interests, and goals, and how this program will help to achieve those goals.

GRADUATION REQUIREMENTS: Minimum 33 total credit hours.

PROGRAM FEE: None

ACCREDITATION: The Association of Technology, Management and Applied Engineering

college. Enroll today to start pursuing your future at one of the best colleges in Ohio. We've been educating successful graduates for over 100 years; join us today.

The Electronic Technology minor gives students a basic knowledge in the use and programming of microprocessor-based circuits. It also illustrate how digital combinational and sequential circuits work, and provides students with some applications of these type of circuits. The minor complements studies in computer science, physics, instrumentation, as well as student interest in a general background on how computers work.

ELECTRONIC TECHNOLOGY MINOR REQUIREMENTS (19 credits)		
Course	Title	Credits

 Web: www.kent.edu/technology

The Professional Flight Crew Development and Air Transport Operations certificate provides an in-depth background in multi-crew, high-altitude and high-speed air transport aircraft operations. The certificate's focus is in the developing the knowledge and skills to successfully transition from the light aircraft used in general aviation to high-performance turboprop air transport aircraft used in air carrier, business and commuter airline operations. The program is for students in a flight technology degree program, those returning to update their existing degree, and pilots seeking to upgrade their professional skills, knowledge and flight credentials.

Kent State University admission requirements apply, including assessment testing. Students may enroll in the program even if they have prior degrees. Students must declare themselves as a certificate candidate prior to completing half of the courses and must complete a minimum of 15 credits at Kent State University.

CERTIFICATE REQUIREMENTS (24 credits)		
Course	Title	Credits
AERN 35040*	Air Craft Systems I	3
